==> ARRL ATLANTIC DIVISION TO HOST TWO WEBINARS IN FEBRUARY

Periodically, the ARRL's Atlantic Division hosts a "webinar" -- an interactive web-based seminar, designed to facilitate communication between a small number of presenters and a large remote audience using the Internet. This month, Atlantic Division Director Bill Edgar, N3LLR,

will host two webinars for ARRL members, one on 501(c)(3) organizations (Thursday, February 24) and one on using Narrow Band Emergency Messaging Software (NBEMS) -- a set of programs used to send messages and files via Amateur Radio using an audio interface (Saturday, February 26). Read more here <http://www.arrl.org/news/arrl-atlantic-division-to-host-two-webinars-in-febr uary>.

==> ARRL FIELD DAY: 2011 FIELD DAY PACKETS AVAILABLE

It's that time of year again -- time to start gearing up for ARRL Field Day, June 25-26, 2011! ARRL's flagship operating event -- always held the fourth full weekend in June -- brings together new and experienced hams for 24 hours of operating fun. Field Day packets are now available for download <http://www.arrl.org/files/file/Field-Day/2011/2011_FD_Packet.pdf>and include the complete rules (including a change for 2011), as well as other reference items such as forms, ARRL Section abbreviation list, entry submission instructions, a Frequently Asked Questions section, guidelines for getting bonus points, instructions for GOTA stations and a kit to publicize your event with the local press. Read more here <http://www.arrl.org/news/2011-field-day-packet-now-available>.

==> SOLAR UPDATE

Tad "Away from the Sun <http://www.youtube.com/watch?v=25upz6PME3I>" Cook, K7RA, reports: The weekly averages for solar flux and sunspot numbers were nearly unchanged this week, although last week they were rising and this week declining. The average daily sunspot number was down less than five points to 65, while the average daily solar flux was up just 0.3 points to 103.8. The outlook from NOAA/USAF shows a gradually rising solar flux, 85 on February 24-26, 88 on February 27 through March 3, 90 on March 4 and rising to 110 on March 10-15. The predicted planetary A index for February 24-through March 5 is 5, 7, 7, 5, 15, 12, 8, 10, 7 and 5. Sunspot groups 1161 and 1162 -- which brought so much activity last week -- are now rotating over our Sun's western horizon, but with the STEREO craft <http://stereo.gsfc.nasa.gov/>, we can see a new active region rotating over the eastern horizon. The predicted geomagnetic storm just before last weekend's ARRL International DX CW Contest did not persist, lasting only half a day through February 18. Look for more information on the ARRL website on Friday, February 25. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad Cookism" is brought to you by 3 Doors Down's Away from the Sun <http://www.youtube.com/watch?v=25upz6PME3I>.

==> AMATEUR RADIO FUN: BE A STAR! ENTER THE ARRL VIDEO CONTEST

If you've ever wanted a way to show the world how exciting Amateur Radio can be, here's your chance: The ARRL is sponsoring its first-ever

video contest <http://www.arrl.org/video-contest>! We are looking for ARRL members to shoot and submit videos that showcase how fun and electrifying our hobby is; extra points will be awarded for a video showing someone, young or old, licensed or not, making their first contact. Videos will be judged on overall quality and composition, and prizes will be awarded. The video author/producer must be an ARRL member; however, the people who appear in your video can be non-members. This contest is intended for amateur videographers. If you are a professional, please do not apply. Check out all the details -- including the fine print -- on the ARRL Video Contest Rules and Guidelines Web page <http://www.arrl.org/video-contest>. The submission deadline is Monday, February 28, 2011.

==> THIS WEEK ON THE RADIO

This week:

- February 25 -- NCCC Sprint Ladder
- February 25-February 27 -- CQ 160 Meter Contest (SSB)
- February 26-27 -- Mississippi QSO Party; North American QSO Party (RTTY)
- February 27 -- High Speed Club CW Contest
- February 27-28 -- North Carolina QSO Party
- February 28 -- CQC Winter QSO Sprint
- March 1 -- AGCW YL-CW Party

Next week:

- March 5 -- Wake-Up! QRP Sprint
- March 5-6 -- ARRL International DX Contest (SSB) <http://www.arrl.org/arrl-dx>; Open Ukraine RTTY Championship
- March 6 -- DARC 10 Meter Digital Contest
- March 8 -- ARS Spartan Sprint
- March 9-10 -- CWops Mini-CWT Test

All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests>, the ARRL Contest Update <http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more info. Looking for a Special Event station? Be sure to check out the ARRL Special Event Stations Web page <http://www.arrl.org/special-event-stations>.

==> UPCOMING ARRL SECTION, STATE AND DIVISION CONVENTIONS AND EVENTS

- February 26 -- ARRL Vermont State Convention <http://www.arrl.org/hamfests/vermont-state-convention-ham-con-1>, Colchester, Vermont
- March 5 -- ARRL South Texas Section Convention <http://www.arrl.org/hamfests/south-texas-section-convention-greater-houston-hamfest-1>, Rosenberg, Texas; ARRL Alabama Section Convention <http://www.arrl.org/hamfests/alabama-section-convention-birminghamfest>,

Birmingham, Alabama
- March 11-12 -- ARRL Oklahoma Section Convention
<http://www.arrl.org/hamfests/oklahoma-section-convention-green-country-hamfe
st>,
Claremore, Oklahoma
- March 12-13 -- ARRL North Carolina Section Convention
<http://www.arrl.org/hamfests/north-carolina-section-convention-charlotte-ham
fest>,
Concord, North Carolina
- March 19 -- ARRL West Texas Section Convention
<http://www.arrl.org/hamfests/west-texas-section-convention-56th-annual-st-pa
trick-s-day-hamfest>,
Midland, Texas; ARRL Nebraska State Convention
<http://www.arrl.org/hamfests/nebraska-state-convention-1>, Lincoln,
Nebraska
- March 25 -- ARRL Maine State Convention
<http://www.arrl.org/hamfests/maine-state-convention-1>, Lewiston,
Maine
- March 26 -- ARRL Maryland State Convention
<http://www.arrl.org/hamfests/maryland-state-convention-greater-baltimore-ham
boree-computerfest>,
Timonium, Maryland

To find a convention or hamfest near you, click here

****

Jock White Field Day Manager
Jock White Field Day is still on this weekend
I have received a lot of e-mail corrospondence both directly and forwarded, asking about the Jock White FD this weekend. Understandably many were uncertain if it was still on. I have had discussions with Frank Hunt the NZART contest manager and NZART President Roy Symon, along with some on the ground in Christchurch and do not see any reason why it should not go ahead.

As comms are being handled on two metres there is no issue with QRM from 80/40 activity during the JWFD, which is confined to the CW section and not much past 3630 kHz odd.

There may be a national day of mourning in the future, that would be an appropriate time for radio silence.

Regards,

Stuart Watchman
ZL2TW
Jock White Field Day Manager

Next NZART Official Broadcast is on SUNDAY 27-FEBRUARY-2011

Next HQ-Infoline e-mailed on SUNDAY 06-MARCH-2011

Regards, Jamie Pye ZL2NN, Editor zl2nn@nzart.org.nz

179. Future of Morse Code

Newsgroup: rec.radio.amateur.misc
Date: 2011-02-25 04:50:11 UTC
From: Klystron <xxx@yyy.zzz>
Message-ID: <xxx-EE721A.23501124022011@nntp.aioe.org>
Source record: 4769

Q. What is the future of Morse Code?

A. Morse Code has no future. "Beeps" are for tired, cranky old goats who are living in the past and like it there. Buy a microphone or learn how to use a computer.

Cross-posted to: rec.radio.amateur.misc,rec.radio.info

RAC Bulletin 2011-004 E - Request for Information, Interference from Plasma Television Sets.
2011-02-24

According to members of the Niagara Peninsula Amateur Radio Club, noise and signals originating from Plasma Screen digital television set are causing considerable interference to their HF activities and have asked RAC for help. Complaints of this nature require specific and detailed information before RAC can consider taking this matter to Industry Canada. To gather this information, RAC invites its members that own a Plasma Screen television to report their experiences of interference from such products. Specifically, reports should describe the make and model of TV, a description of their HF station and antenna system and the exact nature of the interference (what bands, what sound etc). Remedies should also be tried and reported such as using ferrite chokes on power lines cords and signal cables if interference is detected. Amateurs with advanced instrumentation such as spectrum analyzers and calibrated antennas should measure signal intensity levels at given distances; these measurements will add credibility to our investigation. We also want to know from amateurs that can attest that operation of their own plasma TV causes no noticeable interference to their amateur radio operations. All digital domestic equipment, including Plasma and LCD television sets must comply with Industry Canada standard ICES 003 (interference causing equipment standard for digital equipment) to be marketed in Canada. Alternately, TV sets with tuners may be certified under Industry Canada BETS 7 standard. Please indicate in any report submitted that a label on the TV or notation in the manual indicates it is indeed certificated and compliant under current issues of ICES 003 and/or the BETS 7 standards.

Send reports to Norm Rashleigh, VE3LC, VP Industrial Liaison, ve3lc@rac.ca

Troll.

The bow and arrow, black powder firearms, sailboats, horses, and many other
things have limited application in the world of today but are still utilized
and enjoyed by those that appreciate those things.

Devotees of those historical artifacts seldom try to pass them off
as being necessary in today's world. The "beep" boys (or geezers) would
have you believe that beeps are genuinely necessary in the present day.
I posted, some months ago, an item about Morse code being ALLOWED, not
required, to identify aeronautical beacons. The beep gang loves to drag
that one out as a reason why beeps are still "needed" today.
They are living in the past and they are impeding the progress of
the present and future. Please don't encourage them or defend them. Let
them amble their way onto the dustbin of history on their own, along
with their cult-master Samuel Morse and all of his horrid little key
gadgets. Of course, for every one of those key toys, there are probably
a hundred or more computer keyboards. Beeps will be completely forgotten
within a generation.

RESCUE RADIO: HAMS ON ALERT FOLLOWING NEW ZEALAND QUAKE

Rescue workers in Christchurch, New Zealand, are in full callout. This, following a devastating, shallow level 6.3 Richter scale earthquake which struck the heavily populated business area of the city at 12.51 p.m. on Tuesday, February 22nd local New Zealand time. Jim Meachen, ZL2BHF, is in Auckland with the rest of the story:

--

The utter devastation caused by the quake has severely damaged many buildings in downtown Christchurch including the main cathedral in the central city. While 120 survivors were pulled from the wreckage during the first night more than 300 people remain unaccounted for. According to the latest news reports, as many as 75 are dead and scores injured. Others are believed to be trapped in the rubble as buildings simply collapsed burying anyone inside. Officials expect the death toll to rise as the post quake relief operations continue.

Jim Linton, VK3PC, is the Chairman of the IARU Region 3 Disaster Communications Committee. As this newscast is being prepared, VK3PC reports that communications and power have been cut in many areas, and water supplies disrupted. Under formal arrangements already in place, members of New Zealand's A. R. E. C. will find their services put to use as the post quake rescue operations proceed.

And this is what seems to be happening. In a bulletin the Wireless Institute of Australia's news service reports that a small team of amateur radio operators are keeping the lines of communication open in

earthquake-hit areas of Christchurch. The head of the Amateur Radio Emergency Communications team, Richard Smart, ZL4FZ, says 10 amateurs are using their two emergency communications vans to keep rescue teams and Civil Defense staff in touch with one another.

Smart notes that one unit is at a major welfare center. It's providing portable communication so personnel can talk to Civil Defence officials. The other vehicle is en route to assist search and rescue teams in an area where communication is poor. Smart says that amateur radio operators from around New Zealand are volunteering to help out and others are sending updates on the disaster to the families of people in Christchurch who are overseas.

Meantime, Arnie Coro, CO2KK, the International Amateur Radio Union Region II Area C Emergency Coordinator, has issued a notice to hams in the America's. Coro advises users of the 40 and 20 meter bands to be aware of possible earthquake emergency communications traffic taking place in and around the affected areas of New Zealand's South Island, where Christchurch is located.

Coro continues that the propagation on 40 meters more likely to cause problems to the New Zealanders from unintentional QRM coming from the Americas in the window that starts about two or three hours before sunrise and lasts until sunrise on this side of the path. A similar pattern, with a slight time shift shows up on 20 meters as well. More on this story in future reports.

>From Auckland, New Zealand, on the North island, I'm Jim Meachen, ZL2BHF, reporting for the Amateur Radio Newsline.

--

It should be noted that this is the second quake to hit the Christchurch area since last year. While the 7.1 earthquake last September was more than 30km underground, the latest 6.3 quake was a mere five kilometers in depth. It has been followed by a number of major aftershocks.

(VK3PC, ZL3DWS, ZL4FZ, CO2KK, NZ Hearald, others)

**

RADIO POLITICS: CONGRESSIONAL MEASURE COULD LEAD TO LOSS OF 70CM AMATEUR ALLOCATION

A new measure introduced into Congress could eventually lead to the reallocation of the amateur 70 centimeter band to other services. That's if the big business lobby can convince legislators that the security of the nation will not be compromised by such a change. Amateur Radio Newsline's Norm Seeley, KI7UP, has the details:

--

On February 10th, Representative Peter King of New York introduced HR 607, the Broadband for First Responders Act of 2011. King is the Chairman of the House Homeland Security Committee. HR 607 addresses certain spectrum management issues, including the creation and maintenance of a nationwide Public Safety broadband network. As part of that network, the bill provides for the allocation of the so-called "D-Block" of spectrum in the 700 MHz range for Public Safety use.

The D-Block consists of two, 5 megahertz-wide segments of spectrum from 758 to 763 and 788 to 793 MHz. These became available when the FCC ended analog television broadcasts in June 2009 and reallocated the 698 to 806 MHz band for Public Safety and commercial broadband.

At that time it was anticipated that the D-Block would be auctioned for commercial use. However there are several bills in Congress providing for the allocation of the D-Block for Public Safety use, and HR 607 is one of those.

But HR 607 uniquely provides for the reallocation of other spectrum for auction to commercial users, in order to offset the loss of revenue that would occur as the result of the allocation of the D-Block to Public Safety instead of commercial auction. HR 607 lists the paired bands of 420 to 440 MHz and 450 to 470 MHz among the bands to be reallocated for commercial auction within 10 years of its passage.

His measure has been referred to the House Energy and Commerce Committee, which handles telecommunications legislation. There it is likely to see opposition from the United States military and others concerned with the nations overall security. This is because of the infrastructure that currently exists to protect our nations cities and shores.

One thing to keep in mind is that the spectrum in question is allocated as military as primary user and all others, including amateur radio as secondary users. As we in ham radio all know, the military recently spent 10's of millions if not billions of taxpayer dollars to upgrade its PAVE-PAWS long range radar system to a point where UHF ham repeaters and even some individual operations on both coasts were forced to reduce power or go completely QRT.

Ironically the cooperation between hams and the military in resolving issues associated with the PAVE-PAWS upgrade more than likely makes them one of amateur radios best allies in retaining the spectrum in question. That's because Representative King and his co-sponsors could face strong opposition from the U.S. military establishment which is almost certain to do all it can to derail such a spectrum reallocation.

For the Amateur Radio Newsline, I'm Norm Seeley, KI7UP, reporting from Scottsdale Arizona.

--

In related news, the Society of Broadcast Engineers issued a legislative alert to its members regarding this measure. Its advisory

notes that the spectrum targeted at 450 to 451 and 455 to 456 MHz is heavily used by commercial radio broadcasters for remote pick-ups, as well as by many other civilian and defense users. (ARRL, SBE, ARNewsline(tm))

**

RADIO POLITICS: ARRL ASKS HAMS TO WRITE CONGRESS TO DEFEAT HR-607

And this just in: The ARRL is asking that every radio club and individual ham operator in the United States to write to their congressional representative in opposition to HR-607 as it is currently written.

Because of security measures in place in Washington, the ARRL says that it will likely not do any good to mail them direct. Instead the League asks that you go to its website at www dot arrl dot org stroke sample-letters, fill in the sections of the attached letter for your own representative, print it and then send it to Chwat & Co. They in turn will hand deliver it to the appropriate congressional office.

The address to send those letters to is John Chwat in care of Chwat & Co., 625 Slaters Lane, Suite 103, Alexandria, Virginia, Zipcode 22314. Or you can fax it to 703-684-7594.

The bottom line here is that thousands of bills are introduced every Congressional season but very, very few ever make it to the President's desk. If hams, broadcasters and the military all work together, there's a good chance that HR-607 will never see a White House signature or even the political light of day. More is on-line at tinyurl.com/4rgbayj

(ARRL, ARNewsline, others)

RADIO VIOLENCE: THREE HAMS KILLED BY SOMALI PIRATES OFF THE COAST OF EAST AFRICA

Three Radio Amateurs Scott Adam, K9ESO, his wife Jean, KF6RVB, and Bob Riggle, KE7IIV, have been murdered by Somali pirates. Also killed with them was Phylis Macay.

The four were onboard the Adam's owned yacht the Quest off the coast of Oman, East Africa, when pirates boarded their vessel on Friday,

February 18. Officials were in the process of negotiating for their release when gunfire was heard around 1 AM on Tuesday, February 22.

United States Naval forces responded to the gunfire. Navy Seals then boarded the yacht only to discover that all four hostages had been shot by the pirates.

According to a statement from the US Central Command, despite immediate steps to provide life-saving care, all four hostages ultimately succumb to their wounds.

Somali-based pirates have plagued the shipping industry off East Africa for years, but the violence used during the attacks and the money demanded in ransoms has increased in recent months. Sea going bandits are currently holding some 30 ships and more than 660 hostages, however, this is first time American hostages have been killed by a Somali pirate raid. (Southgate, other published reports)

**

RADIO RECORDS: ROS ACROSS THE ATLANTIC ON 500 KHZ

A new low frequency record between the United Kingdom and Canada has been set using a newly developed digital mode called R-O-S. Jeramy Boot, G4NJH, is in Nottingham, in the United Kingdom with the rest of the story:

--

At 2134GMT on 13 February, Joe, VO1NA managed a full beacon decode from Graham, G0NBD on 502kHz using the ROS mode. It is believed this was the first live data mode decoded over the Atlantic on this band.

The signal to noise ranged from -23 to -27dB, giving a 100% decode of the test message. The transmission was sent using MF-7 with an estimated ERP of 1 watt from a 35ft top loaded vertical. The ROS mode did a good job of resolving the signals despite deep and rapid QSB over the 3500km path.

At just over a year old the ROS data mode is relatively new and uses an adaptation of multiple frequency shift keying and forward error correction to help make successful contacts under very difficult band conditions.

I'm Jeramy Boot, G4NJH and this is the Amateur Radio Newsline.

--

The software for the R-O-S is completely free, but is still not legal for use by United States amateurs to transmit with. None the less US hams are free to listen in using it world-wide. More information can be found in cyberspace at rosmodem.wordpress.com (GB2RS)

**

INTRUDER WATCH: COMPLAINTS FROM HAMS MOVE VOICE OF RUSSIA OFF 7.200 MHZ

Shortwave station the Voice of Russia is now in the part of the 40 meter band where it belongs.

The station was first heard on 7.200 MHz on February 1st and reported to the IARU Monitoring System by Dick van Elpelen, PA0GRU, in the Netherlands. Ulrich Bihlmayer, DJ9KR, from the IARU Region 1 Monitoring System then reported the station to the German Telecommunicationss authorities on February 2nd.

Then, in correspondence with the Russian General Radiofrequency Centre, DJ9KR was able to demonstrate the interference. Subsequently, the Voice of Russia moved up the band to 7.265 MHz. (Southgate)

**

ARISSAT-1 UPDATE: MORE ON THE ARISSAT-1 DEPLOYMENT DELAY

An update on the delayed deployment of the ARISSat One ham satellite. As reported last week, ARISSat-1 satellite is still inside the I-S-S and will remain there for the next several months. The Russian space management agency Roscosmos has announced that the satellite will be deployed during the next space walk in July of this year.

Meantime, the United States based ARISSat team is trying to get clarification from Roscosmos about a report that a reported weak batteries condition causing the satellite not to be deployed in the latest E-V-A. The news item can be found in the Russian language on the Roscosmos web page. Its in cyberspace at tinyurl.com/arissat-batteries.

(WA4SXM)

**

ARISSAT-1 UPDATE: ARISSAT-1 TO HELP CELEBRATE 50th ANNIVERSARY OF YURIL GAGARIN'S FIRST SPACEFLIGHT

The Russian space management group Roscosmos has also announced that the ARISSat One satellite will be turned on inside the International Space Station using an external antenna on April 12th. This, to celebrate the 50th anniversary of Cosmonaut Yuri Gagarin's first manned space flight. AMSAT says that it will support this event and issue certificates to those stations reporting reception of the ARISSat One's signals.

Also, Tony Monteiro, AA2TX has an excellent article describing the ARISSat One power system using the Russian Olan suit battery in the upcoming AMSAT Journal. It will have been mailed to AMSAT members by the time this newscast goes to air.

(WA4SXM)

ENFORCEMENT: FAILURE TO FILE TIMELY RENEWAL BRINGS $13000 NAL

A North Carolina broadcaster who let its station license lapse but continued operations under several Special Temporary Authority grants has been handed a $13,000 proposed fine.

WOOW AM of Greenville, North Carolina and its owner The Minority Voice, Inc. have been issued the Notice of Apparent Liability to Monetary Forfeiture for what the FCC says was willfully violating Section 73.3539 of the Commission's Rules and willfully and repeatedly violating Section 301 of the Communications Act. This, by failing to timely file its license renewal application and engaging in unauthorized operation of the station.

As is usually the case, the station licensee has been given the customary time to pay the forfeiture or to file an appeal. (FCC)

ENFORCEMENT: FCC INVESTIGATING WWOR TO SEE IF IT REALLY SERVES NEW JERSEY

According to the Los Angeles Times, the FCC is currently investigating Fox Television owned WWOR TV in Seacaucus, New Jersey. At the center of the inquiry is whether the station has been ignoring its state of license in favor of covering New York area news and other events.

The newspaper says that the FCC has written to Fox about the charges. It says that in a letter sent on Thursday, February 17th, the regulatory agency is seeking to determine if Fox and WWOR intentionally provided material factual information that was incorrect or is guilty of intentionally omitting material information.

WWOR has been criticized by media watchdogs and by New Jersey Senator Frank Lautenberg for not providing ample coverage of New Jersey on the station. A spokesperson for Fox said the company will respond to the FCC's request. Also that Fox is confident that on review of all facts and applicable law, the FCC will recognize that these unwarranted claims hold no merit.

Fox purchased WWOR in 2001. A quick link to the L.A. Times story is tinyurl.com/wwortv. (Multiple published news reports)

TELECOMMUNICATIONS LAW: DO NOT TRACK ME ON THE INTERNET LAW INTRODUCED INTO CONGRESS

An Internet version of the popular "Do Not Call" telephone legislation took a step toward reality on Friday, February 11th. This when a House of Representative legislator from California introduced a measure in Congress designed to let consumers block unwanted tracking of their information online.

Written by Representative Jackie Speier, the "Do Not Track Me Online" bill authorizes the Federal Trade Commission to enact and enforce regulations that give consumers the right to bar organizations from tracking their activities as they use the Internet.

Speier's measure already has one major backer. Consumer Watchdog, a non-profit and non-partisan advocacy group, has already applauded the proposed law. In a press release Consumer Watchdog said that consumers should have the right to choose if their private information from being collected, analyzed, and profiled by companies tracking activities online. It says that "Do Not Track Me Online" is the simple way for consumers to say no to being monitored while they surf the Web. (Webnews)

HAMVENTION 2011: NEWSMAN OR ACTOR NEEDED FOR HAM RADIO TOWN MEETING

If you are a radio amateur planning to attend Hamvention 2011 and one who is a professional television newsman or an actor with on-camera experience, you are neded to take part in this years Ham Radio Town Meeting.

This years session is titled "How To Make A Ham Radio Video In The 21st Century." Among the many topics we want to cover is how to properly appear when the camera lens is on you and tape is rolling. Obviously nobody has better expertise in this area than a TV newsman or an actor who regularly appears on TV or in the movies.

If you want to take on this volunteer role, please contact us or send your resume with your contact information to Bill Pasternak, WA6ITF, who is producing and moderating the session. Our e-mail address is still newsline (at) ix (do)t netcom (dot) com and we look forward to hearing from you. (ARNewsline(tm))

**

HAM RADIO CONFERENCES: CALL FOR PAPERS FOR AMSAT-UL COLLOQUIUM

A first call for speakers for the AMSAT-UK Colloquium 2011 has been issued by the events planners. This years Colloquium will be held at the Holiday Inn, in Guildford, from Friday, July 29th to Sunday July 31st. Presenters are invited to speaker about amateur radio, space and associated activities. Those interested should contact G4DPZ, by e-mail to david (dot) johnson (at) blackpepper (dot) co (dot) uk. (G4DPZ)

CONTEST INFO: RESULTS OF 1010 10 GHZ AND UP CONTEST

Sean Kutzko, KX9X, who is the ARRL's Contest Branch Manager says that the results for the 2010 ARRL 10 GHz and Up Cumulative Contest are now online. You can read them at www.arrl.org/contest-results-articles. (ARRL)

**

NAMES IN THE NEWS: KR4X RETIRES FROM HILLSBOROUGH FLORIDA EMCOMM POSITION

Some names in the news. First up is Larry Gispert, KR4X, who recently retired as the Director of Emergency Management for the County of Hillsborough in the Tampa Bay, Florida area.

According to Peter Kemp, KZ1Z, Gispert's contributions have seen him take on leadership positions in regional, state and national emergency management organizations. He has also been a presenter at major conferences and in Washington, DC.

The Hillsborough Board of County Commissioners recently presented Gispert with a Proclamation for his work. He was commended for his straight talk approach when dealing with Emergency Management issues. (KZ1Z)

**

CHANGING OF THE GUARD: TOM C GLEEMAN KE6YNH - HAM AMBASSADOR _SK

And we are sad to report that one of the true gentlemen of ham radio has become a Silent Key. This with word that Tom Gleeman, KE6YNH, of San Diego, California passed at his home the evening of February 17th.

Gleeman was best known as a late night ambassador of good will on 3.840 MHz in the 75 meter band. He is generally credited with starting the post Art Bell, W6OBB-era 3840 Group in the western states that eventually expanded to the whole country.

A memorial page for KE6YNH is on QRZ.com. The shortcut link to it is tinyurl.com/4wgmss2. Tom Gleeman, KE6YNH, was only age 60 at the time of his passing. (KE6ENI)

RADIO BALLOONING: HAM RADIO "MAKERS" TO LAUNCH TRANS-ATLANTIC BALLOON ON 7.102 MHZ USB

A ham radio equipped balloon called Speedball-1 will soon attempt to become the first amateur radio balloon to cross the Atlantic. Amateur Radio Newsline's Michael Grebert, KJ4ZZV, has more:

--

Speedball-1 was originally scheduled to launch the weekend of February 26th from Space Port Indiana located in Columbus, Indiana. According to the projects website, that date has now been pushed back to when both the Jet Stream as well as ground launch conditions are more favorable for such a flight.

While no exact launch date for Speewdball-1 has been announced, once aloft it will be transmitting RTTY and DominoEX on a Upper Sideband with dial frequency of 7 point 102 MHz. The actual signal will be on 7 dot 1035 MHz and the transmitter will alternate between 110bps RTTY and the DominoEX digital mode. Free dl-fldigi decoder software to follow the balloons progress is at tinyurl.com/4lplegv

Speedball-1 is a project of the new LVL1 Makerspace in Louisville, Kentuckey. They vdescribe themselves as a team of makers, hackers, and amateur scientists, loving the incredible number of challenges this has project presented.

Also on the team are remote members, contributing significantly, despite the distance. These include Bill Brown, of Huntsville, Alabama, who is considered the father of modern amateur weather ballooning, and Carl Lyster, WA4ADG, who is the electronics designer from the Spirit of Knoxville. Quite an all star team.

For the Amateur Radio Newsline, I'm Michael Grebert, KJ4ZZV, near Nashville, Tennessee.

--

You can sign up for a launch notification announcement on the right-hand side of the home page at http://whitestarballoon.org. (ARNewsline(tm), Southgate, White Star Balloons)

HAM RADIO IN SPACE: SA-AMSAT ANNOUNCES KLETSKOUS SATELLITE PAYLOAD

South Africa AMSAT has announced that the main payload on the upcoming KLETSkous ham radio CubeSat. The decision is for the tiny bird to carry a linear UHF to VHF transponder with a bandwidth of 20 kHz.

The U/V mode which uses a 70 centimeter uplink and 2 meter downlink was chosen in line with internationally recommended practice as it will minimize interference. Another aim of this decision is to make possible the satellite to operate over Africa without the need of an access tone to activate the transponder.

South Africa AMSAT says that a multi-city team is working on the designs and will soon finalize the transponders specifications. You can visit www.amsatsa.org.za for more about the KLETSkous project. (SARL, Southgate)

**

DX

In DX, G5XW will be active as GJ5XW from the Isle of Jersey between March 24th and the 30th. Operations will be on the HF bands but will also include the CQWW WPX SSB Contest on March 26th and the 27th. QSL via G5XW, direct only to his QRZ.com address.

Members of the "DX Plus" Hellenic Amateur Radio Team will be active as SX5F from the Farmakonisi Rocky Islet between May 14th and the 22nd. Operation will be on all HF bands using CW, SSB and the several digital modes. QSL via the RAAG Bureau. For more details, see www.qrz.com/db/SX5F

G3SWH and G3RTE plan to operate from the West Island in the Cocos group through March 5th. They will be active as VK9C stroke G6AY on 10 through to 80 meters using CW only. The Cocos Keeling is ranked number 75 most wanted worldwide. QSL via their home callsigns, either direct or via the bureau

2E0WMG and G0DVJ will be active from Lundy Island between March 21st and the 26th. Operations will be on all HF bands 80 through 10 meters. G0DVJ will be on CW and SSB, while 2E0WMG will be on SSB only. Look for QSL details on QRZ.com.

Members of the "DXciting Group" will be active as EG5CI from Columbretes Island between April 7th nand the 10th. QSL's will all be sent via the bureau or direct from EA5EOR. For more details, visit www.dxciting.com

Lastly, the next DXpedition by the I2YSB Team will take place from Liberia between March 31st and April 13th. The group plans to use 3 stations for the HF bands and one other for the 50 MHz band. Modes are CW, SSB and RTTY. The pilot station will be IK7JWY and an online log will be provided by IH9GPI. The expeditions callsign will be announced at a later date. QSL via I2YSB.

(Above from various DX news sources)

**

THAT FINAL ITEM: DAYTON HAMVENTIONr NAMES 2011 AWARD WINNERS

And finally this week, word that the names of the winners of the most celebrated awards in ham radio have been announced. Bill Pasternak, WA6ITF, is in the newsroom with the details:

--

N8LX: "I was just totally astounded. Flabbergasted. I never would have believed that in my lifetime that this would happen to me. And my husband said that someone could have probably knocked me over with a feather at that point."
--

That's Shirley Roberts, N8LX, of Dayton Ohio has been selected as the 2011 Radio Amateur of the Year by the Dayton Hamvention. This prestigious award goes to an amateur operator who has demonstrated

significant contributions to amateur radio as well as related public service.

Among Shirley Roberts numerous achievements has been her work with and for the Dayton Amateur Radio Association and with making the Hamvention happen every year for the past to decades. In the latter she has worked on numerous committees related to the various aspects of Hamvention. She has also been the voice of the Hamvention answer line for the past three and a half years.

But Hamvention is not Shirley Roberts only ham radio interest. Over the years she has been a Control Operator and Manager for a Dayton area repeater and has been directly involved in numerous public service events. And, as reported right here on Amateur Radio Newsline, several years ago it was Shirley Roberts, N8LX, who coordinated the rescue of a ham radio operator trucker who was suffering from a badly infected tooth that was affecting his ability to safely drive his big-rig.

Another of her interests is SKYWARN and there she has been more than just your average volunteer:

--

N8LX: "Several years ago I was one of the people who ran a preliminary net for them as the people who operated the net were on their way to the focal point to where the net was usually done."

--

According to Awards Committee chairman Frank Beafore, WS8B, Shirley Roberts, N8LX, exemplifies all of the deepest aspects of being named the 2011 Radio Amateur of the Year.

The Special Achievement Award this year goes to Fred Lloyd, AA7BQ of QRZ dot com fame. Starting out as a simple on-line call sign look-up project, Lloyd has developed the QRZ website into an interactive one stop web-based home for all things related to amateur radio. Now in 2011, the Arizona-based QRZ dot com operation provides detailed operating and technical information to ham radio operators worldwide and is among the most often visited of any hobby radio spot in cyberspace. And its still the place to go to find the address of that station to which you want to send a QSL card.

Moving on, the committee has chosen Roy Lewallen, W7EL,of Beaverton, Oregon to receive the 2011 Technical Excellence Award. This in recognition of his development of EZNEC. EZNEC is an antenna modeling software system used by hams worldwide. Lewallan's software is also now the basis for numerous amateur radio antenna training courses in the United States and world-wide.

Last but by no means least, the Albemarle Amateur Radio Club, WA4TFZ, of Charlottesville, Virginia has been named Club of The Year. According to the judging committee, in addition to all the normal club activities

of a well led organization, the Albemarle Amateur Radio Club has shown exemplary contributions in public service, emergency communications and in youth recruiting.

With congratulations to all of this years winners, Im Bill Pasternak, WA6ITF, in the Newsroom in the City of Angels.

--

The award winners were announced on February 18th. All will be guests of honor at the 2011 Hamvention which runs from May 20 to May 22 at Hara Arena in suburban Dayton. More details are on-line at www dot Hamvention dot org. We hope to see many of you there.

(DARA, W8HJR, ARNewsline(tm))

GB2RS NEWS

Sunday 27th February 2011

The news headlines:

* Radio amateurs at work following New Zealand earthquake

* Radio amateurs killed by Somali pirates

* Progress on a band near to 500 kHz

Following the earthquake that hit Christchurch, New Zealand this week, a small team of amateur radio operators are helping to keep the lines of communication open. A report on the frequencies in use is yet to be received but Amateur Radio Emergency Communications team member Richard Smart, ZL4FZ said 10 radio amateurs are using their two emergency broadcast vans to keep rescue teams and Civil Defence staff in touch. He said one is at a major welfare centre providing portable communication so they can talk to Civil Defence and the other vehicle is en-route to assist search and rescue teams in an area where communications are poor. Richard, ZL4FZ said amateur radio operators from around the country are volunteering to help out and others are sending updates on the disaster to families of people in Christchurch who are overseas. The RSGB has sent a message of support to the New Zealand Association of Radio Transmitters, the country's national body for radio amateurs.

It has been announced that four Americans including three amateur radio operators who were being held hostage on their yacht by pirates off the coast of Oman have been killed. Scott Adam, K9ESO and his wife Jean, KF6RVB, along with Bob Riggle, KE7IIV and Phylis Macay were on board the vessel Quest when pirates boarded their vessel on 18 February. Our thoughts are with their family and friends.

The ITU Conference Preparatory Meeting, or CPM, for the World Radiocommunication Conference 2012, or WRC-12, has completed its work on the agenda item that considers an allocation of up to 15kHz in the band 415 - 526.5kHz. Three options, one of which is no allocation to the amateurs, are proposed. Whilst initially it was hoped that spectrum around and near to 500kHz could be allocated for amateur use, the maritime service has identified a new requirement for this part of the spectrum. Because of this there is no support from national administrations like Ofcom to support amateur allocation in this part

of the spectrum. One of the remaining options agreed by the ITU CPM is the so-called Method A, originally put forward by the RSGB. This is for an allocation of up to 15kHz between 472kHz and 487kHz. The Americans, Canadians and others within their regional group, CITEL, favour a different option, Method B, which is for a split allocation between 461 - 469kHz and 471 - 478kHz, totalling 15kHz. Method A is the main option being considered within CEPT, which has yet to reach what it terms a European Common Proposal on the option. None of this preparatory work affects our temporary access to 501 - 504kHz, apart from the tests that have been carried out by the maritime service in respect of their proposed new system. UK amateurs who wish to experiment at this part of the spectrum can still obtain an NoV from Ofcom. Further information is at www.rsgb.org/spectrumforum/mf/srp501.php.

A member of The Radio Amateurs' Emergency Network has received two months' funding to examine how RAYNET could best use data communications to support Police and other User Services. Howard Winter, G1BYY, a member of Mid-Herts RAYNET, made an application to the Vodafone World of Difference Scheme

in November. An increasing demand from User Services for RAYNET to provide data links has led many groups to experiment and train on a variety of digital systems. RAYNET members are now using APRS to track vehicles responding to incidents in remote locations, transmitting photographs from the scenes of emergencies and sending data files back to Gold Control. Howard will spend two months undertaking his own research and experimentation, collating the work that has already been done by RAYNET Groups and comparing the experiences of members experimenting with data. He will be producing documents that will be available nationally, to groups of all affiliations. RAYNET Groups of all affiliations are being asked to share their experiences of data communications to help Howard with his task, which begins in March. Contact Howard Winter by email to dataproject@raynet-uk.net.

It seems that radio amateurs may find themselves targets for so-called copper thefts. In the last two years the price of copper has risen by 300% with other metals also experiencing higher prices. We've heard from an amateur in Yorkshire who's been a victim of one of these copper thefts when all his cabling was stolen overnight. That included the coax and ladder line used for a G5RV antenna. Other amateurs are being encouraged to make sure access to cables is restricted and that their installations are as secure as possible.

The Mid-Pennine Raynet Group is seeking members to re-establish a RAYNET presence in East Lancashire. The group's operating area will be the boroughs of Rossendale, Burnley, Pendle and Hyndburn. Further information is available by sending an email to midpennineraynet@rocketmail.com.

Lough Erne Amateur Radio Club will be celebrating the Pearl Anniversary of their radio rally on 17 April. They invite anyone who was at the Club's first Rally in April 1982 or others that followed in the next three decades to contact the Club with memories and any memorabilia. Cliff, GI4CZW was Secretary in 1982, when he sent news of the first rally to Short Wave Magazine and he has gathered memorabilia down the years. More is welcome for a display at the thirtieth rally in the SHARE Centre on Sunday 17 April. Contact Michael by email to mi5mtc@learc.eu.

Lincoln Short Wave Club is celebrating its 90th anniversary this year. Anyone working the club callsign G5FZ will receive a limited edition QSL card that will cease after 31 December 2011.

Air Cadets of Chester 610 squadron are holding a radio weekend with the help of the Chester and District Amateur Radio Society who are setting up VHF, UHF and HF stations on 19 and 20 March. They are asking radio amateurs to listen out for their station and call in to encourage the young people taking part over the weekend. Cadets will be able to get hands on experience of operating radio transmitting and receiving equipment in speech, Morse code and digital modes on both amateur and air cadet frequencies. This event will see the launch of the Squadron's own permanent radio station under the supervision of Corporal Neil Hosker of the Royal Auxiliary Air Force.

GB3XD is a new 6m repeater, on the air from locator IO93WH. The output frequency is 50.730MHz and the input frequency is 51.230MHz with a CTCSS tone of 71.9Hz. All reports should be sent to G7AJP via GB3XD itself or via the 70cm repeater GB3LC. The new 6m repeater is supported by the Friskney and East Lincolnshire Communications Club. More detail can be found on www.qrz.com.

3

And now for the details of rallies and events for the coming week

Today, 27 February, Rainham Radio Rally will take place at Rainham School for Girls, Derwent Way, Rainham, Gillingham, Kent ME8 0BX. Doors open at 10.00am. More details from Trevor, G6YLW, 0771 7678 795.

Also today, 27 February, Swansea ARS Rally will be held at Court Herbert Sports Centre, Neath Abbey, Neath SA10 7BE. Doors open at 10.30am and entry is £2 with free car parking. There will be trade stands and a Bring & Buy along with special interest groups. Details from Roger, GW4HSH, on 01792 404422.

The Bournemouth Radio Society will be holding their 23rd annual sale on Sunday 6 March at The Kinson Community Centre in Millams Road, Bournemouth. Doors open at 9.30pm and the sale closes at 2.30pm. Admission is £1.50. Refreshments will be available. Further details from tonyg3ywg@gmail.com.

The Exeter Radio & Electronics Rally will take place on 6 March in America Hall, De la Rue Way, Pinhoe, Exeter EX4 8PW. Doors open at

10.30am, with disabled access from 10.15. Admission is £2. There will be trade stands and a Bring & Buy. All profits from the event are shared between GB3SW, GB3EW and GB3EX, the local 2m and 70cm repeaters. Contact Pete, G3ZVI on 07714 198374.

Now for the news of special events

The 90 Speke Squadron ATC Radio Club are holding a radio day in support of Marie Curie Cancer Research on 5 March using the special event callsign GB0MAC and the club callsign MX0NAC. They intend to operate on the HF and VHF bands and will be using SSB and PSK modes from 10am to 10pm.

EG8ISS will be on the air until 11 March from Las Palmas in Gran Canaria, which is IOTA reference AF-004. Activity is to celebrate the first ARISS contact with one of the Institute for Technological Development and Innovation in Communications facilities on campus. The special event station will be on the HF bands, from 10 to 40m using CW, SSB, RTTY, PSK31 and SSTV. Activities are also planned for VHF and the satellites AO-27, SO-50, AO-51 and VO-52. There is a special QSL card designed for this event that will be automatically mailed to your QRZ.com address. More info is available on QRZ.com under EG8ISS.

And now the HF DX news compiled from 425 DX News and other sources

The XF4 DXpedition has been assigned callsign 4A4A. A team of 9 operators will take to the air from Isla Socorro from 4 to 19 March. They plan to use 10m through to 160m with CW, SSB some digital modes. More on line at www.revillagigedo2011.com.

Dennis, WA2USA plans to be active as WA2USA/4 until 3 March from St George Island, which is IOTA reference NA-085. He will be on 10m to 160m using RTTY, CW and SSB. QSL via his home callsign, either direct or via the bureau.

Operators Phil, G3SWH and Jim, G3RTE will be active from West Island in the Cocos, Keeling Islands until 5 March. The Cocos, Keeling Islands count as OC-003 for IOTA purposes. Both operators will use the single callsign of VK9C/G6AY. Their activity will be on CW only on all bands from 10 to 80m. There will be no 160, 6 metres or EME activity. QSL via G3SWH, either direct with SAE and adequate return postage, via Phil's website for a bureau reply or via the Bureau.

4

Now the contest news

The CQ WW 160m SSB Contest finishes at 2200UTC today, 27 February. The exchange is signal report and CQ Zone.

The SSB leg of the REF Contest finishes at 1800UTC today, 27 February. Work French stations only, send a report and serial number, and expect to receive a report and a Department code (or prefix from French overseas territories). There are no separate categories for different

power levels and only a few entry categories. Single-op stations can enter single- or multi-band, while multi-op stations can make a single-transmitter all-band entry only.

Today, 27 February, the 70MHz Cumulative Contest takes place from 1000 to 1200UTC. Using all modes the exchange is signal report, serial number and locator.

The 144MHz UK Activity Contest takes place on 1 March from 2000 to 2230UTC. Using all modes the exchange is signal report, serial number and locator.

On the weekend of 5-6th the 144/432MHz contest takes place between 1400 and 1400UTC. It has 6-and 24- hour categories. It's one of the earliest contests of the year in which a few hardy souls or groups are likely to brave the elements and operate portable for 24 hours. The exchange is signal report, serial number and locator.

The ARRL International DX Contest takes place next weekend, 5 and 6 March between 0000 and 2359UTC. Work W/VE stations only, in as many of the 48 contiguous States and Provinces as possible. Send a signal report and your transmitter power, and expect to receive a signal report and 2-letter State or 3-letter Province code.

And now the solar factual data for the period from the 14th to the 20th of February, compiled by Neil Clarke, G0CAS on the 21st of February

Ever since it became obvious that we were climbing out of the long sunspot minimum that we have just gone through, timely warnings were made if warranted in this report that the Sun would suddenly spring into high activity. Well this happened during the period. Three large sunspot groups dominated the solar disc that increased solar activity to high levels, when on the 15th an X2 solar flare occurred and with it a large coronal mass ejection. This is the first X class solar flare since the 14th of December 2006. Also nine M class solar flares and dozens of C class flares took place during the period along with numerous sudden ionospheric disturbances. Solar flux levels increased from 113 units on the 14th to peak at 125 by the 18th. That's the highest daily figure sine May 2005. Levels quickly declined to 105 by the 20th by when one of the large sunspot groups had rotated out of sight. The average was 113 units. The 90 day solar flux average on the 20th was 86 units, that's two units up on last week. X-ray flux levels increased from B5 units on the 14th to B8.1 by the 18th. The average was B5.3 units.

Along with all the solar flare activity several coronal mass ejections took place, all travelling towards Earth at different speeds. It would appear that two arrived at about the same time on the 18th. Until then geomagnetic activity was quiet but increased during the early hours of the 18th. During the height of the storm the Bz

remained positive or northward, which meant that it did not couple into the Earth's magnetic field which is also northward, that's why the needle of a compass points northwards. Given that and the time of the arrival, very little in the way of auroral contacts were reported. Visually it was also disappointing, given that most of the UK was covered by cloud. This is despite the extensive coverage on the national TV news. If the Bz was southward or negative then it would have been a different story. The Ap index for the 18th was a mere 17 units. The remaining days were quiet and the average was Ap 7 units. Solar wind speeds increased to 710 kilometres per second around midday on the 18th. Particle densities were low except for a brief increase to 11 particles per cubic centimetre early on the 18th. Bz fluctuated between minus 14 and plus 27 nanoTeslas early on the 18th, otherwise only modest variations were observed. Strangely, on the 18th, MUFs reached around 35MHz, which is about 10MHz higher than forecasted. Normally, levels would be depressed under such conditions but on this occasion the ionosphere benefited from the storm.

And now the solar forecast. This week solar activity is expected to be very low to low. However, going on previous rotations and the present upsurge in activity on the Sun, activity could increase. The latest SEREO spacecraft shows a large sunspot group that should be in view this week. Solar flux levels are expected to be in the 80s for most of the week but could increase later in the week. Geomagnetic activity should be at quiet levels for the first half of the week but then increase due to a recurring coronal hole. MUFs during daylight hours at equal latitudes should be around 22MHz for the south and 19MHz for the north. Darkness hour lows should be about 9MHz. Paths this week to Japan should have a maximum usable frequency with a 50 per cent success rate of about 19MHz. The optimum working frequency with a 90 per cent success rate will be around 14MHz. The best time to try this path will be between 0800 and 1000 hours.

And that's all for this week from the propagation team.

That is rather strange logic as the only way to identify an NDB or a VOR is
by the morse code identifier and positive identification of your NAVAIDs
is important.

> The beep gang loves to drag
> that one out as a reason why beeps are still "needed" today.

If you actually believe progress in anything is being impeded by devotees
of morse code, you have serious mental problems and a total disconnect
from the real world.

You mean like sailboats and the bow and arrow have?

You sound a lot like a small child in a snit over something.

Perhaps that is how it is done on a very small propeller plane. On a
larger aircraft, identification is performed internally by the RNAV
equipment and the beacon's identity is displayed on a screen.

> > The beep gang loves to drag

I had assumed that it went without saying that I was referring to
the progress of HAM RADIO. I agree that the Morse code gang has no
influence whatever on the real world; the world outside of ham radio.
Nevertheless, they succeeded in delaying the elimination of the code
test from the licensing requirement by hiding behind a bogus and
self-serving interpretation of some radio treaties that almost the
entire world interpreted differently.
Of course, the beep boys had the ability to do that only because the
federal government agency that has the ostensible function of regulating
ham radio has come to consider ham radio to be too trivial for it to
waste any time on it and has, for all practical purposes, outsourced the
regulation of it to the ARRL. Since the ARRL is the last stronghold of
the beep boys, it should come as no surprise that the beep boys were
able to effect the outcome that they did, at least for a while. When it
became unmistakably obvious that the beepists were abusing their
influence in order to delay their own obsolescence, the FCC stepped back
in and took action itself, effectively overruling them.

I post something like this once or twice a year to remind the Morse cultists of the consequences of their actions. Ham radio is almost dead and that is their fault. Two entire generations of potential hams have been kept away from it by the beepists self-serving and slavish devotion to the cult of the telegraph key. I will continue to post these reminders, from time to time. Thank you for your comments, such as they were.

What you ``really`` mean,is that you tried to learn Morse Code and
found it
too difficult for you,so you just gave up,and decided to sneer at what
very
many radio amateurs see as a ``fun`` mode,and also very useful when
conditions are poor with fading,noise, etc. etc.
Also, it`s obvious that there are many digital and computerised modes
these
days, D-STAR etc. which many Morse code users also use and enjoy.

`Nuff` said ! cheers to all. doug.

Babbling nonsense and you obviously haven't a clue what RNAV is or how
any NAVAIDs work.

Ham radio seems to be, and has been, progressing quite well.

Many countries interpreted the treaty requirement more strictly than the
US and many countries iterpreted it more liberally. The US wasn't unique.

This is just revisionist babble.

Ranting nonsense.

Nah, you were just never able to learn code and are holding a grudge.

Like I said, you sound like a small child.

No, I never lifted a finger to learn Morse. I considered it useless
and obsolete. Events have proven me right. By the way, speaking of
things that are too difficult to learn, you might want to try to learn
about line length and line wrap. Yes, I know, computers and typing are
difficult.
The other problem is that even if I had learned Morse, who would I
have talked (beeped) to? I have no interest in talking with (or
exchanging beeps with) the Morse cultists.

That you use terms like "Morse cultists" say a lot about you, none of it
good.

That, and the fact that years after what you objected to has gone away,
you still rant and stomp your feet in protest.

The way that they speak and think about their sainted Samuel Morse
and his holy beeps is entirely consistent with the way that cult
followers relate to their cult leader. I stand by my characterization.

> That, and the fact that years after what you objected to has gone away,

Ham radio is gone. That is what I am really lamenting, here. Ham
radio is dead and the beepists killed it. Look at the license numbers
and express them as a percentage of the total population. Ham radio has
been on a "going out of business curve" for decades. Face it, it's over.

You sound just like the guy in the dirty bath robe standing on a box in
the park shouting his screed with a crazed look in his eyes.

I've been hearing that drival for close to 50 years now.

The percentage of the population that are trumpet players is less than the
percentage that are hams, so I guess trumpet playing is over.

Only a mental defective would fail to understand why ham radio, and trumpet
playing, is of interest to only a fraction of the population.

SARL NEWS - SUNDAY 27 FEBRUARY 2011

You are listening to ZS6SRL, the official radio station of the South African Radio League, the national body for amateur radio in South Africa, with a news bulletin every Sunday at 08:15 CAT in Afrikaans and at 08:30 CAT in English. To listen to a web stream, visit www.sarl.org.za, click on 'ARMI' and follow the links for details. PLEASE NOTE: for audio via Echolink, connect to ZS0JPL-R.

You can download this bulletin and previous ones from www.sarl.org.za and also subscribe to receive future bulletins by e-mail. Your newsreader this morning is (name), (call sign), on 145,725 and 7,066 MHz from Pretoria, with relays on 7,066 and 3,695 MHz SSB.

In the news today

ICASA CHANGES ITS MIND ABOUT REGULATIONS

INNOVATION COMPETITION - FIRST PHASE WINNERS ANNOUNCED

THREE RADIO AMATEURS KILLED BY SOMALI PIRATES OFF THE COAST OF EAST AFRICA

You are listening to ZS6SRL. Stay tuned for more details on these and other important and interesting news items.

ICASA CHANGES ITS MIND ABOUT REGULATIONS

The Council of ICASA has decided that the authority will not go through a second public review process but that the final regulations will be published in the Government Gazette soon. No final date was given at this week's SARL/ICASA liaison meeting but it will be before the end of March 2011.

At the liaison meeting the question of reciprocal agreements between SADC countries was also discussed. The SARL delegation pointed out that the SARL request to have this resolved is now long overdue and that some urgent attention should be given to this. The Chairman of the meeting, Phil Molefe, gave instructions to staff attending the meeting to respond to the SARL within a week. He chaired the meeting on behalf of Dumisa Ngwenya who is attending the WRC preparatory meeting in Geneva.

While not yet Gazetted, the license fees will not go up on 1 April 2011, but only in 2012. The license fee for the period 1 April 2011 to 31 March 2012 will remain R27.

The SARL delegation also discussed the gazetting of the allocation of 135,7 - 137,6 kHz. The allocation is included in the table of amateur radio frequency allocations which will be gazetted with the new regulations. ICASA however agreed to investigate the possibility of issuing a separate gazette.

INNOVATION COMPETITION - FIRST PHASE WINNERS ANNOUNCED

Eight Entries were received in the Innovation Competition sponsored by Multisource and Icom. Two winners were selected by the SA Amateur Radio Development Trust.

Deon Coetzee, ZR1DE, submitted a proposal for the development of a platform for a tracking Directional Antenna. The project proposal describes the development of an operational platform of both the mechanical structure as well as the electronic system required for the control of directional antennas such as for instance a parabolic dish type tracking a moving signal source such as a satellite.

Hannes Coetzee submitted 6 proposals of which one was chosen for immediate further development. The others will be developed as articles for Radio ZS later this year. His proposal for a simple, innovative ground station using modern, state-of-the-art RF IC's in conjunction with a Personal Computer equipped with a sound card is proposed for the reception of satellite downlink signals. Software Defined Radio (SDR) offers the opportunity to join the fun, learn about the future of radio and enjoy all the power of Digital Signal Processing offered by a PC without having to break the bank.

Both entrants have until 15 May to finalise their designs and produce a prototype to be presented at the annual SA Amateur Radio Development Trust Award function to be held in Midrand on 6 June 2011. The winner will be presented with an ICOM7000 HF transceiver by the Managing Director of Multisource, Richard Smuts-Stein.

THREE RADIO AMATEURS KILLED BY SOMALI PIRATES OFF THE COAST OF EAST AFRICA

Three Radio Amateurs Scott Adam, K9ESO, his wife Jean, KF6RVB, and Bob Riggle, KE7IIV, have been murdered by Somali pirates. Also killed with them was Phylis Macay.

The four were on board the Adam's owned yacht the Quest off the coast of Oman, East Africa, when pirates boarded their vessel on Friday, February 18. Officials were in the process of negotiating for their release when gunfire was heard around 01:00 on Tuesday, February 22.

United States Naval forces responded to the gunfire. Navy Seals then boarded the yacht only to discover that all four hostages had been shot by the pirates.

According to a statement from the US Central Command, despite immediate steps to provide life-saving care, all four hostages ultimately succumbed to their wounds.

Somali-based pirates have plagued the shipping industry off East Africa for years, but the violence used during the attacks and the money demanded in ransoms has increased in recent months. Sea going bandits are currently holding some 30 ships and more than 660 hostages, however, this is first time American hostages have been killed by a Somali pirate raid.

SARL CONVENTION

Remember the SARL Amateur Radio Convention on 16 April. Register before the end of February to make use of the discounted price for the Friday boat cruise and dinner, as well as the Saturday's Gala evening. This will be a highlight of the year! Visit www.qsl.net/zs4srk to register you place! The beautiful Vaal awaits!

HAMWAN MEETING

A HAMWAN meeting will be held for all interested radio amateurs. HAMWAN stands for HAM Wide Area Network. HAMWAN is a HAMNET initiative and involves a WiFi network used on amateur radio frequencies.

Details are as follows: Time: 19:00 Place: Echo Charlie in Plantation Road in Springs QRV: 145,675 MHz East Rand Repeater If you get lost: Call Chris on 083 543 5668 for directions.

The purpose of the meeting is to determine how and when they will assemble the equipment they already have in hand. Your assistance and knowledge will be highly appreciated.

CONTEST NEWS

Sunday 6 March 2011 - SARL Hamnet 40 m Simulated Emergency Contest. This SSB Contest is open to all Radio Amateurs in South Africa, Namibia, Botswana, Zimbabwe, Swaziland, Mozambique, Lesotho, Marion Island and South African Antarctica. Only contacts with these areas will count. The contest will run from 12:00 to 14:00 UTC. Participate as a Single operator stationary mobile; Single operator portable; Multi-operator portable or Single operator base station.

Saturday 12 March 2011 - SARL March Madness YL Sprint. This is a fun activity to celebrate International Women's Day (8 March) between radio amateurs in Southern African countries. Call "YL Sprint." The Sprint will run from 09:00 to 10:00 UTC. The exchange is a RS report and YL or OM.

Provisional results of the SARL National Field Day. The committee received 26 logs via email made up of 11 from Class A, 3 each from Class C and D and 9 from Class E. One of these logs is a check log.

Class A. 1st West Rand ARC, ZS6WR, 96 600 points 2nd Northern Cape ARC, ZS3NC, 85 860 points 3rd Sasolburg ARC, ZS4SRK, 56 400 points

Class B, no entries

Class C. 1st Wessie Wessels, ZS2A, 43 200 points 2nd Pierre van Deventer, ZS6A, 40 560 points 3rd Paul van Spronsen, ZS1PVS, 25 536 points

Class D. 1st Geoffrey Lotz, ZR6XZ, 56 160 2nd Pieter Nel, ZS1PN, 2 160 points

Eddie Leighton, ZS6BNE, made 10 710 points in this class as a check log.

Class E. 1st Pieter Jacobs, ZS6XT, 30 700 points 2nd Derek Stuart, ZS2J, 9 360 points 3rd Renier Burger, ZU6HOT, 7 236 points

The final and full results will be published in HF Happenings 445 in the coming week.

CLUB NEWS

NEW REPEATER ON MARIEPSKOP

The OTL Club has installed a repeater on Mariepskop. Coverage should be close to 200 km into the Kruger National Park. The frequency 145,712 5 MHz. No tone is needed.

Tests have been done with Schalk, ZS6DVD, in Skukuza, a distance of 80 km. He was using an external antenna and received the repeater S9+60 dB; also got reception reports from ZS6G in White River at S9 plus.

In Skukuza area you can use 145,637 5Mhz which is also linked to: Mariepskop on 145,712 5 MHz Middelburg 145,737 5 MHz Machadodorp 145,762 5 MHz Roos Senekal 145,662 5 MHZ Ermelo 145,700 MHz These repeaters are all linked together.

The Pretoria/JHB amateurs will now be able to talk into KNP if they can contact the Middelburg 145,737 5 Mhz repeater.

PROPAGATION REPORT

Hannes Coetzee, ZS6BZP, reports that the solar activity is at moderate levels. New sunspot 1 163 produced a spectacular M3 class solar flare on Feb. 24th. Sunspot 1 163 will continue turning toward Earth in the days ahead, setting the stage for more potent geo-effects if the eruptions continue. The effective sunspot number is expected to be around 30 for the coming week.

15 m will provide the best opportunities for DX followed by 20 m. Conditions to India will be good from the afternoon till after sunset. During the afternoons conditions will be good towards Europe on 15 m, later to be followed by good 20 m openings. Good 15 m contacts with the USA are possible during the evenings. Contacts with Australia are possible on 20 m after sunset. 15 and especially 20 m openings to Brazil and South America are possible during the afternoons. With the good 15 and 20 m openings 17 m will also be full of surprises.

For the CW and digital enthusiasts 30 m may be very rewarding with openings to many parts of the world.

Locally 40 m is the work horse for contacts around the country with 20 and 30 m also being very useful for contacts over the longer distances. 80 m will be best during the early mornings and late afternoons as well as over the shorter distances.

80 m is the frequency of choice during the evenings.

Please visit www.spaceweather.co.za for further information.

DIARY OF EVENTS

Today 27 February - First SARL Digital Contest for 2011 from 13:00 to 16:00 UTC on 80, 40 and 20 metres. 28 February - Offers to host a station at Sun City during IARU Region 1 conference to be in to iaru2011@sarl.org.za. 28 February - Due date for inputs for SARL Strategic Indaba to armi@armi.sarl.org. 5 March - ZS6PTA Flea Market at POMC Club house in Keuning St, Silverton from 08:00. 6 March - SARL Hamnet 40 Metre Simulated Emergency Contest will be run from 12:00 to 14:00 UTC. 12 March - SARL March Madness YL Sprint from 09:00 till 10:00 UTC. 19 March - RTA, Programming in Windows course in Cape Town, book at www.sarl.org.za. 25 March - SAiSAT briefing session at the NARC. 2 April - SA AMSAT Space Symposium at Vodaworld, book at www.amsatsa.org.za. 15-16 April - SARL National Convention at Vaal University for Technology.

SARL News invites clubs and individuals to submit news items of interest to radio amateurs and shortwave listeners. Submit news items - if possible - in both English and Afrikaans to www.sarl.org.za/newsinbox.asp, not later than the Thursday preceding the bulletin date.

The SARL also invites you to listen to Amateur Radio Today every Sunday morning at 10:00 CAT on 145,750 MHz in the Pretoria area, with relays on 7 082, 7 205 and 17 560 kHz. There is also a podcast by ZS6RO. For a web-stream and Echolink by ZS6FCS, visit www.sarl.org.za, click on 'ARMI' and follow the links. A repeat transmission can be heard on Mondays at 22:05 CAT on 3 215 kHz. Sentech sponsors the ARMI transmissions on the non-amateur frequencies.

You have listened to a bulletin of the South African Radio League, compiled by Gustav, ZS6BWN.

Thank you for listening, 73.

You don't seem to understand the statements that you probably think
you have refuted. The percentage of the general population who are hams
has been declining for decades. Whether that percentage is large or
small is irrelevant. What matters is the continued, persistent DECLINE
of that percentage. While there may not be many trumpet players, can you
say that the percentage of the population that are trumpet players is
changing?
For someone who is quick to call others mentally defective, you
don't appear to be very bright.

An easy fix to the decline in the number of licensed hams in the US is
to use the same trick that was used with CB: Include the license in the
box with the radio.

Of course, amateur radio would then be useless, just like CB, but
there'd be a lot of hams.

Sound like something you could get behind?

The trumpet is roughly 3,500 years old.

Radio on the other hand is only about 100 years old and a lot of the
people in ham radio were alive while radio and radio related stuff was
a brand new, essentially unknown, and exciting field.

As radio has matured, the unknown parts have been pretty much eliminated,
usage is common, and the excitement has decreased, thus a decrease in
interest in the general population.

If you want to put a license in a box, it might make more sense to put it in a box that contains an Ethernet router or a laser printer maintenance kit. The fact is, there are more "wireheads" today than there have ever been. They just don't choose to become hams. If you ask them why, the subject of beeps (and the cultists who worship beeps) will probably be mentioned.

Well, no, again the current fascination with things computer related is
driven by the fact that it is new and evolving technology.

Do you have any basis in fact for that or is it just your
assumption? I have listened as a coworker asked quite a number of
technical people why they were not hams. The answers that I heard were
as I described. I never heard anything about a lessening of excitement
in a maturing technology.

> > For someone who is quick to call others mentally defective, you
> > don't appear to be very bright.

That is an interesting conclusion in light of the fact that I have
posted nothing about history. Can you draw any similar deductions from
things that I haven't posted about my knowledge of tea price
fluctuations in the Orient?
As far as aeronautical beacons are concerned, I posted that they are
ALLOWED but not required to use Morse as an identifier. Morse zealots
often point to its allowability in that role as proof that it is still
needed and relevant. In a modern aircraft, you will never hear any
beeps. The identifiers will be read automatically and displayed on a
screen. Perhaps you fly one of those tiny little propeller planes that
have gauges and dials but no "screens."

Obviously not as the question was not asked over a span of many decades
where it would show.

Last time I looked the average age of hams as far as anyone can tell
is somewhere in the 50 to 60 year old range, which means a whole lot of
them grew up shortly after the end of WWII when a portable radio weighed
20 lbs and had a very stout handle.

You statements show a total lack of historical knowledge on any subject.

You haven't the slightest clue what you are talking about.

FYI, most of those "tiny little propeller planes" these days have glass
panels, but I doubt you have any idea what the term "glass panel" means.

I said nothing about how long it was done. In fact, I saw it done
for a few years. He may still do it, for all I know.

I still insist that I have posted nothing about the history of any
subject. Neither have I posted about tea prices in the PRC. Still, you
claim to be able to assess my level of knowledge of history from what I
have not posted. Do you understand the concept of "projection," as in
Rorschach blots?

Utter hogwash. If you are referring to something like a Garmin G1000, a cheap version of the Rockwell Collins Pro Line or some other low-end glass cockpit retrofit for small planes, most of them don't have them and never will. The great majority of tiny little prop planes have gauges and dials.

Clueless.

It is difficult to find a new aircraft without a glass panel these days.

Cirrus SR22 Avidyne Entegra glass panel shot about half way down:

http://en.wikipedia.org/wiki/Cirrus_SR22

Cessan Skycatcher G3000 full glass panel:

http://www.cessna.com/single-engine/skycatcher/skycatcher-avionics.html

Cessan Skylane glass panel with integrated synthetic vision:

http://www.cessna.com/single-engine/skylane/skylane-avionics.html

Piper, all of them:

http://www.piper.com/Avionics.htm

Just as you are clues about the morse ID for NDBs, VORs, and VORTACs.

Irish Radio Transmitters Society
Radio News Bulletin
Sunday 27th February 2011

New Zealand Earthquake

The President of The Irish Radio Transmitters Society, (IRTS), Paul Martin, EI2CA has been in contact with the President of New Zealand Association of Radio Transmitters (NZART). Paul writes as follows, " OMs You are in our thoughts today following the earthquake in Christchurch and we know that your members will be working hard for the community. If we can be of any assistance please let us know. Take care and pass our best wishes to all your operators working at the front line."

Paul EI2CA President, Irish Radio Transmitters Society (IRTS), IARU member society for Ireland.

A reply was received from Roy Symon, ZL2KH, President of NZART. Roy Symon, writes as follows, "Thanks very much for your good wishes. I have passed them on to the folks in Christchurch 73 Roy Symon, ZL2KH."

Paul Martin also writes as follows, "IRTS President, Paul EI2CA has been in direct contact with the New Zealand Society, NZART, to offer our Society's condolences. He also asked Debbie Morgan, NZART Business Manager to pass our support and admiration to their Emergency Communication teams working in Christchurch."

IRTS AGM Annual Dinner and Rally 2011

You are reminded of the importance of attending the IRTS AGM weekend, including Annual Dinner and Rally will be held this year on Saturday March 26th and Sunday March 27th. The event will be hosted by the Limerick Radio Club. The venue is the Radisson Blu Hotel, Ennis Road, Limerick.

For more information contact, Ger McNamara EI4GXB on 087 2532512 or ei4gxb/ at /gmail/ dot/ com. A new website for the Rally in Limerick on 27 March 2011 is now available, please go to http://limerickradiorally.com for more details.

The AGM dinner tickets priced at 35 are now available from Tony Condon at QTHR or by email to condona /at / eircom/ dot/ net.

IRTS Stand at Friedrichshafen Rally

IRTS members attending the Friedrichshafen rally this year and who are willing to be in attendance at the IRTS stand for some of the time whilst there are requested to contact Sean Nolan, EI7CD on email ei7cd / at / gofree / dot/ indigo / dot / ie .

IRTS Committee Meeting

The next IRTS committee meeting will be held on March 12th in Portlaoise. All affiliated clubs representatives are encouraged and welcome to attend.

Echo Ireland

The February 2011 issue of Echo Ireland has now been posted to members. This issue contains information about the AGM Weekend, 26 - 27 March hosted by Limerick Radio Club. The Committee Nominations for the year are published together with a request for Awards Nominations.

The "HF Happenings" column by Dave EI9FBB has lots of information on upcoming DX activity during the year and has a review of 2010 DXCC by Joe Reisert W1JR. Pat EI2HX and Charlie EI8JB continue their columns on ATV and Satellites. This month there is an article by Tony EI4DIB on the 4 meter band and on a 160 meter receive only loop antenna by Andy EI8GGB.

Tony EI5EM reminisces in his article "Thirty Years On", while Pat EI2HX provides useful information about the Incoming QSL Bureau.

The newsletter also has details of contests, rallies, clubs and classes and the results of the IRTS 80m Counties Contest together with an article on the Worked ITU Zones Awards.

Rod W6ROD writes about the work of the International Telecommunications Union - ITU - a UN organisation based in Geneva with membership from 192 States.

Hamvention 2011 Dayton, Ohio, USA.

Greg N2BSA who organizes the North Jersey DX Association trip to Dayton every year, is making a group booking in the Marriott Hotel. If there is anyone interested in travelling from EI, please contact Alan Cronin EI8EM. Members are advised to get in contact with Alan soon, as the hotel will fill fast. Alan's email address is alanei8em /at/ gmail/ dot / com.

Limerick Radio Club

Members of Limerick Radio Club presented Decoding the Code, as part of Engineers Week. 60 pupils took part and enjoyed building the CW kits. We were joined on the day by Kieran Horgan, Chairman Thomond branch of Engineers Ireland, who commented that the pupils were getting an important introduction to engineering. Many thanks to Tony EI2AW, Mike EI2IX, Tom EI3AL, Gerry EI3JU, Ger EI4GXB, Tom EI5CA and Simon EI7ALB who were very busy on the day.

International Amateur Radio Union

Arnie Coro, CO2KK, International Amateur Radio Union (IARU) Region II Area C Emergency Coordinator, advises users of the 40 and 20 meters bands to "be aware of possible (earthquake) emergency communications traffic taking place in and around the affected areas of New Zealand's South Island, where Christchurch is located."

He continues: "This is a city of about 400,000 population and it was hit pretty badly because of the proximity of the epicenter of the earthquake and the fact that it was registered at a very shallow depth and very near to the city.

"The propagation on 40 meters more likely to cause problems to the New Zealanders from unintentional QRM coming from the Americas is the window that starts about two or three hours before sunrise and lasts until sunrise at this end. A similar pattern, with a slight time shift shows up on 20 meters, too."

Specific emergency communications frequencies will be posted as soon as the information is available.

Radio Hams Keep Civil Defence in Touch

The Wireless Institute of Australia reports as follows;- "A small team of amateur radio operators are keeping the lines of communication open in earthquake-hit areas of Christchurch. The head of the Amateur Radio Emergency Communications team, Richard Smart, says 10 amateurs are using their two emergency broadcast vans to keep rescue teams and Civil Defence staff in touch. He says one is at a major welfare centre providing portable communication so they can talk to Civil Defence and the other vehicle is en route to assist search and rescue teams in an area where communication is poor. Mr Smart says amateur radio operators from around the country are volunteering to help out and others are sending updates on the disaster to families of people in Christchurch who are overseas."

Louth Earn Rally Yarns

In last week's news, Lough Erne Amateur Radio Club asked for memories of rallies over the thirty years since the Club's first one in April 1982. The first yarn came from Ronnie EI9ED. It was about the tour bus up from Kells to the Killyhelvin Hotel, the former rally venue.

Experimenters with empty bags came up from Dublin for the bus, which lifted them and local experimenters, then others along the road north. The banter was merry going up. But back before the border, all sat quiet worrying about the bargains in the boot. However, once past Customs and over the border, with big sighs of relief the banter broke out again.

Lough Erne rally hosts remember Phil, who asked to get in free for organising the bus. Who was Phil? Is he still about? Ask him to get in contact. Phil will get in free this year as Chairman's guest at the Pearl Anniversary Lough Erne Rally - and no Customs now on the road home.

The Rally is in SHARE on 17th April - the Sunday before Easter. It will be a great place to be for yarns, bargains and lots more to interest radio amateurs and experimenters.

And family too, with children's activities, a Sunday afternoon cruise on the Lough, lunch, bar food, ice cream, caravan, camping and B&B all on site at Ireland's largest residential activity centre.

DX News

A third attempt at landing on Sable Island (CY0) will be made on March 7 by the American team which had hoped to activate this DXCC entity last October and then again in December. The earlier attempts were thwarted by both weather and mechanical problems so lets hope it is a case of third time lucky. The team hope to be QRV from March 7 - 15.

Peter EI7CC will be QRV as 7P8PB while on holiday in Lesotho from March 9 - 23. He will be operating from the station of Gerry 7P8CC better known to us as EI8CC. It is hoped that lots of EI and GI operators make it into the log. QSLs will be OK via the home call.

Lars SM0CCM is having a holiday in the Caribbean and will be active as J73CCM from the island of Dominica. He will be there till March 28.

Another activity from Dominica at the moment is Jan DL7JAN who is signing J79AN till March 5.

The well-known DXpeditioners Phil G3SWH and Jim G3RTE are on Cocos Keeling Island at present signing VK9C/G6AY. They are active all bands 80 - 10m CW only. They will be there till March 5.

Rwanda DXpedition approved for credit

ARRL DXCC Manager Bill Moore, NC1L, reports that the 9X0SP 2010 DXpedition to Rwanda has been approved for DXCC credit.

If you have cards that were recently rejected for this operation, please send an e-mail to the ARRL DXCC Desk. Once your record is updated, results will appear in Logbook of The World accounts or in the live, daily DXCC Standings.

G3RWF is active as 5X1NH from Fort Portal in western Uganda until April 14. He prefers to operate CW but plans to also be on the digital modes with some SSB on all bands except 160m.

QSL via his home callsign G3RWF or electronically using Logbook of the World.

YL International 2012 Adelaide

The organization of the YL International 2012 Meet in Adelaide is almost complete. The meet dates are set with delegates arriving on or before 3 May 2012 staying at various venues in Glenelg. The next few days will see us tour Adelaide, Hahndorf, Cleland National Park, Port Adelaide including a Dolphin cruise and a progressive lunch at 3 Barossa Valley wineries. Those that are doing the optional Ghan tour will join it for either a 7 or 9 day adventure. The 7 day option allows you to leave the tour in Alice Springs after being out to Uluru and the 9 day tour finishes in Darwin. A web site has been created a website which is at www.ylinternational2012.com with detailed up to date information.

The Meet is open to YLs and their OMs. You don't have to be a member of any organization or even licensed but should be interested in amateur radio. Most participants are active on air but that is not a requirement for attendance. If you are interested in attending please complete the online expression of interest form, registration form or contact me directly. My contact details are below. The list of potential participants is growing and at the moment there are 60 who have expressed interest. Registration and deposits are due by September 2011.

For further details please contact Tina Clogg, vk5tmc /at/ bigpond/ dot / com.

Kells Radio Club

Ronnie, EI9ED, writes and tell us that the Kells Radio Club would like to announce the switching on of EI2LLX crossband facility. For the moment this Cross band connects to SEARG repeater networks and can be activated by DTMF *470 with a T.O.T. of 15 minutes. This crossband repeater can be activated from SEARG repeater network and also GI stations can activate the southern repeater system via the Cavan repeater EI2LLX using the same codes. To disconnect the repeater use DTMF #6

During this week stations were heard from Northern Ireland to Cork, from VK via IRLP through Waterford, Cavan to Northern Ireland.

Further updates will be forthcoming.

Across the Atlantic on 502kHz

At 21.34 GMT on 13th February, Joe, VO1NA managed a full beacon decode from Graham, G0NBD on 502kHz using the ROS mode, remote operation system.

It is believed this was the first live data mode decoded over the Atlantic on this band. The signal to noise ranged from -23 to -27dB, giving a 100% decode of the test message. The transmission was sent using MF-7 with an estimated ERP of 1 watt from a 35ft top loaded vertical.

ROS mode did a good job of resolving the signals despite deep and rapid QSB over the 3,500km path. At just over a year old the ROS data mode is relatively new and uses an adaptation of multiple frequency shift keying and forward error correction to help make successful contacts under very difficult band conditions.

The software for the mode is free http://rosmodem.wordpress.com

---

The new Long Wavelength Array

What's being termed as an innovative new radio telescope array is now under construction in central New Mexico. One that will eventually harness the power of more than 13,000 antennas and provide a fresh eye to the sky.

This antenna farm will form what is being called the Long Wavelength Array. This is a radio telescope designed to survey the sky from horizon to horizon over a range of frequencies in the High Frequency spectrum from 20 to 80 MHz.

The first station in the Long Wavelength Array, with 256 antennas, is scheduled to start surveying the sky by this summer. When complete, the entire system will consist of 53 station locations, with a total of 13,000 antennas strategically placed in an area nearly 248 miles in diameter.

Items for inclusion in next week's Radio News can be submitted via e-mail to "newsteam /at/ irts / dot / ie" for automatic forwarding to both the radio and printed news services. Urgent news items for the radio news maybe telephoned to the radio news editor, Aidan, EI7JC on 085 7100511.

Please note that items for the radio news should reach the editor no later than midday on Thursday in order to be guaranteed inclusion in the following Sunday's bulletin.

There are over 300,000 aircraft in the FAA database. Most of them
are nowhere near new. Most of them will never be upgraded. Most of them
are tiny little prop planes with a few gauges and dials. The price of
the glass cockpit upgrade is greater then the remaining market value of
the aircraft, in most cases.

You aren't clueless, you are willfully ignorant. You have dug in
your heels and you will fight like a scrapyard dog to keep out any facts
that might challenge your preconceived ideas (well, if "ideas" is the
right term for that sort of thing). Beeps are as useless as an old Piper
Cub.

What part of "these days" do you have a problem understanding?

Yeah, most old airplanes don't have glass panels and most old cars don't
have fuel injection and engine control computers.

All of which is irrelevant to the fact that the current stuff does.

No, the fact is that there isn't much "current stuff" in existence.
There are vast heaping piles of old junk, but precious little that is
new. Have you looked at the FAA database? As I said, there are over
300,000 entries. Those are the planes that exist today. You can't ignore
the ones that you don't like. The "fleet" is old and getting older. The
manufacturers of single engine propeller planes are teetering on the
brink of bankruptcy. One of them now refuses to release data to the
media about the number of orders that it has on its books (per Business
and Commercial Aviation magazine). There are very few single engine prop
planes in existence that have anything beyond the old 'steam gauge'
cockpit. At the current rate of production (and sale) that situation
will never change significantly.
So just keep on ignoring the facts that you don't like or that
interfere with your chosen beliefs. Keep on pretending that beeps are
useful and that dinky little planes are well equipped and modern.

that I have written 1000 bulletins since 1991. It is even harder to
believe that the bulletin went out almost 20 years ago and OPDX's
20th anniversary will be on March 11th. Many changes have happened
since the first bulletin (distribution, the number of subscribers,
format and size). The bulletin was originally written for a small
group of PacketClusters between Ohio and Pennsylvania, and an online
phone BBS (called BARF80) which then expanded to an InterNet mailing
list. There is no real way to know now how many people read the OPDX
because it is distributed via 9 mailing lists (which includes the
OPDX Subscribers Mailing List - currently having over 3200 subscribers
and provided by Dave/WB8APD, via HAMNET.org), 3 UseNet groups, the
Official OPDX Web Page (HTML version provided by John/K8YSE) and
several other Web pages that post the bulletin. The bulletin itself
has grown from about 75-100 lines each week to over 500-600+ lines.
The main purpose of the bulletin was to help individuals achieve their
DXCC, but now has expanded to achieve/work towards other awards and
special interests. The bulletin's information is provided by many
individuals, searches on the Web and other dedicated shared sources,
usually listed at the top of bulletin each week. If not for them,
there would not be a bulletin. I also must not forget my wife Linda,
OPDX's chief proof-reader/non-ham/LD teacher. As my wife continually
keeps asking me each week, "Why do you do it for FREE?", the answer
is -- For the love of the hobby and to help others work DX.....
```

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 20th-February, through Sunday, 27th-February there were 230 countries active. Countries available: 3A, 3B8, 3B9, 3D2, 3DA, 3V, 3W, 3X, 4J, 4L, 4O, 4S, 4U1I, 4X, 5B, 5H, 5N, 5R, 5V, 5X, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8Q, 8R, 9A, 9G, 9H, 9J, 9K, 9M2, 9M6, 9Q, 9V, 9Y, A4, A5, A6, A7, A9, AP, BV, BY, C3, C5, C6, C9, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FH, FJ, FK, FM, FO, FR, FY, G, GD, GI, GJ, GM, GU, GW, H2, H4, H40, HA, HB, HB0, HC, HH, HI, HK, HK0/a, HL, HP, HR, HS, HZ, I, IS, J2, J3, J5, J6, J7, J8, JA, JD/m, JD/o, JT, JW, JX, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ4, PJ5, PJ7, PY, PZ, R1FJ, S5, S7, SM, SP, ST, SU, SV, SV/a, SV5, SV9, T30, T7, TA, TF, TG, TI, TJ, TK, TL, TR, TT, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V7, V8, VE, VK, VK0M, VK9C, VP2E, VP2M, VP2V, VP5, VP8, VP9, VQ9, VR, VU, XE, XU, YA, YB, YI, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD9, ZF, ZL, ZP, ZS, ZS8

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

4A, REVILLAGIGEDO (Update). By the time you read this, the 4A4A team should be in Mexico's Manzanillo's port, on the Pacific Ocean coast, and is expected to take a 2 day trip by boat to the Revillagigedo Island group on March 1st. The 4A4A team should be on the air March 3rd from Socorro Island (NA-030) until March 20th. They will have 3 stations running simultaneously on CW, SSB and RTTY, as conditions permits. QSL via EB7DX direct. All QSOs will be confirmed via LoTW automatically. The DXpedition's Web site is: http://www.revillagigedo2011.com

5V, TOGO. Franco, I1FQH, is once again active as 5V7DX from Kpalime Village in central Togo until March 4th. Activity will will be on 20-10 meters using a Spiderbeam and on 40-30 meters using a homebrew vertical. His rig will be an ICOM 7000 w/KL500 solid state amplifier. He was heard this past weekend very active on 30 meters CW. QSL via LoTW (preferred) or via his home callsign, direct (w/SASE) or by the Bureau. The log will be available here (porbably after his return) at:
http://dx.qsl.net/cgi-bin/logform.cgi?5v7dx
Franco has pictures and video on his YouTube channel from his last visit and probably will put more on there after his return home at:
http://www.youtube.com/user/i1fqh

7P8, LESOTHO. Peter, EI7CC, will be active as 7P8PB from his brother-in-law's station (7P8CC/EI8CC) in Maseru between March 9-23rd. Activity will be limited because he will be on a family holiday and will operate when circumstances permit. QSL via EI7CC, by the Bureau or direct. Logs will be uploaded to LoTW immediately upon his return to Ireland. If possible, Peter may try to upload them while in Lesotho.

7P, LESOTHO (Update). Two members of the Texas DX Society, Frosty/K5LBU (7P8CF) and Wayne/W5KDJ (7P8KDJ), will be active from the "Trading Post Lodge" in Roma between March 11-20th. Activity will be on 160-10 meters using CW, SSB, RTTY and PSK. They plan to have 2 full time stations on the air for the entire period using a Tennadyne T6 at about 40 feet, a R7 vertical along with a Tennadyne TD-160 which is a folded Dipole that is 126 feet overall in length. QSL 7P8CF via K5LBU, direct or LoTW. QSL 7P8KDJ via W5KDJ, only direct with SASE, LoTW and eQSL (No Bureau cards please). Visit their Web page at: http://www.tdxs.net/lesotho2011.html
A log search Web page will be available after their return.

7Q, MALAWI. QSL Manager Allan, G0IAS, informs OPDX that he dropped Harry, 7Q7HB (G0JMU), at the airport for another trip to 7Q-land this past week. Length of stay is not known at this time,... possibly TWO MONTHS minimum. Harry will be busy the first week there, but after that he will try to be active as often as possible. Activity will probably be on the Digital modes and CW. QSL as usual is ONLY DIRECT to G0IAS with sufficient funds for return cards (After April 1st, 1 USD is no longer sufficient postage for ANY destination -- UK postage has increased again). NO BUREAU cards. NO eQSLs. Just old fashioned paper cards DIRECT! Allan states, "SORRY NO RETURN POSTAGE = NO CARD."

9L, SIERRA LEON (Update). Once again in close cooporation between the DAGOE Foundation, Mercy Ships and 4 Dutch radio amateurs, planning is being done for a DXpedition to Sierra Leone. The Team will stay in Sierra Leone between March 28th and April 18th . The location will be in the area of the capital Freetown. This DXpedition was originally planned two weeks earlier but their cargo container got delayed and because of that they lost that time-window. The team will use the callsign 9L5MS. Operators mentioned are: Arie/PA3A (CW/SSB), Bas/PD0CAV (SSB/RTTY), Ad/PA8AD (CW/SSB), Dickson/EL2DT and Arie/PA3AN (SSB/RTTY). Activity will be on 160-6 meters using CW, SSB and RTTY. The equipment consists of 3 transceivers and linears. The antennas are verticals for 160-30m and beams for 20-6m. For 160m, 80m, 40m and 30m extra receiving antennas will be used to improve station receive capability. They will have a 160/80m receive 4-square and 2 DHDL's for 30/40m. They will take special care to listen for remote locations and small stations. Goal of the team is to work as many different stations as possible and to be open for the smaller stations ("little pistols"). As an experiment, the team will also try to work 6m EME contacts using JT65 and a 5-element beam between March 16-20th, when the moon is in a good position. The Team is supported by Mercy Ships crew members and staff. The team set the following goals and will be able to reach these goals with help of the radio amateur community worldwide:
1.Activate the DXCC-entity Sierra Leone on the HF bands
2.Provide support for a Mercy Ships Charity Project
3.Raise funds for the Mercy Ships Charity Project
All donations and surplus from the QSL will be transferred to the Mercy Ships Charity Project. QSL via PA3AWW, by the Bureau or direct (see info on the Web page). Also, QSLs can be requested with a donation via the OQSL request service on the Web page. For more details and updates, visit their Web page at: http://www.sierraleone2011.com/sl_2011/home.php

Also, see the 9L5MS video announcement (youtube) at:
http://www.youtube.com/watch?v=-KoY7lwjcRs
You can also follow the team on Twitter: @DXpedition.
Information about the Mercy Ships organization at: http://www.mercyships.org

CN, MOROCCO. Mathieu, MJ0ASP, is returning to Marrakech between March 14-21st, and will be active as CN2MR. Activity will be on 40-10 meters using CW. However, he will focus on the 30/17/12 meter bands. QSL via MJ0ASP and LoTW.

CT9, MADEIRA. Operators Rosel/DL3KWR and Hardy/DL3KWF will be active as CT9/homecall from Canico de Baixo, Madeira (AF-014), between March 10th and April 6th. Activity will be on 30/17/12 meters using mostly CW. Also, Hardy is expected to try some RTTY and PSK31. QSL via their home callsign. Bureau QSL cards can be requested via E-mail at: dl3kwr@darc.de
dl3kwf@darc.de
Visit their Web site at: http://www.mydarc.de/dl3kwr

CY0, SABLE ISLAND (Update). Randy, N0TG, reports (edited): "Providing flight conditions are suitable, all is set for commencing operations around 2100z on March 7th. The team will standby and be ready to go on a day to day basis should there be delay. Frequencies are listed as follows, but may have to be adjusted if pre-empted by others:
CW - 1826, 3523, 7023, 10106, 14023, 18072, 21023, 24892 and 28023
SSB - 3781, 7140, 14190, 18145, 21295, 24945 and 28450 kHz
RTTY - Refer to Web site.
QSL via the ONLINE QSL SERVICE (Preferred/fastest) or direct via N0TG for all callsigns. Three stations will be operational simultaneously as much as possible as follows: N0TG/CY0, K8LEE/CY0 and N1SNB/CY0.
Additional details are available on the Web site at:
http://www.cy0dxpedition.com "

DAYTON HAMVENTION NEWS (Contest Dinner Speaker Announced). Tim, K3LR, Dayton Contest Dinner Chairman, reports (edited): "North Coast Contesters are proud to announce that Scott Redd, K0DQ, will be the featured speaker during the 19th Annual Dayton Contest Dinner on Saturday, May 21, 2011, at the Crowne Plaza in downtown Dayton, Ohio. Information about the dinner is available at: http://contestdinner.com
An outstanding contest operator, K0DQ had an impressive Single-Operator/ All-Band effort last weekend in the ARRL International DX CW contest:
http://lists.contesting.com/pipermail/3830/2011-February/218464.html
Scott was the featured speaker at the 2000 Dayton Contest Dinner which was completely sold out. You can read more about K0DQ here:
http://en.wikipedia.org/wiki/John_Scott_Redd
http://www.arrl.org/news/scott-redd-k0dq-the-biggest-gun-of-all "

DXCC NEWS (Awards Processing Update). The ARRL Awards-Blog page reports the following: "We are nearly done with processing all the 2010 DXCC applications. At this point we are reconciling hybrid applications and determining final disposition of applications with problems. It will take us about one more week to finish these tasks, at which time we will shut down the DXCC system so that the data for 2010 (Annual Listings and

Honor Roll listings) can be tabulated.
After we have the 2010 data, we will work with IT staff to incorporate the newest DXCC entities into LoTW and call for LoTW certificate requests from the PJ operations.
VUCC paper applications from 2010 and the first few weeks of 2011 have been entered into the VUCC system, but not processed further. Those who submitted those applications, and have accounts in LoTW, can see that data inside their accounts. Link requests for VUCC have been processed where it was possible without manual intervention. There are approximately 60 link requests that will require further work at HQ.
DXCC and VUCC fees are being evaluated. If the fees are changed (they will not be raised), the new rates will be applied to any applications received in 2011."

IO4, ITALY (Special Event). Look for special event station IO4UI to be active between March 1st and September 30th. Activity is to celebrate the 150th anniversary of the Unification of Italy. All of QSOs will be confirmed automatically via the Bureau. More details are available on QRZ.com. QSL via I4JEE.

IOTA NEWS.....
EU-008. Operators Graham/MM0GHM, Gordon/MM0GOR and Mark/M0UTD will be active as MS0KLR from the Isle of Muck (IOSA NH06, SCOTIA DI18), Inner Hebrides, between April 16-19th. Activity will be on all HF bands. QSL by the Bureau to MM0KLR, or direct to MM0GHM.
More details at: http://qrz.com/db/MS0KLR

EU-042. Operators Friedrich/DL4BBH, Helmut/DL1BGC, Karl/DJ4FO, Peter/DJ4RU, Henning/DB5BZ and Ric DL2VFR will be active as DF0WFF from Langeness Island (GIA N-19, WLOTA 1245), and the National Park and Nature Reserve Schleswig-Holstein Wadden Sea (WFF DLFF-013, Grid Loc. JO44) between April 8-10th. Activity will be on the HF/VHF/UHF bands using CW and SSB. QSL DL2VFR, direct or by the Bureau.

EU-044. Operators Bert/DL2RNS and Ric/DL2VFR are planning to be active as LA/homecall from Mageroya Island between May 28-31st. Their activity will coincide with the CQ WPX CW Contest (May 28-29th). The operators plan to concentrate their operation during the first two days on 30/17/12 meters CW. After the contest they will work on all bands, CW, SSB and with special attention to the JA stations. Ric mentions that propagation should be interesting since at this time of year they will have a midnight sun for 24 hours (NO darkness at all). ADDED NOTE: They "may" also make a side trip to EU-141 or EU-139 (they are undecided).

EU-059. Operators Peter/M0NED, Steve/M6ZIX and Paul/2E0GDD will be active from the Isle of Hirta (IOSA OL02, SCOTIA DI23), St. Kilda, between May 31st and June 3rd. They are planning to use a special callsign (GB0xxx), and it is currently pending. A delay on their station setup or even an extended operating stay may happen due to sea conditions (50 mile crossing to

the island). QSL via the RSGB Bureau. For updates and details,
visit the Web site at: http://www.ukradio.eu/stkilda/

EU-124. Operators Pete/M1PTR, Bernard/G3SHF, Carsten/G0SYP, David/M0DCB,
Evan/M0TJU, Chris/G8HCB, Christine/2E0LMG and Kieron/M5KJM
will be active as GW5O from Holy Island (WLOTA 3338), Wales,
between July 29th and August 1st. Activity will include an
entry in the RSBG IOTA Contest (July 30-31st). QSL by the
Bureau. Visit the group's Web page at: http://www.g5o.org.uk

OC-201. John, 9M6XRO, informs OPDX that he is planning a short operation
from Waiheke Island as ZL/GD3OOK between March 7-11th. He will
use a linear and wire antennas. QSL via M0URX, direct, OQRS or
and LoTW.

J45/SX5, DODECANESE. Martin, ON4PO, will be active as J45PO between March
23rd and April 2nd. Operations will be from the SX5P contest station on
Rhodes Islands, so look for activity before and after the CQ WPX SSB
Contest (March 26-27th), mostly SSB and some PSK. During the contest
Martin will be on 40 meters. QSL via J45PO via ON4PO. QSL SX5P via SV5FRD.

KG4, GUANTANAMO BAY (60m Op). Tip/N4SIA (KG4AS) and Bill/W4WV (KG4WV) are
currently active from this entity on 60 meters until March 8th. They were
on Channel 5, and the operators were reporting a high noise level.

KH6BZF PROPAGATION FORECAST/REPORT (For February 28-March 6th)....
Feb 28 AN SOLAR REFERENCE KEYS
Mar 01 AN-HN --------------------
Mar 02 AN BN - Below Normal
Mar 03 AN AN - Above Normal/Geomagnetic Level is QUIET
Mar 04 AN LN - Low Normal
Mar 05 HN HN - High Normal/Geomagnetic Level is UNSETTLED
Mar 06 HN DIS - Disturbed
VDIS - Very Disturbed

GEOMAGNETIC REFERENCE

QUIET - The "A" index is expected to be between
0-7 and the "K" index will be 2 or less
UNSETTLED - The "A" index is expected to be between
7-16 and "K" index will be 3 or less

P4, ARUBA (SA-036). John, W2GD, will be active as P40W during the CQWW
WPX CW Contest (May 28-29th). Operations outside of the contest will
be on 160m and 30/17/12 meters as time permits. QSL via LoTW or direct
to N2MM. Logs will be loaded on LoTW upon his return to the USA.

PZ, SURINAM. Serge, RX3APM, will active as PZ5P during the ARRL DX SBB
Contest (March 5-6th). QSL via UA4LU.

QSL EA5RKP via the Bureau. Special event station active this past weekend from the Polytechnic University of Valencia in Spain for a radio promotion.

UA2FL AND R750Y QSL STATUS. Jack, RN3RQ, states that he received the logs from Slava (UA2FL & R750Y) and will begin to start sending cards out to all. See QSL policy on: http://qrz.com/db/RN3RQ

QSLS VIA LoTW: 4O3A, C6AKQ, D44TBE, HA5KN/P, HK1N, J39BS, JA1CQK, LY3M, MU/F4EGD, OX3XR, PA1PE, PU8TEP, RW3XZ, RZ3FW, SD58Q, SM2EKM, US1IW, US6EX, UY5AA, V31RR, XE1SOV, YS3CW, YV5OIE and Z36W

QSLS RECEIVED VIA MAIL: 1A0KM, 9L5VT, A25SL, AT25RG, BV100, ER4ER, GD6IA, J6/K8EAB, JY5HX, PJ2T, PJ4D, PJ4W, PJ4X, PJ6A, PJ7E, PX8J, PX8L, S21YX, ST2AR, SV1ASP/A, T6AF, TJ3AY, TL0A, TU2XZ, V73QQ, VK0KEV, VU7NRO, ZD7FT and ZL8X
6M - A92GR, N2TU, K3WC, NN4X and W6UB

QSLS RECEIVED VIA THE BUREAU: EM20UCC, RU3FN, S51ZZ, UA4FRL, UR4LWC, UT7L, UW5ZM, VO1KVT and YI9PT

T30, WEST KIRIBATI (Reminder). Operators Jacek/SP5EAQ and Jacek/SP5DRH will once again be active from the Pacific, but this time to activate Tarawa Island (OC-017) as T30AQ and T30RH, respectively, between March 1-17th. Activity will be on all bands 160-10 meters using CW, SSB and RTTY. Jacek, SP5DRH, will focus mainly on 160 meters and 30 meters RTTY, with some 80 meters. Jacek, SP5EAQ, is a SSB operator and will operate

on the remaining bands. They will have two separate stations using
Elecraft K3/100 with 600w amps. Antennas are: 18m high Spiderbeam poles
(few 9m long poles) and a GP5 antenna by SP7GXP. They will try to operate
at the same time. Rys, SP5EWY, will be their pilot station for this
operation. QSL via their home callsigns. For more details and update,
visit their Web site at: http://www.sp5drh.com/t30

TF, ICELAND. Siggi, LX1NO/TF3CW, will be active as TF3W, the IRA (Islenskir
Radioamatorar) club callsign, during the ARRL DX SSB Contest (March
5-6th) as a Single-Op/Single-Band (20m) entry. QSL via TF3IRA.

V2, ANTIGUA. Operators Bob/W4OWY and Mark/W9OP will once again be active
as V25WY and V25OP, respectively, between March 8-18th. Activity will be
on 160-6 meters using CW, SSB and RTTY. QSL via their home callsign or
by the Bureau. Logs will also be uploaded as before to LoTW and eQSL.

VR, HONG KONG. Charlie, VR2XMT, has been quite active recently on 15
10 meters SSB. Other activities also include 20 and 17 meters SSB
with some RTTY on 20 meters. Since Charlie is no longer the member of
the Hong Kong Amateur Radio Transmitting Society (HARTS), PLEASE DO NOT
QSL VIA THAE BUREAU. Also, No eQSL, LoTW and QRZ Logbook. QSL only direct
with geen stamp(s) or valid IRC(s), and a Self-Addressed-Envelope. Visit
his Web page at: http://www.vr2xmt.com

VU4, ANDAMAN ISLANDS (Update). Members of the Amateur Radio Society of
India (ARSI) who plan to be active as VU4PB from Port Blair, between
March 15-31st, now have a survey/poll on their Web page for "bands and
modes" needs. Go to: http://arsi.info/dxpeditions/vu4pb-mar-2011
The group is also looking for sponsors to help off-set their costs.
A PAYPAL account is available.

ZA, ALABANIA. Operators Vittorio/I2GPT, Roberto/IK2PGM, Paolo/IW2HKW,
Dimitri/IW2JOP, Giorgio/IZ2BKP and Marco/IZ2QCP will be active as ZA/I2GPT
from Albania between March 9-13th. Activity will be on 40/30/20/17 meters
using CW and SSB. QSL via I2GPT, by the Bureau or direct.

> No, the fact is that there isn't much "current stuff" in existence.

The "curent stuff" is the stuff currently in production, which is
predominantely with glass panels.

Of course this has nothing to do with your clain that airplanes will display
the identifier of NAVAIDS on the panel; this is nonsense.

No NDB identifies itself with anything other than morse code.

Some VORs and VORTACs voice identify and all of them identify with morse
and there are no other means of identification.

Aviation radios do not contain morse decoders.

The ID is sent so slowly it is quite easy to write down the dots and dashes
as they are sent and compare them to the dots and dashes that are printed
on the navigation charts if one doesn't know morse code, so anyone saying
knowledge of morse is required to fly is talking out their ass.

You, like a spoiled child, have fixated on the babbling of some other troll
to justify your trolling.

It is currently in production, but the rate of production is
extremely slow. Therefore, there are very few of those planes in
existence. When you see a single engine prop plane flying, that is, an
actual plane flying in the real world, you can safely bet that it is not
equipped with a glass cockpit. Of course, pictures of new airplanes in
catalogs are much better equipped.

Any reasonably current glass cockpit will display named waypoints
superimposed over weather data. The newest ones will include aviation
maps. See Honeywell's and Rockwell Collins' web sites for examples. You
have fixated on a single type of "aeronautical beacon."

> You, like a spoiled child, have fixated on the babbling of some other troll
> to justify your trolling.

You, like some fool who has been exposed as a poseur can only vilify
your opponent, because you have no facts at your service. What troll
have I quoted? I have cited the FAA's downloadable database, B/CA
magazine, Honeywell and Rockwell Collins. Where is the questionable
source? If you had any integrity at all, you would have apologized for
your comment that I probably didn't know what a 'glass panel' was.
You have responded emotionally to a post that has challenged your
holy Morse code. You became further enraged when your dinky little

flying eggbeaters were ridiculed as obsolete toys. I don't know what you fly, but I hope you don't carry paying passengers. You lack the emotional stability for that sort of responsibility.

> <snip irrelevant babble unread>

If you didn't read it, how did you determine that it is irrelevant?

Yep, and the GPS data, which is what that is, comes from the same data the
navigation charts come from, it doesn't come over the radio.

You can see the NAVAID on the GPS display or you can see it on the paper
chart, but neither of those will tell you that you have the NAV radio
tuned to any particular NAVAID.

No, it is directly on topic. The point is that real planes (dinky
little ones, that is) that actually exist in the real world don't have
glass cockpits. They have crude "steam gauges" and not many of them, at
that.

> > Any reasonably current glass cockpit will display named waypoints

Nope.

The topic was about what is the state of the art.

Old stuff is obviously not state of the art and irrelevant to a dicsussion
of the state of the art.

Learn to read what is written instead of what you want to be written.

Yes, you can look up the map position and identifier information on a
paper chart or the electronic equivelant on a glass display.

No, there is no existing way to positively identify the SIGNAL from any NDB
or a VOR/VORTAC that does not voice identify other than listening to the morse
identifier.

No, you do not need to "know morse code" to do that.

Yes, you have to listen the the "beeps".

No, the topic was beeps - their uselessness and their obsolescence.
You dragged in airplanes in response to my recounting of the way that
some Morse code zealots pointed to the fact that beeps were "allowed" in
certain "aeronautical beacons" as proof that beeps were still "needed."
You also interpreted "aeronautical beacons" as narrowly as possible so
that you, too, could argue that beeps really were needed. That was
disingenuous.
You then went on the allege that I had no idea what a glass cockpit
was. In light of my subsequent posts, that allegation is obviously
absurd. I pointed out that if you had any integrity, you would have
apologized. That you did not was craven.

[...]

Yeah, until you drifted off into la-la land talking about non-existant
aircraft systems that auto-identify NAVAIDs due to your confusion and
ignorance of what appears on map displays.

> You dragged in airplanes in response to my recounting of the way that
> some Morse code zealots pointed to the fact that beeps were "allowed" in
> certain "aeronautical beacons" as proof that beeps were still "needed."

Actually there is only two types of "aeronautical beacons" still in existence
today, i.e. NDBs and marker beacons, and identification by morse is required
for NDBs is it is the only identification transmitted.

Marker beacons do identify after a fashion in morse, but given their coverage
and the tone encoding, it isn't really necessary.

> You also interpreted "aeronautical beacons" as narrowly as possible so
> that you, too, could argue that beeps really were needed. That was

Posting-Frequency: posted monthly
URL: http://www.panix.com/~rram/usenet/rram/index.html

Changes followed by "|".

After a 30-day public discussion and feedback period to gauge reader
opinions in March of 2009:

http://groups.google.com/group/rec.radio.amateur.moderated/browse_thread/thread/d7d337db35
f23326

the rec.radio.amateur.moderated Moderation Team has decided to consider
amending its charter, and permit limited simultaneous crossposting to
rec.radio.amateur.moderated and one other unmoderated
amateur-radio-related discussion newsgroup. We are currently trying
this on a temporary basis (90 days, through early July 2009), and adopt
it permanently if successful.

Approved rec.radio.amateur.* newsgroups are those that are currently
listed in the latest version of the "List of Big Eight Newsgroups" which
is crossposted monthly to news.announce.newgroups, news.groups, and
news.lists.misc.

Approved alt.radio.amateur.* and alt.ham-radio.* newsgroups are those
that have been created consistent with the suggestions in "So You Want
to Create an Alt Newsgroup" at:

http://www.faqs.org/faqs/alt-creation-guide/

Approved regional hierarchy newsgroups are those that contain either
"radio.amateur" or "ham-radio" in their names, including
uk.radio.amateur and aus.radio.amateur.misc.

We will make every reasonable effort to keep our list of approved
newsgroups up-to-date. In case we have overlooked any, and a submission
is rejected in error as a result, the rejected submitter can E-mail us
at our administrative contact address (in the signature at the bottom of
this article, and the default Reply-To for the rejection message)
requesting that it be added, and that the article be approved. We may
still choose to reject articles crossposted to any alt.* newsgroup with
an inappropriate name, including obscene language, embedded
name-calling, or encouragement of unlawful conduct.
```

DXNL 1717 - Mar 2, 2011
DX Newsletter

a free and weekly service of
DARC Committee "DX and HF contesting"
(http://www.darcdxhf.de)

editor: Helmut Schlaffer, DL7MAE
(direct: dxnl@dxhf.darc.de)

translation by: Bob, DL7VOA
(direct: dl7voa@darc.de)

CY0 - SABLE ISLAND, NA-063
The well planned and two times postponed DXpedition to Sable (NA-063)
is scheduled to take place from Mar 7-15. Even the team changed since
some of the originally planned operators didn't get a holiday now.
The new team includes Randy,N0TG, Jeff,N1NSB, and Wayne,K8LEE.
They want to run three stations simultaneously in CW, SSB and RTTY on
160m-6m. They will use a "Battle Creek Special" for 40m/80m/160m, three
verticals, at least one wire antenna and a yagi.
All direct and bureau QSL cards should be sent to N0TG.
They ask everybody to use the "ONLINE QSL REQUEST Service" (OQRS) on
their DXpedition website for direct and bureau QSLs (see "How to QSL"):
http://www.CY0dxpedition.com
The CY0 frequency plan is as follows (QRGs in kHz):
CW SSB RTTY
160m 1826 1843 ---
80m 3523 3781 3585
40m 7023 7140 ---
30m 10106 --- 10140
20m 14023 14130 & 14190 14080
17m 18072 18145 18108
15m 21023 21295 21089
12m 24892 24945 ---
10m 28023 28450 28089
6m 50090 50125 ---

HI - DOMINICAN REPUBLIC, NA-096
John,KL7JR, and his XYL Claire,WL7MY, will show up in SSB on 80m-10m
signing HI3/KL7JR from Hispaniola Island (NA-096) from March till May.
The QSL route can be found on QRZ.com.
You can arrange skeds via the e-mail: KL7JR@yahoo.com
Phootos of their antennas can be found on the websites:
http://www.hamuniverse.com/kl7jrhorizminibeams.html and

http://www.hamuniverse.com/kl7jrslopingdelta806.html

HK - COLOMBIA
Cody,HK3/KC2LSD, will stay in Bogota from Mar 4-16. During this time
he will work in RTTY, PSK31, CW and SSB on 40m-10m.
QSL via homecall, also via LoTW.

J6 - ST LUCIA, NA-108
Bob,J6/G3PJT, will be active from the northeast of St. Lucia (NA-108)
from Mar 8-15. He will use a K2 transceiver with verticals and prefers
working on 80m and 30m. He also plans to take part in the upcoming
RSGB Commonwealth Contest. QSLs should be sent via Bob's homecall.

P4 - ARUBA, SA-036
Tim,WD9DZV, will show up as P40D from Mar 8-13. Tim will work in
"holiday style" in several modes on almost all bands. QSL via WD9DZV.

PJ7 - SINT MAARTEN, NA-105
Massimo,I8NHJ, and Pier,W1NA, will be QRV as PJ7DX from the island
of Sint Maarten (NA-105) from Mar 2-7. They will work mostly in CW
and plan to take part in the ARRL DX SSB Contest.
Unfortunately QSLs ONLY direct via I8NHJ.

V2 - ANTIGUA AND BARBUDA, NA-100
Bob,W4OWY, and Mark,W9OP, will be active in CW, SSB and RTTY on 160m-6m
signing V25WY and V25OP from Mar 8-18.
QSLs via bureau, direct, LoTW or eQSL to their homecalls.

V3 - BELIZE
Ken,N2ZN, is going to visit V31MD in Placencia from Mar 2-8. He will
use V31AM in the ARRL DX SSB Contest and plans to work mostly in CW
and digital modes preferably on the WARC bands.
QSLs via bureau, direct or LoTW to N2ZN.

V5 - NAMIBIA
Gert,V5/ZS6AYU, plans to show up from several places in Namibia from
Mar 6-16. He will work "holiday style" in CW only on 30m-15m mostly
during the late afternoon or early morning.
QSL cards should be sent only direct via his homecall.

VP9 - BERMUDA ISLANDS, NA-005
Mark,VP9/AA1AC, will be QRV from Hamilton Parish on Bermuda (NA-005)
from Mar 7-12. More details are not known yet.
QSL cards should be sent via bureau or direct to his homecall.

XF4 - REVILLA GIGEDO ARCHIPELAGO, NA-030
The international team of Mark,XE1B (team lead), Fernando,EA5FX,
Javier,EA5KM, Elmo,EA5BYP, Javi,EC4DX, Vicente,EA5AFP, John,N5NTP, and
Santos,EA4AK, will activate the archipelago Revilla Gigedo (NA-030)
with two or three stations signing 4A4A from Mar 3-20. Their QTH will
be Socorro Island, sunrise around 1320 UTC, sunset around 0100 UTC.
The team works in CW, SSB and digital modes on 160m-10m, using yagis
on the high bands and verticals on the lowbands.

The DXpedition website can be found at http://www.revillagigedo2011.com
The frequency plan of 4A4A (QRGs in kHz) is:
CW SSB RTTY
160m 1824 1850 ---
80m 3514 3790 3582
40m 7014 7065/7165 7038
30m 10114 --- 10140
20m 14014 14195 14082
17m 18084 18140 18102
15m 21014 21295 21082
12m 24904 24940 24922
10m 28014 28475 28082
6m 50104 50140 ---
Their QSL manager is David,EB7DX (see http://www.eb7dx.com).
QSL cards will be confirmed only direct or via LoTW.
Please check also following websites: http://www.youtube.com/user/EA4AK
und for updates: https://twitter.com/EA4AK

XU - CAMBODIA
Nob,JA1FMZ, puts Cambodia on the air signing XU7FMZ from Mar 2-28.
This operation is holiday style in SSB on 20m-10m. He also plans to
join the ARRL DX SSB Contest and the CQWW WPX SSB Contest (Mar 26/27).
QSL via JA1FMZ, direct, eQSL oder LoTW.
See also: http://DXvacation.com

5V - TOGO
Franco,I1FQH, is staying in the village Kpalime in central Togo and
works as 5V7DX on 40-10m until Mar 4. He uses a Spiderbeam on 20m-10m
and a homebrew vertical on 30m/40m plus amplifier.
Franco prefers QSLs via LoTW, but bureau or direct are possible also.
Logs can be found at: http://dx.qsl.net/cgi-bin/logform.cgi?5v7dx
Interested DXers may also like Franco's YouTube Channel on:
http://www.youtube.com/user/i1fqh

7Q - MALAWI
Harry,7Q7HB, is back in Malawi and will stay there for a few months.
Harry is working there, so amateur radio is only his hobby. You can
find him on HF working in CW and digital modes, on request also SSB.
QSL via G0IAS, direct only.

9M6 - EAST MALAYSIA
David,9M6/VO1AU, is now in East Malaysia from Mar 2-15 and announced to
join also the Commonwealth (BERU) and ARRL DX SSB Contest in this time.
David will stay in Southeast Asia and Japan for the next two years and
plans to show up as VO1AU/BY1TTY, VO1AU/BY1RX, VO1AU/BY1DX, JG1RSL and
VR2/VO1AU. The QSL manager for all his activities is Daniel,VO1MX.
He confirms via QSL bureau, direct or LoTW.

ITALY, SPECIAL EVENT STATION
IO4UI can be found on the bands between Mar 1 and Sep 30. They are
celebrating the 150th anniversary of the unification of Italy.
All QSOs will be confirmed via bureau automatically.

If you can't wait and need a direct QSL, please send it to I4JEE.

SILENT KEYS: You may have read or seen it in the news that pirates hijacked
the sailing vessel Quest near the Omani coast on Feb 18. The crew of
four people, all American citizens, was killed. Three of them were
radio amateurs, namely Scott Adam,K9ESO, his XYL Jean,KF6RVB, and
Bob Riggle,KE7IIV. More info can be found on: http://www.arrl.org/news
Other DXers who put their keys away are: Winit Kongprasert (HS1CKC),
radio pioneer in Thailand and vice president of the RAST,
Jean-Jacques Hiblot (F5SHE), founder of the "UK Six Metre Group",
Steve Richardson (G4JCC), Len Hopkinson (ZL3IE) and
Alistair Campbell (ZS5MU), founder of the African Maritime Mobile Net.

LINKS: Current SOTA activities (mountain summits) are announced at:
http://www.sotawatch.org

Detailed information about current VHF activities can be found on the
VHF DX portal "Make More Miles on VHF" at: http://www.MMMonVHF.de

UPCOMING CONTESTS

Mar 1: YL CW Party
Mar 5/6: ARRL International DX Contest, SSB
Mar 5/6: Open Ukraine RTTY Championship

IOTA collected by Fredy,DE0MST (e-mail: iota@dxhf.darc.de)

Island activities:
AN-016, various, Antarctica (main): Lars,SM4TUV, is working as 3Y8XSA from
the Troll station on Dronning Maud Land until the end of 2011.
QSL via homecall (bureau/direct).

EU-024, IS0, Sardinia (main): The station II0IDP is working from Sardinia
from Mar 5-20 and can be counted for the Italian Navy Coastal Radio
Stations Award. QSL via IS0IGV (bureau/direct).

EU-041, I*0, Maddalena archipelago: II0ICH is also good for the 5th Italian
Navy Coastal Radio Stations Award and works from La Maddalena Island
from Mar 5-20. QSL via IM0QMA (bureau/direct).

NA-062, W4, FL State Group (Florida Keys): Pete,VE3IKV, will be active from
Key West signing VX3X/W4 from Mar 6-18. QSL via VE3IKV (bureau/direct).

OC-017, T30, Gilbert Islands: Jacek,SP5EAQ, and Jacek,SP5DRH, are working
as T30AQ and T30RH from Bonriki Islet (Tarawa atoll/Kiribati) from
Mar 1-15. QSLs via homecalls (bureau/direct).

OC-201, ZL, North Island's Coastal Islands: From Mar 7-11 John,9M6XRO, will
be QRV as ZL/GD3OOK from Waiheke Island. QSL via M0URX (bureau/direct).

Lighthouse activities (WLOTA/ARLHS/ILLW)

HS0ZJF/8 LH new? Koh Yao Yai Mar 10-22

II0IDP LH 1608 Sardinia Mar 5-20
II0ICH LH 1632 Maddalena Mar 5-20

Is that the extent of your rebuttal - word usage? If I had said that
I denigrated beeps, derided beeps, trivialized beeps or villified beeps
would you have been forced to respond the the more substantive parts of
my post?

> <remaining kook babble snipped>

I assume that the "kook babble" is the part where I pointed out that
you are a barely qualifed wannabe who is posing as an expert. Once
again, it is reposed, below.

You deleted the most important part, where I discussed your attitude
and your lack of integrity. Be that as it may, I looked you up in the
FAA database and the FCC and QRZ ham radio databases. There are two
Penninos with pilots licenses, but neither one is exactly an Airline
Transport Pilot, if you get my drift, captain.
Poseur.

AND

You have done nothing to refute either charge. You have repeatedly
deleted without comment my charge that you are a minimally qualified
poseur, with either a PP or a PS rating, not qualified to tell others
that they are "clueless." That you refuse to address that says quite a
bit about you.

Is that the extent of your rebuttal - word usage? If I had said that
I denigrated beeps, derided beeps, trivialized beeps or vilified beeps
would you have been forced to respond the more substantive parts of my
post?

> <remaining kook babble snipped>

I assume that the "kook babble" is the part where I pointed out that
you are a barely qualified wannabe who is posing as an expert. Once
again, it is reposted, below.

You deleted the most important part, where I discussed your attitude
and your lack of integrity. Be that as it may, I looked you up in the
FAA database and the FCC and QRZ ham radio databases. There are two
Penninos with pilots licenses, but neither one is exactly an Airline
Transport Pilot, if you get my drift, captain.
Poseur.

Haw! Haw! Haw! (and the sound of knee slapping)

> <snip raving babble>

So tell us, Jim Jim, which Pennino are you? Are you the one in New Jersey who has a student pilot's license; a glorified learners' permit? Are you the one in California who has a private pilot's license with a rating of "airplane single engine land?" Can you rent a plane at the podunk county airport with a license like that? I'll bet you're one of those private pilots who wears a uniform (with epaulets) when flying.

Yep, lunatics are often laughing for no reason when they aren't ranting
about things that don't exist other than from the voices in their head.

<snip lunatic babble>

You seem to have abandoned all ties with rationality. You no longer
even attempt to respond to what is posted. At this point, I am not going
to waste any more time on you. Just to review, I have shown you to be an
underqualified poseur who is completely without integrity. You have been
proven wrong in your allegation that I didn't know what a glass cockpit
was, but you were too cowardly and craven to retract your insults.
Of course, when you deride, denigrate, trivialize, vilify or
otherwise attack beeps, this is the element that comes running to their
defense. If this is all that's left, then you must face the facts; it's
over for beeps.

*****************************************
The ARRL Contest Update

Published by the American Radio Relay League
*****************************************

March 2, 2011

Editor: Ward Silver, N0AX <rate-sheet@arrl.org>

==> IN THIS ISSUE

- ARRL DX Phone - Sideband Serenade
- Sprint Summits - SNS/NS, ARS, CWops, QRP, NAQP
- Hamvention Awards for 2011
- Who You Callin' a LOFAR?
- Webinar Triplets
- IARU HF Championship Extended Results
- Preliminary SS Results and a Hat Trick
- Can You Hear Me Now?
- Full Duplex at Stanford
- An EZ Choice

NEW HF OPERATORS - THINGS TO DO

After cracking your CW knuckles in the ARRL DX CW contest, this
weekend's ARRL DX Phone contest will test tongue-tied transmissions.
It's geomagnetically stormy upstairs as this issue goes to press, but
persevere - if you hang in there and the competition doesn't...you may
prevail!

BULLETINS

No bulletins in this issue - although you should all take time out to
write your Congressional representative about House Bill HR 607
<http://www.arrl.org/news/arrl-asks-members-to-write-in-opposition-to-hr-607>.

BUSTED QSOS

I was informed that "Leavin' On A Jet Plane" was originally by John
Denver and Dr Beldar has been gently disabused of his misattribution to
Peter, Paul, and Mary.

CONTEST SUMMARY

Complete information for all contests follows the Conversation section

Mar 5-6
```

- SNS and NS Weekly Sprints--CW (Mar 4)
- ARRL Int'l Phone DX Contest
- Open Ukraine RTTY Championship
- ARS Spartan Sprint--CW (Mar 8)
- CWops Monthly Mini-CWT Test (Mar 9)
- John Rollins Memorial DX Contest--CW (Mar 9)

Mar 12-13

- Worldwide EME Contest
- RSGB Commonwealth Contest--CW
- AGCW QRP Contest--CW
- QRP ARCI HF Grid Square Sprint--CW
- EA PSK31 Contest
- Idaho QSO Party
- North American RTTY Sprint
- Wisconsin QSO Party
- CLARA and Family HF Contest (Mar 15)

==> NEWS, PRESS RELEASES, AND GENERAL INTEREST

The Contest Update would like to congratulate all winners of the 2011 Dayton Hamvention <http://hamvention.com/> awards. The Amateur of the Year is Shirley Roberts, N8LX of Dayton, OH for her record of public service. The Albemarle Amateur Radio Club, WA4TFZ, of Charlottesville, Virginia was named Club of The Year for exemplary contributions in public service, emergency communications and youth recruiting. The Technical Excellence Award went to a familiar name, Roy Lewellan, W7EL and more about Roy is written in the Conversation section of this issue.

WRTC 2014, Inc. <http://www.wrtc2014.org/>, host of the 2014 World Radiosport Team Championship competition, is pleased to announce that it has received a significant financial contribution from the Northern California DX Foundation <http://www.ncdxf.org/> (NCDXF). "We appreciate this early show of support from NCDXF," said Doug Grant, K1DG, Chairman of WRTC-2014. "We intend to follow the example set in previous WRTC competitions to provide a high level of competition on an unbiased playing field. In addition, we intend to use the event to promote amateur radio competition to a wider audience inside and outside the hobby." To provide assistance with WRTC-2014 fund raising efforts, the Northern California DX Foundation has established a special account to receive tax-deductible donations of $100 or more from individuals. Donations to this account should be made by checks payable to NCDXF, but with the notation "WRTC-2014," and mailed to the WRTC-2014 Fund, NCDXF, Rusty Epps W6OAT, 651 Handley Trail, Emerald Hills, CA 94062 USA. For information on sponsorship, or for general information about WRTC-2014, contact WRTC Chairman, Doug Grant, K1DG, via e-mail at k1dg@wrtc2014.org. This is a good opportunity to help the next WRTC get off to a fast start!

The North Coast Contesters are proud to announce that Scott Redd, K0DQ <http://www.arrl.org/news/scott-redd-k0dq-the-biggest-gun-of-all> will

be the featured speaker during the 19th Annual Dayton Contest Dinner <http://contestdinner.com/> on Saturday, May 21, 2011 at the Crowne Plaza in downtown Dayton, Ohio. K0DQ was the operator behind the impressive WW1WW <http://lists.contesting.com/pipermail/3830/2011-February/218464.html> all-band effort last weekend in the ARRL International DX CW contest and is an engaging speaker.

Tony WA8RJF invites all Weak Signal VHF, UHF and Microwave enthusiasts to the 16th VHF Weak Signal Group <http://www.qsl.net/kb8vao/DAYTON%20HAMVENTION%202011.htm> banquet (no, you won't have to whisper) to be held on Friday evening, May 20th, 2011 at the Doubletree Dayton Downtown Hotel, 11 South Ludlow St. Dinner begins at 7:15 PM, followed by Dana Whitlow, K8YUM presenting "Noise at Arecibo - It's Not Just the Coqui". Reservations are required at a cost per person of $35.00 which includes valet parking. Send a check and an SASE to: Tony Emanuele WA8RJF <WA8RJF@ARRL.net>, 7156 Kory Court, Concord Township, Ohio 44077-2221, including the names and calls of all attendees as well as an email address.

Geoff W0CG/PJ2DX reports that PJ2T's log for the recent ARRL DX CW contest is the first to have broken the 10 million-point barrier in that contest with a claimed score <http://www.pj2t.org/ccc/arrl.cw.2011.htm> of 10.8 megapoints from 10,345 QSOs. Will the record still stand after the log checking process? Tune in later this year for the final results!

Don W7WLL, the "K" sorter for the W7 QSL Bureau, cautions us that there are maximum weight, maximum size, and other surcharges for certain conditions when calculating postage. If your package or envelope is anything out of the ordinary, read the fine print when using the USPS postage calculator <http://postcalc.usps.gov/>.

The 160 meter band was full of signals from end to end last weekend during the CQ 160 Meter WW SSB contest. Numerous correspondence noted that this was the first time for such complete occupancy of Top Band - all the way to 1.999 MHz! Yet not all hams have full access to the band. Henk PA5KT's online table of 160 meter allocations <http://wiki.contesting.com/index.php/160m_frequency_allocations> helps you find where the DX may transmit - the rest is up to you!

The May 1953 QST article by W3FQB, "The Man Who Broke the Bank" certainly seems prescient in its anticipation of station automation. ARRL members can find the article online <http://www.arrl.org/qst> for some amusing reading. (Thanks, Tim K3LR)

Web Site of the Week - Not a Top Band array, Europe's continent-wide Low Frequency Radio Array (LOFAR) <http://www.astro.rug.nl/%7ELofarEoR/> radio telescope combines some simple antennas with distributed computer processing to create a huge telescope tuning 115 to 190 MHz. The first radio "pictures" are just being delivered - is anybody out there during the VHF+ contests?

WORD TO THE WISE

Jim K1TN contributes another pair of QST <http://www.arrl.org/qst>articles <http://www.arrl.org/qst> predicting technology the modern radiosport participant will find familiar: "The Mind of the Contester," (July 1990) and "Packet With a Purpose," (August 1990).

==> SIGHTS AND SOUNDS

The Potomac Valley Radio Club (PVRC) <http://www.pvrc.org/> has two excellent contesting webinars lined up for March. On Wednesday, March 9 at 9 PM EST, World Radio Online propagation editor, Carl Luetzelschwab K9LA will discuss several topics pertaining to HF propagation. And on Sunday, March 13 at 2 PM EDT (note the time change to DST) CQ WPX Contest Director, Randy Thompson K5ZD will hand out some tips for fun and success in WPX. Registration links for both presentations are posted on the PVRC website. In addition, the K3LR webinar on Contest University is also online in the Recorded Webinars. (Thanks, Ken K4ZW)

Rick NQ4I has posted a video about NQ4I CQWW SSB <http://www.nq4i.com/>, shot, edited and published by Lu, W4LT.

Celebrate the 100th birthday of "Uncle" Leo Meyerson, W0GFQ <http://www.amfone.net/Tech/wrl/>, one of ham radio's legends, as he is interviewed by NBC's Willard Scott on "The Today Show" on Wednesday morning, March 9th. A mentor to many, Leo was the man behind the World Radio Lab "Globe" and "Galaxy" equipment used by so many in the 1950's, 1960's and beyond. (Thanks, Gene W4IMT)

You can do what off the Moon? The AMSAT <http://amsat.org/> bulletin ANS-051 notes that a video <http://tinyurl.com/6kmr7nf> of Earth-Moon-Earth (EME) station HB9MOON demonstrating moon-bounce as part of the Google Science fair experiment, "How do you measure the distance between Earth and the Moon?"

How did the world's first transistor work? Here's an interesting video <http://www.dump.com/2010/12/10/how-the-first-transistor-worked-video/> on the subject. (Thanks, Brian VE5RDV)

Is the word "ruins" a verb or a noun in the video title, "Marconi ruins surface in Wellfleet <http://www.youtube.com/watch?v=do47EfKtDSM&feature=player_embedded>"? Watch and find out! (Thanks, Guy N7UN)

I like novel visualizations of data sets (I need a hobby, apparently) such as this animation of Twitter network retweets <http://gephi.org/2011/the-egyptian-revolution-on-twitter/> at the time of Egyptian president Mubarak's resignation. What would a big contest look like if presented this way?

Rich NU6T found visualizing 1 watt per square meter to be difficult, but recommends this photo <http://www.ecd.bnl.gov/steve/watt.html> as a good training aid.

==> RESULTS AND RECORDS

The IARU HF Championship writeup <http://www.arrl.org/contest-results-articles> by Carl K9LA is now online in extended form including extra material from the W1AW/8 hosts and operators. Hustling to get the Sweepstakes results out, the hard-working results authors Kelly VE4XT and Steve N2IC have provided preliminary results <http://www.arrl.org/contest-results-articles> for both modes of the November 2010 SS. The full QST and extended online article packages will be published in the weeks ahead. (Thanks, ARRL Contest Branch Manager, Sean KX9X)

Preliminary results for the February CW Sprint <http://www.ncjweb.com/sprintcwprelim.php> are now posted online. Who is the operator that achieved the coveted "Hat Trick"? (Thanks, CW Sprint Manager, Tree N6TR)

A summary of the RAC Canada Winter Contest logs received <http://www.rac.ca/en/rac/programmes/contests/> and entry category for each has been posted. results from previous years are also online for your enjoyment. Please contact contest chairman, Sam VE5SF <Canadawinter@rac.ca> if you have questions, concerns, or feel there have been errors in the category assigned to your contest entry.

There are more than 500 kbytes of soapbox commentary <http://www.eskimo.com/%7Emwdink/3830/> for the ARRL DX CW contest as captured from 3830 claimed-score postings by Dink, N7WA.

OPERATING TIP

Rick "The Locust" K6VVA was operating from KP2CW in the ARRL CW DX contest - by remote control, no less - and noted not just the usual packet-pileups, but "everyone was exactly ZERO BEAT (or within a few Hz) apparently as a result of point-and-click with no single station loud enough to rise above the pack." Needless to say, this makes high-rate operation well-nigh impossible. The technology of cycle-resolution frequency control and accuracy has unintended consequences! The solution? When selecting spots point-and-shoot style, take your hand off the mouse and wiggle the big knob in the middle of your radio before launching your call sign.

==> TECHNICAL TOPICS AND INFORMATION

Wouldn't it be great to go back after a contest and generate a report of your signal strength compared to other stations in your area? For CW contests, that capability exists today by using the Reverse Beacon Net's Analysis <http://reversebeacon.net/analysis> tool. Pete N4ZR explains, "It is graphical and only handles one skimmer and one 24-hour day at a time, but up to 10 stations can be compared at once. It's pretty informative, particularly because the graphical representation and your eye can filter out the odd variations and easily see trends, like who opens the band first, and who is stronger in which part of the opening." Game on!

Larry N7DF has found a website
<http://www.karlovsky.info/sid/temphtml.htm> with some interesting
information to help us figure out what goes on in Top Band propagation
if VLF conditions relate to MF conditions.

Regarding the use of Morse code for communication with folks with
compromised speech or textual abilities, Frank KR1ZAN notes that Thomas
King has a book on the subject titled, "Modern Morse Code in
Rehabilitation and Education: New Applications in Assistive
Technology".
<http://search.barnesandnoble.com/Modern-Morse-Code-in-Rehabilitation-and-Education/Thomas
-Wayne-King/e/9780205287512>

If you know a puzzle fan, then maybe this Design News "Gadget Freak
<http://www.designnews.com/article/512795-Gadget_Freak_Case_181_Switches_and_Hits_for_Nath
an.php>"
case will spark your creative juices in creating a custom conundrum
just for them!

Technical Web Site of the Week - Multi-multi station owners, rejoice!
>From Slashdot <http://slashdot.org/> comes the news that "Scientists at
Stanford University have built a radio that can transmit and receive at
the same time
<http://www.pcpro.co.uk/news/365275/two-way-radio-breakthrough-doubles-wi-fi-performance>
on the same frequency." I wonder if those scientists ever operate at
W6YX? Don't get too excited - it's only for WiFi - but can 20 meters be
far behind?

==> CONVERSATION

An EZ Choice

In case you hadn't heard the news, the Dayton Hamvention's Technical
Excellence Award for 2011 has been given to Roy Lewellan, W7EL, author
of the EZNEC <http://www.eznec.com/> antenna modeling program. It's
entirely appropriate that Roy was recognized for making
professional-quality antenna modeling software available and affordable
to hams!

While there are other fine antenna modeling programs available,
EZNEC has become the standard tool used by amateurs world-wide for
antenna design and experimentation. Its modest cost, accurate results,
and ease of use have completely changed the game of amateur antenna
design. In the scope of its effects on and benefits delivered to
amateurs, it has been Promethean. It is to Amateur Radio what SPICE is
to analog electronics and the forward pass to football.

After Roy's mid-1990's introduction of ELNEC (the MS-DOS precursor to
EZNEC), the world changed. An amateur (i.e. - me, for instance) could
suddenly create, enter, simulate, evaluate, and revise an antenna
design on a personal computer in a continuous flow of development. The
results were actually representative of the actual antenna's
performance, the effects of ground could be included, and the output
was graphic - not tabular. ELNEC gave way to EZNEC and we were on our

way.

Those of us that have been around a while remember the old "cut and try" (and try, and try, and try...) era of antenna design and construction before computer modeling. If we were fortunate enough to know a professional antenna designer, we might get a few "runs" on their software but there was no such thing as "interactive design". Graphic output of radiation patterns and SWR curves were a fantasy. Mostly, we had to take on faith the tables in handbooks and articles in magazines, cut and drill, then hope the resulting antennas would work for us while having little understanding of the subtleties involved in what makes an antenna work - or not.

If there was ever an instance that warranted the over-used phrase "paradigm shift", this was surely one. As a result, amateur experimentation in antenna design exploded, leading to many innovations such as new configurations of parasitic arrays, whole new classes of receiving antennas, antenna stacking design, and others too numerous to count. It is now expected that any new antenna design comes with a model - almost always an EZNEC model.

While as Larry W7IUV once said, "I don't think anyone has made an EZNEC-to-EZNEC QSO yet," somewhere an amateur is using EZNEC software right now to invent or improve or learn about an antenna in a way that was simply unimaginable before. Then they certainly will make that QSO and many more. A tip of the Contest Update cap to Roy Lewellan, W7EL.

73, Ward N0AX

==> CONTESTS

Mar 2 - Mar 16

An expanded, downloadable version of QST's Contest Corral in PDF format <http://www.arrl.org/contest-calendar> is available. Check the sponsor's Web site for information on operating time restrictions and other instructions.

HF CONTESTS

ARRL Int'l Phone DX Contest--Phone, from Mar 5, 0000Z to Mar 6, 2400Z. Bands (MHz): 1.8-28. Exchange: RS and state, province, or power. Logs due: Apr 4. Rules <http://www.arrl.org/contests>

SNS and NS Weekly Sprints--CW, from Mar 4, 0200Z to Mar 4, 0300Z. Bands (MHz): 1.8-14. Frequencies: Weekly on Thursday evenings local time. Exchange: Serial, name, and S/P/C. Logs due: 2 days. Rules <http://www.ncccsprint.com/rules.html>

Open Ukraine RTTY Championship--Digital, from Mar 5, 2000Z to Mar 5, 2359Z and Mar 6, 0800Z to Mar 6, 1159Z. Bands (MHz): 1.8-28. Frequencies: Multiple operating periods. Exchange: Regional abbreviation and serial. Logs due: Apr 4. Rules <http://uarl.com.ua/openrtty>

ARS Spartan Sprint--CW, from Mar 8, 0200Z to Mar 8, 0400Z. Bands (MHz): 3.5-28. Frequencies: Monthly on the first Monday evening local time. Exchange: RST, S/P/C, and power. Logs due: 2 days. Rules <http://www.arsqrp.blogspot.com/>

CWops Monthly Mini-CWT Test--CW, from Mar 9, 1100Z to see Web site. Bands (MHz): 3.5-14. Frequencies: Multiple operating periods, monthly on the second Wednesday, 18 to 28 kHz above band edge. Exchange: Name and member number or S/P/C. Logs due: 2 days. Rules <http://www.cwops.org/onair.html>

John Rollins Memorial DX Contest --CW, from Mar 9, 2300Z to Mar 10, 2300Z and Mar 12, 2300Z to Mar 13, 2300Z. Bands (MHz): 7,14. Frequencies: Multiple operating periods. Exchange: RS, name, and S/P/C. Logs due: 4 weeks. Rules <http://www.antiquewireless.org/>

RSGB Commonwealth Contest--CW, from Mar 12, 1000Z to Mar 13, 1000Z. Bands (MHz): 3.5-28. Exchange: RST and serial (Commonwealth only). Logs due: 30 days. Rules <http://www.rsgbcc.org/hf/calendar10.shtml>

AGCW QRP Contest--CW, from Mar 12, 1400Z to Mar 12, 2000Z. Bands (MHz): 3.5-28. Exchange: RST, serial, class, AGCW number or NM. Logs due: Mar 31. Rules <http://www.agcw.org/en/?Contests:Semi_Automatic_Key_evening>

QRP ARCI HF Grid Square Sprint--CW, from Mar 12, 1500Z to Mar 12, 1800Z. Bands (MHz): 3.5-28. Frequencies: QRP calling frequencies. Exchange: RST, 4-digit grid square, QRP ARCI number. Logs due: Apr 12. Rules <http://www.qrparci.org/>

EA PSK31 Contest--Digital, from Mar 12, 1600Z to Mar 13, 1600Z. Bands (MHz): 3.5-28. Exchange: RST + serial or EA province. Logs due: 30 days. Rules <http://www.ure.es/>

Idaho QSO Party--Phone,CW,Digital, from Mar 12, 1900Z to Mar 13, 1900Z. Bands (MHz): 1.8-28, 50-440, Frequencies: CW 35 kHz above band edge; Phone 7.260, 14.260, 21.335, 28.470 MHz, plus 50, 144, 440 . Exchange: RS(T) and S/P/C. Logs due: 30 days. Rules <http://www.nx7tt.com/>

North American RTTY Sprint--Digital, from Mar 13, 0000Z to Mar 13, 0400Z. Bands (MHz): 3.5-14. Exchange: Both call signs, serial, name, and S/P/C. Logs due: 7 days. Rules <http://www.ncjweb.com/naqprules.php>

Wisconsin QSO Party--Phone,CW,Digital, from Mar 13, 1800Z to Mar 14, 0100Z. Bands (MHz): 3.5-28, 50+, Frequencies: CW 3.550, 7.050, 14.050; Phone 3.890, 7.230, 14.290, 21.350, 28.400. Exchange: WI county or S/P/C. Logs due: Apr 20. Rules <http://www.warac.org/>

CLARA and Family HF Contest --Phone,CW, from Mar 15, 1700Z to Mar 16, 1700Z and Mar 19, 1700Z to Mar 20, 1700Z. Bands (MHz): 3.5-28. Frequencies: Multiple operating periods. Exchange: RS(T), name, QTH, and CLARA . Logs due: Apr 15. Rules <http://www.claranet.ca/>

VHF+ CONTESTS

Worldwide EME Contest--Phone,CW, from Mar 12 , 0000Z to Mar 13, 2400Z.
Bands (MHz): 144, 10G+. Exchange: TMO/RS(T) and "R". Logs due: Jun 25.
Rules <http://www.dubus.org/>

Idaho QSO Party--Phone,CW,Digital, from Mar 12, 1900Z to Mar 13, 1900Z.
Bands (MHz): 1.8-28, 50-440, Frequencies: CW 35 kHz above band edge;
Phone 7.260, 14.260, 21.335, 28.470 MHz, plus 50, 144, 440 . Exchange:
RS(T) and S/P/C. Logs due: 30 days. Rules <http://www.nx7tt.com/>

Wisconsin QSO Party--Phone,CW,Digital, from Mar 13, 1800Z to Mar 14,
0100Z. Bands (MHz): 3.5-28, 50+, Frequencies: CW 3.550, 7.050, 14.050;
Phone 3.890, 7.230, 14.290, 21.350, 28.400. Exchange: WI county or
S/P/C. Logs due: Apr 20. Rules <http://www.warac.org/>

** IARU R1 March VHF Contest 2011 , 5-6th March **

As well as in past years, Matej, OK1TEH, did setup a list of
stations participating at the IARU R1 March VHF Contest 2011,
5-6th March. For details please do refer the following Page:
http://www.darkside.cz/qrv.php
SOURCE: Matej, OK1TEH at OK2KKW webpage

** Latest AU Opening Updated: 01. Mar 2011 at 20:17 UTC **

First aurorasignals were reported around 14.00. The aurora was
triggered by a C-class flare that followed a M1.1 flare on monday
In order to produce an intersection map of the position of the
Aurora cloud(s), we need reports from both stations who have been
involved in a QSO, including an accurate beam heading. Please use
LOGIN (http://www.mmmonvhf.de/au.php), and file your list of
QSOs by clicking: "Send your report" and follow the guidelines.

** NEW MoonNet-Reflector / Mailinglist **

One week ago the traditional Moon-net crash and put offline all
the subscribers, was not possible for nobody to be in contact via
the reflector. Only direct and private communication works. NLSA
who host the traditional Moon-net back to the ancient Moon-net
under the @nlsa.com domain but with several limitation on the

amount email per hour they can handle. As soon I realize the problematic I decide to open a Moon-net distribution Group but under the well know platform "Google Groups", similar reflectors like LINRAD runs in a perfect way in that platform. The central idea is to have a backup communication systems and don't depend in a single point of failure. The EME community is in contact each other thank that reflector and would be better if we run with the chance to have a backup way. For that reason I invite everybody to join the list, actually we are approximately 200 already and number increase per day, How join the list?, if you have a Google account go to: http://groups.google.com/group/moon-net?hl=en and join the group Moon-net, if you don't have and account or if you donï¿½t want to open one just send me and email to hb9dri at emeham.com and I will send you an invitation. 73 de Alex, HB9DRI

** Second edition of the Marathon 50 MHz **

IZ5HQB, Gabriele (iz5hqb"at"gmail.com) sent following message:
I wanted to announce that the next begins 01/05/2011 The second edition of the marathon 50 MHz organized by the "ARI Florence. "
All amateurs are invited to attend and can find all necessary information (regulations, log on-line charts) at the web http://www.arifirenze.it/maratona
SOURCE: tnx to IZ5HQB, Gabriele, direct to MMMonVHF

** UK Six Metre Group launch newsletter **

The United Kingdom Six Metre Group (UKSMG) has launched an initiative initially to UK radio clubs and societies, to keep them informed regarding operating on 50MHz. A bi-monthly newsletter will be e-mailed to club secretaries who have registered to receive it. The newsletter will contain a wide variety of information including practical operating tips. Much will be specifically targeted at the large number of operators who have not previously experienced the enhanced F2 propagation expected during the sun spot cycle peak in 2012. Any club secretaries who have not already registered to receive the newsletter can do so at www.uksmg.org/phplist

** BEACON SK4MPI **

After tonights NAC at SK4AO I got a hint from SM7GVF about MPI and when I at home checked the signal it is quite weak here, usually I have about 1 mV from the antenna. Propably the PA has tripped for some reason. I will try to get someone to make a quick check tomorrow, I have no possibility to do it myself. Maybe later this week if a reset doesn't help. Btw, is there possibly a solid state PA available, or parts for one? Current PA with 2 x 4CX250B runs normally at 200-250 W out at SK4MPI. Be aware it is continous service, it should preferrably be quite heavily overrated. Current exciter produce around 1 W, but propably a new PA should be accompained by a new exciter as well. Spare X-tal 72,206 MHz is available, so it is possible to construct new beacon without taking the old one out of service. Regards Jan, SM4HFI
SOURCE: tnx to Lasse, OH6KTL direct to MMMonVHF

** RADIO EXPEDITION SIERRA LEONE 2011 **

LATEST NEWS from Lance, W7GJ, dated 2011-02-27: As most of you probably already know, the 9L5MS operation is also taking a small 6m beam (5 element Tonna) and 500w for 6m. They are planning to be active on JT65A mode during at least some moonrises and moonsets (below 20 degrees elevation), depending on how much ground gain they are able to achieve at their QTH. The new dates planned for their operation are March 28 to April 18. Note that that entire period avoids the worst Degradation of the month and includes the best days of the month for 6m EME (April 12-17). Additional info is available on their website: www.sierraleone2011.com/sl_2011/home.php They do expect to have internet at their QTH in 9L, and plan to be on the ON4KST EME chat page when they are QRV. Please watch for them or propose skeds with them. This is the first ever 6m EME from 9L and should result in a number of new DXCC for stations who can arrange a mutual moon window with them. MNI TNX to the 9L5MS crew for this great opportunity! GL to all and VY
SOURCE: 73, Lance, W7GJ via : [Magic Band EME]

** T31A from AI47 in April **

Does anybody know of a 6m yagi that is available to loan to the T31A team? They will have JT65A capability and a kw from an ACOM 1000. They are willing to try some 6m EME on their horizon. I would think they should do very well with something like a 5 or 7 element M2 if they can use a short feedline and get it next to the water. They need to borrow a portable 6m beam that one of the team members can pack up and take on the plane with them. They are planning to be there during the last half of April. More details are on their website: http://www.t31a.com/ MNI TNX and VY 73
SOURCE: Lance, W7GJ via [Magic Band EME]

** HF and 50 MHz Activity from Liberia (EL) **

Silvano, I2YSB and his team (Vinicio IK2CIO, Angelo IK2CKR,
Marcello IK2DIA and Stefano IK2HKT) will be active from Liberia
(callsign TBA) from 31 March to 13 April. They plan to operate CW,
SSB and RTTY on 80-10 metres with three stations on the HF bands
and one dedicated station on 6 metres. QSL direct to I2YSB. Further
information, band/mode survey and Online QSL Request System can
be found at www.i2ysb.com. Once again Arturo IK7JWY will be the
pilot station for the expedition (it will be possibile to contact
him through the dedicated forum at www.hamradioweb.org/forums/
SOURCE: 425 DX News #1034

** HF and 50 MHz Activity, V2, ANTIGUA AND BARBUDA, NA-100 **

Bob,W4OWY, and Mark,W9OP, will be active in CW, SSB and RTTY on
160m-6m signing V25WY and V25OP from Mar 8-18. QSLs via bureau,
direct, LoTW or eQSL to their homecalls.
SOURCE: [DXNL] DXNL 1717 (Mar 2, 2011)

** 4A4A DXpedition - Revillagigedo (XF4) **

An international team of operators will activate the Revillagigedo
[aka Revilla Gigedo] Islands (IOTA NA-030, WFF XEFF-072, WW Loc.
DK48MS) as 4A4A from 4th to 19th of March 2011. Operators include
Marcos XE1B (team leader), Javier EA5KM, Elmo EA5BYP, Javi EC4DX,
Fernando EA5FX, Vicente EA5AFP, Santos EA4AK and John N5NTP.
DXpedition plans include to keep a CW team and a SSB team
simultaneously on the air at all times. Yagis will be used for the
top bands and verticals for the low bands. Efforts are being made
to bring some linear amplifiers to the island. All bands from 160
to 10 (maybe 6) metres will be active using CW, SSB and digital
modes. QSL via EB7DX, direct only (QRZ.com) and LoTW. The
operation's Web page is: www.revillagigedo2011.com/ A 4A4A Twitter
page is also available at: twitter.com/EA4AK
SOURCE: [OPDX] via ICPO Bulletin (25 February-04 March 2011)

** Isl. of Langeness (IOTA EU-042, JO44) qrv HF, VHF and UHF **

Operators Friedrich DL4BBH, Helmut DL1BGC, Karl DJ4FO, Peter DJ4RU
Henning DB5BZ and Ric DL2VFR will be active as DF0WFF from the
island of Langeness (IOTA EU-042, GIA N-19, WLOTA 1245), and the
National Park and Nature Reserve Schleswig-Holstein Wadden Sea (WFF
DLFF-013, Grid Loc. JO44) on 8-10th April 2011. QRV on HF/VHF/UHF
using CW and SSB. QSL direct or bureau to DL2VFR.
SOURCE: [rsgbiota.org] via ICPO Bulletin

** CY0 - SABLE ISLAND, NA-063, qrv HF and 50 MHz **

The well planned and two times postponed DXpedition to Sable
(NA-063 / GN03-FN93) is scheduled to take place from Mar 7-15.
Even the team changed since some of the originally planned
operators didn't get a holiday now. The new team includes Randy
N0TG, Jeff,N1NSB, and Wayne,K8LEE. They want to run three stations
simultaneously in CW, SSB and RTTY on 160m-6m. They will use a
"Battle Creek Special" for 40m/80m/160m, three verticals, at least
one wire antenna and a yagi. All direct and bureau QSL cards should
be sent to N0TG. They ask everybody to use the "ONLINE QSL REQUEST
Service" (OQRS) on their DXpedition website for direct and bureau
QSLs (see "How to QSL"): http://www.CY0dxpedition.com

==> + LEGISLATIVE NEWS: ARRL MEMBERS RESPOND TO HR 607

Last month, a bill was introduced in the US House of Representatives
that addresses certain spectrum management issues, including the
creation and maintenance of a nationwide Public Safety broadband
network. This bill -- HR 607, known as The Broadband for First
Responders Act of 2011 -- if passed, also calls to auction off parts of
the 70 cm band, namely 420-440 and 450-470 MHz. As such, the ARRL asked
its members to write their Representative, asking them to not support
HR 607 in its current form.

According to ARRL Regulatory Information Manager Dan Henderson, N1ND,
Chwat & Co -- the ARRL's legislative relations firm in Washington, DC
-- received almost 1000 letters from League members in opposition to HR
607. "This is a great start and many thanks to the diligent members who
have risen to the challenge; however, it cannot stop there. As long as
HR 607 is in its current form, we must continue this campaign." He
```

clarified that the ARRL opposes HR 607 in its present form: "We do not oppose the concept of dedicated spectrum for the development of a Public Safety infrastructure and wireless network. We object to the bill because of the inclusion of 420-440 MHz as part of the spectrum to be swapped and auctioned to commercial users." Click here <http://www.arrl.org/sample-letters> for some pointers for writing letters in opposition to HR 607.

==> + GET READY FOR THE APRIL ISSUE OF QST!

No foolin' -- the April issue of QST is jam-packed with all sorts of things that today's Amateur Radio operator needs. From product reviews to experiments to contesting -- including articles featuring a homebrew 40 meter transmitter, ground radials, digital modes and the 2011 ARRL Board of Directors Annual Meeting -- this issue of QST has something for just about everyone.

Who says life's too short for QRP? Not Lou Burke, W7JI. Following up on his February 2011 QST article about a homebrew QRP superhet receiver, Burke brings us "The W7JI Low or Lower Power 40 Meter Transmitter," a companion to that receiver. This transmitter features a VFO, CW keyer and automatic antenna switching. Ron Harger, WD8BCS, shows readers an inexpensive and easy-to-build radial system for temporary vertical antenna installations in his article "Does Your Ground Radial Kit Measure Up?" When you keep your audio controls in check, it really does make a difference in how your station sounds. QST Technical Editor Joel Hallas, W1ZR, demonstrates how to set up your SSB transceiver with the proper audio levels in "Sounding Good on the Air -- Setting Your Audio Controls."

Amateur Radio is all about experimentation. One of the newer ways for hams to have fun and play around on the bands is via the digital modes. QST editor Steve Ford, WB8IMY, takes a look at one of the newer digital modes in "JT65 -- The 'Musical' Mode." In January, the ARRL Board of Director met in Connecticut for its Annual Meeting. Join ARRL News Editor S. Khrystyne Keane, K1SFA, and QST Managing Editor Joel Kleinman, N1BKE, as they take you inside the meeting room as the Board charts the course for the coming year and beyond. Keane also tells of the recipients of the ARRL International Humanitarian Award, the George Hart Distinguished Service Award and the print, video and audio winners of the Bill Leonard, W2SKE, Professional Media Award.

QST Technical Editor Joel Hallas, W1ZR, takes a look at the Elecraft P3 panadapter in this month's Product Review. He says this add-on to Elecraft's popular K3 rig "adds high performance, stand-alone functionality. If you want to see what's happening on the band, this will provide the needed view, as well as another way to control radio tuning, if you wish." ARRL Contributing Author Curt Phillips, W4CP, checks out the Uniden HomePatrol-1 scanning receiver. He says that it "brings user friendliness to a new level. It performs complicated scanning functions with ease, and loading local frequencies is a snap."

Carl Luetzelschwab, K9LA, delivers the results of the 2010 IARU HF World Championship, held this past July. What makes this 24 hour contest so much fun? "Everyone works everyone, we get to operate both CW and phone, the exchange is simple and we get to work HQ stations and receive their nifty QSLs," said one participant. "It's also during the summer break, which allows busy college students to take it seriously." ARRL Regulatory Information Manager Dan Henderson, N1ND, tells about the 2011 ARRL Straight Key Night. As one participant described it, Straight Key Night participants appreciate "the opportunity it affords us Old Timers to relive the past in such a wonderful way."

Of course, there are the usual columns you know and expect in the April QST: Happenings, Hints & Kinks, The Doctor Is IN, How's DX, Vintage Radio and more. Look for your April issue in your mailbox. QST is the official journal of ARRL, the national association for Amateur Radio. QST is just one of the many benefits of ARRL membership. To join or renew your ARRL membership, please see the ARRL Web page <https://www.arrl.org/join>.

==> THE DOCTOR IS IN : MEASURING A METER'S TOLERANCE

David Van Doorn, W9WEL, of Fort Wayne, Indiana, wrote to the ARRL's Doctor, asking about his analog meter's tolerance. He wanted to know if the tolerance is listed as 10% of full scale, does that actually mean ±10% of full scale? For example, a meter with a 300 unit full scale would have a specified accuracy of the measured value of ±30. Thus, a reading of 40 could actually be anywhere from 10 to 70. Or does that mean ±10% at full scale? For example, at 300 full scale, an actual value of 300 could read 270 or 330 and every other reading on that scale would read ±10%? So an actual value of 40 could read 36 or 44?

Here's what the Doctor had to say:

I'm afraid it is the former. This suggests that the scale selected be one with the reading near the top of the range for maximum accuracy. Keep in mind that the actual accuracy could be -- and often will be -- much better than that specified, just not worse.

Thanks Doctor! Do you have a question or a problem? Send your questions via e-mail <doctor@arrl.org> or to The Doctor, ARRL, 225 Main St, Newington, CT 06111 (no phone calls, please). Look for "The Doctor Is IN" every month in QST <http://www.arrl.org/qst>, the official journal of the ARRL.

==> + PUBLIC SERVICE: NO HF FREQUENCIES BEING USED IN NEW ZEALAND EARTHQUAKE OPERATIONS

The ARRL has received word from the New Zealand Association of Radio Transmitters (NZART <http://www.nzart.org.nz/>) -- that country's IARU <http://www.iaru.org/> Member-Society -- that amateurs there providing communications support in the aftermath of the 6.3 earthquake <http://www.arrl.org/news/new-zealand-amateurs-assist-in-earthquake-s-afterma th>

are using 2 meters (144 MHz). No HF frequencies are being used. If this changes, the information will be posted on the ARRL website.

==> + ARRL IN ACTION : WHAT HAVE WE BEEN UP TO LATELY?

Compiled by ARRL News Editor S. Khrystyne Keane, K1SFA

This feature is a concise monthly update of some of the things ARRL is doing on behalf of its members. This installment -- which covers the month of February -- looks at how the ARRL is responding to HR 607, a new Memorandum of Understanding between the ARRL and the Boy Scouts of America, improvements at W1AW and in the ARRL Lab, reports from the Official Observer Desk and more . Read more here <http://www.arrl.org/news/arrl-in-action-what-have-we-been-up-to-lately-31>.

==> ARRL FIELD DAY: 2011 FIELD DAY PACKETS AVAILABLE

It's that time of year again -- time to start gearing up for ARRL Field Day, June 25-26, 2011! ARRL's flagship operating event -- always held the fourth full weekend in June -- brings together new and experienced hams for 24 hours of operating fun. Field Day packets are now available for download <http://www.arrl.org/files/file/Field-Day/2011/2011_FD_Packet.pdf>and include the complete rules (including a change for 2011), as well as other reference items such as forms, ARRL Section abbreviation list, entry submission instructions, a Frequently Asked Questions section, guidelines for getting bonus points, instructions for GOTA stations and a kit to publicize your event with the local press. Read more here <http://www.arrl.org/news/2011-field-day-packet-now-available>.

==> SOLAR UPDATE

Tad "Waiting for the Sun <http://www.youtube.com/watch?v=A0kypyGSKsE>" Cook, K7RA, reports: Solar activity is on the rise again, but the average sunspot and solar flux numbers are down, compared with last week. This week, the average daily sunspot number declined more than 14 points to 50.9, and the average daily solar flux was off 7 points to 96.8. The average daily planetary A index rose from 6.1 to 9, and the average mid-latitude A index was about the same, declining from 5.4 to 5.1. The most active day for geomagnetic indexes was March 1, with a planetary A index of 31. The planetary K index rose as high as 6 on that day. NOAA and USAF predict solar flux at 115 on March 3, 120 on March 4-10, 110 on March 11-15 and 105 on March 16-17. The planetary A index is forecast at 15, 12 and 10 on March 3-5, 5 on March 6-13 and 7 on March 14-15. The monthly average of sunspot numbers for December through February was 22, 32.2 and 53.5. Look for more information -- including a take on why Solar Cycle 24 has been so weak -- on the ARRL website on Friday, March 4. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad Cookism" is brought to you by The Doors' Waiting for the Sun

<http://www.youtube.com/watch?v=A0kypyGSKsE>.

==> + SILENT KEY: EUGENE PRESSLER, W3ZXV (SK)

Eugene "Gene" Pressler, W3ZXV, of Gwynedd, Pennsylvania, passed away February 22. He was 80. Pressler, who served as an Assistant Director in the ARRL Atlantic Division, also served as the Public Information Coordinator and Assistant Section Manager for Eastern Pennsylvania, as well as the Division's representative on the Public Relations Advisory Committee for several years. In 1996, Pressler was honored by the Atlantic Division as its Amateur of the Year for a "lifetime of service to Amateur Radio." He co-founded and served as Director Emeritus of the Area Repeater Coordination Council, the regional Amateur Radio repeater frequency coordinator for Eastern Pennsylvania and Southern New Jersey. Read more here <http://www.arrl.org/news/former-atlantic-division-assistant-director-eugene-pressler-w3zxv-sk>.

==> + ARRL RECOGNIZES: LOU BURKE, W7JI, WINS FEBRUARY QST COVER PLAQUE AWARD

The winner of the QST Cover Plaque Award for February is Lou Burke, W7JI , for his article "A Compact 40 Meter Receiver. " Congratulations Lou! The QST Cover Plaque award -- given to the author or authors of the best article in each issue -- is determined by a vote of ARRL members on the QST Cover Plaque Poll Web page <http://www.arrl.org/cover-plaque-poll> . Cast a ballot for your favorite article in the March issue today.

==> DX NEWS: SPRATLY ISLANDS DXPEDITION POSTPONED TO 2012

In the March 3 edition of The Daily DX <http://www.dailydx.com/>, Editor Bernie McClenny, W3UR, reports that the planned DXpedition to the Spratly Islands <http://www.arrl.org/news/the-spratly-islands-dxpedition-gets-wings> has been postponed until April 2012. According to DX0DX Team Leader Chris Dimitrijevic, VK3FY, the postponement is due to circumstances beyond the control of the DX0DX Team and "in the best interests of the Team of Operators." The DX0DX DXpedition was originally scheduled to run January 6-February 1, 2011. Spratly currently sits at #32 on DX Magazine <http://www.dxpub.com/dx_news.html>'s "Most Wanted" List.

==> THIS WEEK ON THE RADIO

This week:

- March 5 -- Wake-Up! QRP Sprint
- March 5-6 -- ARRL International DX Contest (SSB) <http://www.arrl.org/arrl-dx>; Open Ukraine RTTY Championship
- March 6 -- DARC 10 Meter Digital Contest
- March 8 -- ARS Spartan Sprint
- March 9-10 -- CWops Mini-CWT Test

Next week:

- March 12 -- AGCW QRP Contest
- March 12-13 -- Idaho QSO Party
- March 13 -- North American Sprint (RTTY); SKCC Weekend Sprint; UBA Spring Contest (CW)
- March 13-14 -- Wisconsin QSO Party; EA PSK31 Contest
- March 15-16 -- CLARA HF Contest

All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests>, the ARRL Contest Update <http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more info. Looking for a Special Event station? Be sure to check out the ARRL Special Event Stations Web page <http://www.arrl.org/special-event-stations>.

==> UPCOMING ARRL SECTION, STATE AND DIVISION CONVENTIONS AND EVENTS

- March 5 -- ARRL South Texas Section Convention <http://www.arrl.org/hamfests/south-texas-section-convention-greater-houston-hamfest-1>,
Rosenberg, Texas; ARRL Alabama Section Convention <http://www.arrl.org/hamfests/alabama-section-convention-birminghamfest>,

Amateur Radio Newsline(tm) Report 1751 - March 4 2011

Amateur Radio Newsline report number 1751 with a release date of Friday, March 4, 2011 to follow in 5-4-3-2-1.

The following is a Q-S-T. Ham radio continues its role in the wake of the Christchurch New Zealand earthquake. We have a report from the scene. Also, a United Kingdom ham is funded to conduct a study on digital communications in emergency communications and the latest on the proposal to create a new 500 kilohertz ham band. Find out the details are on Amateur Radio Newsline(tm) report number 1751 coming your way right now.

(Billboard Cart Here)

**

RESCUE RADIO: THE CHRISTCHURCH NEW ZEALAND EARTHQUAKE STORY CONTINUES

Ham radio continues to be an important factor in rescue and recovery efforts in the wake of the earthquake that hit Christchurch, New Zealand, on Tuesday, February 22nd. Jim Meachen, ZL2BHF, is several hundred miles to the North in Auckland with the latest:

--

ZL4FZ: "At this stage were still extensively supporting the Land Star operation that's the more major component. Today with 300 searchers in the field we have deployed probably 50 radios to teams of operators and each of those teams has each got its own radios. There are about an actual 250 staff on foot in the field and all of that communications is coming back through AREC"

--

That's Richard Smart, ZL4FZ, who is head of the Amateur Radio Emergency Communications team explaining the role that his emergency communications group is currently playing in the aftermath of the 6.3 earthquake. A quake that as of airtime is believed responsible for at least 160 deaths and scores of injuries in and around the Christchurch area. According to Smart ham radio was on scene from the time the quake hit and right though the present:

--

ZL4FZ: "AREC involvement in the Christchurch earthquake has been to support Civil Defense directly with the welfare centers, initially at

the temporary welfare center in Hagley Park. (This is) a small tent city where AREC provided effectively a complete communications terminal right through to the extensive support for the Land Star operation which has been visiting every home in the Western suburb of Christchurch. To date a total of some eighteen thousand homes have been visited by the Land Star teams and the AREC teams have provided communications for upward of 300 volunteers in the field at any one time."

--

Smart tells Amateur Radio Newsline that it's the ability of hams to quickly adapt and respond to any emergency that masks them valuable in situations such as this. He also says that those in charge of relief efforts are very satisfied with the AREC ham radio operations:

--

ZL4FZ: "I believe in this case that AREC has managed to provide a solution to unforeseen communications difficulties, and in the case of the Land Star deployment particularly because it has become a linchpin to allow the operation to work.

"We have been told by the senior management for the Land Star operation that basically it would not have been possible to achieve what they have achieved which is spectacular in its own right, without the assistance of AREC in that role."

--

So what role will AREC play as recovery efforts continue? ZL4FZ says that at this moment its hard to say:

--

ZL4FZ: "Its very difficult to tell at this stage and the difficulty is that there a number of significant issues that the city is facing and there are a number of agencies involved, obviously with specializations in different areas. One of the things the Civil Defense emergency management teams are working on is setting the appropriate team for the tasks that they have. And at this stage, while this tasking is drawing nearer to a close, we are waiting word as to what the next tasking may be."

--

The story of the Christchurch earthquake and the part being played by ham radio in post quake recovery efforts is far from over and we will have more for you in future Amateur Radio Newsline reports.

>From Auckland, on the North Island of New Zealand, I'm Jim Meachen, ZL2BHF, reporting for the Amateur Radio Newsline.

--

It has to be noted that so far, this has been a VHF only operation. Word from the New Zealand Association of Radio Transmitters is that hams providing communications support in the aftermath of the quake are using only 2 meter FM. No High Frequency communications into and out of the Christchurch area has been found to be necessary. (ARNewsline(tm), ZL2BHF, ZL4FZ)

**

RESCUE RADIO: UK HAM GETS FUNDING TO STUDY DIGITAL EMCOMM SYSTEMS FOR RAYNET

A member of The United Kingdom's Radio Amateurs' Emergency Network or RAYNET has received two months' funding to examine how that group could best use data communications to support police and other services.

Howard Winter, G1BYY, a member of Mid-Herts RAYNET, made an application to the Vodafone World of Difference Scheme in November. According to the RSGB News, Winter will spend two months undertaking his own research and experimentation, collating the work that has already been done by RAYNET Groups and comparing the experiences of members experimenting with data. He will then be producing documents that will be available nationally, to groups of all affiliations.

An increasing demand from emergency response services using RAYNET to have it provide data links has led many groups to experimenting on a variety of digital systems. RAYNET members are now using APRS to track vehicles responding to incidents in remote locations, transmitting photographs from the scenes of emergencies and sending data files back to their control and command centers (GB2RS)

**

RESTRUCTURING: THE LATEST ON THE 500 KHZ PROPOSAL

A possible hitch in the creation of a permanent low frequency allocation at or near 500 KHz. Jeremy Boot, G4NJH is in Nottingham in the UK with more:

--

The ITU Conference Preparatory Meeting, or CPM, for the World Radiocommunication Conference 2012, or WRC-12, has completed its work on the agenda item that considers an allocation of up to 15kHz in the band 415 to 526.5kHz.

Three options, one of which is no allocation to the amateurs, are proposed. Whilst initially it was hoped that spectrum around and near to 500kHz could be allocated for amateur use, the maritime service has identified a new requirement for this part of the spectrum. Because of this there is no support from national administrations like Ofcom to support amateur allocation in this part of the spectrum.

One of the remaining options agreed by the ITU CPM is the so-called Method A, originally put forward by the RSGB. This is for an

allocation of up to 15kHz between 472kHz and 487kHz. The Americans, Canadians and others within their regional group, CITEL, favor a different option, Method B, which is for a split allocation between 461 - 469kHz and 471 - 478kHz, totaling 15kHz. Method A is the main option being considered within CEPT, which has yet to reach what it terms a European Common Proposal on the option.

I'm Jeremy Boot, G4NJH.

--

None of this preparatory work affects any temporary experimental access to this spectrum other than tests that have been carried out by the maritime service in respect of its proposed new system. Further information is at tinyurl.com/lowfreq (RSGB News)

**

BREAKING DX NEWS: SABLE ISLAND MAY BE ON BY MARCH 7

And some breaking news in the world of DX. This with news that the long anticipated Sable Island DXpedition may be on the air before our next newscast.

Randy Rowe, N0TG, reports via the Southgate news that providing flight conditions are suitable, all is set for operations to begin around 2100 UTC on March 7th. Rowe also says that the team will standby and be ready to go on a day to day basis should there be delay.

Three stations will be operational simultaneously as much as possible using the calls N0TG/CY0, K8LEE/CY0 and N1SNB/CY0. Additional details are available on line at www.cy0dxpedition.com. And we will have more DX news later on in this weeks Amateur Radio Newsline report. (Southgate)

RADIO LAW: FCC GRANTS CONTROVERSIAL CONDITIONAL WAIVER TO BROADBAND PROVIDER TO OPERATE ADJACENT TO THE GPS BAND

A big bru-ha-ha is building over a new service grant adjacent to the G-P-S band. Amateur Radio Newsline's Norm Seeley, KI7UP, is here with the rest of the story:

--

The Air Transport Association and other aerospace companies say that a project to help make broadband wireless service available to all residents across the United States has the potential to interfere with the current users of the Global Positioning System. Also, it that it could jeopardize the cornerstone of the Federal Aviation Administration's $40 billion next generation air navigation and transportation system.

At the heart of the controversy is what broadband suppliers are calling an innovative project by service provider LightSquared, Inc. to rebroadcast L-band satellite data and voice communications over a large terrestrial network. This using a new technology that would bring terrestrial broadband to 260 million people by 2015.

On January 26th LightSquared received a conditional waiver from the Federal Communications Commission to rebroadcast its satellite signals using high power transmitters on as many as 40,000 tower sites around the country. LightSquared launched its SkyTerra-1 communications satellite in November 2010, and plans to launch a second satellite in 2012.

The FCC approved the request from LightSquared in less than three months, angering the nations aerospace industry that had requested that the normal Notice of Proposed Rule Making process be followed. This, allow for more time to analyze the potential impacts to air navigation. Also in opposition is the GPS equipment supply industry with well known manufacturer Garmin leading those who do not want to see the LightSquared rushed into place at the expense of G-P-S users world-wide.

The issues involve the potential for out-of-band interference between LightSquared's operating spectrum of 1525 of 1559 MHz and the GPS band of 1559 to 1610 MHz. A study released by Garmin, whose GPS units are installed in more than 43,000 aircraft showed that aviation units would detect interference, or jamming, more than 12 Nautical Miles from a simulated LightSquared antenna site and suffer loss of its positional fix at 5 Nautical Miles. Garmin says its results were conservative, and actual implementation of the LightSquared system could increase the distances.

For the Amateur Radio Newsline, I'm Norm Seeley, KI7UP, reporting from Scottsdale, Arizona.

--

Meantime, caught in the middle of this fight are the tens of millions of U-S citizens who use G-P-S to navigate from one place to another. All they want is to get from point A to point B without being interfered with by anyone. (Various sources)

**

ENFORCEMENT: LASER POINTER HITS COCKPIT OF PHOENIX NEWS HELICOPTER

A Phoenix news helicopter was the victim of an attack from the ground in late February. This as someone shot a bright laser beam into its cockpit that was also caught by the choppers on-board camera.

According to The Arizona Republic, authorities are currently investigating the incident and have yet to identify the perpetrator. The newspaper goes on to note that local police actually searched door-to-door in the area where the beam originated but so far have come up empty handed.

A spokesman with the Federal Aviation Administration commenting on the incident said that the message here is very simple. If you want to engage in this kind of dangerous and irresponsible behavior, you can be caught and arrested. If caught, and if prosecuted by the perpetrator of this stunt could face up to 20 years in prison. (Published news reports)

**

HAM RADIO POLITICS: NEW SM ELECTED IN ARKANSAS

Turning to the ham radio political scene, in the only balloted Section Manager election this winter, ARRL members in Arkansas have elected Dale Temple, W5RXU, North Little Rock, as Section Manager. Temple received 362 votes, and his opponent, incumbent Section Manager J. M. Rowe, N5XFW, of Hot Springs, received 290 votes.

Temple begins his two year term of office on April 1st. Outgoing Section Manager Rowe has served in that position since December 2008.

Ballots were counted and verified at ARRL Headquarters on Tuesday, February 22. (ARRL)

**

HAM HAPPENINGS: RADIO CLUB OF AMERICA BREAKFAST AT IWCE

On the social scene, the Radio Club of America Breakfast at IWCE Mobile Communications Show is slated for Thursday, March 10th. The venue is the Las Vegas Hilton Hotel from 7:30 AM to 9:00 AM. The keynote speaker is Mark Crosby who will discuss Existing Licensees and the Push to Broadband. More information is on line at tinyurl.com/4buj9lm. (RCA)

**

HAM HAPPENINGS: HAMVENTION EXHIBITS FLOOR MAP AVAILABLE

If you plan on attending Hamvention 2011, listen up. Hamvention planners have announced that a file containing a map of all the inside exhibits has been uploaded to the files area of the Hamvention Yahoogroup on-line discussion. If you are a Yahoogroups member you an access this map at tnyurl.com/324qy9.

Hamvention 2011 is slated for May 20th to the 22nd at the Hara Arena is suburban Dayton, Ohio. We hope to see you there. (AC8DE)

**

NAMES IN THE NEWS: RICHARD FISHER, KI6SN, NAMED NEW EDITOR OF POPULAR COMMUNICATIONS MAGAZINE

And another change at CQ Communications. This with word that veteran journalist and writer Richard Fisher, KI6SN, has been named the new Editor of Popular Communications magazine.

Fisher will succeed Edith Lennon, N2ZRW, who is stepping down after four years at the Popular Communications editors desk. This, to pursue freelance editing and writing projects and to work with a non-profit organization.

Richard Fisher, KI6SN lives in Riverside, California, and is no newcomer to the CQ family. In addition to his new position, Fisher will also continue in his current position as Editor of WorldRadio Online magazine and will also continue to write his current columns in Popular Communications, WorldRadio Online and CQ magazines. KI6SN also manages three related Internet sites, including blog sites for WorldRadio Online, his "Trail-Friendly Radio" column in that magazine, and his "Public Service" column in CQ magazine. He is also an administrator of the Facebook pages for all four CQ Communications publications.

Richard Fisher, KI6SN, assumes the Popular Communications Editors mantle effective with the June 2011 issue. (CQ)

**

NAMES IN THE NEWS: UTAH'S WOMEN IN RADIO CELEBRATE NUMBER 10

And the group Women in Amateur Radio, the largest class for female ham radio operators in Utah, for and taught by women, is celebrating its 10th anniversary on March 7th. According to Linda Reader, N7HVF, most of those who graduated from that class are still active in the hobby, with some involved in emergency and public service communications. The group hopes to make these classes a regular event for those women in Utah seeking to become radio amateurs. (N7HVF)

**

BREAK 2

This is ham radio news for today's radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

EMERGING TECHNOLOGY: NEW STUDY FINDS CELLPHONES AFFECT BRAIN WAVES

A newly completed study indicates that electromagnetic radiation from the antenna of cellular telephones may be altering the way we think and behave. This according to an article published Tuesday, February 22nd in the Journal of the American Medical Association.

According to news reports, researchers peered inside the brains of 47 healthy subjects using Positron Emission Tomography to measure the location and timing of brain activity by detecting signs that cells were consuming energy. They found that despite official skepticism including statements issued by the Food and Drug Administration that cellphones' electromagnetic energy exerts any influence on nearby cells.

The preliminary study, led by a respected neuroscientist at the National Institutes of Health provides what other researchers are calling solid evidence that cellular telephone use has measurable effects on brain activity. It also suggests that the peoples attachment to its millions of wireless phones may be altering the way we think and behave in subtle ways. (Various published reports)

**

ON THE AIR: CELEBRATING 100 YEARS OF THE REPUBLIC OF CHINA

On the air, keep an ear open for members of the Republic of China Centenary Foundation who will be activating special event station BV100 during the CQ WW WPX SSB Contest on March 26th and 27th. The operators from Taiwan will then be on the air from Shaio-Liu-Chiu Island until the end of the year as a special event is to celebrate the 100th anniversary of their homeland. Operations will be on all bands and modes. Complete details, a operating schedule and information as to how to earn a BV100 award is available at www.bv100.tw/EN. QSL's go via BV2KI. (OPDX)

**

ON THE AIR: CELEBRATING THE UNIFICATION OF ITALY

And keep on the lookout for special event station IO4UI to be active between March 1st and September 30th. This operation is to celebrate the 150th anniversary of the Unification of Italy. All of QSOs will be confirmed automatically via the bureau. More details are available on QRZ.com. QSL this one via I4JEE. (OPDX)

**

ON THE AIR: 90 YEARS FOR THE LINCOLN SHORTWAVE CLUB

The United Kingdom based Lincoln Short Wave Club is celebrating its 90th anniversary this year. According to GB2RS, anyone working the club callsign G5FZ will receive a limited edition QSL card that will only be available through December 31st. (GB2RS)

**

ON THE AIR: K5B - THE BATAAN MEMORIAL DEATH MARCH MARATHON

Closer to home, the Mesilla Valley Radio Club of Las Cruces, New Mexico will be operating special events station K5B on March 27th. This in conjunction with the 22nd annual Bataan Memorial Death March Marathon held at the White Sands Missile Range from 10:00 to 23:00 UTC.

K5B will be operating on or near 3.893, 7.225, 14.330 and 21.337 MHz. QSL cards go to Special Events Station K5B in care of the Mesilla Valley Radio Club, P. O. Box 1443, Las Cruces, New Mexico 88004. Please put `K5B' on the lower, left hand corner of your outer envelope. Complete information on this event is on-line at www.n5bl.org/bataan. (WB4AEJ)

**

DX

In DX, DO1BEN and DO1IQ will be on the air portable OZ from Lolland Island between April 22nd and the 29th. Operation will be on 80 through 10 meters using SSB and some digital modes. QSL each operator via their home callsigns, either via the bureau or direct. For updates, visit www.do1ben.de

EI7CC, will be active as 7P8PB from his brother-in-law's 7P8CC station in Maseru, Lesotho between March 9th and the 23rd. His operating time will be limited because he will be on a family holiday. QSL via EI7CC via the bureau or direct. Logs will be uploaded to Logbook if the World immediately upon his return to Ireland.

A team of six operators from Italy will be active as from Albania as I2GPT portable ZA between March 9th and the 13th. Their operations will be on 40, 30, 20 and 17 meters using CW and SSB. QSL to I2GPT, either direct or via the bureau.

MJ0ASP is returning to Marrakech, Morocco, between March 14th through the 21st, and will be active as CN2MR. Operation will be on 40 through 10 meters using CW. He says that he will focus on the 30, 17 and 12 meter bands. QSL via MJ0ASP.

Listen out for Antigua on the air as W4OWY and W9OP will once again be active as V25WY and V25OP, respectively. They will be on the island between March 8th and the 18th. Operation will be on 160 through 6 meters using CW, SSB and RTTY. QSL via their home callsign. Either direct or via the bureau.

Lastly, DL3KWR and DL3KWF will be active portable CT9 from Madeira between March 10th and April 6th. Their operation will be on 30, 17 and12 meters using mostly CW. DL3KWF is expected to try some RTTY and PSK31. QSL via their home callsign. And if you are a Limeliters fan you might say to this one, have some Madeira, my dear.

(Above from various DX news sources)

THAT FINAL ITEM: WISE RADIOS ITS LAST SPACE PHOTO BACK HOME

And finally this week, its 73 to a NASA sky-mapping telescope that spent 13 months scanning cosmic objects as it roamed through space. The agency's Wide-Field Infrared Survey Explorer, nicknamed WISE, captured one last snapshot of a portion of our Milky Way galaxy as the spacecraft shut down for good.

During its thirteen months of operation, WISE scanned the sky taking about 1.8 million images of asteroids, stars and galaxies that it dutifully radioed back to Earth. The spacecrafts mission netted some nineteen previously unseen comets and more than 33,500 asteroids. The latter included 20 near Earth objects which are items in space with orbits that pass relatively close to our Earth's own orbit.

The final image it took and sent home shows thousands of stars in the constellation Perseus covering an area three times the size of the full moon. Its one of those spectacular photos that once seen is hard to forget. You can view it and read more abut the WISE mission on-line at tinyurl.com/4ce63wd. (Space)

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB, the Southgate News and Australia's W-I-A News, that's all from the Amateur Radio Newsline(tm). Our e-mail address is Newsline (at) arnewsline (dot) org. More information is available at Amateur Radio Newsline's(tm) only official website located at www.arnewsline.org. You can also write to us or support us at Amateur Radio Newsline(tm), 28197 Robin Avenue, Santa Clarita California, 91350

Before we go, a reminder that Amateur Radio Newsline is looking for a radio amateur planning to attend Hamvention 2011 and who is a professional television newsman or an actor with on-camera experience. This to take part in this years Ham Radio Town Meeting.

This years session is titled "How To Make A Ham Radio Video In The 21st Century." Among the many topics we want to cover is how to properly appear when the camera lens is on you and tape is rolling. Obviously nobody has better expertise in this area than a TV newsman or an actor who regularly appears on TV or in the movies.

If you want to take on this volunteer role, please contact us or send your resume with your contact information to Bill Pasternak, WA6ITF, who is producing and moderating the session. Our e-mail address is still newsline (at) ix (dot) netcom (dot) com and we look forward to hearing from you.

For now, with Bill Pasternak, WA6ITF, at the editor's desk, I'm Jim Damron, N8TMW, and I'm Jeff Clark, K8JAC, saying 73 and we thank you for listening.

WIANEWS FOR WEEK COMMENCING MARCH 06 2011.

Dormant frequency allocation eyed.

Southeast Queensland Microwave Day today.

3 hams killed by pirates.

Another look at Amateur Radio magazine

Amateur Television history made.

ALL THESE STORIES UP AND COMING IN THIS EDITION OF NEWS FROM THE WIRELESS
INSTITUTE OF AUSTRALIA FOR WEEK COMMENCING MARCH 6 2011.

Amateur Television history made.

On Wednesday evening, 23 February 2011, Digital Amateur Television signals from
Victoria were received in the northwest of VK7 by Winston VK7EM.

After noting the band conditions improving with a lift in the 70cm beacon
strength and the appearance of Community TV Channel 31, Winston monitored
VK3RTV, the Melbourne Digital ATV repeater.

At around 5.30pm colour bars appeared.

Then with liaison with Peter VK3BFG on 147.4 MHz simplex, who had made sure the repeater was activated, live pictures were organized, with Peter proudly showing off his equipment with a very professional 'on camera' appearance.

Word spread and other stations- Neil VK3BCU, John VK3DQ, and Jack VK3WWW joined in.
At one stage there were two independent pictures arriving, John 3DQ on one channel, VK3RTV1 and Peter 3BFG on VK3RTV2, and both in contact with each other.

8.00PM signals on VK3RTV began to fade. It was then that a separate receiver monitoring 1250Mhz suddenly came to life with a perfect colour bar signal.

A call on 2 metres established that it was Rob, VK3TRX who chatted and then held up a 10 gig. antenna he will use in an upcoming ATV field day.
These pictures on 23 centimetres analogue FM, became quite noise free.

The equipment used by Winston consisted of home-brew yagis on each band to a K7MEM design, masthead mounted pre-amplifiers designed by VK5EME, fed into a Teac SDB451 Digital Set Top Box on 70 centimetres, while for 23 centimetres a Drake ESR 700 satellite receiver.

Read more on WIA Front Page News, wia.org.au

Dormant allocation eyed.

iTnews.com.au have a story worth a read on how Telstra has called on the ACMA to reclaim 1452 TO 1492 MHz, reserved for digital radio, advocating its return for use by point-to-point microwave services.

It was in an important spectral band for Telstra, which used the 1.5 GHz band to deploy microwave systems for telephony services to meet its universal service obligations in remote and low-density areas.

Telstra was of the view that the continued reservation of the DAB spectrum should be reviewed against the ACMA's spectrum management principles. World DAB reports about 212,000 digital radio receivers had been sold in Australia. Most services were deployed in VHF Band III spectrum, not 1.5 GHz.

Go to iTnews.com.au for the full story.

WIA
President Michael Owen VK3KI president@wia.org.au
Vice President Phil Wait VK2ASD vk2asd@wia.org.au
Secretary Geoff Atkinson VK3AFA secretary@wia.org.au
Treasurer John Longayroux VK3PZ vk3pz@wia.org.au

The WIA has announced the resignation of Geoff Atkinson VK3TL as WIA Secretary and the appointment of Sarah Thompson VK3AUD as the new Secretary.

Geoff has been secretary since February 2008.

Geoff has played a very important role as secretary, in particular in relation to finding our current building, negotiating the lease and ultimately its purchase.

WIA President Michael Owen said that he very much regretted the resignation of VK3TL who has been forced to resign as WIA Secretary because he believes that his health no longer allows him the time to do the job to the level he believes is necessary.

"Geoff will still look after the inwards QSL's.

Sarah Thompson VK3AUD, recently retired from Telstra, at a senior technical position at the IP Networks, Global Operations Centre at Clayton she has also spent a year with the Antarctic Division as a Radio Officer at Macquarie Island.

Oh and I see on her CV vk3aud Sara holds a Black Belt in Taekwondo!

Members will be able to meet Sarah at the WIA Annual Conference in Darwin.

Read more on WIA Front Page News, wia.org.au

WIA Extends Emergency Communications Training

The WIA's training scheme for Emergency Communications Operators is proving to be a great success. 58 radio amateurs have now completed the training and almost 100 additional radio amateurs are registered for upcoming training sessions.

Building on this success, the WIA is now extending the Emcomms training scheme to all Australian radio amateurs, both members and non-members of the WIA, and to all WIA affiliated clubs. We believe this training scheme is important for amateur radio in Australia, and that we must treat all groups on an equal basis.

However, as all WIA members have all contributed to the development of this training system, with more than $7,000 from members funds already spent on the project, it's only right that non-members should pay an amount which fully covers the cost of their training. The charge for the Emcomms training for WIA members is $30 inc. GST, and the charge for people who are not WIA members is $65 inc. GST. That way, member's fees will not be used for the benefit of non-members. We believe that is only fair.

All non-members applying for training will be given a 6 month temporary non-voting membership of the WIA, including 6 mail-outs of AR magazine and other WIA member services. We have done this for two reasons: firstly, because we require them to be covered by the WIA insurance scheme they need to be a member to be calculated in the insurance premium the WIA pays each year, and secondly, quite frankly we are also using this as an opportunity to identify active amateurs and promote WIA membership.

For those who have completed their training and have been assessed as competent, WIA Accreditation is the next step. I will tell you more about WIA accreditation as a Volunteer Communications Operator in a few weeks. For more information on the WIA Emergency Communications Training Scheme, and to apply for the training, visit the WIA website at www.wia.org.au and click on Members Area and then Emergency Training.

We sincerely hope as many people as possible will take up this opportunity.
This is Phil Wait, VK2ASD, for the WIA

Tune-in to the world Amateur Radio gets people talking

Available to both radio clubs and individuals is the WIA National Field Day on Sunday 17 April, marking World Amateur Radio Day.

There's a hook ready-made for local publicity. The first social media in the world was Amateur Radio and it continues that and many other roles today.

Here is there an opportunity of well-presented and knowledgeable radio amateurs to support their local club or form a trio of individuals.

Put something back into the hobby you enjoy so much. Promote your local classes and in a meaningful way put Amateur Radio prominently on display.

Have things looking tidy and in order rather than frighten away prospective radio amateurs.

Check out the rules and why not register immediately online for the public relations day on 17 April.

Visit wia.org.au

right now for more details.

ACMA NEWS

ACMA concludes review of 3D TV trials and other emerging technologies but will continue to consider authorising trials of emerging technologies using the currently unassigned digital television channels until the end of 2011.

The ACMA also decided that any further trials must be of a short duration, and broadcasters will be required to give the ACMA undertakings on measures that will assist consumers to understand that trial broadcasts are temporary and will only be available in a limited number of locations.'

The ACMA considers it important that when purchasing 3D TV receivers, consumers understand the current generation of 3D receivers might be not be compatible with future transmission methods.

The ACMA website has been updated, with a new section on 3D TV setting out the ACMA approach to further trials.

HOME OF THE GOOD GUYS

Stu VK4SDD was calling CQ on 14.240 when a very weak station came back, WD0NMU / MM.

Mike was sailing somewhere north of the Philippines heading for Japan, Mike and Stu exchanged the usual in a QSO then Mike asked if Stu could do him a favour.

It seems his sat phone (ahh modern consumer technology don't we love it) was not working and could VK4SDD send an email to his family explaining the sat phone situation and that they were on track and all was well!

This He did and the next day Stu received a nice reply from WD0NMU's family thanking and praising amateur radio.

I think this is one huge benefit to our hobby we can have fun and occasionally help someone!!!

(trec news)

EDUCATION YOUTH AND ADVANCEMENT OF AMATEUR RADIO
www.hamcollege.com.au

Training course at Dural.

Tomorrow, Monday 7th will be the start of the Amateur Radio New South Wales license training course. It will be held at the Quarry Road site of ARNSW in the Sydney suburb of Dural - number 6 3 - and will commence at 7 pm.

The course instructor is Terry VK2UX.

It will be held each Monday evening and Terry expects it could last up to six months - and says it will be a thorough grounding in all aspects of theory and operating practice for the hobby of Amateur Radio.

Remember -- the course starts tomorrow evening - at Dural - and listeners - would you advise anyone you know within range of Dural who would like to undertake the training .....

Fone the office telephone and leave a message with contact details.

The number is 02 9651 1490.

There are also details www.arnsw.org.au

Look under training and exams.

INTERNATIONAL NEWS With thanks to RSGB, Southgate AR Club, the ARRL, Amateur Radio Newsline, NZART and the WW sources of the WIA.

CANTERBURY / CHRISTCHURCH
audio intensive listen now on WWW.WIA.ORG.AU

On Tuesday 1 March WIA news spoke with Richard Smart the AREC Section Leader for Christchurch and the guy responsible for the post earthquake AREC operations in the field and asked him the followingquestions.

1. What has AREC's involvement and function been since the earthquake?

2. What is AREC roll and involvement now?

3. What is AREC's future involvement likely to be?

4. What has AREC accomplished?

THREE YACHTSMEN KILLED BY SOMALI PIRATES WERE HAMS

Four Americans -- including three Amateur Radio operators -- who were being held hostage on their yacht by pirates off the coast of Oman have been killed. Scott Adam, K9ESO, and his wife Jean, KF6RVB, along with Bob Riggle, KE7IIV, and Phyllis Macay were on board the S/V Quest when pirates boarded their vessel on Friday, February 18.

Officials were in the process of negotiating for the Americans' release when gunfire was heard. "As (US forces) responded to the gunfire, reaching and boarding the Quest, the forces discovered all four hostages had been shot by their captors."

NEWS FROM ARNEWSLINE USA

A BIG LEAP FOR CODEC 2

Codec 2 may not be ready for prime time, but its getting close.

Take a listen.

Codec 2 audio Hear it by downloading the MP3 version of this weeks newscast at www.wia.org.au

That was just a snippet of a long conversation between Bruce Robertson VE9QRP, in Sackville, New Brunswick, Canada holding forth with Paul Saville, ZL3IN, in Christchurch, New Zealand using Codec2.

For those unaware, Codec 2 is an open source alternative to both D-Star and P25 that's being developed by a group of volunteers all around the world. The idea behind Codec 2 is to provide a single, free, software-based digital voice encode and decode system that would not require any proprietary firmware as is found in most other current digital voice systems. And as you can hear, even in this Internet-only QSO being held by two hams half a world apart, the quality is quite extraordinary. Likely on a par with all the systems available to hams today. Listen as ZL3IN describes his current career to VE9QRP:

Codec 2 audio Hear it by downloading the MP3 version of this weeks newscast at www.wia.org.au

More about Codec 2 is on-line at Codec2.org

The complete QSO between VE9QRP and ZL3IN is at tinyurl.com/codec2video

==========

International Marconi Day

International Marconi Day takes place this year on Saturday 30th April. Here in Ireland the Howth Martello Radio Group will be participating once again as an award station using the call-sign EI0MAR.

EI7JC Aian Noone IRTS News has details

"This is not a contest but there are several nice awards available for working the officially listed stations, each of which has an historic connection with Marconi.

The event is organised by the Cornish Amateur Radio Club.

For more information please visit the club's website
http://crac.g4usb.net/cracblog/.

EI0MAR operates from the Martello Tower overlooking the East Pier in Howth. The tower now houses a vintage radio museum. In 1905 the British Post Office carried out wireless telegraphy experiments at the tower in Howth using Marconi equipment.

Visitors are always welcome at the museum and the group hopes to see many visitors during the IMG event in April. The HMRG's website is www.ei0mar.org where a free information booklet in PDF format can be downloaded.

The North Cork Radio Group are pleased to announce that they will be active from the Marconi Signal Station at Goleen, Mizen Head, West Cork, where Marconi sent many of his first test transmissions to America.

Further details will be posted nearer the event, however, please pencil the day free if you'd like to attend or work the station. The Official call sign for the event will be EI-0-IMD and it is hoped we will be excepted on the official International Marconi Day Awards Program.

EI7JC Aidan Noone IRTS News."

MEDIA WATCH
www.cq-amateur-radio.com/WorldRadio.html
VK Club Bulletins http://groups.yahoo.com/group/aarnie/

Another look at Amateur Radio magazine

Themed this month is the WIA Centenary Year in Review. A striking composite front cover design, inside-back cover display and a review of the 100th anniversary celebrations.

The comprehensive article captures the essence of the year-long celebration which included a special callsign and the Centenary Award. A highlight was the AGM, which included the day at Dick Smith's wonderful country retreat.

The article discusses the planning and execution of the many events that were part of the celebrations. Well worth a read.

Looking ahead, the Darwin Amateur Radio Club President Spud Murphy VK8ZWM welcomes everyone to the WIA Annual Conference to be held in May this year. Get your bookings in now.

In technical articles this month is one entitled 'Delta loops and Quad loops and inverted vee dipoles' presented by Felix Scerri VK4FUQ, must be read by those who use this type of antenna or are just thinking about it. Felix VK4FUQ first got into Delta Loops some 20-years ago so has plenty of experience and knowledge too share.

Also on the technical side is included Building an 80 metre SSB kit radio by Lyle Wyatt VK5WL and the ubiquitous SDR - A different sort of radio explained from Hans Smit VK5YX.

Amateur Radio magazine, a WIA membership service, and also available at selected newsagents.

I'm Barry Robinson VK3PV and you're listening to VK1WIA.

SPECIAL INTEREST GROUPS - VHF AND ABOVE

Today in VK4 is the already-announced SouthEast Queensland Microwave Day, (6th of March)

Doug Friend, VK4OE PRESIDENT of the Brisbane VHF Group says they want to enable as many folk as possible, amateurs and non-amateurs, to be able to go and see microwave amateur radio in action.

"Starting just after completion of callbacks to the WIA and QNEWS broadcasts, you should find a group of us using several bands on Mt Gravatt on Brisbane's south side, or to Kevin VK4WA's place (several bands operational) at Redbank Plains in the West, or further West to John VK4JMC's place at Laidley on 1296 and 2403 MHz. On the North side of Brisbane, you can catch up with Roy, VK4ZQ who will be portable with several microwave bands. Further North again, Adrian VK4OX will be operational on 2.4 GHz from Maleny, and Wayne VK4WS will have a number of bands operational from Howell's Knob also near Maleny.

Operating with low power on 5.7 and 10.3 GHz to the East of Brisbane (yes, East!) should be Peter VK4EA on the beach at Moreton Island, an unusual and potentially interesting contact for many to make.

Primary liaison is expected to be via the VHF Group's 'RBN repeater on 147 MHz, so this repeater will be active on that morning.

Anyone can go to any of these locations to experience the ways of operating, the challenges and the intense fun of microwave amateur radio."

So again for all the latest, check in on 147.000 in Brisbane after the news!

Please think of the environment before printing this email

GB2RS NEWS

Sunday 6th March 2011

The news headlines:

* Hands-On Experience for National Science Week

* 2011 Dayton Hamvention Awards announced

* New Train the Trainers at Renton

The subject for National Science Week 2011 is Communications. To support the Week, Sheffield Amateur Radio Club is providing hands-on experience of amateur radio at a local school as well as to the community at large. On Saturday 12 March Sheffield ARC will be at Tapton School at Crosspool, Sheffield, from 10am to approximately 4pm. Using two temporary radio stations and aerials, they will put the school on the air for the day using the club callsign GX3RCM/P. Then on Monday 14 March the club will be holding an open house from 7.30 to 9.30pm at their HQ, Sheffield Transport Sports Club, Greenhill Main Road, Meadowhead Roundabout, Sheffield S8. The evening will include demonstrations of short wave and VHF/UHF amateur radio including HF, VHF satellite communications, datamodes and the state of the art D-Star repeater system. In addition there will be a display of equipment, amateur radio videos and printed information. More details at http://krystynahaywood.co.uk/sarc. Also for National Science Week, Sands Contest Group is operating from Heron Corn Mill in Cumbria and will be active on 16 & 17 March using the callsign GB4HCM. The group will be active on 20, 40 and 80m between 10am and 4pm each day. Activity will be on SSB and data modes and there will be a number of interactive displays. For more information visit GB4HCM on QRZ.com.

The winners of the 2011 Dayton Hamvention awards have been announced. Amongst the various awards, the Technical Excellence Award went to Roy Lewallen, W7EL for his development of EZNEC, the antenna modelling software system. This software is now the basis for numerous amateur radio antenna training courses. The Special Achievement Award goes to Fred Lloyd, AA7BQ, who developed the QRZ.com website that is used by amateurs worldwide.

A Train the Trainers day is being organised for 19 March at the Carman Centre, Renton. The purpose of the Train the Trainers course is to offer tutors some guidance on running courses and teaching techniques.

If you are interested in attending, please contact GM0ONX by e-mail to GM0ONX@rsgb.org.uk or call 01563 534383. The course will start at 10am and finish around 6pm.

The YL International Meet 2012 will take place in Adelaide in May 2012. Those interested in attending, whether licensed or not, should check out the website www.ylinternational2012.com for full details. The plan is for delegates to arrive in Adelaide around 3 May. Over the next few days several tours and outings are planned that will culminate in a 7 or 9 day tour ending in either Alice Springs or Darwin.

If you are planning to visit Cyprus this year, the Pafos Radio Club would like to welcome you. They meet on the 3rd Thursday of each month at the Pafos Gardens Hotel at 7pm. They also have a weekly net on Wednesdays at 7.30pm using the local repeater, 5B4PRC, on 145.750MHz. More details from Don, 5B4AGQ.

2

And now for the details of rallies and events for the coming week

Bournemouth Radio Society is holding their 23rd annual sale today, Sunday 6 March, at The Kinson Community Centre, Millams Road, Bournemouth. Doors open at 9.30am and the sale closes at 2.30pm. Admission is £1.50. Refreshments will be available. Further details by email from tonyg3ywg@gmail.com.

The Exeter Radio & Electronics Rally will take place today, 6 March, at America Hall, De la Rue Way, Pinhoe, Exeter, EX4 8PW. Doors open at 10.30am, with disabled access from 10.15. Admission is £2. There will be trade stands and a Bring & Buy. All profits from the event are shared between GB3SW, GB3EW and GB3EX, the local 2m and 70cm repeaters. Contact Pete, G3ZVI on 07714 198374.

On 12 March the Dutch National Radio Flea Market will take place at "Autotron", Rosmalen 's- Hertogenbosch, just off the A59 motorway. Doors open from 9am to 3.30pm and talk-in is available on 145.250MHz. Check out www.radiovlooienmarkt.nl for more details.

On 13 March, Cambridge & District Amateur Radio Club Rally will be held at Wood Green Animal Shelter, King's Bush Farm, A1198 London Road, Godmanchester, Cambs PE29 2NH. Doors open at 10am and admission is £3. There will be trade stands and a Bring & Buy. Contact John, G0GKP, on 01954 200072.

Also on 13 March, the 26th Wythall RC Radio and Computer Rally will be held at Woodrush Sports Centre, Shawhurst Lane, Hollywood, Birmingham B47 5JW. The venue is on the A435, 2 miles from J3 of the M42. Entry is £2 and there will be trade stands and a Bring & Buy. Contact Chris, G0EYO, on 07710 412 819.

Now for the news of special events

GB1OOD has been issued for 2011 by Ofcom as a special event callsign. It will be used throughout 2011 to celebrate the 100 years of the Derby Wireless Club, founded in 1911. Until 25 March the station will be operating from the Silk Mill Museum located in the city centre of Derby, alongside the River Derwent. The station will have restricted operation mostly at weekends due to the museum's opening hours. Information on GB1OOD can be found on QRZ.com.

GB1IMW will be on the air from Mepal & Witcham Primary School, Mepal near Ely in Cambridgeshire. The operation is part of the children's study and participation in National Science Week for Communications from 14 to 18 March, including 'Red Nose Day'. They will be operating nationally on 80m and 40m HF and locally on 2m, 6m and 70cm. The organisers ask that amateurs please do answer the children's CQs.

Between 13 March and 3 April GB8HBW and GB0CMR will be on the air celebrating 85 years of Hospital Radio in the UK. GB8HBW will be operating in the Newbury area and GB0CMR is in Hinckley for Castle Mead Radio.

3

And now the HF DX news compiled from 425 DX News and other sources

Four stations will be active from Port Blair in the Andamans from 15 to 31 March. Details are on the web at http://arsi.info/dxpeditions/vu4pb-mar-2011.

Frosty, K5LBU, and Wayne, W5KDJ, are heading to Lesotho as 7P8CF and 7P8KDJ from 11 to 20 March. Plans are to have two stations for activity on 160 through 10m on CW, SSB, RTTY and PSK.

Nick, G3RWF, will be returning to Uganda from 20 February until 14 April. This is not a DXpedition as he will be doing voluntary work at a university, but will include plenty of operating as 5X1NH on 80 through 10m. He does not have room for a 160 metre antenna.

SP5EAQ and SP5DRH will operate from West Kiribati from 1 to 17 March. Calls will be T30AQ and T30RH. They'll be on 160 to 10m CW, SSB and RTTY, with a focus on the low bands and 30m.

Now the contest news

The ARRL International DX Contest takes place this weekend, 5 and 6 March, between 0000 and 2359UTC. Work W/VE stations only, in as many of the 48 contiguous States and Provinces as possible. Send a signal report and your transmitter power and expect to receive a signal report and 2-letter State or 3-letter Province code.

Monday 7 March sees the data leg of the 80m Club Championship taking place between 2000 and 2130UTC. The exchange is signal report and serial number.

The following day, 8 March, is the 432MHz UK Activity Contest from 2000 to 2230UTC. Using all modes the exchange is signal report, serial

number and locator.

The Commonwealth Contest takes place for 24 hours on 12 and 13 March from 1000 to 1000UTC. This is a contest that only takes place between Commonwealth countries, so it is largely free of Continental European stations. Infrequently activated countries always appear in this contest and, without the mega pile-ups that occur in many other worldwide contests, the owner of a modest station in Britain stands a decent chance of working some real DX. Be aware though that some DX openings are very short, so it helps to know when to look for particular areas, especially on the upper HF bands. The exchange is signal report and serial number.

Finally for this week, 13 March sees the 2nd 70MHz Cumulative contest taking place from 1000 to 1200UTC. Using all modes the exchange is signal report, serial number and locator.

And now the solar factual data for the period from the 21st to the 27th of February, compiled by Neil Clarke, G0CAS on the 28th of February.

Solar activity was mostly low with a number of C class solar flares taking place. Activity increased to moderate when the only M class solar flare took place on the 24th. Conversely, on the 22nd solar activity declined to very low levels. None of the solar flares had any significant effect on propagation. Solar flux levels declined from 97 units on the 21st to 88 by the 25th. The average was 91 units. The 90 day solar flux average on the 27th was 87 units. That's one unit up on last week. X-ray flux levels varied little day to day and averaged B2.2 units. Geomagnetic activity was quiet every day. The most disturbed day was the 21st

4

with an Ap index of 7 units. The average was only Ap 3 units. Solar wind data from the ACE spacecraft saw solar wind speeds decline from 450 kilometres per second on the 21st to 300 by the 26th. Particle densities were low throughout. Bz varied no more than minus and plus 6 nanoTeslas during the period.

And now the solar forecast. This week the active side of the Sun is expected to rotate into view on or around the 6th of March. A lot will depend on how active the returning region is after spending the last two weeks on the far side of the Sun. Remember, this is the group that produced numerous M and one X class solar flares on its last rotation. Solar activity should be low with a chance that activity could increase higher than that. Solar flux levels are expected to be about the 100 mark or even higher. Geomagnetic activity should be quiet, however, if any large solar flares take place and a coronal mass ejection that is heading our way, then activity could increase. MUFs during daylight hours at equal latitudes should be about 22MHz for the south and 19MHz for the north. Darkness hour lows should be around 9MHz. Paths this week to the east coast of North America should have a maximum usable

frequency with a 50 per cent success rate of around 20MHz. The optimum working frequency with a 90 per cent success rate will be about 15MHz. The best time to try this path will be between 1400 and 1900 hours.

And that's all for this week from the propagation team.

5

Next, the Local News:

Please note that details of all RSGB-affiliated clubs and societies

can be found on the RSGB website, including email addresses

and website links where known.

[Note to Newsreaders: Please read the local news items appropriate to the service area of your

transmission.]

NEWS FOR THE MIDLANDS On Monday 7 March Gloucester Amateur Radio & Electronics Society is having a talk on marine VHF radio by Ian Hewer, G4CLR. Contact Anne, 2E1GKY, on 01452 548478, daytime.

On Monday 7 March Leicester Radio Society is launching its new website, http://g3lrs.co.uk. Details from Alex, G8FCQ, on 0753 120 1640.

On Monday 7 March South Birmingham Radio Society is on the air and reviewing field day. Contact Don, on 0121 458 1603.

On Monday 7 March South Normanton Alfreton & District Amateur Radio Club is holding a junk sale. Details from A Lawrence, 2E0BQS, by email to adylawri@btinternet.com.

248. SARL NEWS - SUNDAY 06 MARCH 2011

Newsgroup: rec.radio.amateur.misc
Date: 2011-03-05 20:00:14 UTC
From: website@sarl.org.za
Message-ID: <20110305200007.044D933C54@panix2.panix.com>
Source record: 4888
Cross-posted to: rec.radio.amateur.misc,rec.radio.info

SARL NEWS - SUNDAY 06 MARCH 2011

You are listening to ZS6SRL, the official radio station of the South African Radio League, the national body for amateur radio in South Africa, with a news bulletin every Sunday at 08:15 CAT in Afrikaans and at 08:30 CAT in English. To listen to a web stream, visit www.sarl.org.za, click on 'ARMI' and follow the links for details. PLEASE NOTE: for audio via Echolink, connect to ZS0JPL-R.

You can download this bulletin and previous ones from www.sarl.org.za and also subscribe to receive future bulletins by e-mail. Your newsreader this morning is (name), (call sign), on 145,725 and 7,066 MHz from Pretoria, with relays on 7,066 and 3,695 MHz SSB.

SILENT KEYS

It is with deep regret that the passing of two radio amateurs must be announced.

The key of Bernardus van Heerden, ZR3BVH, went silent on 20 February 2011. We extend our condolences to his family and friends.

The key of Dennis Shannon, ZS6JDS, went silent at 05:00 on 23 February 2011. Dennis had been ill for some time. We extend our condolences to his wife Carol, family and friends.

In the news today

CPUT TO BUILD S-BAND TRANSMITTER FOR UK SATELLITE

SARL COUNCIL TO MEET THIS WEEK

UK RADIO AMATEUR GETS FUNDING TO STUDY DIGITAL EMCOMM SYSTEMS FOR RAYNET

You are listening to ZS6SRL. Stay tuned for more details on these and other important and interesting news items.

CPUT TO BUILD S-BAND TRANSMITTER FOR UK SATELLITE

The Cape Peninsula University of Technology has been invited by the UK to build an S-band transmitter for the first satellite to be launched by the UK Space Agency in December 2011. UKube1 is an exciting and novel collaboration between the UK Space Agency, industry and academia, and is envisaged as the pilot for a full UK CubeSat programme.

Strathclyde University, who are coordinating the project, approached CPUT to build the transmitter. A similar unit is already under construction at CPUT for its own 3U CubeSat.

Can South Africa build its own satellite launch facility?

Naledi Pandor, Minister of Science and Technology, at the SANSA launch said that South Africa will take the satellite launch facility which was constructed for the Greensat project many years ago out of the mothballs and develop it into a modern day launch facility. This however is a long term project. Now an entrepreneur, Mark Comninos, formed a company Marcom Aeronautics and Space with the express purpose of bringing to market a two stage expendable launch vehicle the "CHEETAH-1 CSLV", aimed at reducing South Africa's dependence on foreign launch services and provide accommodating satellite launch services for the global satellite industry.

Mark will be one of the main speakers at the SA AMSAT Space Symposium which will be held at Vodaworld on 2 April 2011. Amongst the other speakers are Dr Sandile Malinga the CEO of SANSA, and the two SA AMSAT CubeSat project leaders John Willescroft and Hannes Coetzee, as well as Dr. L.J. du Toit of EMSS Antennas, the company responsible for the development, production, commissioning and factory support of the KAT-7 receivers. For details and to book visit www.amsatsa.org.za. Make use of the early bird discount. Special rates are offered for SARL and SA AMSAT Members.

SARL COUNCIL TO MEET THIS WEEK

The council of the SARL meets this week for the annual strategy session to plan for the year ahead. This is the only time council members meet face to face as all other meetings are conducted via teleconference. The outcome of the meeting and plans for the next year are presented at the AGM in the annual report which will also be available on line at the time of the Annual General Meeting.

UK RADIO AMATEUR GETS FUNDING TO STUDY DIGITAL EMCOMM SYSTEMS FOR RAYNET

A member of The United Kingdom's Radio Amateurs' Emergency Network or RAYNET has received two months' funding to examine how that group could best use data communications to support police and other services.

Howard Winter, G1BYY, a member of Mid-Herts RAYNET, made an application to the Vodafone World of Difference Scheme in November. According to the RSGB News, Winter will spend two months undertaking his own research and experimentation, collating the work that has already been done by RAYNET Groups and comparing the experiences of members experimenting with data. He will then be producing documents that will nationally be available to groups of all affiliations.

An increasing demand from emergency response services using RAYNET to have it provide data links has led many groups to experimenting on a variety of digital systems. RAYNET members are now using APRS to track

vehicles responding to incidents in remote locations, transmitting photographs from the scenes of emergencies and sending data files back to their control and command centres.

VHF ACTIVITY ON THE INCREASE

Several radio amateurs in the Johannesburg and Cape Town areas have started to experiment with SSB on 2 metre. Recently they decided to also use 144,200 MHz SSB as the country-wide calling frequency. This frequency has been in use for a number of years by division 2 and 5 stations and many contacts have been made on SSB. If you are only equipped with FM then try 144,400 MHz the FM DX channel. Very long distance contacts have been made on this frequency from the east coast of the RSA to Reunion Island on both FM and SSB and over land from Richards Bay to Port Elizabeth. Amateurs in Port Elizabeth monitor this FM channel from 19:30 CAT until 20:00 CAT for stations in Mosselbay and East London. At 20:00 CAT they change frequency to 144,200 MHz SSB for longer distances to Durban and beyond.

Likewise there has been a revival of interest in the 6 metre band too. Quite a number of stations became active again in Cape Town, Johannesburg, Durban and Port Elizabeth using the frequency of 50,200 MHz SSB.

To get the best long distance results on VHF you should use around 100 Watt and a high gain horizontally polarized Yagi beam antenna with a LNA.

CONTEST NEWS

Sunday 6 March 2011 - SARL Hamnet 40 m Simulated Emergency Contest. This SSB Contest is open to all Radio Amateurs in South Africa, Namibia, Botswana, Zimbabwe, Swaziland, Mozambique, Lesotho, Marion Island and South African Antarctica. Only contacts with these areas will count. The contest will run from 12:00 to 14:00 UTC. Participate as a Single operator stationary mobile; Single operator portable; Multi-operator portable or Single operator base station.

Saturday 12 March 2011 - SARL March Madness YL Sprint. This is a fun activity to celebrate International Women's Day (8 March) between radio amateurs in Southern African countries. Call "YL Sprint." The Sprint will run from 09:00 to 10:00 UTC. The exchange is a RS report and YL or OM.

PROPAGATION REPORT

Hannes Coetzee, ZS6BZP, reports that the solar activity is at moderate levels. Sunspots continue to pop up in various locations on the sun. Currently Sunspot 1 164 in the north and 1 166, which rotated into view on the eastern limb, remain the largest regions. A new sunspot that formed between 1 164 and 1 166 was numbered 1 167. The effective sunspot number is expected to be around 65 for the coming week.

15 m will provide the best opportunities for DX followed by 20 m. Conditions to India will be good from the afternoon till after sunset. During the afternoons conditions will be good towards Europa on 15 m, later to be followed by good 20 m openings. Good 15 m contacts with the USA are possible during the evenings. Contacts with Australia are possible on 20 m after sunset. 15 and especially 20 m openings to Brazil and South America are possible during the afternoons. With the good 15 and 20 m openings 17 m will also be full of surprises. With the higher sunspot activity 10 m may also show signs of life around mid day.

For the CW and digital enthusiasts 30 m may be very rewarding with openings to many parts of the world.

Locally 40 m is the work horse for contacts around the country with 20 and 30 m also being very useful for contacts over the longer distances. 80 m will be best during the early mornings and late afternoons as well as over the shorter distances.

80 m is the frequency of choice during the evenings.

Please visit www.spaceweather.co.za for further information.

DIARY OF EVENTS

6 March - SARL Hamnet 40 Metre Simulated Emergency Contest will be run from 12:00 to 14:00 UTC. 12 March - SARL March Madness YL Sprint from 09:00 till 10:00 UTC. 19 March - RTA, Programming in Windows course in Cape Town, book at www.sarl.org.za. 25 March - SAiSAT briefing session at the NARC. 2 April - SA AMSAT Space Symposium at Vodaworld, book at www.amsatsa.org.za. 15-16 April - SARL National Convention at Vaal University for Technology.

SARL News invites clubs and individuals to submit news items of interest to radio amateurs and shortwave listeners. Submit news items - if possible - in both English and Afrikaans to www.sarl.org.za/newsinbox.asp, not later than the Thursday preceding the bulletin date.

The SARL also invites you to listen to Amateur Radio Today every Sunday morning at 10:00 CAT on 145,750 MHz in the Pretoria area, with relays on 7 082, 7 205 and 17 560 kHz. There is also a podcast by ZS6RO. For a web-stream and Echolink by ZS6FCS, visit www.sarl.org.za, click on 'ARMI' and follow the links. A repeat transmission can be heard on Mondays at 22:05 CAT on 3 215 kHz. Sentech sponsors the ARMI transmissions on the non-amateur frequencies.

You have listened to a bulletin of the South African Radio League, compiled by George, ZS6NE.

Thank you for listening, 73.

Message from Break-In Editor
"The Break-In Editor John Walker ZL3IB has advised that he is assuming
Break-In will be published as usual although it maybe slightly late. He
would be grateful if columnists and others could get their copy to him no
later than the usual deadline which is 10th March."

****

>From The Business Manager ZL2DL
Debby says...
Election results, will be advised to all candidates by the Returning Officer
on at approximately 6pm on Monday 21st after which they will be placed on
the NZART official web site.

Remits will be published in the March/April Break In. For those branches who
have made their remits known to other members, when considering the remits,

please remember that the number that you may be discussing will not be the Remit number that is assigned in Break In.

There are 13 remits in total, therefore I have had to renumber them in consequential order.

It's now time for all branches to be considering recipients of awards:

Amateur of the year, Young Amateur of the Year, and Arthur Godfrey Memorial Award.

Criteria for these awards are attached to this issue of HQ Info-line. Nominees names must be received here at HQ before 1 May 2011.

Talk soon...Debby ZL2DL

FMTAG Notes For March 2011 HQ Infoline 225
Please click HERE to go to the FMTAG Applications Being Processed

Proposals
Published in HQ Infoline and on the NZART website, inviting comments from members.

1.. Branch 74 Wellington VHF has applied to relocate its 2 metre Bulletin Board to Ngaio Reservoir, Topo50 map reference BQ31 494.92 316.02. An Engineering Evaluation, in accordance with the MED's Radio Licence Certification Rules (PIB38), shows that the transmit frequency can remain on 146.025 MHz and the receive frequency can remain on 146.625 MHz, and that there will be no interference to other stations.
2.. Branch 74 Wellington VHF has applied to relocate its 70 centimetre Bulletin Board to Ngaio Reservoir, Topo50 map reference BQ31 494.92 316.02. An Engineering Evaluation, in accordance with the MED's Radio Licence Certification Rules (PIB38), shows that the transmit frequency can remain on 434.875 MHz and the receive frequency can remain on 439.875 MHz, and that there will be no interference to other stations.
3.. Branch 74 Wellington VHF has applied to change the frequency of the 70 centimetre repeater located at Ngaio Reservoir, Topo50 map reference BQ31 494.92 316.02. The transmit frequency will be 434.550 MHz and the receive frequency will be 439.550 MHz. An Engineering Evaluation, in accordance with the MED's Radio Licence Certification Rules (PIB38), shows that there will be no interference to other stations.
Final Recommendations To NZART Council
None this month.

Comments and Applications
Please send your comments and suggestions on the above matters and recommendations, and on any other FMTAG matters, by e-mail to: fmtag@nzart.org.nz

Applications for repeaters, beacons, digipeaters, point-to-point links, and so on, should be made on the latest version of FMTAG Form 10. The latest versions of FMTAG Form 10, and the explanatory Form 10A, are available on

the NZART web site:
http://www.nzart.org.nz/nzart/fmtag/

Completed forms should be sent by e-mail to fmtag@nzart.org.nz

END

****

Christchurch Earthquake 22-February-2011
There has been messages from amateur radio societies and individuals around the world. Please see these on the February news page at:
http://www.nzart.org.nz/news/2011-news/feb-2011-news/

****

Rescue Radio:
The Christchurch New Zealand Earthquake Story Continues
Ham radio continues to be an important factor in rescue and recovery efforts in the wake of the earthquake that hit Christchurch, New Zealand, on Tuesday, February 22nd. Jim Meachen, ZL2BHF, is several hundred miles to the North in Auckland with the latest:

ZL4FZ: "At this stage were still extensively supporting the Land SAR operation that's the more major component. Today with 300 searchers in the field we have deployed probably 50 radios to teams of operators and each of those teams has each got its own radios. There are about an actual 250 staff on foot in the field and all of that communications is coming back through AREC"

That's Richard Smart, ZL4FZ, who is head of the Amateur Radio Emergency Communications team explaining the role that his emergency communications group is currently playing in the aftermath of the 6.3 earthquake. A quake that as of airtime is believed responsible for at least 160 deaths and scores of injuries in and around the Christchurch area. According to Smart ham radio was on scene from the time the quake hit and right though the present:

ZL4FZ: "AREC involvement in the Christchurch earthquake has been to support Civil Defence directly with the welfare centers, initially at the temporary welfare center in Hagley Park. (This is) a small tent city where AREC provided effectively a complete communications terminal right through to the extensive support for the Land SAR operation which has been visiting every home in the Western suburb of Christchurch. To date a total of some eighteen thousand homes have been visited by the Land SAR teams and the AREC teams have provided communications for upward of 300 volunteers in the field at any one time."

Smart tells Amateur Radio Newsline that it's the ability of hams to quickly adapt and respond to any emergency that masks them valuable in situations such as this. He also says that those in charge of relief efforts are very satisfied with the AREC ham radio operations:

ZL4FZ: "I believe in this case that AREC has managed to provide a solution to unforeseen communications difficulties, and in the case of the Land SAR deployment particularly because it has become a linchpin to allow the operation to work.

"We have been told by the senior management for the Land SAR operation that basically it would not have been possible to achieve what they have achieved which is spectacular in its own right, without the assistance of AREC in that role."

So what role will AREC play as recovery efforts continue? ZL4FZ says that at this moment its hard to say:

ZL4FZ: "Its very difficult to tell at this stage and the difficulty is that there a number of significant issues that the city is facing and there are a number of agencies involved, obviously with specializations in different areas. One of the things the Civil Defence emergency management teams are working on is setting the appropriate team for the tasks that they have. And at this stage, while this tasking is drawing nearer to a close, we are waiting word as to what the next tasking may be."

The story of the Christchurch earthquake and the part being played by ham radio in post quake recovery efforts is far from over and we will have more for you in future Amateur Radio Newsline reports. From Auckland, on the North Island of New Zealand, I'm Jim Meachen, ZL2BHF, reporting for the Amateur Radio Newsline.

It has to be noted that so far, this has been a VHF only operation. Word from the New Zealand Association of Radio Transmitters is that hams providing communications support in the aftermath of the quake are using only 2 meter FM. No High Frequency communications into and out of the Christchurch area has been found to be necessary.

(ARNewslineT, ZL2BHF, ZL4FZ)

The MP3 version of this text is available on the NZART Web as is a link to Amateur Radio Newsline. Please see:
http://www.nzart.org.nz/h-quarter/broadcasts/

VHF Convention
Wellington ï¿½ Easter 2011
The Wellington VHF Group invites you to attend the VHF Convention to be held in Wellington during Easter, 22nd ï¿½ 24th April, 2011, at Tawa College in Tawa. Come and enjoy Lonely Planetï¿½s 4th top city in the world to visit in 2011 and see for yourself why Wellington is the ï¿½Coolest Little Capital in the World".

On this occasion, the Convention is being held in conjunction with the annual Wellington Radio Expo - Wellington Expo-11. The Official Opening will be after lunch on Saturday 23rd April to enable out of towners and locals to fossick through the treasures at the Expo that will be seeking new homes.

VHF Convention offers a great programme for both the newcomer and the experienced Ham, and will include an exciting mix of speakers and events including technical presentations, VHF Forum, ATV, Satellites, Special Interest Groups and a forum for Repeater and Beacon Trustees and National System Trustee.

The nearest motel is Aotea Lodge, near the Police College and there are 6+ other motels in Porirua, none more than 5-10 minutes drive and 3+ in Johnsonville, 4-5 minutes drive from Tawa.

The cost will be $50 per person attending the Convention - includes afternoon tea on Saturday and morning tea/lunch/afternoon tea on Sunday. Arrangements are being made with a local restaurant for a pay as you go Dinner on Saturday night.Entry to the Wellington Expo-11 costs an additional $4.00, to be paid at the door.

More details on the programme will be published via Infoline as soon as they are finalised. Registration forms are available on the Wellington VHF Group website http://www.vhf.org.nz

Report on Proposed Amateur Allocation Around 500 kHz
>From The ITU Conference Preparatory Meeting
for WRC-12 Geneva, 14-25 February 2011
I'm pleased to report that Document 175(Rev. 1) was adopted by Plenary this afternoon without meaningful comment or change. See attached. This completes the work of the CPM on Agenda Item 1.23.

Removal of the original Method A came about because there was no administration support for retaining it. Given that, it is just as well that it has been deleted in order to avoid confusion. I believe there is more support now for some form of amateur allocation below 487 kHz than there was at the beginning of the CPM.

Congratulations to all concerned and especially to Ken Pulfer.

Dave Sumner, K1ZZ

Scientists Warn of Solar ï¿½Katrinaï¿½
Author: Clive Cookson in Washington
Source: FINANCIAL TIMES - http://www.ft.com
Date Published: 20th February 2011

The Sun and its activity plays an important part in amateur radio. What the events, described below, will do with the propagation of our radio waves, we will have to wait and see. It looks serious. EDITOR

Excerpt:

'....The sun is waking up from a long quiet spell. Last week it sent out the strongest flare for four years ï¿½ and scientists are warning that earth should prepare for an intense electromagnetic storm that, in the worst case, could be a ï¿½global Katrinaï¿½ costing the world economy $2,000bn.

Senior officials responsible for policy on solar storms ï¿½ also known as space weather ï¿½ in the US, UK and Sweden urged more preparedness at the annual meeting of the American Association for the Advancement of Science in Washington.

ï¿½We have to take the issue of space weather seriously,ï¿½ said Sir John Beddington, UK chief scientist. ï¿½The sun is coming out of a quiet period, and our vulnerability has increased since the last solar maximum [around 2000].ï¿½.....'

Branch Data - The Information on NZART Branches and Affiliates
The format for advising the Call Book Editor about changes to Branch details has been changed to a more efficient CMS based system.

Please use the new form
http://www.nzart.org.nz/branches/branch-data/branch-list-report-form/
to advise changes to Branch details.

An update to the Branch list will be done early March and the old system of spreadsheet, Word document and pdf removed.

The new system has a menu 'BRANCH LIST MENU' and a simple database 'BRANCH LIST DATA'. The Branch List menu has a list of all NZART branches in alphabetical and branch number order. Branch List Data has 88 records with each record having 19 fields with the details of each branch.

For those that like their data in Excel format, instructions on how to convert the branch data is at:
http://www.nzart.org.nz/branches/branch-data/#conversion

Lorne ZL2AHB Call Book Editor E-mail: callbook@nzart.org.nz

Web Update
Redesign of LINKS on The NZART Web
A complete redesign has taken place from the opening page to the

presentation of the links.

The links selection is now in two pages, broken into A to I and L to W. This allows descriptive menu names. The single letter has been removed and has been replaced with a name that relates to the main subject of the link. The name is shown on the opening page in a larger size bold type. Also you can see the other subjects that belong to the particular link with the separator between the names being the spade symbol.

In the level two menu, which is under the main menu, entries of L-W and A-I are found. These allow easy navigation between the two pages of the links section.

Also added is a menu heading of 'Feedback(1)'. Suggestions and notification of broken links can be done with very little effort.

A list of the links are clearly shown when a link page is opened, with the major list being closes to the Page Links menu column.

The Quick Navigation section on the bottom of each page, also shows the Links entries. I fitted it in where I could.

Have a LOOK: http://www.nzart.org.nz/links/

The Open Polytechnic is Using SilverStripe CMS
Just received the March Newsletter from Silverstripe and was surprised to see that the Open Polytechnic has gone live using SilverStripe for their CMS enrolment system. The Open Polytechnic is a distance-learning institute, with 25 000 students.
NZART is up with the big boys by using SilverStripe as its CMS!

NZART Amateur of the Year Award Rules
Presented at NZART Annual Conference

Award to be made to the radio amateur who in the preceding 12 month calendar year (January to December) has given outstanding service to Amateur Radio.

Criteria
1.. Nominees must be active in more than one aspect of amateur radio and in these to have shown extraordinary service to their fellow amateurs,
2.. The nominee must be a current member of NZART, and

3.. The nominee should be unaware of the nominations.
Nominations
1.. Nominations to be made to the President of NZART (at current address) to reach the President by May 1st following the year under review,
2.. Nominations must be made through the Secretary of a Branch of NZART, and
3.. Points of "service rendered" must be tabulated and certified as correct by the Branch Chairman (except that two other officers would be accepted if the circumstances warrant) and these must refer only to the 12 month period under review. Through these, the reason why the nominee should be considered must be clearly evident.
The President will decide on the Award allocation reporting the result to Council immediately prior to the Annual General Meeting. It is possible that in some years no award would be made even though recommendations were received.

****

NZART The Young Amateur of the Year Award Rules
To Recognise The Young Amateur of the Year

The Award Objectives
Objectives of the Award is for NZART (and a co-sponsor) to demonstrate and encourage interest in promoting technological awareness and education in the field of radio and electronics by involving young people in Amateur Radio and to focus the activities of our younger Amateur Radio operators into achieving excellence in all aspects of the hobby, both individually and within the fellowship that belonging to Amateur Radio brings.

Requirements to obtain The Young Amateur of the Year Award

The criteria for this award is:
1.. Nominee to be under 18 years of age at April 1 in the year of presentation,
2.. Nominee to have provided demonstrable service to Amateur Radio in any of the following areas of achievement:
3.. Assistance with NZART Branch or activity,
4.. Development of a significant project (hardware or software) for use in Amateur Radio, and
5.. Participation in projects associated with the promotion of Amateur Radio.
The recipient will be presented at NZART Conference with:
1.. A suitably endorsed framed certificate presented by NZART (and co-sponsor if applicable),
2.. A voucher for $100 to purchase books of the recipient's choice,
3.. One years free subscription to NZART,
4.. A presentation from any other Branch/Business/Individual who may wish from time to time, to co-sponsor the Award with NZART, and
5.. Payment of half registration to NZART Conference if the recipient attends.
6.. If no suitable nominations for the Young Amateur of the Year are received by April 1, no presentation will be made for that year,

7.. Nominations for this award should be sent by Branches or individuals along with "substantiating evidence", to the General Secretary of NZART by MAY 1st in the year of presentation, and
8.. The Young Amateur of the Year will be selected by a sub-committee appointed by Council.
****

Arthur (Jumbo) Godfrey Award Rules
The purpose of this award is to remember one of New Zealand's most well known radio amateurs, who fully supported NZART Inc and branch level activities, in the belief that strong branches meant a strong national organisation.

As there was/is a gap in this area of recognising branch level activities at a national level, this award has be instituted to not so much reward those who work at this most important level but to acknowledge to the rest of the amateur service the tireless work put in at the grass roots of amateur radio.

The Award is to be made to the radio amateur or non-transmitting branch member who in the opinion of the nominator(s) has given outstanding service to Amateur Radio at a branch level over a period of time that has not been recognized anywhere else.

Criteria
1.. Nominees must be active in branch level activities and in these to have shown extraordinary service to their fellow branch members. Points of service rendered need to be presented to ensure that the nominee meets the purpose and vision of the award as outlined in the introduction,
2.. The award is for the years prior to the award presentation. e.g. if award year is 2008, the period of time to be considered are those prior to 31 December 2007,
3.. There are no limits on the number of nominees, however up to a maximum of three recipients can be awarded in any one year,
4.. The nominee must be a current member of NZART,
5.. The nominee must be a current member of the nominating branch, and
6.. The nominee should be unaware of the nominations.
Nominations
1.. Nominations to be made to the General Secretary of NZART (at current address) to reach the office by 1 May following the year(s) under review,
2.. Nominations must be made through the Secretary of a Branch of NZART, and
3.. Bullet points of "service rendered" must be tabulated and certified as correct by the Branch Chairman (except that two other officers would be accepted if the circumstances warrant) and these must refer to the period under review. Through these, the reason why the nominee should be considered must be clearly evident. I in my capacity of General Secretary I will recommend those that meet the criteria of the Award to NZART Council for confirmation immediately prior to the Annual General Meeting. It is possible that in some years no award would be made even though nominations/recommendations were received.

Any branch that feels that they have members who would fit this criteria,
please send their nominations to me before 1 December.

Irish Radio Transmitters Society
Radio News Bulletin
Sunday 06th March 2011

Silent Key We regret to announce the death of Ettie Dolan wife of John Dolan EI9AD in Limerick. We offer our sincere condolences to the Dolan family. May she rest in peace.

IRTS AGM Annual Dinner and Rally 2011

You are reminded of the importance of attending the IRTS AGM weekend, including Annual Dinner and Rally will be held this year on Saturday March 26th and Sunday March 27th. The event will be hosted by the Limerick Radio Club. The venue is the Radisson Blu Hotel, Ennis Road, Limerick.

For more information contact, Ger McNamara EI4GXB on

087 2532512 or ei4gxb/ at /gmail/ dot/ com. A new website for the Rally in Limerick on 27 March 2011 is now available, please go to http://limerickradiorally.com for more details.

The AGM dinner tickets priced at 35 are now available from Tony Condon EI2AW at QTHR or by email to condona /at / eircom/ dot/ net.

IRTS Stand at Friedrichshafen Rally

IRTS members attending the Friedrichshafen rally this year and who are willing to be in attendance at the IRTS stand for some of the time whilst there are requested to contact Sean Nolan, EI7CD on email ei7cd / at / gofree / dot/ indigo / dot / ie .

IRTS Committee Meeting

The next IRTS committee meeting will be held on March 12th in Portlaoise. All affiliated clubs representatives are encouraged and welcome to attend.

IRTS AGM Dinner Tickets.

Tickets will be available at the next Committee meeting on 12 March from Ger McNamara EI4GXB. Please make contact with your club or regional representative who may be attending the meeting to collect tickets on your behalf. Payment can be made by cheque payable to Limerick Radio Club or by cash.

South Dublin Radio Club

South Dublin Radio Club Annual General Meeting (AGM) will take place in Terenure College on Tuesday 29th March at 8pm sharp.

All members are welcome and asked to attend.

Mayo Radio Experimenters Club

John Browne, EI7FAB, won the 2010 Mayo Radio Experimenters annual club activity competition. The annual event consists of twelve monthly competitions with accumulator points going to the annual award. John won four of the monthly competitions, and had half a point to spare over Dominic Curtin, EI9JS in the annual table. All the monthly competitions are for on air activity and range from working Locator squares, DXCC countries, a novelty alpha-numeric grid and a month devoted to listening. John McAndrew, EI3JM, (third,) Padraic Baynes, EI9JA, (fourth,) and Jimmy Kelly EI2GCB, make up the top five in the competition. The club uniquely transmits the IRTS and local news on Sunday evenings simultaneously on four VHF bands - 6mts, 4mts, 2 mts and 70cms and the club is very active on these bands locally. The news simulcast originally presented technical challenges, but these have been overcome thanks to the guidance of Dominic Curtin, EI9JS.

Mayo Radio Experimenters publishes a monthly newsletter for members and this is currently edited by John Corless, EI7IQ. He took over form David Hatfield, EI3ECB last summer.

At the recent AGM, Jimmy Kelly, EI2GCB was re-elected Chairperson, and the club's two prestigious awards for contribution to the club and to the hobby went to Padraic Baynes, EI9JA and Dominic Curtin, EI9JS.

The club plans a monthly activity day where SWLs and the public will be invited to explore the hobby with portable set-ups at different locations on one Sunday per moth from April to September.

The club is active in all IRTS competitions using the club call, EI7MRE and individual members take part in many international contests.The club won the January 80mts counties contest again this year. John Walsh, EI5GHB was well placed in this contest also. Another member, Brendan Minish, EI6IZ, is one of the to CW contesters in Europe.

Theory classes are ongoing within the club under the guidance of John Corless, EI7IQ. The club meets on the first Wednesday of each month in The Welcome Inn Hotel, Castlebar at 9.30pm local time. Visiting

amateurs or curious radio enthusiasts are most welcome to come along.

North Cork Radio Group

North Cork Radio Group will be active EI1NC/P from the old governors house at Cork City Gaol and Radio Museum on the weekend of the 19 and 20th of March, The intention of the activation is to gain publicity and awareness for the Museum as an attraction for radio enthusiast both in Cork city and for visitors to the county in general. The Gaol houses the restored 6CK radio Broadcast studio in addition to an audio visual dedicated to Marconi and his Irish connections along with a wide collection of nostalgic artefacts from the golden age of Irish radio.

North Cork Radio Group

The North Cork Radio Group, after last year's great success, is pleased to announce their second annual rally and electronics fair at the Blarney Golf Resort, Tower, Co Cork. on Sunday September the 11th 2011.

The doors open to the public at 11.30 and the rally will run throughout the afternoon. The usual traders will be on hand with some very tasty bargains, South East Communications, Long Communications and JBT Trading.

The Hotel are also offering room deals for the rally a Room Only from 59 and Double Room inc B&B: 79 Please Contact the hotel directly for room bookings on Tel:+353 21 4384477. www.blarneygolfresort.com

Small traders are very welcome but it essential that they contact the events organiser Liam EI7GTB, Tel: 085-7039042 Email: ei7gtb / at/gmail /dot/com as soon as possible.

Further details can be found via the group's website, www.ei1nc.com.com

---

Limerick Radio Club

The next meeting of Limerick Radio Club will take place on Thursday 10 March at 7.30pm in the Limerick Institute of Technology.

Lough Erne Amateur Radio Club

Michael Clarke writes and tells us about Amateur Radio Exam Successes.

All nine candidates passed the Intermediate amateur radio examination last Sunday afternoon after a course run by Lough Erne Amateur Radio Club in the SHARE Centre.

This course began last November but was abandoned in severe winter weather. It resumed over three busy February weekends with the

examination on the third Sunday afternoon.

These nine Intermediate successes represent a 35% progression from last year's 26 Foundation successes after two courses in 2010. The Club hopes more will follow, and there are ambitions for an Advanced course and examination later this year for Ofcom's Full Amateur License.

Meantime, the nine new Intermediate licensees will each receive a congratulations certificate at the Lough Erne Pearl Anniversary Rally in the big SHARE Arena on Sunday 17 April 2011.

South Eastern Amateur Radio Group

A New committee was elected at the Annual General Meeting of South Eastern Amateur Radio Group on 28 February in Waterford. The incoming committee for 2011 is as follows:

Chairperson: John McCarthy EI8JA Vice Chairperson: Francis Lenane EI5GOB Secretary: John Ronan EI7IG Treasurer: Mark Wall EI7IS PRO: Declan FitzgeraldEI5GRB

Officers are: Mick Hoban EI5DCB, Egidio Giani EI9EQ and David Gainda EI6GVB.

The club would like to thank the outgoing committee for all their work over the past year.

New 2m Repeater (EI2CCR) at Dundalk Amateur Radio Society

An upgraded 2m repeater has been installed at the RTE site at Clermont Cairn, north of Dundalk. The new installation consists of a Phillips FX5000 base station and a G1SLE repeater logic. As a result of the upgrade, licensed users need to ensure they use the following:-

1. Narrow band 12.5khz Tx deviation selected.

2. CTCSS encode set to 110.9Hz or 1750Hz tone burst used to open EI2CCR.

When you access EI2CCR you will hear a your signal report in Morse- S trong(...), I ntermediate (..), W eak (.--) this will be followed by 8 pips.

Dundalk Amateur Radio Society is most grateful to Richard, MI3CQR, for technical expertise and generosity in the installation of the new upgrade.

More comprehensive details can be obtained by access to www.ei7dar.com

---

Dundalk Amateur Radio Society EI7DAR- Lecture Series

A series of two very interesting lectures will be given by John, EI7BV. The first of the lectures will be entitled, 'The early years and the bands below 30MHz. This is quite a comprehensive 'talk' and extensive use of powerpoint will be employed. This lecture will take place on March 16th at QTHR of EI7DAR, 'Larkin House', 113, Castletown Road, Dundalk. Location map is available on www.ei7dar.com

The second lecture, date yet to be decided, will discuss the bands above 30MHz, (VHF,UHF,SHF & EHF). Members and visitors are most welcome to attend and EI7DAR look forward to seeing you all there.

DX News

Roger CT8/G3SXW and Lionel CT8/G5LP will operate from San Miguel Island, Azores EU-003 on March 16-17th. Note that Azores used to have the prefix CU but this is now changed to CT8! They hope to be active for several hours each day with the Elecraft K2, CW only. QSL via home call and LoTW.

Allan, W6HGF plans to stage a one-man expedition to Miquelon between March 14 - 22, 2011.

Activity is planned on all bands, with focus on RTTY/Digi.

John, KL7JR and Claire, WL7MY are now QRV from Costambar, Dominican Republic until June 2011. QSL via H/c. QSLing will start around July.

Anne, OH2YL makes a Dxpedition to Saint Barth&#65533;lemy. The expedition starts on 15th April and ends on the 27th. She works on all HF bands (160 m to 10 m). The mode will be CW. QSL cards via OH2YL. Also LoTW works fine. You can find more information about this expedition at www.fjoh2yl.com

4A4A Will take place between 3 to 20 of March, a good group will put the signal on the air on SSB , CW and Digital modes from Benito Juarez Island (Isla Socorro). IOTA: NA-030 // QTH locator : DK48MR They will try setup 3 stations running simultaneously as conditions permits.

World Radiocommunication Conference Amateur Radio has moved a step closer to a medium frequency (MF) allocation below the AM broadcast band. During the first week of the Conference Preparatory Meeting (CPM) for the 2012 World Radiocommunication Conference (WRC-12) of the International Telecommunication Union (ITU), held in Geneva February 14-25, delegates completed the drafting of nine pages of analysis of the technical and regulatory issues related to WRC-12 Agenda Item 1.23: consideration of a possible secondary allocation to the Amateur Service of about 15 kHz somewhere between 415 and 526.5 kHz. What is now called Method A envisions an allocation of up to 15 kHz between 472 and 487 kHz. Method B calls for allocations of 461-469 kHz and 471-478 kHz.

Lough Erne Amateur Radio Club Annual Rally

The Lough Erne Annual Rally takes place The Share Centre, Lisnaskea Co. Fermanagh BT92 0EQ on Sunday April 17th 2011. Doors open at 11.30am and access can be obtained from the Erne/Shannon waterway. Bring and Buy, Food, on-site parking. Contact: Iain 028/048 66326693. EMail: iain /at/ learc.eu See www.loughernerадioclub.co.uk

---

Items for inclusion in next week's Radio News can be submitted via e-mail to "newsteam /at/ irts / dot / ie" for automatic forwarding to both the radio and printed news services. Urgent news items for the radio news maybe telephoned to the radio news editor, Aidan, EI7JC on 085 7100511.

Please note that items for the radio news should reach the editor no later than midday on Thursday in order to be guaranteed inclusion in the following Sunday's bulletin.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 27th-Feb, through Sunday, 6th-Mar there were 227 countries active. Countries available: 3A, 3B8, 3D2, 3DA, 3V, 3W, 4J, 4L, 4O, 4S, 4X, 5B, 5H, 5N, 5R, 5T, 5V, 5W, 5X, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8Q, 8R, 9A, 9G, 9H, 9J, 9K, 9M2, 9M6, 9Q, 9V, 9Y, A4, A6, A7, A9, AP, BV, BY, C2, C3, C6, C9, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, CY0, D2, D4, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FK, FM, FO, FR, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HC, HH, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J6, J7, J8, JA, JD/o, JT, JW, JX, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ4, PJ5, PJ7, PY, PZ, R1FJ, S2, S5, S9, SM, SP, ST, SU, SV, SV/a, SV5, SV9, T30, T7, T8, TA, TF, TG, TI, TJ, TK, TL, TR, TT, TY, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V7, V8, VE, VK, VK0M, VK9C, VP2E, VP2M, VP2V, VP5, VP6, VP8, VP9, VQ9, VR, VU, XE, XF4, XT, XU, YA, YB, YI, YJ, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZD7, ZD9, ZF, ZL, ZP, ZS, ZS8

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

4A, REVILLAGIGEDO (Update). The 4A4A team is now on the air as of March 3rd, from Socorro Island (NA-030) and is expected to be there until March 20th. They will have 3 stations running simultaneously on CW, SSB and RTTY, as conditions permits. Suggested operation frequencies are:
CW - 1824, 3514, 7014, 10114, 14014, 18084, 21014, 24904 and 28014 kHz
SSB - 1850, 3790, 7065/7165, 14195, 18140, 21295, 24940 and 28475 kHz
RTTY - 3582, 10140, 14082, 18102, 21082, 24922 and 28082 kHz
6m - 50104/CW and 50140/SSB
As this was being typed, the 4A4A QSO count as of 2129z, March 5th, is 8409 with 4678 unique callsigns (5369/CW, 2698/SSB and 342/RTTY). QSL via EB7DX direct. All QSOs will be confirmed via LoTW automatically. The DXpedition's Web site is: http://www.revillagigedo2011.com
Online log available at: http://www.revillagigedo2011.com/en/log.html

9A, CROATIA. Zrinko (Zik), DK8ZZ/VE3ZIK/YT3ZZ, will be once again active from Croatia as 9A/VE3ZIK between March 13-30th. He also plans to be active in the Russian DX Contest and CQ WPX SSB Contest. Zik also mentions that there is a good chance he will be active from Vrana Lake (9AFF 019). QSL via DK8ZZ, by the Bureau, LoTW, eQSL or direct. E-mail Bureau request for QSLs can go to: ve3zik@gmail.com

A5, BHUTAN. Operators Shigeo/JA1JQY (A52JY), Nakayama/JA1KJW (A52KJ) and Kunio/JA8VE (A52VE) will be active from Thimphu between April 19-26th. Activity will be on 160-6 meters using CW, SSB and RTTY.

CE0Y, EASTER ISLAND. Frank, I2DMI, will be active as CE0Y/I2DMI from Easter Island between July 30th and August 8th. Activity will be RTTY only. Bands of operation were not provided. QSL via his home callsign.

CN, MOROCCO. Hartwig, DL7BC, will be active as CN2BC during the CQ WW WPX SSB Contest (March 26-27th) as a Single-Op/All-Band/Low-Power entry. QSL via DL7BC. Visit his Web page at: http://www.qslnet.de/dl7bc

CQ MM DX 2011 CONTEST. Members of the Juiz de Fora CW Group will sponsor the first ever CQ Manchester Mineira DX Contest, April 16-17th. For more details, please go to: http://www.cwjf.com.br

CQ PRESS RELEASE. Richard Moseson, W2VU, Editorial Director for CQ Communications, Inc., reports on March 1st: "Richard Fisher, KI6SN, Named Editor of Popular Communications -- Veteran journalist and writer Richard Fisher, KI6SN, has been named Editor of Popular Communications magazine, effective with the June 2011 issue, Publisher Richard Ross, K2MGA, announced today. Fisher will succeed Edith Lennon, N2ZRW, who is stepping down to pursue freelance editing and writing projects and to work with a non-profit organization.
Lennon has been Editor of Popular Communications for the past four years, solidifying the magazine's editorial content and reader appeal. She has held a variety of positions with publisher CQ Communications, including Editor of the company's Amateur Radio Equipment Buyer's Guides

and Radio magazine (a custom publishing project for RadioShack); and Managing Editor of CQ VHF, Communications Quarterly and the CQ Amateur Radio Almanac.
'Edith has been a tremendous asset to our company over the past two decades with the energy and integrity she has brought to every project,' said Ross. 'We will miss her greatly and wish her all the best in her new endeavors. At the same time, I am looking forward to working even more closely with Richard and gaining the additional benefits he will bring from his extensive experience in print and online journalism.'
Fisher, of Riverside, California, will continue in his current position as Editor of WorldRadio Online magazine and will continue to write his current columns in Popular Communications, WorldRadio Online and CQ magazines.
Fisher also manages three related Internet sites, including blog sites for WorldRadio Online, his 'Trail-Friendly Radio' column in that magazine, and his 'Public Service' column in CQ magazine. He is also an administrator of the Facebook pages for all four CQ Communications publications.
He thanked Lennon for giving him a solid foundation on which to continue building Popular Communications. 'Edith is a very talented editor with a great news sense who surprises readers with every new edition,' he noted. 'She has led and developed a tremendous staff and has wonderful rapport with the readers. The proof is the highly respected publication that Edith passes to us to carry forward.'
Fisher's interest in radio spans more than 50 years. 'A Hallicrafters S-38D multi-band receiver first opened the world of shortwave listening to me in 1957 as a kid in Goose Bay, Labrador,' he said. 'I'm thrilled beyond words with the opportunity to begin this new chapter in a life that has been so enriched by radio and journalism.' Fisher begins his new duties as Editor on March 7th.
Popular Communications is published monthly by CQ Communications, Inc., which also publishes CQ Amateur Radio, CQ VHF and WorldRadio Online magazines, as well as a variety of radio-related books and videos."

CT8, AZORES. Operators Roger/G3SXW and Lionel/G5LP will be active as CT8/homecall from San Miguel Island (EU-003) between March 16-17th. The duo has rented accommodations in Ponta Delgada at a working farm on the northside facing the coast and will have plenty of space for wire antennas. This is expected to be a fun trip including culinary pleasures, so they will be active for several hours each day using a Elecraft K2 on CW only. QSL via their home callsign and LoTW.

CY0, SABLE ISLAND (Update). After a few postponements, the DXpedition to Sable Island (NA-063) is finally on the air and until March 15th. Look for operators Randy/N0TG, Jeff/N1NSB and Wayne/K8LEE to be active as homecall/CY0. They plan to run three stations simultaneously using CW, SSB and RTTY on 160-6 meters. The suggested updated frequencies are:
CW - 1826, 3523, 7023, 10106, 14023, 18072, 21023, 24892 and 28023 kHz
SSB - 1841, 3780, 7140, 14170, 18120, 21275, 24960 and 28450 kHz
RTTY - 3589, 7050, 10130, 14089, 18092, 21075, 24910 and 28089 kHz
QSL all callsigns via N0TG, direct or by the Bureau. They will have an "Online QSL Request Service" (OQRS) on their Web site for both direct

and Bureau QSLs (see "How to QSL") at: http://www.CY0dxpedition.com

DX0, SPRATLY ISLANDS (DX0DX Update). Jim Linton/VK3PC, Public Affairs for the DX0DX, reports (edited): "The DX0DX mission to the Spratly's has been postponed to April 2012, following the initial expedition attempt in January this year.
Team Leader Chris Dimitrijevic, VK3FY, said he was determined to recover as much of the costs as possible to put things right for all the Team members, sponsors, organizations and individuals involved.
'I have been thinking very long and hard about the Spratly's and to put DX0DX off until next year will allow me time to clean up the situation from the first attempt' (The DX entity was to have been activated from 6th January 2011 until 1st February 2011).
'It's better to concentrate on getting the best value for the assets so that I can recover the best return for the operators', said Chris, VK3FY.
'I will inform the DX Community and also the generous DX Foundations of the decision.'
'But I need to put things right for the operators that put their faith in me. That is of paramount importance at this time. Ongoing efforts are being made towards selling the assets.'
April is by far the best month for a DX expedition to Thitu Island in the Spratly's because the seas are far calmer for a sea voyage.
Apologies are made by Chris, VK3FY, to the DX community for the changes that have been outside his control.
Earlier on it was announced that difficulties with logistics and customs were the major problems, but were overcome.
Chris, VK3FY, has personally undertaken to post the contributions, foundations, and costs on the DX0DX Yahoo group and to foundations by Tuesday, 8th March 2011."

DXCC NEWS (From the DXCC Blog Page)[edited]: "Happy New Year DXCC! - Bill Moore, NC1L, Awards Branch Manager, popped the cork on the champagne today (alcohol-free, of course...) and we spent 3 minutes celebrating the completion of 2010's DXCC processing and started-in on 2011.
The biggest changes include the deletions of the Netherlands Antilles entities and the addition of the four new entities (PJ2, PJ4, PJ5/6, and PJ7) to the system. It will take some time for all the changes to appear throughout the system. Already you might notice that your current entity totals have dropped because of the deletions. If you had both of the PJs confirmed on 10 bands, you will see your current entity total drop by 20.
The PJ operations have already started obtaining their certificates and will be entering their logs into LoTW shortly -- some may make it into the system by 00Z on 4 March. Attention PJ stations: You must download the new TQSL Configuration file before you can request a new certificate. This download can be found under Your Account, and then Your Certificates.
Congratulations to all the DXers who now have credit for their first Deleted Entities! Does that make everyone OTs?"

FJ, SAINT BARTHELEMY. Anne, OH2YL, will be active as FJ/OH2YL from Saint Barthelemy (NA-146) between April 15-27th. Activity will be on all HF

bands, 160-10 meters and using CW only (on a lower edge of all bands).
QSL via OH2YL or LoTW. More details are available at:
http://www.fjoh2yl.com

FO, FRENCH POLYNESIA. Phil, FO8RZ, from Tahiti, reports that the 160 meter season will finish soon, and it will be his last 160 meter season because he will be going back to France this next summer. So he is looking for "big gun" stations from the following states in order to finish his "LoTW WAS" on 160m: LA, RI, SC or SD. Please send him a E-mail for a sked at: f5phw@free.fr
Phil states that he is on every evening on ON4KST's chat between 0530-0630Z. More info about FO8RZ is on: http://f5phw.hamlogs.net

FP, ST. PIERRE AND MIQUELON. Allan, W6HGF, will be on a one-man DXpedition as FP/W6HGF to Miquelon (NA-032) between March 14-22nd. Activity will be on all HF bands, 160-10 meters, and with a focus on the RTTY and Digital modes. QSL via LoTW. Look for more details and updates on:
http://www.qsl.net/w6hgf

HI, DOMINICAN REPUBLIC (Update). Operators Yukon John/KL7JR and XYL Claire/WL7MY are now active as HI3/KL7JR and HI3/WL7MY from Hispaniola Island (NA-096) until June. Activity will be on 80-10 meters SSB using several different wire antennas from their beach location. Main antenna will be a 40-10m vertical loop. E-mail for skeds at: kl7jr@yahoo.com
QSL via KL7JR (QRZ.com). QSLing will start until around July.

HR5, HONDURAS. Gerard F2JD will once again be active as HR5/F2JD from Copna starting mid-March to mid-May. Activity will be on all HF bands using CW and SSB. QSL via F6AJA.

IOTA DXPEDITION 2011. Members of the MS0INT team are once again planning IOTA DXpeditions to EU-010, EU-059 and EU-111. After the successful activation of the dangerous and rare Flannan Isles (EU-118) in June 2010, the MS0INT team has re-grouped, re-organized and strengthened in size for their next adventure. The team will once again be led by Col/MM0NDX. The other 2011 IOTA team members includes the following highly experienced island activators: Christian/EA3NT, Ramon/EA3OR, Raul/EA5KA, Stan/EI6DX, Vincent/F4BKV and Simon/IZ7ATN. The tentative IOTAs to be activated are: EU-010 EU-059 EU-111

Benbecula	St. Kilda	Monach Isles
South Uist		
Grimsay		
Baleshare		
North Uist		
Berneray		

Activation is expected to take place between June 14-20th. They state that their plans could change quite suddenly due to weather/seas in the area. QSLs will be via M0URX. There are a few options to receive a QSL via direct and OQRS (direct or Bureau). NO eQSL. For more details and updates, visit the MS0INT Web page at: http://www.ms0int.com

IOTA NEWS.............................
AS-118. Members of the Kuwait Amateur Radio Society will be active
as 9K2F from Failaka Island until they leave on March 7th.
They plan to have two stations on the air. QSL via 9K2HN.

NA-221. Operators Ismael/XE1AY, Gustavo/XE1KKK, Francisco/XE1P, Ricardo/
XE1RZL, Ricardo/XE1SOV, Fernando/XE1VGC, Jose/XE1UYU, Martin/
XE1UZH, Modesto/XE1UZU, Juan/XE2IA, Jose/XE2IVG and Ricardo/
XE3NMC will be active as XF2P on from Lobos Island (ARLHS
MEX-35), Veracruz, between April 29th and May 1st. Activity
will be on the HF bands and 6 meters, using CW, SSB and RTTY,
and also the satellites (AO27, AO51 and SO50). QSL via XE1AY.

OC-091. Operators Ed/4F1OZ, Gus/4F1EAA, Nani/DU1COP and Gudo/4F3XX
will be active as DZ1P from Polillo Islands between March
11-13th. Also, operators Gil/4F2KWT and Frank/VE7DP will be
joining their operation. Plans of band and mode activities
were not provided, so watch the IOTA frequencies. QSL via
4F1OZ or VE7DP.

OC-195. Operators Les/VK3MLM, Peter/VK3ADO, Mark/VK3FMGF, Lino/VK3EI,
Luke/VK3HJ and John/VK3DQ will be active as VK7DI from Deal
Island in the Furneaux IOTA Group between March 20-23rd.
Activity will be on the HF bands using CW, SSB and SSTV.
Their suggested frequencies are 3570, 7093 and 14195 kHz.
The team will operate from Garden Cove which is located on
the north side of Deal Island, and possibly have up to three
stations on the air using a number of batteries with both
solar charging and a small generator set. QSL via VK3DQ. For
more details, check out QRZ.com under VK7DI.

OC-164. John, VK6HZ, will once again be visiting Rottnest Island this
year. Dates of operation will be March 20-27th. Operation will
be holiday style (he states "in between beer, swimming and,
of course, quality time with my family!). Activity will be on
40-10 meters with a focus on 17-10 meters CW and RTTY. Equipment
will be IC-7000 running 100w into a Buddipole. This year QSL
via VK6IR. Details on QRZ.com.

SA-029. Fred, PY2XB, will be active as PY2XB/1 from Grande Island
(DIB RJ-02, WLOTA 0795) until March 9th. Activity will be
holiday style on 40-10 meters, mainly CW and using 100 watts
and wire antennas. QSL via PT7WA (Bureau OK).

J7, DOMINICA. Arno, DL1CW, is now active as J79ZZ from Salisbury until
March 12th. Activity this past weekend has been on 15/12/10 meters CW.
QSL via his home callsign.

KH6BZF PROPAGATION FORECAST/REPORT (March 7-13th)....
Mar 07 AN SOLAR REFERENCE KEYS
Mar 08 HN-AN --------------------
Mar 09 HN-AN BN - Below Normal
Mar 10 HN-AN AN - Above Normal/Geomagnetic Level is QUIET

Mar 11 AN LN - Low Normal
Mar 12 AN HN - High Normal/Geomagnetic Level is UNSETTLED
Mar 13 AN-HN DIS - Disturbed
VDIS - Very Disturbed

GEOMAGNETIC REFERENCE

QUIET - The "A" index is expected to be between
0-7 and the "K" index will be 2 or less
UNSETTLED - The "A" index is expected to be between
7-16 and "K" index will be 3 or less

KH8, AMERICAN SAMOA. Rick, AI5P, will be active as AI5P/KH8 between April 8-18th. Activity will be holiday style. Bands and modes of operation were not provided. QSL via his home callsign.

NO8, UNITED STATES (Special Event). Several members (including your editor) from the Northern Ohio DX Association (NODXA) will be on the air using the special callsign NO8DX/20 to celebrate the 20th anniversary (March 11th) of the Ohio/Penn DX Bulletin. Activity will take place between March 11-13th. Look for operation to be on the HF bands and the satellites. A special QSL card will be designed for this event. QSLs for this event only will be via KB8NW.

PY0, FERNANDO DE NORONHA. Marcello, PY2FN, will be active as PY0FO from Fernando de Noronha (SA-000) between July 2&#65533;9th. Activity will be on 80-6 meters but only on CW. Emphasis will be on 6 meters. QSL via his home callsign.

HQ5A QSL ROUTE. Mike, KA2AEV, reports that for this past ARRL CW oper-
ation, to PLEASE QSL HQ5A via KA2AEV direct with a SASE/SAE and return

postage. He suggests plenty of patience because he just received the logs but does not have any QSLs yet. ALSO PLEASE NOTE -- DO NOT SEND ANY QSLS TO HIM VIA REGISTERED MAIL. It's a waste of your money and his time. It's not needed!!!

PIRATE ALERT. The TJ9PF operation was over since February 20th. There were reports of PIRATE activity on February 23rd (80/RTTY) and March 1st (CW 30m).

PJ7E QSL STATUS. Co-leaders Craig/K9CT and Joe/W8GEX report, "We are doing very well getting out QSLs but still have about 5 mailing trays to confirm yet. Tom, N4XP, our QSL Manager, expects to complete those in the next three weeks. The OQSL will be shut down on March 4th. The OQSL service has been a huge success with certificates issued with the QSLs. All of the OQSLs received at this time have been mailed. ARRL has announced that they will soon be issuing the LOTW certificates to the new PJs. We are ready to upload the logs at that time. The PJ7E team thanks everyone for their QSOs."

QSL RECEIVED VIA LoTW: CW5W, D44TBE, F5IN, FO8RZ, GB0ANT, HI8CJG, HK1N, HK1YR, HQ5A, HR9/WQ7R, KH2L, LZ170MDS, MD/PA3EWP, OE1A, P40L, PJ2/W5MPC, PJ2T, PJ4D, PJ4N, PJ4W, PJ5/K1XM, PJ5/AH6HY, PJ6A, PJ6N, PJ7/KC0VKN, PU8TEP, R750Y, RZ3FW, SA0AQT, T32OU, T32YA, US6EX, V31TF, V44KAI, VK9C/G6AY, XE7S and YV6BTF

QSLS RECEIVED VIA MAIL: 3W6C, 5X0CW, A25BI, C5YK, CE3/VE7SV, CP4BT, DT8A, EP2MKO, ER8DX, IA7IPY, J6/K8EAB, JW7XM, KH7Y, MU/F4EGD, PJ2A, PJ2T, PJ4I, PJ6A, PJ7E, S21YX, T70A, T94MZ, TG9NX, V31YY, V73RRC, VP2MSC, VP8/LZ1UQ, XE2WWW, YI9PSE, ZD9AH and ZD9T

QSLS RECEIVED VIA THE BUREAU: 9L7NS, 9Q/DK3MO, DA0HQ, DR5N, CR1M, HF2000TC, JD1BMH, P29/OE9SJI, TF/DJ2VO, TO8S, VP2ENK and ZK2DL

RTTY MOST WANTED SURVEY 2011. Don, AA5AU, reports: "All RTTY operators are invited to participate in the RTTY Most Wanted Survey 2011. This survey is being conducted by Larry/K8UT and myself. Larry has graciously offered to host the survey on the Southeast Michigan DX Association Web site. This makes perfect sense since Larry already had the form created and ready to go. This survey will be run for 3 weeks beginning now until midnight EST Monday, March 20, 2011. The results of the survey will be announced when they have been compiled. Please submit to the survey only once per callsign unless you have made a mistake or your "needs" list on RTTY has changed within the survey period. If more than one survey is submitted with your callsign, we will use the last one submitted. The survey can be found at: http://rttysurvey2011.semdxa.org
Thank you for your participation. Thanks to Larry/K8UT and the Southeastern Michigan DX Association for hosting the survey. Please report any problems with the survey directly to Larry at: k8ut@k8ut.com "

T31, CENTRAL KIRIBATI (Update). The W8GEX (60m News) states: "It has been reported by the T31A team that the T31A DXpedition is planning a 60m operation if things run as expected. Time permitting, and if antennas

can be properly placed so as to not interfere with other bands or take away from significant QSO rates on other bands, they will TRY to activate 60m. CW and SSB positioning is carefully being planned, and 60m will be squeezed in the site setups. Their sunset is 0548z and sunrise at 1736z."
An international team will activate T31A from Kanton Island (OC-043) between April 17-28th. See OPDX.994 for more details. The T31A Web page is available at: http://www.T31A.com
LAST MINUTE UPDATE: The T31A Web page states: "We delivered 6,981 pounds of equipment to the shipping company near Long Beach, California, on March 1st. We have 11 pallets of equipment being prepped for the sailing date of March 12th. The shipment should arrive in Apia, Samoa, around March 26th."

T6, AFGHANISTAN. Jim, WA2EWE, is currently active as T6AF from Kabul. His length of stay not known. According to his QRZ.com page, Jim states, "Almost every day, I operate at around 1230-1430z. Sometimes I am QRV until around 1500z. On Thursday afternoon, sometimes, I am able to extend the hours to 1100-1630z. Recently, I have been on the air on Fridays at 0130-0230z too. YP-3 is set up for 20 meters, aimed north; also work 15, 20, 30, and 40 meters on the dipole." QSL via LoTW or eQSL. Paper QSL card Manager is via David, EB7DX (QSL Manager).

TO2, REUNION ISLAND. Olivier, F4FLF, will be active as TO2Z from Reunion Island (AF-016) between April 9-22nd. Activity will be holiday style with operations planned for every evening using SSB, PSK and RTTY. QSL via his home callsign.

TP50, FRANCE. The "Council of Europe Radio Amateur Club" (CERAC - TP2CE) will be active as TP50CE, March 11-13th and the 18th. Activity is to celebrate the 50th anniversary of the European Social Charter. Operations are usually on all HF bands and modes, including the satellites. QSL via F5LGF. An online log search will be available at: http://ewwa.free.fr
ADDED NOTE: The CERAC will also be present at the "Ham Radio in Friedrich-shaffen, June 24-25th. They will be checking the log for QSOs with TP2CE, TP20CE, 3A0CE, 40OCE, TP60CE and TP50CE.

V2, ANTIGUA (Update). Three members of the Midwest 6 Meter DX Group will operate holiday style from Antigua (NA-100, Grid Square FK97BD) between June 14-28th. Operators mentioned are Dave/W9DR, Dave/K9UK and Tom/W9AEB. Look for W9DR to be active as V25DR and concentrate on 6 meters SSB/CW on 50.115 MHz. Look for K9UK to be active as V25DD and W9AEB as V25TP and operate on 80-10 meters using CW, SSB and PSK31. QSL via their home callsigns. For more details, a Web link has been added to the Midwest 6 Meter DX Group Web page at:
http://www.6meterdxgroup.com/Antigua_DXpedition.html

VP5, TURKS AND CAICOS. Craig, VE3OP, will be active as VP5/VE3OP between March 9-18th. Activity will be on as many bands as possible using CW, SSB, RTTY and PSK-31. QSL via his home calsign, direct or by the Bureau and also LoTW and eQSL.

V4, ST.KITTS & NEVIS. Hal, K5MV, will be active as V4/K5MV from St. Kitts (NA-104) between March 10-17th. Activity will be holiday style on 160-6 meters using CW and SSB. QSL via LoTW or direct to K5MV.

VP5/VQ5, TURKS AND CAICOS ISLANDS. Dave, W5CW, will once again be active as VP5/W5CW from the VP5JM Hamlet on the Island of Providenciales (NA-002, WLOTA 1476) between March 23rd and April 20th. Activity will be on 160-6 meters using CW and SSB. Dave also plans to be entries in the following contests using the special callsign VQ51V: SP DX Contest (April 2-3rd), JIDX CW Contest (April 9-10th) and the YU DX Contest (April 16-17th). QSL direct to his home callsign (QRZ.com address) at: PO Box 88, Morris, OK 74445-0088 U.S.A.

VQ9, CHAGOS ISLAND (QRT, For Now!). Jeremy, N1ZZZ/VQ9ZZ, reports, "As of today, 5th March 2011, I will be leaving VQ9, leaving no active hams on the island. I should be back in late June, but my schedule is apt to change. So thanks to everyone who worked us over here, and hopefully we will be back on the air in the summer....73."

XV4, VIETNAM. Yannick, XV4Y (ex-XV4TUJ), who is located in Mekong Delta in southern Vietnam, has been on the air using his new callsign since the beginning of March. According to QRZ.com, his main profession (with his wife) is tourism in Vietnam and is now running a "Bed & Breakfast" in the city of Can Tho, near the Cai Rang floating market. Since he runs a business, his activity is limited to his free time. He suggests to look for him in the early afternoon (0700-0900z) or evening (1330z-1500z), no matter if it is a week day or weekend. Suggested frequencies are around 14276, 18126, 21312 or 7080 kHz. His antennas are: a ground plane for 20m (also works on 17/15m), a 40m delta-loop (ok on 20m and 15m) and a sloper for 30m listening. QSL Manager is OK1DOT, but please be patient because QSL cards are not printed yet. An online logbook is available on: http://www.clublog.org

Archive-name: radio/ham-radio/recruitment
Revision: 1.2 2009/11/25 14:41:01
Posting-Frequency: posted monthly
URL: http://www.faqs.org/faqs/radio/personal-intro/

Changes followed by "|".

The rec.radio.info newsgroup, first established in 1993, has been
recently revived by an active moderation team. We are currently seeking
suitable information, FAQ, and bulletin articles from the entire
rec.radio.* newsgroup hierarchy for simultaneous cross-posting to our
newsgroup.

We are seeking a replacement maintainer for the following information
bulletin formerly posted to rec.radio.amateur.* (and currently archived
at http://www.faqs.org/faqs/radio/personal-intro/ ):

radio/personal-intro
Subject: Guide to the rec.radio Newsgroups
Maintainer: jeffreyh@Hawaii.Edu (Jeffrey Herman)
Last Posted: 9 Nov 2001 06:18:17 GMT
Posting-Frequency: 15th of each month

One significant omission, requiring immediate updates, for this article |
is that it does not mention newer amateur radio newsgroups created since |
it was written, including: |

rec.radio.amateur.antenna |
rec.radio.amateur.boatanchors |
rec.radio.amateur.dx |
rec.radio.amateur.equipment |
rec.radio.amateur.homebrew |
rec.radio.amateur.moderated |
rec.radio.amateur.space |

We are willing to provide any technical support necessary to get this
article updated and automatically posted again at a regular interval.
This would include establishing contact with the original maintainer for
any necessary permissions. We would prefer to seek a new, dedicated
maintainer at this time, rather than start auto-posting the original
article ourselves.

For more information about our newsgroup, see:
```

http://www.panix.com/~rram/usenet/rri/index.html

Please direct any comments, questions, or criticisms to
rec-radio-info-request@panix.com.

256. Repairing a Xantrex 600HD Powerpack--The Tricky Handle

Newsgroup: rec.radio.amateur.misc
Date: 2011-03-08 13:26:12 UTC
From: "W. eWatson" <wolftracks@invalid.com>
Message-ID: <il5apm$37u$1@news.eternal-september.org>
Source record: 4896

My battery is pretty well shot, but when I contacted Xantrex tech last week, the tech said it could be taken apart. It's all in a nice orange enclosure with a handle, light, radio, and so on. He said the tricky part is getting the handle separated. I took it to a battery shop in town, and indeed they were stumped by the handle problem, but didn't force it.

Has anyone here had experience doing this?

257. [DXNL] DXNL 1718 (Mar 9, 2011)

DXNL 1718 - Mar 9, 2011
DX Newsletter

a free and weekly service of
DARC Committee "DX and HF contesting"
(http://www.darcdxhf.de)

editor: Helmut Schlaffer, DL7MAE
(direct: dxnl@dxhf.darc.de)

translation by: Bob, DL7VOA
(direct: dl7voa@darc.de)

CN - MOROCCO
Mathieu,MJ0ASP, is going to hit the airwaves from Marrakech as CN2MR
working in CW on 10m-40m from Mar 14-21. Mathieu prefers working on
the WARC bands. QSL via MJ0ASP, via bureau, direct or LoTW.

CT3 - MADEIRA ISLAND, AF-014
Rosel,CT9/DL3KWR, and Hardy,CT9/DL3KWF, plan to become active from
Madeira (AF-014) between Mar 10 and Apr 6. They plan to work mainly
in CW on 12m/17m/30m and Hardy will be QRV also in RTTY and PSK-31.
Their homepage can be found at: http://www.mydarc.de/dl3kwr
QSLs via homecalls, bureau QSLs can be request by sending an e-mail to
dl3kwr@darc.de or dl3kwf@darc.de

FG - GUADELOUPE, NA-102
Jean-Pierre,FG/F6ITD, wants to activate two islands near Guadeloupe
from Mar 9-31. He will work in SSB and digital modes from
La Desirade Island (Mar 9-15) and Basse Terre Island (Mar 16-31).
QSLs via bureau or direct to his homecall.

FP - ST PIERRE ET MIQUELON, NA-032
Allan,FP/W6HGF, will show up from Miquelon (NA-032, DIFO FP-002,
WLOTA 1417) from Mar 14-22. He works mainly in RTTY and other digital
modes on following frequencies: 1830, 3590, 7050, 10130, 14090, 18092,
21075, 24910 and 28090 kHz.
Allan prefers QSL via LoTW, but cards are sent also via buro or direct.
See also: http://www.qsl.net/w6hgf

HR - HONDURAS
After his activities from the Philippines and Cameroon Gerard,F2JD,
plans to become QRV from Copna/Honduras signing HR5/F2JD in CW and SSB
on all HF bands between the mid of March and the mid of May.
QSL via F6AJA, direct or via bureau.

J7 - DOMINICA, NA-101
Arno,DL1CW, is now active from Salisbury signing J79ZZ. He is working mainly in CW on 15m/12m/10m until Mar 12.
QSL cards should be sent via his homecall (also via bureau).

PJ2 - CURACAO, SA-099
Don,PJ2/W5FKX, Jim,PJ2/N5HZ, Dave,PJ2/W5XU, and Mike,PJ2/W5ZPA, will be QRV in all modes on all bands from the "Signal Point Station" PJ2T from Curacao (SA-099, WLOTA LH-0942) from Mar 10-17.
QSL cards should be sent to their homecalls, either via bureau, direct or LoTW. An online log and more information is available at: http://www.deltadx.net/Activities/PJ2/PJ2-DDXA.htm

T6 - AFGHANISTAN
Jim,WA2EWE, is momentarily active as T6AF from Kabul but nothing is known about the length of his stay. Jim tries to become active every day around 1230-1430 UTC and on fridays also from 0130-0230 UTC. He works with a dipole on 15m, 20m, 30m and 40m.
QSL via LoTW or eQSL. Paper QSLs should be sent to his manager EB7DX, unfortunately only direct.

TP - COUNCIL OF EUROPE
The radio club of the "Council of Europe" will be active in all modes on all bands using the special callsign TP50CE from Mar 11-13 and on Mar 18.
QSL cards should be sent via bureau or direct to F5LGF.
Online logs can be found on their website: http://ewwa.free.fr
QSL cards of TP2CE, TP20CE, 3A0CE, 4O0CE, TP60CE and TP50CE can be obtained also at the "CERAC" booth on the HAMRADIO in Friedrichshafen.

V4 - ST CHRISTOPHER AND NEVIS, NA-104
Halford,V4/K5MV, will stay on St. Kitts (NA-104) from Mar 10-17. He will work "holiday style" in SSB and CW on 160m-6m.
QSL cards should be sent to his homecall, either direct or via LoTW.

VP2V - BRITISH VIRGIN ISLANDS, NA-023
Tortola Island (NA-023) will be activated by Peter,VP2V/G3PHO, in CW and SSB on 160m-10m from Mar 11-18.
QSLs via bureau or direct to his homecall.

VP5 - TURKS AND CAICOS ISLANDS
Craig,VP5/VE3OP, announced to show up in CW, SSB and PSK-31 on all bands from Mar 9-18.
QSLs can be sent via bureau, direct or LoTW to his homecall VE3OP.

VU4 - ANDAMAN AND NICOBAR ISLANDS, AS-001
Some HAMs of the Amateur Radio Society of India (ARSI) plan to become active as VU4PB from the Andaman capital Port Blair from Mar 15-31.
The team includes Ananth,VU2PAI, Aravind,VU2ABS, Basappa,VU2NXM, Chetan,VU3DMP, Deepak,VU2CDP, Gopal,VU2GMN, (team lead), Ramesh,VU2LU, Govind,VU2GGM, Devadas,VU2DH, Krishna,VU2VKU, Prasad,VU2PTT, Ramachandra,VU2RCT, Ramachandra,VU2RCR, Rohit,VU2RDQ, Sanjay,VU2SJD, Suhas,VU2SMN, and Vishnumoorthy,VU2MTT. Operation will take place in

in CW, SSB and RTTY on all bands using up to four stations. They also want to work via moonbounce on 6m.
Their QSL manager will be W3HNK, which means that QSLs are confimred only direct but reliably. Their homepage is: http://www.arsi.info/VU4PB

XV - VIETNAM
Yannick,XV4Y (ex-XV4TUJ), is using a new callsign since the beginning of March. His QTH is situated in the Mekong Delta in the south of Vietnam. Yannik and his XYL are running a "Bed & Breakfast" pension nearby the city of Can Tho near to the Cai Rang "floating market".
He is working preferably on 14276, 18126, 21312 and 7080 kHz mostly from 0700-0900 UTC and from 1330-1500 UTC. He is using a groundplane for 20m/17m/15m, a delta loop for 40m/20m/15m and a sloper for 30m.
The QSL manager is OK1DOT, cards are confirmed ONLY direct but have to be printed first.
An online logbook is available at: http://www.clublog.org

ZA - ALBANIA
I2GPT, IK2PGM, IW2HKW, IW2JOP, IZ2BKP and IZ2QCP will be active in CW and SSB on 17m/20m/30m/40m signing ZA/I2GPT from Mar 9-13.
QSL via bureau or direct via homecall.
More information can be found at: http://www.I2GPT.com or QRZ.com

7P - LESOTHO
W5KDJ & K5LBU will be QRV from the Trading Post Guesthouse in Lesotho from Mar 11-21. They will work with two stations simultaneously signing 7P8KDJ and 7P8CF in CW/RTTY/PSK/SSB on 160m-10m. More information can be found on their website: http://www.tdxs.net/lesotho2011.html
QSLs for 7P8CF via K5LBU, direct or LoTW,
QSLs for 7P8KDJ via W5KDJ, direct only with SASE, LoTW and eQSL (no QSLs via bureau).

Peter,EI7CC, is also staying in Lesotho and signs 7P8PB from Mar 9-23. He is visiting his step brother (7P8CC/EI8CC) in Maseru and can use his station as well. This is a family holiday so amateur radio is not the main part of this trip. QSLs via bureau, direct or LoTW to EI7CC.

9A - CROATIA
Zrinko ("Zik") will be active again from Croatia signing 9A/VE3ZIK from Mar 13-30. He will try to take part in the Russian DX Contest and the WPX SSB Contest. There is also a good chance to activate the nature reserve Vrana Lake (9AFF-019). QSL via DK8ZZ, bureau/LoTW/eQSL/direct.
Bureau QSLs can be requested also via e-mail: ve3zik@gmail.com

USA, SPECIAL EVENT STATION
The American "Ohio/Penn DX Bulletin" (short "OPDX") celebrates its 20th anniversary and published its 1000th issue last week. This is reason enough for the publisher the "Northern Ohio DX Association" (NODXA) to activate the special event station NO8DX/20. The operations take place on HF and via satellites on Mar 11-13.
Special QSLs can be sent via the QSL manager and editor of the OPDX, Tedd Mirgliotta,KB8NW.

The DX Newsletter congratulates Tedd and the NODXA and is very thankful
for the regular information which is also incorporated in our bulletin.

SILENT KEYS: Aisea Aisake,3D2AA, passed away at the age of 62 on Feb 26.
Last week we also lost Tapir Cassiano Araujo Sepulveda (PY6TS) and
Evgenij N. Petrov (RW9MD).

PIRATE: TJ9PF went QRT on Feb 20, 2011. Everybody who has worked this call
in RTTY on 80m on Feb 23 or in CW on 30m on Mar 1 has worked a pirate.

LINKS: Current SOTA activities (mountain summits) are announced at:
http://www.sotawatch.org

Detailed information about current VHF activities can be found on the
VHF DX portal "Make More Miles on VHF" at: http://www.MMMonVHF.de
---
A survey to find out the Most Wanted RTTY DXCC entities is running
until Mar 20 on: http://rttysurvey2011.semdxa.org

Is there another DXpedition to Yemen coming up? A website has been
put up on http://7o7s.de

UPCOMING CONTESTS

Mar 12/13: DIG QSO Party
Mar 12: AGCW-DL QRP Contest
Mar 13: North American Sprint
Mar 13: UBA Spring Contest

IOTA collected by Fredy,DE0MST (e-mail: iota@dxhf.darc.de)

Island activities:
AS-049, JA6, Tokara Islands: Take,JI3DST/JI6, plans to activate the island
Kuchinoshima from Mar 11-20. QSL via homecall.

OC-138, VK4, QLD State (Torres Straight) Group: Craig,VK4LDX/p, will be
QRV from Horn Island from Mar 10-14. QSL via homecall.

SA-029, PY, Ilha Grande: PY2XB/1 is working holiday style mostly in CW on
40m-10m until Mar 9. QSL via bureau or direct to PT7WA.

Lighthouse activities (WLOTA/ARLHS/ILLW)

March 8, 2011
Centralia, Washington
>Subject: Communications Academy 2011

Good Morning

I would like to invite any interested Hams, to attend our Communications Academy April 16 and 17 in Seattle. The following is a recent blurb I have been putting out. I'd appreciate you passing it along.

73

Jim Pace K7CEX
ARRL Section Manager
Western Washington
wwasm@comcast.net

Registration is now open for Communications Academy 2011 to be held at South Seattle Community College, April 16th and 17th. The theme this year is "Bringing Professionalism to Amateur Emergency Communications".

We have an exciting lineup of keynote speakers and breakout sessions scheduled. Something for everyone. Saturday's keynote speaker is Allen Pitts, W1AGP, Media and Public Relations Manager, from the American Radio Relay League. He will be addressing "Reality Check: The four stages of ARES".

The Sunday's keynote speaker is Alan Komenski, AC2K, State Interoperability Executive Committee, Washington State Patrol, Bellevue, Washington. You can register right now by clicking here or for general information, schedule, and more go to the Communications Academy web site. www.commacademy.org
There is a tasty menu of lunches included in the registration fee and we will have a good assortment of comm vans on display as well.

Early registration by April 3rd saves 15% and groups of 5 or more registering at the same time save an additional 10% so don't delay.
Hoping to see you there,

Your Communications Academy 2011 organizing committee.

** LU8EDR SK **

Unfortunately I have bad news to communicate. Daniel Bernardini, LU8EDR
passed away this morning. He was in his early fifties. He was working on
his new dish up on the roof of the house when he apparently had a deadly
heart attack. I have confirmed the bad news with several people in
Argentina. I worked with Daniel for several years. He was the best
technician I ever worked with, and also a very honest and respectful
person. He was passionate about motorcycles. Together with LU4DHD, we
made the first 23cm EME QSO from LU in 1998. RIP, Daniel.
SOURCE: Marc Franco lu6dw"at"yahoo.com via MoonNet
The Team of MMMonVHF will pass our deep sympathy and condolences
to his family. Rest in peace, Daniel! SOURCE: The MMMonVHF Team

** NEW 6m Info-Source **

Andy, N8OFS, informed that there is a new 6m Source: www.smirk.org
SMIRK has members in 100 countries on all continents, an international
organization. We are devoted to promoting six meter activity throughout
the world. You help us by joining and promoting SMIRK over the air and
in person with other hams. SOURCE: tnx to N8OFS direct to MMMonVHF

** Great news about LU7DZ logs **

I met for dinner last night with Eduardoï¿½s girlfriend and I now have
in my hands all his logs going back 10 years. Ray wa4njp has offered

to send cards to all who need them to comfirm argentina on EME... Be AWARE that it costs about $1 to send each card. That is just US postage Be sure that you do not expect Ray to pay for all that postage and work I am having a good time in Argentina but itï¿½s not the same without my best friend LU7DZ at my side. I will be running the net on 14.345 starting the first weekend of april. Please keep it alive until I return. Thanks to all. I have passed your endless messages of sadness to all who loved him here. The town had a special celebration for him and his memory here in Villa General Belgrano. They have his picture posted in the main beer hall along with plaques in memory of the townï¿½s great friend and citizen. Those who didnï¿½t know him, Iï¿½m sorry, for those who did we share our memories of what a great and gentle guy he was. 73 and good DXing to all my friends .

** RADIO EXPEDITION SIERRA LEONE 2011 (IJ38JK) **

LATEST NEWS from 425 DX News #1035, dated 2011-03-04: The new dates for
the 9L5MS operation from Sierra Leone [425DXN 1025] are 28 March-18
April. Arie PA3A, Arie PA3AN, Ad PA8AD, Bas PD0CAV and Dickson EL2DT
will operate on 160-6 metres metres CW, SSB and RTTY, using three
stations with amplifers and several beam and vertical antennas. They
will also give 6m EME a try between 16 and 20 March. The team will
provide support and raise funds for a Mercy Ships Charity Project.
QSL via PA3AWW, direct or bureau (plus LoTW six months after the
expedition). An OQRS for direct cards is available on the expedition's
website. Further information on the project can be found at
www.sierraleone2011.com - SOURCE: 425 DX News #1035

** VU4 - ANDAMAN AND NICOBAR ISLANDS, AS-001 **

Some HAMs of the Amateur Radio Society of India (ARSI) plan to become
active as VU4PB from the Andaman capital Port Blair from Mar 15-31. The
team includes Ananth,VU2PAI, Aravind,VU2ABS, Basappa,VU2NXM, Chetan,
VU3DMP, Deepak,VU2CDP, Gopal,VU2GMN, (team lead), Ramesh,VU2LU, Govind,
VU2GGM, Devadas,VU2DH, Krishna,VU2VKU, Prasad,VU2PTT, Ramachandra,
VU2RCT, Ramachandra,VU2RCR, Rohit,VU2RDQ, Sanjay,VU2SJD, Suhas,VU2SMN
and Vishnumoorthy,VU2MTT. Operation will take place in in CW, SSB and
RTTY on all bands using up to four stations. They also want to work via
moonbounce on 6m. Their QSL manager will be W3HNK, which means that
QSLs are confimred only direct but reliably. Their homepage is:
http://www.arsi.info/VU4PB - SOURCE: DXNL 1718 (Mar 9, 2011)

** 50 MHz (EME) activity in V51 in May **

Pierre, HB9QQ, will be OK to depart for V51 May the 1st. Tickets are
here.The first few days we will install and measure everything and
then we will be active during moonset from about 20i¿½ downwards. We will
have enough power and I assume we will be able to make a number of
contacts. I dont know yet whether we will have an internet access,
because the shack is way out in the bush (JG88am). We will start first
using may own call V5/HB9QQ (license is here) and afterward the guys

down there will use other call signes.
SOURCE: tnx to Lance, W7GJ and his [Magic Band EME]

** XF2P from Isla de Lobos (NA-221) **

Ismael, XE1AY and other eleven operators will be active as XF2P from Isla de Lobos (NA-221) from 29 April to 1 May. They will operate CW, SSB and RTTY on the HF bands, 6 metres and satellite (AO27, AO51 and SO50). QSL via XE1AY. SOURCE: [TNX DX World] via 425 DX News #1035

** DX Operation: Fernando de Noronha Is. **

Marcello, PY2FN will be active from the island of Fernando de Noronha (IOTA SA-003, DIB OC-01, WLOTA 1208, Grid Loc. HI36) on 2-9 July 2011. QRV using CW only on 80-6m, with focus on the 6 m-band. QSL via PY2FN
SOURCE: tnx to Bill/NG3K direct to MMMonVHF

** 50 MHz activity from V4 St.Kitts in March **

Jeff, K5MV will be active as V4/homecall from the island of St. Kitts (IOTA NA-104, Grid Loc. FK87) from 10-17 March 2011. Vacation style operating, 160 through 6 metres, SSB and CW. QSL direct only to K5MV. Logs will be uploaded to LoTW.
SOURCE: tnx to Bill/NG3K direct to MMMonVHF

** VQ51V in CQ WW WPX Contest, SSB (March 26-27, 2011) **

March 23 - April 20, 2011. Also active as VQ51V during SP DX Contest, JIDX CW Contest, and the YU DX Contest. Before and after Contests active on 160 - 6 Meters CW/SSB as VP5/W5CW. QSL Direct only via W5CW or via PO Box 88, Morris, OK 74445-0088 U.S.A
SOURCE: tnx to Bill/NG3K direct to MMMonVHF

** DX0, SPRATLY ISLANDS (DX0DX Update) **

Jim Linton/VK3PC, Public Affairs for the DX0DX, reports (edited): "The DX0DX mission to the Spratly's has been postponed to April 2012, following the initial expedition attempt in January this year.

==> + HR 607: NPSTC SAYS HR 607 "NEEDS TO BE AMENDED"

The National Public Safety Telecommunications Council (NPSTC) -- a
federation of more than a dozen public safety communications
organizations -- has gone on record as sharing the ARRL's concerns
regarding HR 607, the Broadband for First Responders' Act of 2011. The
ARRL is actively opposing the legislation in its current form because
Section 207(d) of the bill -- introduced in the US House of
Representatives by Representative Peter King (R-NY-3) -- calls for the
reallocation of 420-440 MHz for commercial auction. The ARRL, which is
a member of the NPSTC Governing Board, has assured NPSTC members that
its opposition is limited to Section 207(d) and that it supports the
underlying objective of the legislation, which is to provide spectrum
near 700 MHz for a nationwide interoperable public safety broadband
network. Read more here
```

<http://www.arrl.org/news/npstc-says-hr-607-needs-to-be-amended>.

==> + FCC NEWS: FCC ADOPTS SPREAD SPECTRUM RULES CHANGES

In a Report and Order adopted February 22 and released March 4, 2011, the FCC eliminated the requirement that amateur stations transmitting Spread Spectrum use Automatic Power Control (APC) to reduce transmitter power. At the same time, the Commission has reduced the maximum power of a Spread Spectrum emission from 100 to 10 W PEP. In March 2006, the ARRL filed a Petition for Rulemaking, asking that the APC requirement be eliminated.

The R&O explains the Commission's actions this way: "We believe that these rules changes will (1) encourage individuals who can contribute to the advancement of the radio art to more fully utilize SS technologies in experimentation, and (2) balance the interests of all users in mixed-mode and mixed-service frequency bands until sharing protocols are sufficiently developed to avoid interference." Read more here <http://www.arrl.org/news/fcc-adopts-spread-spectrum-rules-changes>.

==> + FCC NEWS: FCC ISSUES CALIFORNIA MAN $7000 FORFEITURE ORDER FOR REFUSING FCC INSPECTION

After a Merced, California man refused to let FCC investigators inspect his Citizens Band (CB) radio station, the FCC issued a Notice of Apparent Liability for Forfeiture (NAL) for $7000. The Commission found that Ira Jones "apparently willfully and repeatedly" violated Section 303(n) of the Communications Act of 1934, as amended, and Section 95.426(a) of the Commission's rules by failing to permit the inspection. Read more here <http://www.arrl.org/news/fcc-issues-california-man-7000-forfeiture-order-for-refusing-fcc-inspection>.

==> + AMATEUR RADIO IN THE CLASSROOM: MIDDLE SCHOOL STUDENTS TO LAUNCH NEAR-SPACE BALLOON

A group of students from Olde Towne Middle School (OTMS) in Ridgeland, Mississippi is preparing for a trip to space -- or as close as they can get. The OTMS RadioN5VEI] and Technology Club, along with the school's Science Team, are planning a near-space balloon launch at 9 AM (CDT) on March 26 (the date and time are subject to change depending on weather). The balloon -- nicknamed Titans in Space -- will use the call sign KC5NXD and is expected to reach an altitude of 94,825 feet. Read more here <http://www.arrl.org/news/middle-school-students-to-launch-near-space-balloon>.

==> + PROPAGATION: RESPECTED JOURNAL PUBLISHES EXPLANATION FOR LOW SUNSPOTS

An article in the March 3 issue of the journal Nature purports to explain the extended sunspot minimum from 2008-2010. According to one

of the authors, Piet Martens, the last time a sunspot minimum lasted twice as long as usual was around 1913 and before that, 1810. Although solar activity has increased recently, scientists have been puzzled by the lack of sunspots from 2008-2010. This quiet period had prevented the ionosphere from supporting much of the long-range higher frequency HF Amateur Radio communication that had been expected during the past few years. Read more here <http://www.arrl.org/news/respected-journal-publishes-explanation-for-low-sun spots>.

==> + ARES® E-LETTER NOW AVAILABLE IN AUDIO FORM

The ARES® E-Letter is now available in audio format <http://www.arrl.org/ares-e-letter-audio-version>. There are three editions currently available, including the most recent recording of the February 16 ARES® E-Letter. Edited for audio by Al Brown, KZ3AB, the ARES® E-Letter is voiced by Tony Riggs, W1FHN. Brown was licensed in 1966. He was a member of the White House Press Corps before retiring from the International Broadcasting Bureau/Voice of America (IBB/VOA). Licensed since 1955, Riggs has worked in both the commercial and public broadcasting venues. He retired after 21 years as a staff announcer and news anchor with the VOA. With more than 35,000 subscribers, the ARES® E-Letter is written by Rick Palm, K1CE and is published each month. Click here <http://www.arrl.org/ares-e-letter-audio-version> to subscribe to the ARES® E-Letter.

==> HINTS & KINKS : WEATHERPROOFING YOUR AUTOMATIC ANTENNA TUNER

Geoff Haines, N1GY, of Bradenton, Florida, sent us this idea for waterproofing your automatic antenna tuner. Contact Geoff via e-mail <n1gy@arrl.net> for more information.

As an avid Amateur Radio operator, I sometimes use an automatic antenna tuner to operate more than one band with the same antenna. My mobile unit uses an LDG RT-11 autotuner to feed a pair of "Hamstick" style antennas on several different bands. One antenna covers the lower bands and another antenna covers the higher ones. An excursion into operating "fixed portable" with a telescopic vertical had me looking for another solution.

In order to minimize the coax losses when feeding a vertical monopole away from its resonant band it is necessary to reduce the distance between the tuner and the antenna to a minimum. The use of ladder line is not feasible when the antenna is fed almost at ground level. In order to do this, it is necessary to place the tuner almost directly at the base of the antenna and thus reduce the coax run from the tuner to the antenna to nearly nothing. The coax from the tuner to the transmitter can then be any appropriate length since the mismatch has already been corrected.

Owning an LDG Z-100 automatic tuner already, I looked for a way to mount it at the base of the antenna and yet protect it from the

elements. A phone call to LDG gave me the necessary specifications for a 50 foot extension of the control cable so the only thing left was to find a workable enclosure for the tuner itself. I discussed the requirements for such an enclosure with my spouse, Audrey. Without a word, she rummaged through a kitchen cabinet and produced a semi flexible plastic container that had a snap-on lid and fit my Z-100 and its cables to a T.

I drilled four small holes in one end of the container into which I fitted two short coax jumpers, one for the antenna and one for the radio. I also made up and installed a short 4-conductor cable to connect the stock control harness to the 50 foot extension. The fourth opening was used for a similarly short insulated wire to connect the grounding stud on the Z-100 to the radial system of the antenna. Once these four cables were in place, I sealed the drilled openings with hot glue. Silicone caulk could be used just as easily, provided it will stick to the container. I did not try that because the hot glue was at hand so you are on your own there (see Figure 1).

With the jumpers connected to the tuner, the extension cable and coax were run to the transceiver and the antenna erected. Now, testing was in order. The pressing of the TUNE button on my IC-706MKIIG did exactly what it was supposed to do. The Z-100 ran through its paces and signaled a good match. Now if the afternoon showers come while I am operating "fixed portable," the only thing I have to worry about is keeping me and the radio dry. The tuner is cozy in its own little raincoat (see Figure 2).

Total cost, even if you had to buy the container new at the discount store, would probably not exceed $10. That does not include the extension control cable of course. The container was already here and I had enough UHF connectors, coax, wire and weatherproofing on hand for the project. The only thing I had to buy was the 4-conductor cable and Molex connectors to build the 50 foot extension cable.

This project has enabled me to comfortably operate "fixed portable" from the beach, at Field Day and many other events where a vertical was the only feasible antenna. As long as the container can handle the physical size of the tuner with room for the connecting cables, any automatic tuner could be protected in this way.

Do you have an idea or a simple project that has improved your operating? Maybe you've taken something commonly found around the home and developed a ham radio use for it? Why not share your hints with fellow hams in "Hints and Kinks," a monthly column in QST. If we publish your hint, you will receive $20. Send your hints via e-mail to h&k(at)arrl(dot)org or to ARRL Headquarters, Attn: "Hints and Kinks," 225 Main St, Newington, CT 06111. Please include your name, call sign, complete mailing address, daytime telephone number and e-mail address.

==> ARRL FIELD DAY: 2011 FIELD DAY PACKETS AVAILABLE

It's that time of year again -- time to start gearing up for ARRL Field Day, June 25-26, 2011! ARRL's flagship operating event -- always held the fourth full weekend in June -- brings together new and experienced hams for 24 hours of operating fun. Field Day packets are now available for download <http://www.arrl.org/files/file/Field-Day/2011/2011_FD_Packet.pdf>and include the complete rules (including a change for 2011), as well as other reference items such as forms, ARRL Section abbreviation list, entry submission instructions, a Frequently Asked Questions section, guidelines for getting bonus points, instructions for GOTA stations and a kit to publicize your event with the local press. Read more here <http://www.arrl.org/news/2011-field-day-packet-now-available>.

==> SOLAR UPDATE

Tad "Fun, fun, fun in the Sun, Sun, Sun <http://www.youtube.com/watch?v=-ZFLKXINNns>" Cook, K7RA, reports: Solar Cycle 24 continues to ramp up at a quickening pace. The average daily sunspot number this week was more than double the value of the week before, rising from 50.9 to 114. The average daily solar flux rose 44 percent, from 96.8 to 139.4. All this week through Tuesday, the sunspot numbers and solar flux kept rising and beating old numbers, and we had to look further and further back into Solar Cycle 23 to find comparable conditions. On Tuesday, March 8, the daily sunspot number was 137. The last time the daily sunspot number was higher than this was July 7, 2005 when it was 149. Twice this week, the 10.7 cm receiver at Penticton was overloaded, swamped by energy from a solar flare and the daily solar flux value had to be estimated. On March 7 and 8, the noon solar flux readings were 938.6 and 166.7, and they were corrected by NOAA to estimated values of 153 and 155. The estimated flux level of 155 was the highest since July 23, 2004, when the solar flux was 165. Predicted solar flux for March 10-17 is 150, 145, 140, 140, 135, 130, 125, 105 and then 100 on March 18-21, then going below 100 until April 2. The predicted planetary A index for March 10-11 is 22 and 18, then 5 on March 12-21, 7 on March 22-23, 5 on March 24-26, then 7, 7, 19 and 7 on March 27-30. Note the high predicted planetary A index on March 10-11 of 22 and 18. This is because of recent solar flares, and the disturbance will probably affect signals traversing a polar route. Look for more information -- including propagation reports, as well as a critical look at last week's report of a 2 meter FM signal from South America, reportedly monitored in North Carolina, more than 4700 miles away -- on the ARRL website on Friday, March 11. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad Cookism" is brought to you by the British television series Red Dwarf <http://en.wikipedia.org/wiki/Red_Dwarf>.

==> AMATEUR RADIO FUN: NEW QUICKSTATS POLL NOW AVAILABLE ON ARRL WEBSITE

Four new poll questions have just been published on the QuickStats page <http://www.arrl.org/quickstats> on the ARRL website. Let your voice be heard!

Questions in this month's QuickStats poll:

- How did you sign up for ARES&#65533;?
- When was the last time you built a transceiver from a kit?
- Are your station antennas supported by a tower?
- Do you regularly operate HF mobile?

Visit the QuickStats page <http://www.arrl.org/quickstats> and be sure to bookmark it in your browser. Results from this QuickStats poll will be published in the June 2011 issue of QST on the QuickStats page, located in the rear advertising section of the magazine. Along with monthly poll results, QST QuickStats offers colorful charts and graphs that highlight interesting Amateur Radio statistics.

==> THIS WEEK ON THE RADIO

This week:

- March 12 -- AGCW QRP Contest; ARCI HF Grid Square Sprint
- March 12-13 -- Idaho QSO Party
- March 13 -- North American Sprint (RTTY); SKCC Weekend Sprint; UBA Spring Contest (CW)
- March 13-14 -- Wisconsin QSO Party; EA PSK31 Contest
- March 15-16 -- CLARA HF Contest

Next week:

- March 19 -- 10-10 International Mobile Contest; AGCW VHF/UHF Contest; Feld Hell Sprint (local time)
- March 19-20 -- Oklahoma QSO Party; North Dakota QSO Party; Russian DX Contest
- March 19-21 -- Virginia QSO Party; BARTG HF RTTY Contest
- March 21 -- Run for the Bacon QRP Contest
- March 23 -- SKCC Sprint

All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests>, the ARRL Contest Update <http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more info. Looking for a Special Event station? Be sure to check out the ARRL Special Event Stations Web page <http://www.arrl.org/special-event-stations>.

==> UPCOMING ARRL SECTION, STATE AND DIVISION CONVENTIONS AND EVENTS

- March 11-12 -- ARRL Oklahoma Section Convention <http://www.arrl.org/hamfests/oklahoma-section-convention-green-country-hamfest>,
Claremore, Oklahoma
- March 12-13 -- ARRL North Carolina Section Convention <http://www.arrl.org/hamfests/north-carolina-section-convention-charlotte-ham

fest>,
Concord, North Carolina
- March 19 -- ARRL West Texas Section Convention

264. Amateur Radio Newsline(tm) Report 1753 - March 11 2011

Newsgroup: rec.radio.amateur.misc
Date: 2011-03-11 10:00:14 UTC
From: "William M. Pasternak" <newsline@ix.netcom.com>
Message-ID: <20110311100004.5F0E633C49@panix2.panix.com>
Source record: 4704
Cross-posted to: rec.radio.amateur.moderated,rec.radio.amateur.misc,rec.radio.amateur.policy,rec.radio.info

Amateur Radio Newsline(tm) Report 1753 - March 11 2011

Amateur Radio Newsline report number 1752 with a release date of
Friday, March 4, 2011 to follow in 5-4-3-2-1.

The following is a Q-S-T. Three hamsats are lost when a launch booster
fails to achieve orbit, the FCC changes the rules on ham radio use of
Spread Spectrum, Argentina is heard on 2 meter FM in North Carolina and
a Digital Amateur Radio record is established down-under. Find out the
details are on Amateur Radio Newsline(tm) report number 1752 coming
your way right now.

**

HAM RADIO IN SPACE: THREE HAMSATS LOST IN TAURUS XL LAUNCH FAILURE

A launch failure has lead to the demise of several new ham radio birds.
Bill Pasternak, WA6ITF, is in the newsroom with the details:

--

Three amateur radio satellites were lost when a launch booster failed
to achieve orbit. The satellites were launched from Vandenberg Air
Force Base in California at 10:09 UTC on Friday, March 4th on board an
Orbital Sciences Taurus XL rocket.

According to news reports, its believed that the launchers fairing
which covers the satellites on top of the rocket, did not separate
properly. This added drag prevented the Taurus XL from gaining enough
momentum to attain orbit.

The ham radio payload consisted of the Explorer-1, KySat-1 and Hermes.
The rocket is believed to have crashed near the Antarctic.

For the Amateur Radio Newsline, I'm Bill Pasternak, in Los Angeles.

--

By the way, Bill actually saw and photographed the launch from his
front lawn in Santa Clarita, California. That's at least 80 miles from
Vandenberg Air Force Base. He says that it was the brightest abject in
the night sky. His pictures, which were a last minute idea are
grab-shots taken without a tripod. They are posted in his 2011 photo
album on Facebook. (Southgate, ARNewsline(tm))

**

RESCUE RADIO: CHRISTCHURCH NZ HAM RADIO QUAKE ASSISTANCE WINDS DOWN

Ham radio emergency communications operations in the wake of the recent Christchurch, New Zealand, earthquake have just about wound down.

In an e-mail to Newsline's Jim Meachen, ZL2BHF, Richard Smart, ZL4FZ, who is head of the Amateur Radio Emergency Communications team says hat Christchurch has made or is making the transition from rescue to recovery. As such the normal services such as cellular, landline and internet are being progressively restored, although they are yet far from completely reliable at this stage. Cellular in particular, suffers from periods where calls can be received but not made or unable to get any service at all as the very high loads seem to swamp the switches.

Smart says that some cellular sites have been damaged by buildings collapsing or have been dismantled to allow demolition work to occur. ZL4FZ says that the damage has affected the capacity of the networks as infrastructure essential to Christchurch in many cases traverses the closed off centre of the city and will either need to be bypassed or overbuilt.

Other essential services, water, power and sewage are being restored, although for some the restoration will likely be long and protracted. This he says is an indication of the very large number of faults and breaks that have occurred.

Smart ends by telling ZL2BHF that at this time only informal amateur communications is being heard on the repeaters during the day. but there is no formal AREC activation at this time. (ARNewsline(tm) via ZL2BHF, ZL4FZ)

**

RADIO LAW: FCC CHANGES PART 97 SPREAD SPECTRUM RULES

Back in the United States, the FCC has changed the rules regarding the way in which radio amateurs can use Spread Spectrum technology.

In its Report and Order released March 4th, the regulatory agency has eliminated the requirement that amateur stations transmitting Spread Spectrum to use Automatic Power Control or APC to reduce transmitter power. At the same time, the Commission has reduced the maximum power of a Spread Spectrum emission from 100 to 10 watts PEP.

The changes are to Sections 97.311 and 97.313 of the Commission's Rules. This all will become effective 30 days after the Report and Order is published in the Federal Register. (FCC)

**

RADIO LAW: MORE CHANGES MADE TO EAS LAWS

The FCC has made more changes to its Emergency Alert System rules. This, to allow for national EAS testing and data collection from such tests.

The commission's Part 11 rules now say all EAS participating stations must take part in national tests of the EAS system. The first national EAS test must use the Emergency Alert Notification and the live event code for nationwide presidential alerts. Whenever the national test occurs, it replaces the monthly and weekly EAS tests for that particular month and week.

The new rules require the FCC to give stations at least two months' notice before a national test; and stations must submit test-related diagnostic information. This includes whether they received the alert, if they re-transmitted it and the make and model of their EAS encoder/decoder. And the submission is due to the FCC within 45 days. The data won't be released to the public but can be shared with other federal agencies and state governmental emergency management agencies.

These latest changes, were adopted on February 2nd. Thy have now been published in the Federal Register and are in effect. The goal of the national test is to determine whether EAS functions as intended to deliver a national presidential alert. (RW, FCC)

**

PROPAGATION: ARGENTINA HEARD IN NORTH CAROLINA ON 2 METER FM ON WIRE ANTENNA

The recent sunspots have brought some interesting propagation. Even on some of the VHF and UHF bands.

According to W0WOI reporting over the VHF Reflector, at 16:55 U-T-C on March 2nd, Johnathon Ballard, KI4UKF who lives in Stokes County, North Carolina heard Claudio Costa, LW2ECC in Argentina calling CQ on 144.48 MHz FM.

What really makes this interesting is that KI4UKF was using a Moxon wire antenna tacked to a wall. He said the signal was steady for several minutes at about S6, before it faded away. H e emailed Claudio, who confirmed the transmission. Claudio reported that he was using three 5/8 wave verticals and 160 watts. (W0WOI via VHF Reflector)

**

BREAKING DX NEWS: DX0DX SPRATLEY ISLAND ON HOLD

The DX0DX mission to the Spratly's has been postponed to April 2012. This, following the initial expedition attempt in January this year.

Team Leader VK3FY says he is determined to recover as much of the costs as possible to put things right for all the team members, sponsors, organizations and individuals involved. This rare DX-entity was to have been activated from 6 January 2011 until 1 February 2011.

More DX news later on in this weeks Amateur Radio Newsline report. (Southgate)

ENFORCEMENT: FLORIDA UNLICENSED BROADCASTER ISSUED $20,000 NOTICE OF APPARENT LIABILITY FOR FORFEITURE

The FCC has issued a $20,000 Notice of Apparent Liability for Forfeiture to Whisler Fleurinor. This for his alleged willful and repeated violated section 301 of the Communications Act by operating an unlicensed radio transmitter at his commercial property in Fort Lauderdale, Florida. Here's the back-story.

--

On March 16th and August 24th of 2010, in response to complaints about an unlicensed station on 99.5 MHz, agents from the Enforcement Bureau's Miami Office used direction finding techniques to locate the source of radio frequency transmissions on to a commercial property in Fort Lauderdale, Florida. The FCC says it found that the property is owned by Whisler Fleurinor.

On March 16, 2010, the agents determined that the signals from Mr. Fleurinor's building exceeded the limits for operation under Part 15 of the Commission's and therefore required a license. Following up, on August 24th, the FCC agents inspected the unlicensed station. The Commission says that at that time Mr. Fleurinor showed them his antenna and transmitter. He admitted that the equipment was his, and then turned off the transmitter.

Prior to leaving the property, the agents issued a Notice of Unlicensed Operation to Fleurinor, which he signed acknowledging that he was in receipt of it. The Notice warned that operation of an unlicensed station violated the Communications Act and the Rules and could result in further enforcement action.

But the Commission alleges that not long after Fleurinor came back on the air with the unlicensed station. And so it was that on August 31, 2010, agents from the Miami Office again used direction-finding techniques to locate the source of radio frequency transmissions on 99.5 MHz to Mr. Fleurinor's commercial property in Fort Lauderdale. The agents again determined that these signals exceeded the limits for operation under Part 15 of the Rules and therefore required a license. As such, Whisler Fleurinor was issued a second Notice of Unlicensed Operation.

Pursuant to the Commission's Forfeiture Policy Statement and the base forfeiture amount for operation without an instrument of authorization is $10,000. In assessing the monetary forfeiture amount, the FCC says that it must also take into account the statutory factors set forth in section 503(b)(2)(E) of the Communications Act. These include the nature, circumstances, extent, and gravity of the violations, and with respect to the violator, the degree of culpability, any history of prior offenses, ability to pay, and other such matters as justice may require. Consequently, the $10,000 base forfeiture amount is subject to adjustment.

The FCC says that as proven by its investigation, on two separate occasions Fleurinor was issued a Notice of Unlicensed Operation. It says that despite having acknowledged receipt of both notices that he continued to operate the unlicensed radio station. It says that the fact that Fleurinor continued to operate with full knowledge that such activity violated the Communications Act and the FCC's Rules demonstrates a deliberate disregard for the Commission's requirements. As such it believes that the $20,000 proposed fine is warranted.

For the Amateur Radio Newsline, I'm Norm Seeley, KI7UP, in Scottsdale, Arizona.

--

The action in this case was adopted and released on March 4th, 2011. Whisler Fleurinor was given the customary 30 days to pay the $20,000 forfeiture amount or to file an appeal. (FCC)

**

ENFORCEMENT: FCC ISSUES OFFICIAL CITATION FOR ERRANT WIRELESS CAMERA

The FCC has issued an Official Citation to SecurityMan Inc. of Ontario, California. This, for marketing a non-compliant wireless camera that caused interference to other service.

According to the Citation, the camera in question apparently radiated an excessive second harmonic of the 902 to 928 MHz band on which it was designed to operate. This in turn caused interference to a nearby PCS cell site.

The matter goes back to In December 2009. That's when the FCC's Enforcement Bureau received a complaint alleging that the SecurityMan SM-302T wireless camera was causing harmful interference to U.S. Cellular's licensed operation of its PCS network in the 1850 to 1865 MHz band. If you do the math, a second harmonic of a 902 to 928 MHz transmitter has a good chance of falling within the cellular P-C-S band.

Once suspicious that the camera might be the cause of the interference, Enforcement Bureau staff visited the SecurityMan web site at www.securitymaninc.com. There they observed that SecurityMan was marketing the SecurityMan SM 302T wireless camera. They then purchased

a SecurityMan SM 302T wireless camera, and forwarded it to the FCC's Office of Engineering and Technology Laboratory for testing. The lab's tests demonstrated that the SecurityMan SM-302T does not comply with the radiated emission limits specified in sections 15.249(d) and 15.209 of the rules. (FCC)

**

ENFORCEMENT: LASER HITS COCKPIT OF PHOENIX NEWS HELICOPTER

Pointing a laser at aircraft is illegal and now authorities in Phoenix, Arizona, are looking for whomever it was that did just that to a news chopper. Jeff Clark, K8JAC, has more:

--

A Phoenix news helicopter was the victim of an attack from the ground in late February. This as someone shot a bright laser beam into its cockpit that was also caught by the choppers on-board camera.

According to The Arizona Republic, authorities are currently investigating the incident and have yet to identify the perpetrator. The newspaper goes on to note that local police actually searched door-to-door in the area where the beam originated but so far have come up empty handed.

A spokesman with the Federal Aviation Administration commenting on the incident said that the message here is very simple. If you want to engage in this kind of dangerous and irresponsible behavior, you can be caught and arrested.

Im Jeff Clark, K8JAC.

--

The helicopter in question shoots footage for multiple Phoenix stations. These include CBS-affiliate KPHO and independent station KTVK. If caught, and if prosecuted by the perpetrator of this stunt could face up to 20 years in prison. (Published news reports)

**

RESCUE RADIO: COMMUNICATIONS ACADEMY 2011

Registration is now open for Communications Academy 2011 to be held at South Seattle Community College, April 16th and 17th. ARRL Western Washington Section Manager Jim Pace, K7CEX, says that the theme this year is "Bringing Professionalism to Amateur Emergency Communications".

According to Pace, planners has an exciting lineup of speakers and breakout sessions scheduled. Saturday's keynote speaker is ARRL Media and Public Relations Manager Allen Pitts, W1AGP. He will be presenting an address titled "Reality Check: The four stages of ARES." On Sunday, Alan Komenski, AC2K, State Interoperability Executive Committee of the Washington State Patrol.

Early registration by April 3rd saves you 15% and groups of 5 or more registering at the same will save an additional 10%. You can register right at www.commacademy.org. (Press Release)

**

HAM HAPPENINGS: VHF CONVENTION DOWN-UNDER IN APRIL

The show must go on down-under. This with word that the Wellington VHF Group will hold its VHF Convention from April 22nd to the 24th Tawa College in Tawa. This years convention is being held in conjunction with the annual Wellington Radio Expo and Wellington Expo-11.

According to planners, the VHF Convention offers a great program line-up for both the newcomer and the experienced radio amateur alike. Some of the topics include forums on VHF, ATV, Satellites, Special Interest Groups and a forum for Repeater and Beacon Trustees.

More information along with registration forms are available on the Wellington VHF Group website. Its in cyberspace at www.vhf.org.nz (Wellington VHF Group)

**

HAM HAPPENINGS: HAPPY 20th BIRTHDAY TO THE OPDX NEWSLETTER

And congratulations to our friends at the Ohio/Penn DX Bulletin which celebrated its 20th anniversary and published its 1000th issue last week. To celebrate, the Northern Ohio DX Association which publishes the on-line newsletter was to activate the special event station NO8DX/20 between March 11th and the 13th. If you made contact, please send your QSL via the events QSL manager and editor of the OPDX, Tedd Mirgliotta, KB8NW at his callbook address. (DXNL)

**

HAM HAPPENINGS: NAMIBIAN AMATEUR RADIO LEAGUE CELEBRATES 21st ANNIVERSARY

And on March 21st the Namibian Amateur Radio League or NARL celebrate its 21st birthday. At the same time Namibia will celebrate 21 years of its own independence.

To commemorate these two event the NARL has been issued the special event callsign V521NAM. Plans are to activate the call from Saturday the March 19th to Monday the 21st. All amateurs in Namibia are allowed to use the special event callsign for the duration of the event but they will be required to send in their logs so the NARL QSL Bureau can send out special QSL cards to all worked stations.

All incoming QSL's should be via sent via the bureau or electronically using e-qsl. More on this special event operation is on the web at www.qsl.net/narl. (NARL)

WORLDBEAT: INTERNATIONAL MARCONI DAY - APRIL 30th

This years International Marconi Day takes place on Saturday April 30th. This is not a contest but there are several awards available for working the officially listed stations, each of which has an historic connection with Marconi. The event is organized by the Cornish Amateur Radio Club. For more information please visit the club's website at crac.g4usb.net/cracblog. (GB2RS)

**

WORLDBEAT: CANADIAN HAMS ASK RAC FOR ASSISTANCE IN RIDDING PLASMA TV INTERFERENCE

Members of Canada's Niagara Peninsula Amateur Radio Club say that noise and signals originating from Plasma screen digital television sets are causing considerable interference to their HF activities. They have asked their national society for help.

According to a news release from Radio Amateurs of Canada, complaints of this nature require specific and detailed information before it can consider taking this matter to telecommunications regulator Industry Canada. To gather this information, Radio Amateurs of Canada invites its members who own a Plasma screen television receivers to report their experiences of interference from such products. Specifically, these reports should describe the make and model of TV, a description of their HF station and antenna system and the exact nature of the interference. This means what bands are affected, what the interference sounds like and any other pertinent information. Remedies should also be tried and reported such as using ferrite chokes on power cords and signal cables if interference is detected.

Amateurs with advanced instrumentation such as spectrum analyzers and calibrated antennas should measure signal intensity levels at given distances; these measurements will add credibility to our investigation. Canadian hams suffering from this type of interference should send their reports to Norm Rashleigh, VE3LC, via email to ve3lc (at) rac (dot) ca. (RAC)

WORLDBEAT: RNW LAUNCHES IPHONE APP IN 9 LANGUAGES

Radio Netherlands Worldwide has developed a free news application in nine languages for the Apple iPhone. This application gives iPhone users 24-hour access to Radio Netherlands latest internet postings, including web articles, radio programs, videos and podcasts. The application called RNW. It is available free of charge from the iPhone App Store. (Media Network)

**

DX

In DX, word that JA1JQY, JA1KJW and JA8VE will be active from Thimphu Bhutan between April 19th and the 26th. Operations will be on 160 through 6 meters using CW, SSB and RTTY. QSL as directed by the operators.

DL7BC will be active from Morocco as CN2BC during the CQ WW WPX SSB Contest as a Single-Op, All-Band, Low-Power entry. QSL his operation via DL7BC. You can visit his Web page at www.qslnet.de/dl7bc for further information regarding this one.

VE3ZIK will be once again active portable 9A from Croatia between March 13th and the 30th. He also plans to be active in the Russian DX Contest, the CQ WPX SSB Contest and mentions that there is a good chance he will be on from Vrana Lake as well. QSL via DK8ZZ, via the bureau, Logbook of the World, eQSL or direct. E-mail Bureau requests for QSLs can go to ve3zik (at) gmail (dot) com.

And keep an ear open for F2JD will once again be active as stroke HR5 from Copna, Honduras starting mid-March and continuing through to mid-May. Operations will be on all HF bands using CW and SSB. QSL via F6AJA.

A group of hams from the Amateur Radio Society of India plan to become active as VU4PB from the Andaman Island capital Port Blair. This, from March 15th through the 31st. Modes used will be CW, SSB and RTTY on all bands using up to four stations. They also hope to work via moonbounce on 6 meters. Their QSL manager will be W3HNK, which means that QSLs are confirmed only direct but reliably.

Lastly, I2DMI will be active as CE0Y from

Easter Island between July 30th and August 8th.

His operation will be RTTY and what bands he

plans to use are at this time unknown. QSL via

his home callsign.

(Above from various DX news sources)

THAT FINAL ITEM: DIGITAL ATV RECORD SET DOWN

UNDER

And finally this week, word that new records for Digital Amateur Television have been set down-under. Robert Broomhead, VK3DN, of the WIA News is here with an in-depth look at what took place to make it all happen:

--

On Wednesday evening, 23 February 2011, Digital Amateur Television signals from Victoria were received in the northwest of VK7 by Winston, VK7EM. After noting the band conditions improving with a lift in the 70cm beacon strength and the appearance of Community TV Channel 31, Winston monitored VK3RTV, the Melbourne Digital ATV repeater.

At around 5.30pm color bars appeared. Then with liaison with Peter VK3BFG on 147.4 MHz simplex, who had made sure the repeater was activated, live pictures were organized, with Peter proudly showing off his equipment with a very professional `on camera' appearance.

Word spread and other stations like Neil VK3BCU, John VK3DQ, and Jack VK3WWW joined in. At one stage there were two independent pictures arriving, John 3DQ on one channel, VK3RTV1 and Peter 3BFG on VK3RTV2, and both in contact with each other.

At 8.00 PM signals on VK3RTV began to fade. It was then that a separate receiver monitoring 1250 MHz suddenly came to life with a perfect color bar signal. A call on 2 meters established that it was Rob, VK3TRX who chatted and then held up a 10 gig. antenna he will use in an upcoming ATV field day. These pictures on 23 centimeters analogue FM, became quite noise free.

The equipment used by Winston consisted of home-brew yagis on each band to a K7MEM design, masthead mounted preamplifiers designed by VK5EME, fed into a Teac SDB451 Digital Set Top Box on 70 centimeters, while for 23 centimeters a Drake ESR 700 satellite receiver.

I'm Robert, VK3DN.

--

For those listeners in North America who have never heard the term "lift conditions" it's the way most of the rest of the world describes what we call improved band conditions, especially on frequencies at and above 50 MHz. (WIA News)

GB2RS NEWS

Sunday 13th March 2011

The news headlines:

* Air Cadets on the Air

* Science week open day in Dorset

* Yahoo 6m repeater constructors group

The Air Cadets of Chester 610 squadron are holding a radio weekend with the help of the Chester and District Amateur Radio Society over the weekend of 19 and 20 March. They plan to put HF, VHF and UHF stations on the air. Cadets will be able to get hands on experience of operating radio transmitting and receiving equipment in speech, Morse code and digital modes on both amateur and air cadet frequencies. The organisers are encouraging other amateurs who hear the cadets on the air to call in and speak to them. This event will see the launch of the Squadron's own permanent radio station under the supervision of Corporal Neil Hosker of the Royal Auxiliary Air Force.

As part of National Science and Engineering week, Flight Refuelling Amateur Radio Society will hold an Open Day on Saturday 19 March at their HQ in Merley Park Road, Wimborne, Dorset. Exhibits and demonstrations based on this year's communication theme will be on display to visitors as well as a Tesla coil demonstration. Local BATC members will stream the event live on the internet via their website www.batc.tv. Enquiries about the event can be obtained, via e-mail, to G4POF@hotmail.com.

A Yahoo 6m repeater constructors group has been set up at uk6mrepeatercons@yahoogroups.co.uk. The idea behind the group is to pool resources together to aid the construction of 6m repeaters, which pose a unique set of challenges. The group is by no means restricted in frequency, in fact it is open for debate for all repeaters using duplexers. It is hoped that this group can have a UK bias and be used in conjunction with the already established yahoo repeater-builders group.

The Amateur Radio Section of ORF, the Austrian Broadcasting Corporation, in conjunction with the Documentary Archives Radio Communications QSL Collection will operate OE11M from 0000UTC on 29 April to 2359UTC on 1 May. OE11M is an official International Marconi Day station and contacts made on 30 April are valid for the IMD Award.

QSL via OE-Bureau or direct to OE1WHC. Cards without SAE & new IRC or dollars to cover postage will be processed via Bureau.

The 2011 International Museums Weekend special event will once again be a double-weekend and will take place on 18 and 19 June as well as 25 and 26 June. Radio amateurs are encouraged to participate in this event by setting up stations in their local museums. Harry, M1BYT, who is organising the event, asks that all those intending to take part should register their museum via e-mail to harry.m1byt@tiscali.co.uk. Full details of the event can be found on the International Museums Weekend website at www.ukradioamateur.co.uk/imw. And now for the details of rallies and events for the coming week

Today, 13 March, Cambridge & District Amateur Radio Club Rally will be held at Wood Green Animal Shelter, King's Bush Farm, A1198 London Road, Godmanchester, Cambs PE29 2NH. Doors open at 10am and admission is £3. There will be trade stands and a Bring & Buy. Contact John, G0GKP, on 01954 200072.

Also today, 13 March, the 26th Wythall RC Radio and Computer Rally will be held at Woodrush Sports Centre, Shawhurst Lane, Hollywood, nr Birmingham B47 5JW on the A435, 2 miles from J3 of the M42. Entry is £2 and there will be trade stands and a Bring & Buy. Contact Chris, G0EYO, on 07710 412 819.

The Lagan Valley ARS Rally will take place on 19 March in the Village Centre, 7 Ballynahinch Road, Hillsborough. Doors open at 11.30am and there will be plenty of trade stands as well as on-site catering. Contact Jim, GI0DVU, on 02892 662 270.

27th Yeovil QRP Convention will take place on 20 March in Digby Hall, Hound Street, Sherborne, Dorset DT9 3AA. The venue adjoins the central shopping car park. Doors open at 9.30am and talk-in is provided on S22. There will be trade stands, lectures and a Bring & Buy. DIS. Contact Derek, M0WOB, 01935 414 452.

Now for the news of special events

As part of Omagh District Council's annual St Patrick's Day celebrations, West Tyrone Amateur Radio Club will be on air from Omagh Arts Centre from 12 noon until 5pm on Thursday 17 March with the callsign GB1SPD. They will be active on all bands as the club demonstrates amateur to the general public.

Special event station GB2SPD will be operating from the QTH of Martin, 2I0WAI from 17 March to celebrate St Patrick's Day. The station will operate all bands and hope to have a PSK31 station on air too. QSL information and other details are as listed on qrz.com.

The Humber Fortress DX Amateur Radio Club will be putting GB0BB on the air on the weekend of 18 to 20 March from Fort Paull in East Yorkshire. The station will celebrate the 6th anniversary of the Blackburn Beverley XB259 aircraft. Operators and guests are welcome. See qrz.com

for details of the weekend's events.

GB1IMW will be operational from Mepal & Witcham Primary School, Mepal near Ely in Cambridgeshire. The operation is part of the children's study and participation in National Science Week for Communications from 14 to 18 March, which includes Red Nose Day. They will be operating nationally on 80m and 40m and locally on 2m, 6m and 70cm. The organisers ask that amateurs please do answer the children's CQs.

Between 13 March and 3 April GB8HBW and GB0CMR will be on the air celebrating 85 years of Hospital Radio in the UK. GB8HBW will be operating in the Newbury area and GB0CMR is in Hinckley for Castle Mead Radio. And now the HF DX news compiled from 425 DX News and other sources

EI7CC will be active as 7P8PB from Maseru in Lesotho until 23 March. His operating time will be limited because he will be on a family holiday. QSL EI7CC via the bureau or direct. Logs will be uploaded to Logbook if the World immediately upon his return to Ireland.

MJ0ASP is returning to Marrakech, Morocco, between 14 and 21 March and will be active as CN2MR. Operation will be on 40 through 10 meters using CW. He says that he will focus on the 30, 17 and 12 metre bands. QSL via MJ0ASP.

Roger CT8/G3SXW and Lionel CT8/G5LP will operate from San Miguel Island, Azores, IOTA reference EU- 003, on 16 and 17 March. The Azores used to have the prefix CU but this is now changed to CT8. They hope to be active for several hours each day with the Elecraft K2, CW only. QSL via their home callsigns and Logbook of The World.

Allan, W6HGF plans to stage a one-man expedition to Miquelon from 14 to 22 March. Activity is planned on all bands, with focus on RTTY and other digital modes.

Radio amateurs from the Amateur Radio Society of India plan to be active as VU4PB from the Andaman capital Port Blair from 15 to 31 March. Operation will take place using CW, SSB and RTTY on all bands with up to four stations on the air. The group also want to work via moonbounce on 6m. Their QSL manager will be W3HNK.

Now the contest news

The CW leg of the 80m Club Championships will take place on 16 March between 2000 and 2130UTC. The exchange will be signal report and serial number.

The 1.3GHz UK Activity Contest will also take place on 16 March from 2000 to 2230UTC. Using all modes, the exchange is signal report, serial number and locator.

The BARTG HF RTTY Contest runs for 48 hours starting 0200UTC on the 19th. Single operator stations can make a 6-hour all-band or 30-hour single-band or all-band entry, while multi-op stations can be single

transmitter or multi transmitter, but only enter the full 48 hours. There are no differing categories for different power levels. The 3.5 to 28MHz bands are used and the exchange is signal report, serial number and time.

The Russian DX Contest takes place for 24 hours over the same weekend from 1200 to 1200UTC. This is a CW/SSB event that includes the interesting possibility of submitting two single-band entries, for example 10m and 80m. Work everyone and send a signal report and serial number, but expect Russian stations to send you a signal report and a 2-letter Oblast code. And now the solar factual data for the period from the 28th of February to the 6th of March, compiled by Neil Clarke, G0CAS on the 7th of March.

The latest smoothed sunspot numbers are now available and are for June, July and August 2010 and are 16.4, 16.8 and 17.4 respectively.

First one, then two and, by the end of the period, three large sunspot groups dominated the solar disc. One of these groups was the largest so far for this sunspot cycle. Despite their size and magnetic complexity, all three groups failed to produce a major flare in the M or X class level. Numerous C class solar flares took place most days, the largest was a C8 that occurred on the 6th. Solar flux levels increased steadily day after day increasing from 96 units on the 28th to 143 by the 6th. This is the highest level since the 1st of December 2003. In fact there was only one other day in 2003 that saw flux levels at the same level and that was in January. The average was 121 units. The 90 day solar flux average on the 6th was 90 units. That's four units up on last week. X-ray flux levels did not fare as well, only showing a slight rise from B2.2 units to B6.6 by the 5th. The 6th saw a sizable increase to B9.6 units. The average was B5.1 units. This could be one reason, along with others, why solar flare activity was limited in size. Exactly as forecast, a coronal hole disturbance arrived on the 1st and rumbled on until well into the 4th. The most disturbed day was the 1st with an Ap index of 31 units. The average was Ap 12 units. Solar wind data from the ACE spacecraft saw solar wind speeds increase from 290 kilometres per second to 700 by the next day. Speeds then gradually declined and by the end of the period were down to 450 kilometres per second. Particle densities were low except for a brief rise to 18 particles per cubic centimetre on the 1st. Bz showed little variations except for the 1st which fluctuated between minus and plus 15 nanoTeslas.

And now the solar forecast. Over recent weeks the Sun has shown an increase in activity. Will this continue for another week? The answer is maybe. Remember, activity can die away as quickly as it starts. With large sunspot groups on each side of the Sun and always having one in view from Earth, solar activity is expected to be low to moderate. Solar flux levels could well be above the 100 mark on some days, if not all. Geomagnetic activity should be predominantly quiet, no coronal holes are expected, however, if a large solar flare takes place and a

coronal mass ejection heads are way then activity could increase substantially. MUFs during daylight hours at equal latitudes should be around 24MHz for the south and 21MHz for the north. Darkness hour lows are expected to be about 9MHz. Paths this week to the Middle East should have a maximum usable frequency with a 50 per cent success rate of around 25MHz. The optimum working frequency with a 90 per cent success rate will be about 20MHz. The best time to try this path will be between 100 and 1500 hours.

And that's all for this week from the propagation team.

Next, the Local News:

Please note that details of all RSGB-affiliated clubs and societies

can be found on the RSGB website, including email addresses

and website links where known.

[Note to Newsreaders: Please read the local news items appropriate to the service area of your

transmission.]

NEWS FOR THE MIDLANDS We welcome Eddie, M0WDE as a new primary newsreader for the Lincoln area on 2m FM. He joins Jim, G0EJQ who now becomes reserve newsreader at 10.30am on Sundays. The opportunity has also been taken to change the existing reading from 145.525MHz to the Lincoln repeater, GB3LM. From now on, listen on its output frequency, 145.725MHz for this news bulletin. However 145.525MHz simplex will be used on any occasion when the repeater is out of service. Eddie and Jim will appreciate reception reports and comments on this new arrangement during their after-news net.

On Sunday 13 March Hucknall Rolls Royce Amateur Radio Club is holding a fox hunt in Bestwood Country Park. More information from Dave Wilde, G1YAI, on 0844 4355593.

On Sunday 13 March Midland Amateur Radio Society Club is visiting the Wythall Radio Rally. Details from Norman, G8BHE, on 01214 229 787.

On Sunday 13 March South Birmingham Radio Society is running the Wythall Radio Rally at Windrush Sports Centre. Contact Don, on 0121 458 1603.

On Monday 14 March Gloucester Amateur Radio & Electronics Society is operating on VHF. Contact Anne, 2E1GKY, on 01452 548478, daytime.

On Monday 14 March Leicester Radio Society is having a presentation on PCB CAD by Duncan. Contact Alex, G8FCQ, on 0753 120 1640.

On Monday 14 March South Birmingham Radio Society is unloading the trailer and having a rally debrief. Contact Don, on 0121 458 1603.

On Monday 14 March South Normanton Alfreton & District Amateur Radio Club is having a natter night. Details from A Lawrence, 2E0BQS, by email to adylawri@btinternet.com.

On Monday 14 March Stratford Upon Avon District Radio Society is having a test equipment evening with John, G0JUQ. Contact G0CHO, on 01608 664488.

On Tuesday 15 March Derby & District Amateur Radio Society is watching a video. Contact Richard Buckby, by email to radio@dadars.org.uk.

On Tuesday 15 March Loughborough & District Amateur Radio Club is having a vintage equipment evening. More information from Chris, G1ETZ, on 01509 504 319. On Wednesday 16 March Hinckley Amateur Radio Society is having Health & Safety risk assessments by Keith Tonks. Details from John, M0JAV, on 07836 731544.

On Wednesday 16 March Lincoln Short-Wave Club is having a natter night and putting G5FZ on the air. For more information contact Pam Rose, G4STO, on 01427 788356.

On Wednesday 16 March Midland Amateur Radio Society is planning for rallies and contests and running training classes. Details from Norman, G8BHE, on 01214 229 787.

On Wednesday 16 March Telford & District Amateur Radio Society is having a talk on kites as antenna supports by Roger, G4ROJ. Contact Mike, G3JKX, on 01952 299 677.

On Thursday 17 March Cheltenham Amateur Radio Association is holding a constructors' exhibition. Contact Derek Thom, G3NKS, on 01242 241099.

On Thursday 17 March Solihull Amateur Radio Society is having a talk on crystal radio receivers by Geoff Roberts, G8DHI. Contact P T Gaskin, G8AYY, on 0121 628 7383.

On Thursday 17 March South Birmingham Radio Society is holding training classes with Dave Murphy, G8OWL. Contact Don, on 0121 458 1603.

On Friday 18 March Coventry Amateur Radio Society is having a construction night for Project 2011. Contact John, G8SEQ, on 07958 777363.

On Friday 18 March Hucknall Rolls Royce Amateur Radio Club is having a general club meeting. More information from Dave Wilde, G1YAI, on 0844 4355593.

On Friday 18 March Nunsfield House Amateur Radio Group is working on its RSGB project. Details from Ken Frankcom, G3OCA, on 01332 720976.

On Friday 18 March South Birmingham Radio Society is having a construction evening. Contact Don, on 0121 458 1603.

On Saturday 19 March Lincoln Short-Wave Club invites M3s, M6s and 2E0s to use 400W on HF. For more information contact Pam Rose, G4STO, on 01427 788356.

NEWS FOR THE NORTH OF ENGLAND On Monday 14 March Bolton Wireless Club is having a talk by RSGB President Dave Wilson, M0OBW. For details, send an email to boltonwireless@gmail.com.

On Monday 14 March Macclesfield & District Radio Society is having a talk on fox hunting by Simon Faulkner, M0TGT. More information from Roger Bell, M0GMG, on 0771 258 9163.

On Monday 14 March Scarborough Amateur Radio Society is having a talk on the history of Ever Ready by Bob Alders, M0GAP. Details from Jerry Scarr, G6LBL, on 01751 476601.

On Monday 14 March Sheffield Amateur Radio Club is holding an open evening for National Science Week. The evening will include demonstrations of short wave and VHF/UHF amateur radio including HF, VHF satellite communications, data modes and the state of the art D-Star repeater system. In addition there will be a display of equipment, amateur radio videos and printed information. Visitors will be able to meet the club members and, in particular, obtain information on how to obtain an amateur radio licence through the club's highly successful courses. Children under 18 MUST be accompanied by a parent or other responsible adult family member. More information from Peter Day, G3PHO, by email to sarc@g3pho.org.uk.

On Monday 14 March Thornton Cleveleys Amateur Radio Society is having a talk on the treasure of the Humboldt Glacier by Mick, G4EZM. Details on the web at www.tcars.org.uk.

On Monday 14 March Workington and District Radio and IT Group is having a talk on phased verticals by Steve, G0MTD. For more information get in touch with Barry Easdon, G0RZI, on 01946 812092.

On Tuesday 15 March Chester & District Amateur Radio Society is having a talk at Burley Hall on RAYNET by Jon Mossman. Details from Barbara Green on 07957 870770.

On Tuesday 15 March Halifax & District Amateur Radio Society is having a talk on choosing the equipment and antenna for a /P station by Richard M0RBG, including a demonstration of his portable mast and multiband antenna. Contact Martin, M0GQB, on 01422 341317.

On Tuesday 15 March Otley Amateur Radio Society is having an open shack night with technical chat. Contact Paul, 2E0PAK, on 07768 996370.

On Tuesday 15 March Stockport Radio Society is having an audio extravaganza with Roland Myers, G8LOL. More information from Nigel Roscoe, on 07973 312 699.

On Wednesday 16 March Denby Dale Radio Club is planning for the Huddersfield Narrow Canal bicentenary celebrations. Details from Richard, M0RBG, on 07976 220126.

On Wednesday 16 March Grimsby Amateur Radio Society is having a natter night. Contact Cliff, G4YHP, on 01472 328 830.

On Wednesday 16 March Hornsea Amateur Radio Club is holding a CW competition. Contact Gordon MacNaught, G3WOV, on 01377 240573.

On Wednesday 16 March Mid-Cheshire Amateur Radio Society is on the air and assessing a dish for high frequency use. Contact Peter Paul Fox, G8HAV, on 01606 553401.

On Wednesday 16 March Sheffield Amateur Radio Club is visiting local schools for National Science Week. More information from Peter Day, G3PHO, by email to sarc@g3pho.org.uk.

On Thursday 17 March Ripon & District Amateur Radio Society is having a talk on the relay-switched dipole. Details from Rob Hall, M0RBY, on 0787 608 5631.

On Thursday 17 March South Manchester Radio and Computer Club is having a visit by RSGB President Dave Wilson, M0OBW. Details from Ron, G3SVW, on 0161 969 3999.

On Friday 18 March East Cleveland Amateur Radio Club invites members to bring in something interesting. For more information contact Alistair, G4OLK, on 01642 475 671.

NEWS FOR NORTHERN IRELAND On Monday 14 March Greenisland Electronics Amateur Radio Society is on the air on 2m. Details from Peter Lowrie, MI5JYK, by email to mi5jyk@rsgb.org.uk.

NEWS FOR SCOTLAND On Tuesday 15 March Livingston & District Amateur Radio Society is having a club evening. Details from Norman, on 07740 946192.

On Wednesday 16 March West of Scotland Amateur Radio Society is having Solder Group homebrew projects & licence training. More information from Fred Coombes, 2M0BIN, on 01415 715512.

On Thursday 17 March Aberdeen Amateur Radio Society is testing the antenna analyser. More information from Lewis, GM4AJR, on 01224 575 663.

On Friday 18 March Cockenzie & Port Seton Amateur Radio Club is having a talk on RAYNET by Malcolm Gibson, MM0YMG. More information from Bob, GM4UYZ, on 01875 811 723.

On Friday 18 March West of Scotland Amateur Radio Society is having presentations, guest speakers, a quiz and a raffle. More information from Fred Coombes, 2M0BIN, on 01415 715512.

NEWS FOR THE SOUTH EAST and EAST ANGLIA On Sunday 13 March Cambridge & District Amateur Radio Club is holding its rally. Details from Ron, G3KBR, on 01223 501712.

On Monday 14 March Coulsdon Amateur Transmitting Society is having a talk on building and using the Ten- Tec 1330 by Martin, M1MRB. Details from Steve Beal, G3WZK, by email to secretary@catsradio.org.

On Monday 14 March West Kent Amateur Radio Society is having a club evening. More information from Les, G6UBM, by email to westkentars@googlemail.com.

On Tuesday 15 March Andover Radio Amateurs Club is having a club night and committee meeting. Details from Martin, M0MWS, on 07776 181646.

On Tuesday 15 March Bromley & District Amateur Radio Society is having a talk on low earth orbit satellites. Details from Andy, G4WGZ, on 01689 878089.

On Tuesday 15 March Chelmsford Amateur Radio Society is having a club net night. Contact Martyn, G1EFL, on 01245 469 008.

On Wednesday 16 March Chesham & District Amateur Radio Society is discussing a technical topic. More details from Terry, G0VFW, on 01442 831 491. On Wednesday 16 March Havering & District Amateur Radio Club is having an in formal evening. Details from John, M0UKD, on 07890 222111.

On Wednesday 16 March Norfolk Amateur Radio Club is taking part in the RSGB CW Club Contest and having an informal evening with construction, shack and Bright Sparks participation. Details from Chris Danby, G0DWV, on 01603 898678.

On Wednesday 16 March Worthing & District Amateur Radio Club is having a talk on the the history of light bulbs by John Narborough. Contact Phil, G4UDU, on 01903 816684.

On Thursday 17 March Colchester Radio Amateurs has a talk by RSGB Essex DRM Mark, M0IEO. More information from Kevan, 2E0WMG, on 07766 543784.

On Thursday 17 March Cray Valley Radio Society has a reprise of special events with videos presented by Bob, M0MCV and Paul, G3SXE. Details from Bob, M0MCV, on 020 8265 7735 after 8pm.

On Thursday 17 March Horsham Amateur Radio Club is having a social at The Plough, Rusper. Details are on the web at www.harc.org.uk.

On Thursday 17 March King's Lynn Amateur Radio Club is having a club night and 2m club net. Contact Ray, G3RSV, by email to ral-g3rsv@supanet.com.

On Thursday 17 March Shefford & District Amateur Radio Society is having a talk on films of yesteryear by Frank Banfield. Details from David, G8UOD, on 01234 742 757.

On Thursday 17 March Sutton & Cheam Radio Society is having a talk on behind the scenes at Bletchley Park in WWII by Brian Oakley.. More information from John, G0BWV, on 020 8644 9945.

On Friday 18 March Cambridge & District Amateur Radio Club is having a rally report. Details from Ron, G3KBR, on 01223 501712.

On Friday 18 March Harlow & District Amateur Radio Society is having a general chat night. Contact RC WHITE, G0AGO, by email to G0AGO@aol.com.

On Friday 18 March Mid-Sussex Amateur Radio Society is having a radio night and table top sale. Contact Peter, G4AKG, on 01444 239371.

On Friday 18 March Reading & District Amateur Radio Club commences its Foundation Licence course. Contact Eric by email to m0luv@radarc.org for more information.

On Friday 18 March Wey Valley Amateur Radio Group is having a club night. Details on the web at www.weyvalleyarg.org.uk.

NEWS FOR THE SOUTH WEST On Monday 14 March Exeter Amateur Radio Society is having a general meeting. More information from Nick, on 01363 775756.

On Tuesday 15 March West Devon Radio Club is having a valve and vintage demo night. Further information from Jules Cuddy, M1AGY, on 01752 291588.

On Wednesday 16 March Cornish Radio Amateur Club is running its Foundation course. Details from Steve, G7VOH, on 01209 844939.

On Wednesday 16 March Taunton & District Amateur Radio Club is holding a committee meeting. Contact William, G3WNI, on 01823 666 234 for more information.

On Wednesday 16 March Thornbury & South Gloucestershire Amateur Radio Club is having a video night. Contact Tony, G0WMB, on 01454 417048.

On Thursday 17 March South Bristol Amateur Radio Club is having a quiz night with Muriel, G4YZR. Details from Andrew Jenner, G7KNA, on 07838 695471.

On Thursday 17 March Swindon & District Amateur Radio Club is having an activity night. Contact Den, M0ACM, on 07810 317750.

On Thursday 17 March Yeovil Amateur Radio Club is having a briefing for the QRP Convention. Contact Steve Crask, G7AHP, by email to steve@g7ahp.co.uk.

On Friday 18 March North Bristol Amateur Radio Club is having an operating evening. Contact Dick, on 01454 218362.

On Friday 18 March Torbay Amateur Radio Society is having a natter night. For more information contact Dave, G6FSP, by email to g6fsp@tars.org.uk.

On Sunday 20 March Yeovil Amateur Radio Club is running the Yeovil QRP Convention. Contact Steve Crask, G7AHP, by email to steve@g7ahp.co.uk.

NEWS FOR WALES On Monday 14 March Llanelli Amateur Radio Society is on the air and holding a raffle. Contact Craig, MW0MXT, on 01269 840292.

On Tuesday 15 March Wrexham Amateur Radio Society is having a talk on the early history of radio with some Welsh connections by GW8NZN. More information from Patrick, 2W0HUU, on 07947 701 927.

266. _ _ ._ ... _ __._ ... _ Piece of shit, IRA terrorist supporter RepubliCON Pete King, not content with trashing 1.5 million Americans because of their religion, now wants to destroy amateur radio

Newsgroup: rec.radio.amateur.misc

I though RepubliCON piece of shit, IRA terrorist Pete King was to busy
hating Muslims to go after anyone else.

WRONG.

Once RepubliCONS get on a roll, they try to destroy anything in their
path.

Rep. Pet King now wants to rip off a major amateur radio band.

Why?

Because police departments all over the USofA need something called
ï¿½broadband for cops." After all, if thereï¿½s one thing the cops need,
itï¿½s more ways to talk to each other on radios.

Of course, King doesn't want you to know that manhy of the the current
public service frequencies ares being sold off to the private sector,
because the Federal Government sells the airwaves because it can.

From the ARRL amateur radio website:
http://www.arrl.org/hr-607

-- quote
On February 10, 2011, Rep. Peter King (R-NY), Chairman of the House
Homeland Security Committee, introduced H.R. 607, the ï¿½Broadband for
First Responders Act of 2011,ï¿½ which has been referred to the House
Energy and Commerce Committee (which handles telecommunications
legislation). The bill addresses certain spectrum management issues
including the creation and maintenance of a nationwide Public Safety
broadband network.

As part of that network, the Bill provides for the allocation of the
so-called ï¿½D-Blockï¿½ of spectrum in the 700 MHz range for Public Safety
use. HR 607 uniquely, provides for the reallocation of other spectrum
for auction to commercial users, in order to offset the loss of
revenue that would occur as the result of the allocation of the
D-Block to Public Safety instead of commercial auction. H.R. 607
lists, among the bands to be reallocated for commercial auction within
ten years of the passage of the Bill, the paired bands 420-440 MHz and
450-470 MHz.

The inclusion of most of the Amateur 70-cm spectrum as one of the
replacement bands is a major problem. The 420-440 MHz band is not

Public Safety spectrum and should not be included in any spectrum swap of Public Safety allocations.

While the ARRL and all Amateurs support the work of Public Safety and recognize their need for dedicated spectrum which would promote interoperability, the ARRL vigorously opposes HR 607 in its present form. HR 607 is a direct threat to our limited spectrum and the ARRL encourages all amateurs to appropriately voice their opposition to this bill.
-- end quote

Text edition:

WIANEWS FOR WEEK COMMENCING MARCH 13 2011.

Isle of Muck an IOTA DXPEDITION.

Successful Field Operation

FREQUENCIES EYED.

ALL THESE STORIES UP AND COMING IN THIS EDITION OF NEWS FROM THE WIRELESS INSTITUTE OF AUSTRALIA FOR WEEK COMMENCING MARCH 13 2011.

FREQUENCIES EYED.

Last week we told you of how Telstra had called on the ACMA to reclaim 1452 TO 1492 MHz, reserved for digital radio, advocating its return for use by point-to-point microwave services.

Now we learn that Australia's peak rail authority is battling to protect billions of dollars worth of investment in the safety of national rail networks, which is under siege as the carriers scramble for scarce Long Term Evolution spectrum resources.

Australasian Railway Association chief executive Bryan Nye said state rail authorities had invested $500 million in a unified national radio safety network dependent on the 1800MHz spectrum and that billions more had been slated for the project.

But mobile-phone industry groups have targeted the 1800MHz band to be the international standard for next-generation mobile LTE handsets and equipment, and regulators and carriers are turning up the pressure to obtain as much of that spectrum as they can.

If the railways lose the licences, it will set back more than a decade of co-operation and planning to modernise and unify Australia's rail radio network.

For instance, the Indian Pacific, which passes from Perth to Sydney, needs 8 separate radio sets on board to manage signalling systems on its journey.

It is said the ARA had requested an urgent meeting with Senator Conroy but so far there had been no response.

Peter Harding vk4od@wia.org.au is assembling qnews for March 13

Welcome to QNews from VK4WIA. I'm Geoff Emery, VK4ZPP, and I've been thinking.

One thing that identifies a community is the shared identity and commitment of its members. I like to think of the world wide hobby of amateur radio as a community. But like the motto of recent years, it is very much a case of thinking globally and acting locally.

Our local radio club, or any club, is a community, a community of interest. How that community governs itself often defines whether it grows, remains static or drops off the radar. If there is a sharing of experience and knowledge and a willingness to include all people in the club activities, then perhaps we have made a start in growing our club.

It is well recorded how the formation of self interest groups within organisations tend to undermine the homogeneity, the unity and purpose of the organisation. From organisational psychology, group dynamics, business studies and on and on the literature is overwhelming that cliques can spell the death of a group.

It may not be even an obvious self indulgence within the clique but a lack of enthusiasm, a been there done that and it didn't work dogmatism that can do the damage. The alpha male who refuses to relinquish control can be equally damaging and we all know the saying that you can't teach an old dog new tricks.

We all want to enjoy our club activities and it is for each of us to make our club a success.

I'm Geoff Emery and that's what I think....how about you?

Hellow again, I'm David vk4pdr for the Redcliffe Districts amateur radio club

Wednesday's at 730 pm local time we hold a trivia night on our 70 cm repeater 438.325 and don't forget the 91.5 kHz tone for access.

It is a fun night for those that join in and the prize for winning is that you get to be next weeks trivia master!

so all of you amateurs out there with inquiring minds and wishing to join in on a fun night for a hour or so come and join us.

This is David vk4pdr for the Redcliffe and districts amateur radio club and you have been listening to and enjoying qnews on vk4wia

Peter Harding vk4od@wia.org.au is assembling qnews for March 6 and 13

Welcome to QNews from VK4WIA. I'm Geoff Emery, VK4ZPP and I've been thinking.

Looking in the mirror reminds me that age is catching us baby boomers. It is interesting to reflect that the generation of amateurs prior to us represented the golden age of home brew which culminated in the shops full of disposals gear in the 1950's.

It was perhaps from this tradition, when amateurs still had access to 11 metres, with war time training that an attitude of "amateur purity" became indoctrinated but perhaps we can blame the semiconductor revolution for a bend in the road.

That was the availability of cheap, low power radios becoming available and the PMG Radio Branch approved a limited number of frequencies in the 27MHz band. By the time Commonwealth Games were held in Brisbane, Citizen's Band Radio was a reality.

As people sought more from their hobby interests, many people who cut their teeth on 27MHz and then 477MHz sought to expand their options by obtaining one of a variety of amateur licences. I don't know how many current amateurs cut their teeth with CB but it has certainly been the major pool of recruits over many years.

As the numbers of people using CB seems to be well down on the boom years, I wonder where the next generation of amateurs will come from? With the success of last year's WIA National Field Day, now is the time to mark the calendar with 17/4/2011. Let's get out and show the hobby to the public.

I'm Geoff Emery and that's what I think....how about you?

Redcliffe and District Radio Club
www.redclifferadioclub.org.au/

I'm Ray, VK4CF with news from Redcliffe Amateur Radio club.

A group of 14 club members arrived back into Brisbane late Sunday night and in the early hours of Monday morning after a 3 day trip to attend the Wyong HamFest

The group led by club president David, VK4DC, kept in contact all the way down via the 2 metre repeaters down the Pacific Highway. Doug, VK4MCD, along with several others made a few HF contacts whilst mobile as well. Mal, VK4UMS was also keen to try out his new vehicle on a long trip and despite one small hiccup all went well. Somehow or other, he left a pair of high voltage tuning capacitors at the venue.

There were quite a few bargains to be had but from the reports the crowds were not as great as the last few years.

By now we should all have marked on our calendars the John Moyle dates. Peter, VK4EA, is leading this year's event & is looking for further volunteers on the Friday to help setup along with operators for the midnight to dawn shift Saturday/Sundays and with the clean-up on the Sunday.
The club will be active on all HF bands and the club will be setting camp up on Friday 18th March at the Murrenbong Scout Camp at Petrie, camp site No. 6.
The club will be using monoband yagis on 10, 15 and 20 metres and dipoles on the other HF bands including 160 metres.
With the site so close to the Brisbane metropolitan area, it is ideal for visits by local amateurs either as day trippers or to stay & camp over night. Please contact Peter if you are able to assist with either the Friday setting up or the clean-up on Sunday afternoon. Peter can be contacted via the club website.
The event is a BYO everything and the club will have its BBQ on site for cooking.

And whilst speaking about cooking, the club will be setting up a sausage sizzle at Bunnings Warehouse at Rothwell on Saturday 11 June 2011. Food will be available from 0830 until the mid afternoon. We hope to see you there.

If you hear Geoff, VK4FNRS, on the air say good day. Geoff is convalescing after serious shoulder surgery and would enjoy the chat. All club members wish you a speedy recovery and hope to see you down at the club very soon.

Several of our club "F" calls have had visits from the radio inspector in the last few weeks to see what equipment they actually use. Ken, VK4FKEN said the inspector who visited his QTH, enjoyed the visit despite, being nearly licked to death by Ken's dog.

VK5

South Coast Amateur Radio Club - Subsidised Members Dinner 20 th March 2011

The South Coast Amateur Radio Club Inc. will be holding its 2011 Subsidised Members Dinner on Sunday 20th March 2011 at Fresh Choice Family Restaurant in Sturt South Australia.

It would be great to see as many members and partners as possible in attendance, to allow members to socially meet outside the Clubroom environment.
Registration can also be done through the event list function on the SCARC Website www.scarc.org.au

ACMA NEWS

Successful Field Operation

Over the last couple of months there has been a strength 9 noise coming and going around the frequencies 146.00 to 147.500 around Hobart.

For some in Mt Nelson it got unbearable and made 147.500 unusable at times.

So the ACMA were called, they were very prompt and after some considerable investigative work the offending data transmitter was located then shut down until it is repaired.

Thank you to the ACMA.

(Roger, VK7HT)

DISCUSSION POINT

HOME OF THE GOOD GUYS

Cyprus radio group welcomes visitors

If you are planning to visit Cyprus this year, the Pafos Radio Club would like to welcome you.

They meet on the 3rd Thursday of each month at the Pafos Gardens Hotel at 19.00. They also have a weekly net on Wednesdays at 19.30 using the local repeater, 5B4PRC, on 145.750MHz. More details from Don, 5B4AGQ.

SILENT KEY

INTERNATIONAL NEWS With thanks to RSGB, Southgate AR Club, the ARRL, Amateur Radio Newsline, NZART and the WW sources of the WIA.

Copper thefts on the rise

It seems that radio amateurs may find themselves targets for so-called copper thefts.

In the last two years the price of copper has risen by 300% with other metals also experiencing higher prices. We've heard from an amateur in Yorkshire who's been a victim of one of these copper thefts when all his cabling was stolen overnight. That included the coax and ladder line used for a G5RV antenna. Other amateurs are being encouraged to make sure access to cables is restricted and that their installations are as secure as possible.

(rsgb)

LASER POINTER HITS COCKPIT OF PHOENIX NEWS HELICOPTER

A Phoenix news helicopter was the victim of an attack from the ground.

This as someone shot a bright laser beam into its cockpit that was also caught by the choppers on-board camera.

According to The Arizona Republic, authorities are currently investigating the incident and have yet to identify the perpetrator. The newspaper goes on to note that local police actually searched door-to-door in the area where the beam originated but so far have come up empty handed.

A spokesman with the Federal Aviation Administration commenting on the incident said that the message here is very simple. If you want to engage in this kind of dangerous and irresponsible behavior, you can be caught and arrested.

If caught, and Prosecuted the perpetrator of this stunt could face up to 20 years in prison.

(ARNEWSLIME)

NEW STUDY FINDS CELLPHONES AFFECT BRAIN WAVES

A newly completed study indicates that electromagnetic radiation from the antenna of mobile telephones may be altering the way we think and behave.

This according to an article published in the Journal of the American Medical Association.

According to news reports, researchers peered inside the brains of 47 healthy subjects using Positron Emission Tomography to measure the location and timing of brain activity by detecting signs that cells were consuming energy. They found that despite official skepticism including statements issued by the Food and Drug Administration that ' electromagnetic energy exerts any influence on nearby cells.

The prelim study, led by a respected neuroscientist at the National Institutes of Health provides what other researchers are calling solid evidence that

mobile telephone use has measurable effects on brain activity. It also suggests that the peoples attachment to its millions of wireless phones may be altering the way we think and behave in subtle ways.

WEIRD AND WONDERFUL

You're A Ham IF.

10 ways to spot a Radio Amateur

>From the web site of the West Tennassee Amateur Radio Society
www.qsl.net/wtarc/youreaham.htm

You might be (and probably are) an Amateur Radio operator, if:

1. You strip wire with your teeth.
2. You have grabbed the wrong end of a hot soldering iron.
3. You have given out RST reports while you were on the telephone.
4. You told the XYL, when she noticed a new rig in the shack,
"Why, that has been there for years."
5. You have set your watch to UTC only.
6. You have tapped out "CQ" or "HI" on the car horn in Morse Code.
7. You know the Latitude, Longitude, and Elevation of your home QTH.
8. You have answered the telephone with your call sign.
9. You look for antennas, radios, and Morse Code in movies and tv shows.
10. You refer to your Ham friends by their call sign, NOT their real names.

The West Tennessee ARS ask - "Does anyone know who is the original author of these lines? If so, please e-mail kb4rpv@arrl.net so credit can be given for the correct author.

DIGIMODE ACTIVITY IN THE 40 m CW SEGMENT

At WRC03, the ITU allocated frequency segment 7 100 - 7 200 kHz to the Amateur Service in Region 1.

This extension of the 40 m band allowed IARU Region 1 to modify the Region 1 band plan. These changes became effective on 29 March 2009.

Some of these changes include extension of the exclusive CW segment by 5 kHz, and is now 7 000 - 7 040 kHz; the segment for Narrow Band Modes (Digimodes) with a maximum bandwidth of 500 Hz was extended by 5 kHz (doubled) and moved to 7 040 - 7 050 kHz and the segment for All Modes (Digimodes) with a maximum bandwidth of 2 700 Hz was extended by 7 kHz and moved to 7 050 - 7 060 kHz.

Although the separation of the segments is by frequencies that are easy to remember (7 040, 7 050, 7 060 kHz), there is still a lot of PSK31 activity around 7 037 kHz. region 1 Radio amateurs are requested to adhere to the guidelines as stipulated.

JILA ANNOUNCES A BEW SOURCE OF TERAHERTZ RADIATION

JILA researchers have developed a laser-based source of terahertz radiation that is unusually efficient and less prone to damage than similar systems. The technology might be useful in applications such as detecting trace gases or imaging weapons in security screening.

JILA is a joint institute of the National Institute of Standards and Technology and the University of Colorado at Boulder. Its technology is a new twist on a common terahertz wave source. That being a semiconductor surface patterned with metal electrodes and excited by ultra fast laser pulses.

An electric field is applied across the semiconductor while near-infrared pulses lasting about 70 quadrillionths of a second, produced 89 million times per second, dislodge electrons from the semiconductor. The electrons accelerate in the electric field and emit the terahertz waves.

Terahertz radiation which fall between the radio and optical bands of the electromagnetic spectrum have the ability to penetrate materials such as clothing and plastic but can be used to detect many substances that have unique absorption characteristics at these wavelengths. Terahertz systems are challenging to build because they require a blend of electronic and optical technologies that are integrated to work together flawlessly. The complete story of this advancement in this technology is on line at
tinyurl.com/terahertz

(ARNEWSLINE)

OVER OVER - OVER

A technology that allows wireless signals to be sent and received simultaneously on a single channel has been developed by Stanford researchers.

Their research could help build faster, more efficient communication networks, at least doubling the speed of existing networks.

These first wireless radios can send and receive signals at the same time, this immediately makes them twice as fast as existing technology, and with further tweaking will likely lead to even faster and more efficient networks in the future.

Researchers are working that if a radio receiver could filter out the signal from its own transmitter, weak incoming signals could be heard.

Their setup takes advantage of the fact that each radio knows exactly what it's transmitting, and hence what its receiver should filter out. The process is similar to noise-cancelling headphones.

VK Club Bulletins http://groups.yahoo.com/group/aarnie/

RadCom Channel 4 TV article

The UK's Channel 4 drama about Amateur Radio called 'C.Q.' was first shown in 1984 and repeated 1986.

It starred Michael Elphick as 'Norman' a radio amateur G4ESB who contacts a Round The World Yachtsman called Alec G4FLP/MM on 20mtrs.

The RadCom article says that Peter Marcham, G3YXZ was technical advisor to the makers of the drama and ensured technical accuracy.

Suprisingly the article comments that in striving to be authentic, the drama isn't as funny as a show produced by a comedian (Tony Hancock) who was popular in the late 1950's and early 60's. Perhaps the author wasn't aware of the distinction between a drama and a comedy.

The article appeared in the September 1984 edition of RadCom.

The Channel 4 programme is the only time Amateur Radio has been represented with any degree of accuracy on UK TV in the last half century.

An AVI file of a Betamax home recording made at the time still exists and is at http://tinyurl.com/CQvideo1984

YL International 2012 Adelaide

The organization of the YL International 2012 Meet in Adelaide is almost complete. The meet dates are set with delegates arriving on or before 3 May 2012 staying at various venues in Glenelg.

The next few days will see them touring Adelaide, Hahndorf, Cleland National Park, Port Adelaide including a Dolphin cruise and a progressive lunch at 3 Barossa Valley wineries.

Those that are doing the optional Ghan tour will join it for either a 7 or 9 day adventure.
The 7 day option allows you to leave the tour in Alice Springs after being out to Uluru and the 9 day tour finishes in Darwin. A web site has been created a website which is

www.ylinternational2012.com

The Meet is open to YLs and their OMs. You don't have to be a member of any organization or even licensed but should be interested in amateur radio.

Most participants are active on air but that is not a requirement for attendance. If you are interested in attending please complete the online expression of interest form, registration form or contact VK5TMC.

The list of potential participants is growing and at the moment there are 60 who have expressed interest.
Registration and deposits are due by September 2011.

Yuri's Night - World Party for Space

ARISSat-1, still inside the ISS, will be activated using an external antenna on 145.950MHz FM for this year's Yuri's Night, April 12.

Yuri's Night, the World Party for Space, was first held in 2001 and has grown steady in popularity since. It celebrates the first human space flight in 1961 and Radio Amateurs around the world are actively involved with some holding parties in their home and on the wireless.

AMSAT-NA will be issuing special certificates to those stations reporting reception of the 145.950 MHz ARISSat-1 signals on this special night.

New Pakistan Satellite ICube-1

Students at the Institute of Space Technology (IST) are building Pakistan's first CubeSat ICube-1. They are currently looking for a launch in the 3rd quarter of 2011.

The ICube website gives these specifications:
Beacon 436.8475MHz, CW, 100mW
Downlink 437.490MHz, FSK, AX.25, 1200bps, 600mW
Uplink 145.835MHz, FSK, AX.25, 1200bps

DO NOT TRACK ME ON THE INTERNET LAW INTRODUCED INTO CONGRESS

An Internet version of the popular "Do Not Call" telephone legislation took a step toward reality when a House of Representative legislator introduced a measure in Congress designed to let consumers block unwanted tracking of their information online.

"Do Not Track Me Online" bill authorizes the Federal Trade Commission to enact and enforce regulations that give consumers the right to bar organizations from tracking their activities as they use the Internet.

Consumer Watchdog, a non-profit and non-partisan advocacy group, has already applauded the proposed law.

WW SPECIAL INTEREST GROUPS --- LOW DOWN

AMATEUR MF ALLOCATION MOVES A STEP CLOSER

Amateur Radio has moved a step closer to a medium frequency (MF)
allocation below the AM broadcast band. During the first week of the
Conference Preparatory Meeting (CPM) for the 2012 World
Radiocommunication Conference (WRC-12) of the International
Telecommunication Union, held in Geneva February 14-25, delegates
completed the drafting of nine pages of analysis of the technical and
regulatory issues related to WRC-12 Agenda Item 1.23: consideration of
a possible secondary allocation to the Amateur Service of about 15 kHz
somewhere between 415 and 526.5 kHz.

Two possible methods of satisfying the agenda item, along with the
possibility of there being no change (and therefore no allocation),
are set out in the CPM Report, along with the advantages and disadvantages
of each.

SARL NEWS - SUNDAY 013 MARCH 2011

You are listening to ZS6SRL, the official radio station of the South African Radio League, the national body for amateur radio in South Africa, with a news bulletin every Sunday at 08:15 CAT in Afrikaans and at 08:30 CAT in English. To listen to a web stream, visit www.sarl.org.za, click on 'ARMI' and follow the links for details. PLEASE NOTE: for audio via Echolink, connect to ZS0JPL-R.

You can download this bulletin and previous ones from www.sarl.org.za and also subscribe to receive future bulletins by e-mail. Your newsreader this morning is (name), (call sign), on 145,725 and 7,066 MHz from Pretoria, with relays on 7,066 and 3,695 MHz SSB.

In the news today

LAST CHANCE TO BOOK FOR THE PROGRAMMING IN WINDOWS COURSE

RESPECTED JOURNAL PUBLISHES EXPLANATION FOR LOW SUNSPOTS

BOOK NOW FOR THE SA AMSAT SPACE SYMPOSIUM

AMATEUR RADIO LICENSE FEES TO REMAIN AT R27 FOR NOW

You are listening to ZS6SRL. Stay tuned for more details on these and other important and interesting news items.

LAST CHANCE TO BOOK FOR THE PROGRAMMING IN WINDOWS COURSE

Reserve your place now for the programming in Windows course to be held in Cape Town on Saturday 19 March 2011. Learn how to produce your own applications in Windows, and design your own shack control program with stand-alone applications. Create your very own EXE files.

The course fee is R350 for SARL members and R500 for non-members. A USB interface that will switch relays and read push buttons and voltages is available for an additional charge of R120 and can now be ordered at the time of registration and will be available for delivery at the course. This course will only be presented in Cape Town once this year. Don't miss this opportunity!

Bookings for the course close on Wednesday afternoon. Get the registration form on www.sarl.org.za, click on RTA.

RESPECTED JOURNAL PUBLISHES EXPLANATION FOR LOW SUNSPOTS

An article in the March 3 issue of the journal Nature purports to explain the extended sunspot minimum from 2008-2010. According to one

of the authors, Piet Martens, the last time a sunspot minimum lasted twice as long as usual was around 1913 and before that, 1810. Although solar activity has increased recently, scientists have been puzzled by the recent lack of sunspots. This quiet period had prevented the ionosphere from supporting much of the long-range higher frequency HF Amateur Radio communication that had been expected during the past few years.

After simulating 210 previous sunspot cycles, Martens, along with Dibyendu Nandi and Andres Munoz-Jaramillo, discovered that extended solar minima have coincided with unusually weak magnetic fields at the Sun's poles. The three scientists were associated with Montana State University while they conducted their research.

NASA-sponsored research has resulted in the first computer model that explains the recent period of decreased solar activity during the sun's 11-year cycle.

This recent solar minimum, a period characterised by a lower frequency of sunspots and solar storms, was the deepest observed in almost 100 years. The solar minimum has repercussions on the safety of space travel and the amount of orbital debris our planet accumulates.

Solar scientists around the world were puzzled by the extended disappearance of sunspots in 2008-2009. Results published in Nature indicate the mystery may be solved.

During this deep solar minimum, the sun's magnetic field weakened, allowing cosmic rays to penetrate the solar system in record numbers, making space a more dangerous place to travel. At the same time, the decrease in ultraviolet radiation caused Earth's upper atmosphere to cool and collapse.

As a consequence space debris stopped decaying and started accumulating in Earth orbit due to decreased atmospheric drag. These effects demonstrate the importance of understanding the entire solar cycle, during both minimum and maximum.

Observations from NASA's Solar Dynamics Observatory (SDO) will eventually provide measurements that could validate the current model and provide the basis for future solar cycle prediction.

For more information about the research, visit http://www.nasa.gov/sunearth.

BOOK NOW FOR THE SA AMSAT SPACE SYMPOSIUM

Book now for the SA AMSAT Space Symposium which will be held at Vodaworld on 2 April 2011. Amongst the speakers are Dr Sandile Malinga the CEO of SANSA, and the two SA AMSAT CubeSat project leaders John Willescroft and Hannes Coetzee, as well as Dr. L. J. du Toit of EMSS Antennas, the company responsible for the development, production, commissioning and factory support of the KAT-7 receivers. For details

and to book visit www.amsatsa.org.za . Make use of the early bird discount. Special rates are offered for SARL and SA AMSAT Members.

AMATEUR RADIO LICENSE FEES TO REMAIN AT R27 FOR NOW

The Amateur Radio License fees will remain at R27 for this year and are only to increase from next year. ICASA will post license renewal accounts for the period 1 April 2011 to 31 March 2012 in the near future. If you have not yet paid your licence for the three month period January to March 2011, please do so now. The charge is R6,75. If you did not receive an account in the post, use the information printed on last year's license.

CONTEST NEWS

The SARL VHF/UHF analogue and digital contest encourages activity on the VHF/UHF and microwave bands so that operators can work greater distances than usual and allows the activation of new grid squares; also to have a weekend of amateur radio fun.

The contest is open to all licensed radio amateurs in South Africa and neighbouring states. The contest starts at 10:00 UTC on Saturday 19 March and ends at 10:00 UTC on Sunday 20 March with phone - FM and SSB, CW and the digital modes on 6, 4 and 2 metres, 70 and 23 cm and higher. There are five categories of participation including field stations and rover stations. Go to page 33 of the 2011 SARL Contest Manual for the complete set of rules.

ONLY TWO DXCCs AMONGST THE SARL PRESIDENTS

Tjerk, ZS6P, the SARL Awards Manager informed SARL News that only two SARL Presidents have obtained the DXCC award while in office. The first was Henry Flanter, ZS1FD, who was president from 1954 to 1956 and the second is Dennis Green, ZS4BS, who has just been awarded the DXCC via Logbook of the World.

PROPAGATION REPORT

Hannes Coetzee, ZS6BZP reports that the solar activity is at moderate to active levels. Just as active Sunspots 1164 and 1165 have rotated onto the western limb and out of direct earth view, The second largest Solar Flare of Cycle 24 thus far has taken place around huge Sunspot 1166. The X1.5 event event peaked on Wednesday evening and caused Radio Blackouts on the sunlit side of earth. Currently Sunspot 1169 and 1166 remain the largest regions. The effective sunspot number is expected to be around 80 for the coming week.

15 m will provide the best opportunities for DX followed by 20 and 10 m. With the higher sunspot activity 10 m will open first followed by 15 and 20 m. Conditions to India will be good from the afternoon till after sunset. During the late afternoons conditions will be good towards Europa. Good contacts with the USA are possible during the evening. Contacts with Australia are possible on 20 m after sunset.

Openings to Brazil and South America are possible during the afternoons. With the good 15 and 20 m openings 17 m will also be full of surprises.

For the CW and digital enthusiasts 30 m may be very rewarding with openings to many parts of the world.

Locally is 40 m the work horse for contacts around the country with 20 and 30-m also being very useful for contacts over the longer distances. 80 m will be best during the early mornings and late afternoons as well as over the shorter distances.

80 m is the frequency of choice during the evenings.

Please visit www.spaceweather.co.za for further information.

DIARY OF EVENTS 16 March- -Last day to register for Programming in Windows course in Cape Town. 19 March - RTA, Programming in Windows course in Cape Town, book at www.sarl.org.za. 19/20 March - SARL VHF/UHF analogue and digital contest. 25 March - SAiSAT briefing session at the NARC. 2 April - SA AMSAT Space Symposium at Vodaworld, book at www.amsatsa.org.za. 15-16 April - SARL National Convention at Vaal University for Technology.

SARL News invites clubs and individuals to submit news items of interest to radio amateurs and shortwave listeners. Submit news items - if possible - in both English and Afrikaans to www.sarl.org.za/newsinbox.asp, not later than the Thursday preceding the bulletin date.

The SARL also invites you to listen to Amateur Radio Today every Sunday morning at 10:00 CAT on 145,750 MHz in the Pretoria area, with relays on 7 082, 7 205 and 17 560 kHz. There is also a podcast by ZS6RO. For a web-stream and Echolink by ZS6FCS, visit www.sarl.org.za, click on 'ARMI' and follow the links. A repeat transmission can be heard on Mondays at 22:05 CAT on 3 215 kHz. Sentech sponsors the ARMI transmissions on the non-amateur frequencies.

You have listened to a bulletin of the South African Radio League, compiled by George, ZS6NE.

Thank you for listening, 73.

Irish Radio Transmitters Society
Radio News Bulletin
Sunday 13th March 2011

IRTS AGM Annual Dinner and Rally 2011

You are warmly welcomed to attend the IRTS AGM weekend, including Annual Dinner and Rally will be held this year on Saturday March 26th and Sunday March 27th. The event will be hosted by the Limerick Radio Club. The venue is the Radisson Blu Hotel, Ennis Road, Limerick.

For more information contact, Ger McNamara EI4GXB on

087 2532512 or ei4gxb/ at /gmail/ dot/ com. A new website for the Rally in Limerick on 27 March 2011 is now available, please go to http://limerickradiorally.com for more details.

The AGM dinner tickets priced at 35 are now available from Tony Condon EI2AW at QTHR or by email to condona /at / eircom/ dot/ net.

IRTS Stand at Friedrichshafen Rally

IRTS members attending the Friedrichshafen rally this year and who are willing to be in attendance at the IRTS stand for some of the time whilst there are requested to contact Sean Nolan, EI7CD on email ei7cd / at / gofree / dot/ indigo / dot / ie .

IRTS AGM Dinner Tickets.

Tickets will be available at the next Committee meeting on 12 March from Ger McNamara EI4GXB. Please make contact with your club or regional representative who may be attending the meeting to collect tickets on your behalf. Payment can be made by cheque payable to Limerick Radio Club or by cash.

South Dublin Radio Club

South Dublin Radio Club Annual General Meeting (AGM) will take place in Terenure College on Tuesday 29th March at 8pm sharp.

All members are welcome and asked to attend. Also, at the South Dublin Radio Club, amateur radio theory classes will be held on a weekly basis

and morse classes will be held in the near future.

North Cork Radio Group

North Cork Radio Group will be active EI1NC/P from the old governors house at Cork City Gaol and Radio Museum on the weekend of the 19 and 20th of March, The intention of the activation is to gain publicity and awareness for the Museum as an attraction for radio enthusiast both in Cork city and for visitors to the county in general. The Gaol houses the restored 6CK radio Broadcast studio in addition to an audio visual dedicated to Marconi and his Irish connections along with a wide collection of nostalgic artefacts from the golden age of Irish radio.

Foyle and District ARC

Foyle and District ARC have been allocated the callsign GB5SPD to celebrate St.Patrick's Day, 2011. This has been an annual event for several years and is the most popular activity in the club's calendar. The station will be active from Wednesday March 16th until Friday 18th. A special qsl card will be issued to each station worked.

Special Event Station GB2SPD

Special Event Station GB2SPD will be operating from the QTH of (Martin 2I0WAI) from the 17th of March to celebrate St. Patrick,s Day.

The station will operate all bands open to us on the day, and hope to have a psk31 station also on air.

QSL info and all details are as listed on qrz .com

Loc:IO64SU

WAI/WAB C90

Special Event for St Patrick' Day

As part of Omagh District Council's annual St Patrick's Day celebrations, West Tyrone Amateur Radio Club, will be on air from Omagh Arts Centre from 12 noon until 5pm on Thursday 17th March 2011 with the callsign GB1SPD, as well as being active on all bands the club will be demonstrating Amateur to the general public.

The Shannon Basin Radio Club

The Shannon Basin Radio Club will be holding a meeting in Hannons Hotel, Roscommon on Wednesday night the 23rd of March at 20:30.

All members are requested to attend and anybody wishing to join the club is more than welcome to attend. Should anybody require more info, they can contact Brian, EI8IU on 0862514822.

DXCC List

ARRL have now updated their DXCC listings to take account of the reorganisation of the Netherlands Antilles. This reorganisation gave rise to 2 existing DXCC entities being deleted and 4 new entities being created, the new entities being Curacao (PJ2), Bonaire (PJ4), Saba / St. Eustatius (PJ5/PJ6) and Sint Maarten (PJ7). Not surprisingly, there has been plenty of DX activity from these new entities, and of course plenty of interest in the new entities.

The updating of the DXCC listings results in some changes in the DXCC Honor Roll membership; confirmation that 331 current entities have been worked is now required for the Honor Roll. Have a look at www.irts.ie/dxcc to see the latest placings by EI stations.

Amateur Radio for All at the Erne Rally

Lough Erne Amateur Radio Club is delighted that the Radio Amateur Invalid and Blind Club will have a stand at the Pearl Anniversary Rally on Sunday 17 April.

RAIBC is the charity working for radio amateurs with disabilities. The rally venue, SHARE is another registered charity that provides activities for disabled and able bodied to enjoy together. Lough Erne Amateur Radio Club is based at SHARE and runs courses there for Foundation and Intermediate licenses.

Course members include some with a disability or who are Carers, and all value amateur radio as an excellent hobby. Take one example. Tommy from February's Intermediate course requested the call 2i0RVH from Ofcom. His chosen suffix RVH means the Royal Victoria Hospital where he had a life-saving operation a few years ago. Amateur radio enthusiasm and achievement is helping Tommy build a new life.

RAIBC were invited to the Erne rally to help spread the word that amateur radio is for all and can be an ideal interest and activity for many with a disability, or their carers. There will be information about RAIBC services and membership, and about amateur radio opportunities at SHARE with Lough Erne Amateur Radio Club.

Other amateur radio groups with word to spread about their interests and activities are also very welcome to take a stand at the Lough Erne Pearl Anniversary Rally. It is only five weeks away, so please contact the Club as soon as possible.

Michael Clarke, Mi5MTC Chairman Lough Erne ARC Mi5mtc / /at/ / learc / dot/ eu

---

DX News

Maurizio, IW1GGN will be active holiday-style from Martinique (NA-107) between 12 to 18 March, 2011. Activity mainly 20m. Callsign requested is TO1N - if not available then FM/IW1GGN.

A0SC, UA0SE, UA0SW and RZ0SR will be working from Senegal between 17 to 28 March.

During RDXC and WPX contests they will be active as 6V7D. Before and after they will use 6W/home calls. They will be working on all HF bands and all modes. QSL for 6V7D via UA0SE. 6W/ via home calls.

Joe, DK5WL (9N7WL); Ernst, DK7AN/(9N7AN); Georg DL4SVA and Franz DL9GFB plan to be active from Nepal in a period stretching from mid-March to early-April 2011.

Beginning March 16th, Ernst 9N7AN will commence solo activity from Kathmandu, with the main part of the DXpedition starting on March 26th once the rest of the team arrive in Nepal. They will operate all bands/modes therefater until April 8, 2011.

Hugo PA2HW, Robert PA2RDK, Frank PA3CNO, Paul PA3DFR and Gert PE0MGB will be active from the Swedish/Norwegian peace monument "Morokulien" as LG5LG and SJ9WL from April 10-16.

Activity will be on 160-6m in CW, SSB and digital modes. The callsign will change every day at 00:00 UTC. An award will be available for 2 contacts with each call on different bands and different days. QSL via buro.

TE8X will be active from Venado Island (IOTA NA-116) starting 10 March 2011.Activity will be on HF Bands. QSL via TI5AA.

Kells Radio Club

Ronnie, EI9ED, writes and tell us that the Kells Radio Club would like to announce the switching on of EI2LLX crossband facility. For the moment this Cross band connects to SEARG repeater networks and can be activated by DTMF *470 with a T.O.T. of 15 minutes. This crossband repeater can be activated from SEARG repeater network and also GI stations can activate the southern repeater system via the Cavan repeater EI2LLX using the same codes. To disconnect the repeater use DTMF #6

During this week stations were heard from Northern Ireland to Cork, from VK via IRLP through Waterford, Cavan to Northern Ireland.

Further updates will be forthcoming.

Practical Wireless - FUNcube Dongle Article

The April edition of Practical Wireless magazine has a special treat for all satellite enthusiasts and VHF/UHF listeners - a two page article on the AMSAT-UK FUNcube Dongle radio. The FUNcube Dongle (FCD) Software Defined Radio (SDR) was developed as part of the AMSAT-UK FUNcube satellite project.

Items for inclusion in next week's Radio News can be submitted via e-mail to "newsteam /at/ irts / dot / ie" for automatic forwarding to both the radio and printed news services. Urgent news items for the radio news maybe telephoned to the radio news editor, Aidan, EI7JC on 085 7100511.

Please note that items for the radio news should reach the editor no later than midday on Thursday in order to be guaranteed inclusion in the following Sunday's bulletin.

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, NJ1Q, KL2A, NG3K & ADXO, WP3GW, N4AA & QRZ DX, KH6BZF, W7GJ, K8GI, K8YSE, KG8P, W8GEX (60m News), W9NGA, 2E1EUB, AT International, DF1DV, DL1SBF, DL7MAE & The DX News Letter, DxCoffee.com, DX-World.Net, F6AJA & Les Nouvelles DX, F8DVD, GM3WOJ/ZL1CT, HP1AC, I1JQJ/IK1ADH & 425 DX News, JA1MFR, JG1EIQ, OZ6OM & 50 MHz DX News, PA3CNO, Pete's-DX-Newsdesk, OE1WHC, RSGB IOTA Web Site, RZ0SR, TA1HZ, VA3RJ & ICPO, VE1QD, VE3ZZ, VE7DP and VHF-DX-Portal (MMMonVHF) for the following DX information.

*** SPECIAL NOTE: Due to the Japanese earthquake/tsunami disaster, it is recommended/suggested to please stay clear of the following emergency frequencies:
Operators JARL and Volunteers • 3520-3530, 7025-7035, 14090-14110, 21190- 21200, 28190-28210, 50100, 51000, 14100, 14500, 430100 and 433000 kHz.
DXpedition Operators • Please kindly consider QSX freq & RTTY freq.
It is also suggested to stay away from the IARU Region 3 Emergency Centre of Activity frequencies: 3600, 7110, 14300, 18160 and 21360 kHz.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 6th-March, through Sunday, 13th-March there were 234 countries active. Countries available: 3A, 3B8, 3D2, 3DA, 3V, 3W, 3X, 4J, 4L, 4O, 4S, 4X, 5B, 5H, 5N, 5R, 5T, 5U, 5V, 5X, 5Z, 6W, 6Y, 7P, 7Q, 7X, 8P, 8R, 9A, 9G, 9H, 9J, 9K, 9M2, 9M6, 9N, 9Q, 9V, 9X, 9Y, A4, A6, A7, A9, AP, BV, BY, C3, C5, C6, C9, CE, CE0Y, CE9, CM, CN, CP, CT, CT3, CU, CX, CY0, D2, D4, D6, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, F, FG, FJ, FK, FM, FO, FP, FR, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HB0, HC, HC8, HH, HI, HK, HL, HP, HR, HS, HZ, I, IS, J2, J3, J5, J6, J7, J8, JA, JT, JW, JX, JY, K, KG4, KH0, KH2, KH6, KH9, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ4, PJ5, PJ7, PY, PZ, R1FJ, S2, S5, S7, S9, SM, SP, ST, SU, SV, SV/a, SV5, SV9, T30, T7, T8, TA, TF, TG, TI, TJ, TK, TL, TR, TT,

TU, TY, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V8, VE, VK, VK0M, VP2E, VP2M, VP2V, VP5, VP8, VP8/h, VP9, VR, VU, XE, XF4, XT, XU, XW, YA, YB, YI, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD9, ZF, ZL, ZP, ZS, ZS8

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

2M, SCOTLAND (Satellite Op). Paul, 2E1EUB, will once again be active as 2M1EUB from March 20th for 7 days (depending on the WX). He states that he will be operating from the van; so could be interesting because he has spent all winter setting it up and he hopes to be able to be on the mountains of Scotland rather than below them. Paul says the fun starts from IO87rj in Eastern Scotland and around that area. Watch QRZ.com for updates. Paul also has plans later this year to activate the western islands of Scotland, including Sky, Harris and Lewis...some other rare islands for Satellite operators! Dates will follow later in the year. Remember to check out QRZ.com under 2M1EUB for more info.

4A, REVILLAGIGEDO (Update). The 4A4A team conitnues to be active from Socorro Island (NA-030) until March 20th. They will have 3 stations running simultaneously on CW, SSB and RTTY. As this was being typed, the 4A4A QSO count as of 0413z, March 13th, is 50064 with 14366 unique callsigns (24738/CW, 19864/SSB and 5462/RTTY). QSL via EB7DX direct. All QSOs will be confirmed via LoTW automatically. The DXpedition's Web site is: http://www.revillagigedo2011.com
Online log available at: http://www.revillagigedo2011.com/en/log.html

4A, MEXICO (Special Event). Members of the DXXE (Mexican Contest and DX group) will activate the special callsign 4A0IARU between April 18-24th. Activity is to celebrate World Amateur Radio Day on April 18th, and the 86th anniversary of the founding of the International Amateur Radio Union, IARU. The theme for this year's celebration is "Amateur Radio: The first technology-based social network." QSL via N7RO. Don't send your QSL cards to the Mexican Bureau since they will not have QSLs to answer. Make sure your Bureau QSL card is clearly marked via N7RO. QSOs with this station are good for the DXXE Award. For more information, visit the DXXE Web page at: http://www.dxxe.org

5V, TOGO. A German group will be active as 5V7CC, from a location outside the capital city of Lome between the sea and Lac Togo, starting in the middle of April through the 28th. Operators mentioned are Werner/DL9MBI, Christian/DL3MBG, Armin/DL5MGH and Rudi/DL5MEV. Activity will be on 160-10 meters using CW, SSB and RTTY. QSL via DL9MBI (Bureau preferred). See QRZ.com for details on direct. Logs will be uploaded to Clublog at: http://www.clublog.org

6V/6W, SENEGAL. Operators Serge/UA0SC, Sergey/UA0SE, Alex/UA0SW and Igor/RZ0SR will be active as 6W/homecall from Senegal between March 17-28th. QSL via the operator's home callsign. However, during the Russia DX Contest (RDXC - March 19-20th) and the CQ WPX SSB Contest (March

26-27th) they will be active as 6V7D. QSL 6V7D via UA0SE. Activity outside the contest will be on all HF bands and all modes.

8P, BARBADOS. Yuri, VE3DZ, will once again be active as 8P9AA between March 9-29th. Activity will be on all HF bands using CW, SSB and RTTY. He is expected to be in the CQWW WPX SSB Contest (March 26-27th) as 8P3A. QSL both callsigns via his home callsign.

8P, BARBADOS. Carsten, DF1XC, will be active as 8P9XC from Saint Philip, Barbados (NA-021), between July 23rd and August 15th. Activity will be holiday style on the HF bands. QSL via his home callsign, direct or by the Bureau. Log will be available at: http://www.clublog.org/logsearch/8p9xc

8TH MARITIME DX FORUM (MDF). The Halifax Amateur Radio Club (HARC) is pleased to invite all DXers, contesters and HF enthusiasts to attend the 2011 MDF. It will start on Friday, August 5th, at 4:00 pm, when the Maritime Contest Club (MCC) will sponsor a social gathering. This will be followed by a Pizza Dinner at 5:30 pm, an opportunity to pickup registration materials and socializing at a reception. The MDF program on Saturday, August 6th, will run from 8:30 am - 4:45 pm and will be followed at 5:00 pm by a reception and the MDF banquet.
The speakers - active and outstanding members of our ham radio community - include:
* John Devoldere, ON4UN, Low Band DXing for the 21st Century
* Scott Johns, W3TX, Practical Options for Operating a Remote Station
* Reg Beck, VE7IG, Islands On the Air: RSGB's Top Contest and Awards Program
* George Nicholson, N4GRN/VE1GRN, & Wes Lamboley, W3WL, The Antarctic Island: Still a Major Challenge for Amateur Radio
* Wes Lamboley, W3WL, Why do we do it? (Banquet Speaker)

The MDF will be held in the Rosaria Centre of Mount St. Vincent University in Halifax, Nova Scotia. Inexpensive accommodations are available at the university. This is a great opportunity to combine a top-notch ham radio event with a tourist visit to Canada's Maritime Provinces. Details about the program, sponsors, prizes, costs and accommodations as well as registration instructions can be found on the HARC Web site <www.harc-arc.org/mdf>. They may also be requested directly from the MDF Chairman, K. Scott Wood, VE1QD, who also will gladly answer any questions. He can be contacted at: ve1qd@rac.ca or at (902) 823-2761.

9N, NEPAL. A German team of operators will activate the callsigns 9N7AN and 9N7WL from the High View Resort (1570m ASL) in Dhulikhel, which is located about 25 km from Kathmandu, the capital city of Nepal, and 127 km west of the Mount Everest between March 26th and April 8th. Activity will be on all HF bands, 160-10 meters and 2 meters as well. Modes to be used are CW, SSB, RTTY, PSK31 and JT65b on 2m. The 9N7AN team consists of Heinz-Josef/DK5WL, Ernst/DK7AN, Georg/DL4SVA and Franz/DL9GFB. Ernst, DK7AN, will arrive early in Nepal on March 16th to prepare the 9N7AN activity and possibly be active from time to time on 40/30/20/17m. They also plan to activate Nepal for the first time on 144 MHz in JT65b by Earth-Moon-Earth (EME) communication using the callsign 9N7WL. The 2m

EME operation will be on March 30th. QSL 9N7AN via DL4SVA and 9N7WL via DK5WL. An OQRS is available via their Web page. For more details and updates, go to: http://www.160m.de/9N7AN/index.html

A2, BOTSWANA. Filip, ON4AEO, will be active as A25FC from Botswana between April 14-18th. Activity will be on 160-10 meters using CW, SSB, RTTY and PSK. QSL via ON4CJK. Visit his Web page at: http://www.filipstattooshop.be/botswana

A5, BHUTAN. Operators Zorro/JH1AJT and Jay/JA1TRC will be active as A51A and A51J, respectively, from Bhutan between March 23-38th. Activity will be limited to their free time from work on the HF bands. QSL via JH1AJT.

CY0, SABLE ISLAND (Update). Operators Randy/N0TG, Jeff/N1NSB and Wayne/K8LEE continue to be active as homecall/CY0 from Sable Island (NA-063) until Tuesday, March 15th. According to their Web page: "The Team has been operating all bands but have experienced the same propagation problems due to solar flares that all of us, not on Sable Island, have witnessed this week. Two of the members have severe colds which has restricted their ability to operate SSB. Never the less, the three-operator team is approaching 20,000 Qs." QSL all callsigns via N0TG, direct or by the Bureau. They will have an "Online QSL Request Service" (OQRS) on their Web site for both direct and Bureau QSLs (see "How to QSL") at: http://www.CY0dxpedition.com
ADDED NOTE: Alan, VE1AWW, is scheduled to return to Sable Island as VE1AWW/CY0 between April and June. He is an assigned worker on Sable Island.

DAYTON HAMVENTION NEWS (DX Dinner Banquet). Members of the SouthWest Ohio DX Association (SWODXA) are pleased to announce that Dan Henderson, N1ND, of the ARRL will be the speaker at this year's DX Dinner which is held in conjunction with the 2011 Dayton Hamvention. The dinner will be at the Dayton Marriott on Friday, May 20th. Cash bar starts at 5:30 with dinner served at 7:15 pm.
CQ Hall of Fame awards will be presented at the dinner by Gail SHEEHAN, K2RED, Managing Editor, and Chip Margelli, K7JA, Director of Advertising and Marketing.
As in the past, there will be many excellent door prizes. They will include an IC7000 donated by Icom, and an Alpha 8410 amplifier donated by RF Concepts.
Dinner tickets are available through their web site at <www.SWODXA.org>. Print and complete the form, and submit it with your payment to Kirk Swallow, W8QID with a SASE.
Don't forget their new location; they will be at the Dayton Marriott, 1414 S. Patterson Blvd., Dayton, OH 45409. There is plenty of free onsite parking at ground level. Should you need accommodations, their phone number is 937 223-1000 or the website is:
http://www.marriott.com/hotels/travel/dayoh-dayton-marriott
Yaesu has donated a FT-2000 that will be raffled off at the DX Forum, which is held on Saturday afternoon. Proceeds from the raffle are used to sponsor DXpeditions. Presentation speakers will be announced at a

later date.
This is their 26th annual dinner, and they are eager to renew old
acquaintances and meet new ones.

DL0, GERMANY (Special Event). The special event callsign DL0YLWM will be
active between June 1st and July 31st. Activity is to celebrate the "Woman's
World Cup 2011" in Germany. There is also a short term award recognizing
this event. Further information can be found at:
http://www.darc.de/referate/yl/yl-fussball-wm-2011/yl-wm-diplom-2011/english
/

DX2, PHILIPPINES (Attention Prefix Hunters!). Frank, VE7DP, is celebrating
his "50th year in HAM-RADIO", and he will be active between March 18-20th,
using the special callsign DX2DP. QSL via VE7DP.
Island. His schedule is 3 months ON and 3 Months OFF.

HQ2, HONDURAS. Operators Johnny/HQ2JCM, Dan/HR2DMR and his son Daniel
(JR.)/HQ2DMR, will be active as HQ2W during the CQWW WPX SSB Contest
(March 26-27th) as a Multi-Single/All-Band/Low-Power entry. They will
use monobander antennas on 20/15/10m and sloper antennas on 160/80/40m.
QSL via OK1DOT. QSL via address on QRZ.com.

IOTA NEWS.............................
AF-018. (Early Announcement) Operator Raffaele, IH9YMC, will be active
from Pantelleria Island (IIA TP-001, MIA MI-124, WW Loc.
JM56XT), African Italy, during the CQWW ZDX SSB Contest (October
29-30th) as a Single-Op/Single-Band (??)/Low-Power entry.
QSL via eQSL.

AS-049. (POSTPONED) Take, JI3DST, has cancelled/postponed his trip
to Tokara Archipelago due to Japan's enormous earthquake
and Tsunami.

OC-091. (Late Announcement) Members of CW-Philippines ARC were expected
to activate DZ1P from Polillo Islands this past weekend (March
11-13th). Operators mentioned are Ed/4F1OZ, Gus/4F1EAA, Nani/
DU1COP and Gudo/4F3XX. Gil/4F2KWT and Frank/VE7DP were expected
to also joining the team. QSL via 4F1OZ or VE7DP.

J2, DJIBOUTI. Freddy, F5IRO, will be active as J28RO during the CQWW
WPX SSB Contest (March 26-27th). QSL via F8DFP.

JD1, OGASAWARA. Operators Makoto/JI5RPT (JD1BLY), Harry/JG7PSJ (JD1BMH)
and Masaru/JE4SMQ (JD1BMT) are scheduled once again to be active from
from Chichijima Island (AS-031), Ogasawara during the following dates:
JD1BLY: April 30th to May 7th
JD1BMT: April 30th to May 5th
JD1BMH: May 4-13th
Activity will be on 40-10 meters, possibly 80 and 6 meters (no EME),
using CW, SSB and RTTY. Check QRZ.com for QSL info.

JW, SVALBARD. Francois, F8DVD, will once again be active as JW/F8DVD from
Longyearbyen ARC located on Spitsbergen Island (EU-026, LAFF 033) between

April 1-8th. His activity will be on all HF bands mostly on SSB. He will use the Longyearbyen Radio Club's equipment which consists of an ICOM 751 and a 500 watts amp into a 5 elements yagi on a 30 meters high tower. QSL via his home callsign, through the French REF-Union Bureau or direct, w/SAE + 1 IRC (or 1 USD for EU, and 2 USDs for elsewhere) to: Francois Bergez, 6, Rue de la Liberte, F-71000 MACON, France. To see previous pictures from his JW/F8DVD activity, visit: http://f8dvd.monsite-orange.fr

JW, SVALBARD. Jon, LA8HGA, will be active as JW9HGA from Longyearbyen ARC located on Spitsbergen Island (EU-026) between May 19-23rd. Activity will be on the HF bands and CW only. QSL is via LA8HGA, by the Bureau or direct.

KH0, MARIANA ISLANDS. Operators Eri/JF1VGZ (an 11 year old YL) and Masa/JA1MFR will be active as KH0/KH7ERI and KH0/WN1Y, respectively, from Saipan between March 25-29th. QSL via JF1VGZ direct. Also, check out the Web page at: http://www.qrz.com/db/kh7eri

7-16 and "K" index will be 3 or less

LX, LUXEMBOURG. Lars, DF1LON, will be active as LX7I during the CQWW WPX SSB Contest (March 26-27th) as a Single-Op/All-Band entry. QSL via LX2A. Visit the following Web page at: http://www.lx2a.com

KP4, PUERTO RICO. To celebrate his 20 years in Digital Amateur Radio (and his birthday) Jose, KP4JRS, will be active as special event station with the callsign K4J between March 14-29th. Operation will be mostly on RTTY and PSK31. This will include an entry on the Russian DX and CQ WPX SSB Contests. A special Electronic Certificate will be available via his home callsign and http://k4j.kp4jrs.com .

OE11, AUSTRIA. The Amateur Radio Section of ORF (Austrian Broadcasting Corporation) and the Documentary Archives Radio Communications/QSL Collection will operate, for only 72 hours, a special event station with the callsign OE11M between Friday, April 29th and Sunday, May 1st (0000-2400z). The OE11M is an official "International Marconi Day"

station. Contacts made on Saturday, April 30th, are valid for the IMD Award. QSL via OE Bureau or direct to OE1WHC. Cards without SAE and (new!) IRC or green stamps to cover postage will be processed via Bureau.

PJ2, CURACAO (YL Op/Update/Reminder). Just a reminder that a YL team of operators (Gayle/K6GO, Margie/KG6TBR, Ellen/N6UWW, Michelle/W5NYV, Rusty/AF6WF and Georgia/KI6LAV) will be activating the PJ2T Signal Point Station on Curacao (SA-099, WLOTA LH-0942) as PJ2/NA6YL between March 18-21st. They plan to have 4 stations on the air operating 24 hours on as many bands as possible. QSL direct to NA6YL (w/SAE and 2 USDs) to: YL DX-peditions, 2104 Poplar Rd, Oceanside, CA 92058 USA. All QSOs will be confirmed via LOTW amd eQSL. Visit the YLs DXpeditions Web page at: http://www.yldxpeditions.com

PJ2, CURACAO. Operators Jan-Willem/PA7JWC and Monique/PD7DB will be active as PJ2/homecall from Curacao (SA-099, WLOTA LH-0942) between April 15-22nd. Activity will be on 80-10 meters using CW, SSB, RTTY and PSK. QSL PJ2/PA7JWC via PA7JWC or LoTW. QSL via PJ2/PD7DB via PD7DB. For updates, visit Jan-Willem Web page at: http://www.pa7jwc.nl

PJ4, BONAIRE (2m & 6m EME Planned). Operators Peter/PJ4NX, Johan/PA3FPQ, Jurgen/PE1LWT and Ren&#65533;/PE1L will be active from the island of Bonaire (SA-006, WLOTA L1279) as PJ4X on 144 MHz moonbounce between April 7-11th. The locator is FK52ud. It was announced this past weekend (by popular demand), the PJ4X will also be setting up a horizon-only 6m EME operation from PJ4-land for the first time ever. PJ4X will be operating on both moonrise and moonset when their moon is below 20 degrees elevation providing them with ground gain lobes. Experienced 6m EME operators know that these ground gain lobes can make your horizon-only antenna perform like a 4 yagi array. QSL via PE1L. For more details and updates, go to:
http://www.emelogger.com/bonaire
http://www.emelogger.com/bonaire/default.asp?page&#65533;e
ADDED NOTE: Operators Johan/PA3FPQ, Jurgen/PE1LWT and Ren&#65533;/PE1L will also be active as PJ2/PE1L from Curacao (SA-099, WLOTA LH-0942) between April 14-18th. Activity will also be on 144 MHz moonbounce only. The locator is FK52nc. For more details and updates, go to:
http://www.emelogger.com/curacao/default.asp?page&#65533;e

VP8ORK LoTW STATUS. A press release from Don, N1DG, states: "The VP8ORK team is pleased to announce we have completed the first upload of LoTW credits to the ARRL's website. If you were either a donor of our expedition or used our direct OQRS service you should see those contacts that match our log."

ZL8X QSL/LOTW STATUS. Christian, DL1MGB, reports, "We got our first boxes with QSL cards from the printer. Thanks to the QSL-Shop in Berlin for their fast and professional service and the excellent quality of the QSL cards! We already started to send the first QSL cards. DX clubs with a special QSL service for their members (GDXF, SDXF and DDXG) were the first who got them. Followed by another 1000 letters last week we continue working on the over 4000 direct requests which came through OQRS. On the day we received the QSL cards from the printer, we uploaded ALL QSOs to LOTW. Please check your LOTW account before asking us when we will upload LOTW! Nevertheless it can happen due to wrong dates/times that this or that QSO does not show up in LOTW. You may contact us, and we can have a look at it." To read the complete press release, go to: http://www.kermadec.de/news/news_archives/index.php?task&#65533;ownews&id&#65533;8

QSL RECEIVED VIA LoTW: 4X20HC, 5H3/IK2GZU, 6W/PA3EWP, 7Z1HL, 9A5AN, 9K2F, C6ANM, C6APG, CE3DNP, CN8KD, CW5W, EF8R, F2DX, HH4/AF4Z, HH4/K4QD, LZ170MDS, IZ4GWE, J7Y, J73WA, JH1MDJ, KH2L, KH6/AA4V, KL7RA, KM4DR, LU6ETB, LY100SP, MD/PA3EWP, NY3C, OM5MF, ON4KEB, P49Y, PJ2/DF7ZS, PJ2/K9NV, PJ2/OE3JAG, PJ2/W1NG, PJ2/WI9WI, PJ2MI, PJ2T, PJ4A, PJ4D, PJ4N, PJ4NX, PJ5/AA4NC, PJ5/AH6HY, PJ5/K1XM, PJ6/N4HH, PJ6A, PJ7/K1GI, PJ7E, PJ7/KC0VKN, PZ5RA, S59ABC, SV1CQN, SV9/ON6WP, TG9AGR, TM6M, UA6YGN, V21ZG, V31YN, V44KAI, VE3IFS/W2, VE3WU, VK3BM, VP2MXF, VP8ORK, WP4SK, XE2S, XE7S, YO9HP, ZL50VK and ZS2I

QSLS RECEIVED VIA MAIL: 3B8/EA3BT, 3B8/SP2FUD, 3C0CW, 5J0BV, 6Y1LZ, 7Z1HL, 9M6YBG, 9Q50ON, C4SV, CM3RPN, CS7/PD0HNL, CY0X, DP1POL, E51PJT, ER240C, ET3JA, FM/F5LGE, FJ/VE3EY, FO/N6JA, JY4NE, LU1ZC, OH1K, OM3EY, OZ5E, PJ2/N2MF, PJ2/OH1VR, PJ2MI, PJ2T, PJ4D, PJ4I, PJ4N, PJ5/AA4NC, PJ5/AH6HY, PJ5/K1XM, PJ5/SP6IXF, PJ6A, PJ7E, S21YX, SA3W, ST2AR, SV9AHZ, SY8AN, TM0WAP, V31YN, V73NS, VK0KEV, YN2DD, YS4/N0AT, Z23MS, Z24EA, ZD9T and ZL8X

QSLS RECEIVED VIA THE BUREAU: NONE REPORTED THIS WEEK!

S2, BANGLADESH. The "Foundation with Global Children (FGC) DX Group" is pleased to announce their next multi-national DXpedition to Bangladesh using the callsign S21YZ between March 17-30th. Bangladesh is the 14th most wanted country in North America. Activity will be on 160-10 meters, including the 30/17/12 meter bands, and using the modes CW, SSB and RTTY. The team plans to erect high gain antennas, use filtering and receive antennas, and run 4 stations with amplifiers 24 hours a day. They state, "We have a new and improved QTH and will focus on the low bands to maximize this time of year. Also, we intend to listen carefully to the needs of the DX community during the operation by monitoring the activity on our Web site, and other social media outlets for band openings, and dialogue with the radio community." Operators mentioned are: Zorro/JH1AJT/A51A (Team Leader), Jay/JA1TRC/KH2J, Hiroyuki/JP1TRJ, Nao/JA1HGY, Eun-Gwang/DS4EOI, Jon/KL2A, and 3 other operators TBA. QSL via JH1AJT, direct, by the Bureau or LoTW. For more details, visit their We pages at:
http://www.s21yx.com/index.php
http://www.facebook.com/S21YX
http://twitter.com/#%21/search/s21yz
At this time the team is seeking contributions from sponsors and the DX community at large to help defray the significant logistics costs of this DXpedition. All team members will be covering their own travel costs. Donations are being requested to cover shipping, licensing, and the other necessary fees. Details of how to donate appear on the S21YX web page at:
http://www.s21yx.com/sponsors.php
PayPal and Secure credit card donations may be made directly via the Web site. Thank you for your consideration in whatever you can offer.

SJ9WL AND LG5LG, MOROKULIEN STATION. Operators Hugo/PA2HW, Robert/PA2RDK, Frank/PA3CNO, Paul/PA3DFR and Gert/PE0MGB will activate the special Swedish/Norwegian peace monument "Morokulien" as LG5LG and SJ9WL between April 10-16th. Activity will be on 160-6 meters using CW, SSB and the Digital modes. The callsign will change every day at 0000z. An award will be available for 2 contacts with each call on different bands and different days. QSL via Bureau or direct to LA4EKA. For more details on this station, visit: http://www.sj9wl-lg5lg.com

TC18, TURKEY (Special Event). Members of the Turkish group called TCSWAT (Special Wireless Activity Team) are proud to announce that special event station TC18M will be active on the air between March 14-20th, to com-memorate the Naval Victory of March 18, 1915. Operators Ahemt/TA3AX, Onur/TB2MYE, Tevfik/TA1HZ, Hasan/TA1GE and Leonardo/TA1FR will be active from Canakkale - the Dardanelles to commemorate the Naval Victory. Activity will be on the HF bands using CW, SSB and BPSK31. This year's QSL Manager is TA1HZ. More detailed information is available at:
http://www.qrz.com --or-- http://www.tcswat.org
PLEASE NOTE: The QSL cards will be ready for Friedrichshafen Messe (end of June) distribution; therefore, please do not hurry for sending in your QSL cards direct (unless you need them for DXCC or something else).

TJ, CAMEROON (Special Event). Henry, TJ3AY, is now active with the special callsign, TJ3FC, until March 30th. Activity is to commemorate the 51st anniversary of the "Francophonie". He was spotted this past week on 80/40/

12/10/6 meters SSB. A special QSL cards has been printed (see QRZ.com). QSL via F5LGE.

TK, CORSICA. Chris, F8DZY, will be on a job mission in Ajaccio between March 23rd and April 17th. He plans to be active as TK/F8DZY. Activity will be limited to his free time but will be on 80-10 meters using CW, SSB and RTTY. He will be using an Icom 7600 with 100 watts into a vertical. QSL via his home callsign, direct, by the Bureau or LoTW.

TO1, MARTINIQUE. Maurizio, IW1GGN, will be active as TO1N from Martinique (NA-107) between now and March 18th. Activity will be holiday style and mainly on 20 meters. QSL only direct to IW1GGN.

TO11, GUADELOUPE (NA-102). Gildas, F6HMQ, will once again be active from here, but this time using a special callsign, TO11A, between March 20th and April 1st. He plans to also be active in the upcoming CQ WPX SSB Contest (March 26-27th) as a Single-Op entry. QSL via F6HMQ.

VC2, CANADA. Operators VE2BR/Noel and VE3ZZ/Gregg will be active using the special callsign VC2B during the CQWW WPX SSB Contest (March 26-27th) as a Multi-Single entry. QTH will be Mercier, Quebec (Zone 5, Grid Loc FN35dh). QSL to VE2BR.

VK9, LORD HOWE ISLAND. Members of the Hellenic Amateur Radio Association of Australia (HARAOA Group) are planning a major DXpedition to Lord Howe Island (OC-004) as VK9HR for 10 days between July 8-17th. The group plans to operate on multiple bands simultaneously to give everyone a chance to contact Lord Howe Island. This the same group of operators that activated VI2BI from Broughton Island (OC-212) back in February 2010, and VK9NI from Norfolk Island (OC-005) in July 2009. The VK9HR DXpedition team leader is Tommy/VK2IR and co-leader John/VK3YP. QSL is via: HARAOA, Attn: VK9HR QSL MANAGER, PO BOX 13, SANS SOUCI, NSW 2219, AUSTRALIA. Look for more details by the end of April on the team of operators, frequencies and equipment at: http://www.vk9hr.com

VU4, ANDAMAN ISLANDS (Update). By the time you read this, 11 members of the Amateur Radio Society of India (ARSI) are in Port Blair (and 6 more to follow in a few days), are beginning to prepare to be active as VU4PB between March 15-31st. Before their schedule date to operate the team has plenty to do. Much of the equipment was sent by sea freight and has been received at Port Blair awaiting for them to unpack and deployment to the three operating sites. Some items missed the last sailing and have gone out via air freight. It will be a busy few days before the stations go on the air. More details and updates, visit: http://arsi.info/dxpeditions/vu4pb-mar-2011

Z2, ZIMBABWE. Rudi, DK7PE, will be active as Z22CW from Harare between March 20-26th. His main focus will be CW using wire antennas (Jumper Beam/Slopers). He is thankful for the great support of Eric/Z21FO, Fernando/ Z21BB and POTRAZ Zimbabwe, because he was issued the callsign Z22CW. QSL via DK7PE. Visit his Web apge at: http://www.rooody.de

ZC4, U.K. SOV. BASE AREAS ON CYPRUS. Tom, ZC4TS, states that he is sorry but ZC4 is off the air for good. The radio is disconnected and the antennas are down. Tom is headed back to the states for good in 2 weeks. If you were still looking for a contact with ZC4, you'll have to get in touch with Steve, ZC4LI. He's the only other ZC4 that Tom knows and is off the air currently.

ZK2, NIUE. Chris/GM3WOJ/GM2V will once again be active as ZK2V from Niue (OC-040) starting about October 15th, and onward. Keith/GM4YXI/GM5X, will join him for 2 weeks during the DXpedition and will be active in the CQWW DX SSB Contest (October 29-30th) as a Single-Op/All-Band/High-Power entry. QSL via N3SL. Chris informs OPDX, "I hope to be active as ZK2V for several months, from a new QTH on the island. ZK2V will be making an extra effort on the low bands, with special antennas to overcome the local QRN problems on 160m and 80m which made these bands difficult in 2009." Chris states that the Web site <http://www.zk2v.com> will be updated as soon as more detailed information is available.

ZS8, MARION ISLAND (Reminder/Uodate). Pierre, ZS1HF/ZS8M, has ceased his ZS8M operation as of Sunday, March 13th. He states, "Our polar supply ship arrives on Tuesday, March 14th, and departs the island on March 20th. If I am able to operate after March 20th, I certainly will. The ZS8M operation officially ends on May 5th." Watch the QRZ.com Web page or the ZS8M Web page <http://www.iz8epy.it/html/zs8m.html> for updates.

274. Japanese Disaster Communications

Newsgroup: rec.radio.amateur.misc
Date: 2011-03-14 15:12:55 UTC
From: ARRL Members Only Web site <memberlist@www.arrl.org>
Message-ID: <20110314135212.40C5720857@bmail.arrl.org>
Source record: 4714
Cross-posted to: rec.radio.amateur.moderated,rec.radio.amateur.misc,rec.radio.info

The images from Japan are heart-rending. Evidently amateur radio is being used within Japan and in the international community to provide support.

This was posted on the International Amateur Radio Union Region 1 website:

===Japan Earthquake/Pacific Tsunami - Update 2
Written by G0DUB

Saturday, 12 March 2011 09:39

HF frequencies are now known to be in use by Japanese amateurs as part of their emergency response:

7043 kHz SSB: controlled by JR3QHQ the Osaka branch manager of JARL He is gathering incident information on radio and forwarding this information onto the internet.

7075 kHz SSB: Operated by JL3YSP in Wakayama occasionally.

7030 kHz : JARL emergency communication frequency in their bandplan is in use by JA7RL (JARL regional HQ station).

Would all amateurs please make every effort to avoid interfering with emergency communications on these frequencies.

Last Updated on Saturday, 12 March 2011 12:18

===
Jack Powley, WAØSAQ, sent me an email that indicated that Toru, JG1EIQ, asked that specific frequencies be kept clear:

Following freq's are assigned for emergency QSO. Please keep clear. Thank you for your kind help! Ops JARL & volunteers - 3520 to 3530, 7025 to 7035, 14090 to 14110, 21190 to 21200, 28190 to 28210, 50100, 51000, 141000, 145000, 430100, 433000 kHz.

I do not know how official this list is. However, please be careful to monitor any frequency before you transmit to be sure that you are not using a frequency being used in the disaster response.

If I get more information, I will send it out.

Just as I sent off my last email, I received the following:

===
Hi friends

QTC ! A1 CLUB DX members and other

As you may know, we had a terrible quake in northern part of Japan on
Friday afternoon last week. After three days past, more than 2000
killed and more than 10000 missing up to now. Also, the nuclear power
plants located in Fukushima-pref. is getting serious situation.

We as an amateur radio operator are gathering and exchanging emergency
information on the following frequencies.

Please kindly keep clean these freqs.
3525KHz+/-5KHz
7030KHz+/-5KHz
14.100MHz+/-10KHz
21.200MHz+/-10KHz
28.200MHz+/-10KHz
50.100MH z 、51.000MH z 、51.500MHz
144.100MHz、145.000MHz、145.500MHz
430.100MHz、433.000MHz、433.500MHz

Thank you for your kind cooperation.

A1 CLUB secretary
Atsu, JE1TRV

===
Please be careful to avoid these frequencies.

EMERGENCY TRAFFIC IN JAPAN

DXpeditions and radio amateurs all around the world are asked to keep the
following frequency ranges clear for emergency traffic in Japan:
3520-3530, 7025-7035, 14090-14110, 21190-21200, 28190-28210, 50100, 51000,
14100, 14500, 430100 and 433000 kHz.
Please be aware that this includes also RTTY fequencies!

CT3 - MADEIRA, AF-014
Helmut,CT9/DF7ZS, is going to activate Madeira (AF-014) in "holiday
style" preferably on the WARC bands from Mar 22-29. QSL via DF7ZS.
Helmut will join the WPX SSB Contest in the single OP/allband class
as CQ3L. QSLs for CQ3L via DJ6QT.

CU - AZORES, EU-003
Roger,CT8/G3SXW, and Lionel,CT8/G5LP, will be active only in CW from
the island San Miguel (EU-003) on Mar 16/17. They will live on a farm
near Ponta Delgada with enough space for wire antennas. For both this
is a trip with focus on the hobby and also on culinary highlights.
QSLs via bureau, direct or LoTW to their homecalls.

FG - GUADELOUPE, NA-102
Gildas,F6HMQ, will be on Guadeloupe (NA-102) again and plan to use the
special callsign TO11A between Mar 20 and Apr 1. He wants to join the
WPX SSB Contest as well. QSLs direct or via bureau to his homecall.

FM - MARTINIQUE, NA-107
Maurizio,IW1GGN, will show up as TO1N from Martinique (NA-107)
working in holiday style mainly on 20m from Mar 12-18.
QSLs unfortunately only direct via IW1GGN.

GJ - JERSEY, EU-013
Kazu,JK3GAD (M0CFW), will be QRV from Jersey (EU-013) signing MJ0CFW

on 160m-10m from Mar 18-21 (including Russian DX Contest).
QSL via M0CFW or LoTW.

PJ2 - CURACAO, SA-099
Some members of the Caribbean Contesting Consortium (CCC) will be QRV
from the "Signal Point Station" on Curacao (SA-099, WLOTA LH-0942) from
Mar 22 until Apr 6. Marty,K2PLF, and friends will sign PJ2T in the WPX
SSB Contest. They will be QRV as PJ2/homecall before and after the WPX.
QSLs via homecalls, for PJ2T via N9AG or LoTW.

The YL team of Gayle,K6GO, Margie,KG6TBR, Ellen,N6UWW, Michelle,W5NYV,
Rusty,AF6WF, and Georgia,KI6LAV, will be active as PJ2/NA6YL from
"Signal Point Station" as well from Mar 18-21. Operation takes place
on all bands with up to four stations.
QSL cards only direct (SAE and 2 US $) to NA6YL, YL DXpeditions,
2104 Poplar Rd, Oceanside, CA 92058, USA.
All QSOs will be confirmed via LoTW and eQSL as well.
See also their website at: http://www.yldxpeditions.com

Dirk,PJ2/DO7DP, is staying on Curacao from Mar 15-30. During the first
week of his stay he will only work during the night hours. Activities
take place in PSK31, RTTY and SSB on 10m, 20m and 40m.
QSL via bureau, eQSL or LoTW.

S2 - BANGLADESH
Zorro,JH1AJT, Nao,JA1HGY, Jon,KL2A, Hiroyuki,JP1TRJ, Jay,JA1TRC/KH2J,
Eun-Gwang,DS4EOI, and three more operators will show up as S21YZ from
Mar 15-29. They will work with four stations (all equipped with ampli-
fiers) in SSB, CW and RTTY on 160m-6m, with emphasis put on lowbands.
QSL via JH1AJT, via bureau, direct or LoTW.
For more details please click on: http://www.s21yx.com

VK9C - COCOS KEELING ISLANDS, OC-003
Tim,NL8F, plans to become QRV as VK9CF from Cocos Keeling (OC-003) from
Mar 19-29. He hopes the conditions will be better than last year and
plans activities in SSB on 80m-10m, maybe also on 160m. QSL via K8NA.
He wants to take part in the upcoming CQ WPX SSB Contest as well.

Z2 - ZIMBABWE
Rudi,DK7PE, announced to be active as Z22CW from Harare from Mar 20-26.
Rudi is using wire antennas and he is known to work mainly in CW on
all bands but especially on 160m. QSL via bureau or direct to DK7PE.
You can visit Rudi's homepage at: http://www.rooody.de

3D2 - FIJI, OC-016
Eddie,VK4AN, and Kenneth,OZ1IKY, are going to hit the airwaves from
the main island Nadi (OC-016) between Mar 15 and Apr 2. They will sign
3D2A in CW/SSB/RTTY/PSK on 160m-6m and are looking forward to their
pile-ups on the lowbands. They will put up a groundplane for 30m/40m, a
Spiderbeam for the high bands and a K9AY Loop for receiving on 80/160m.
Eddie and Kenneth plan to join also the BARTG RTTY Contest and the
CQWW WPX SSB Contest.

QSL cards for 3D2A should be sent via bureau or direct to VK4AN.
More information can be found at: http://pacific-dxers.com/News.html

6W - SENEGAL
RZ0SR/6W, UA0SC/6W, UA0SE/6W and UA0SW/6W will be QRV in all modes on
all bands from Mar 17-28. QSLs via UA bureau or direct to each OP).
They will sign 6V7D in the WPX Contest. QSL for 6V7D via UA0SE.

8P - BARBADOS, NA-021
VE3DZ is working as 8P9AA in RTTY, SSB and CW from Mar 9-29.
He plans to join the WPX Contest as 8P3A. QSL via VE3DZ, bureau ok.

9N - NEPAL
Ernst,DK7AN (9N7AN), will show up from Dhulikhel/Nepaln on Mar 16.
His activities are limited to 40m, 30m, 20m and 17m. He will be joined
by other OPs from Germany about ten days later. More info in next DXNL.
The QSL cards should be sent via bureau, direct or LoTW to DL4SVA.

NAMIBIA, SPECIAL EVENT STATION
The special event station V521NAM will be active on Mar 19-21 to
celebrate 21 years of the independence of Namibia. The "Namibian
Amateur Radio League" (NARL) was founded in 1990 as well. The station
will be QRV in CW, SSB and PSK on 80m-10m and also on 6m/2m/70cm and
via satellites. QSLs via the NARL QSL bureau, direct or via eQSL.

PUERTO RICO, SPECIAL EVENT STATION
Jose,KP4JRS, celebrates the 20th anniversary of the day he got his
first radio licence. For this reason he will use the special call K4J
from Mar 14-29. Jose prefers working in RTTY and PSK31.
See also his website: http://k4j.kp4jrs.com

TURKEY, SPECIAL EVENT STATION
The TC Special Wireless Activity Team (http://www.tcswat.org) is active
as TC18M from Mar 14-20 remembering the battle of Gallipoli on Mar 18,
1915. The OPs Ahmet,TA3AX, Onur,TB2MYE, Tevfik,TA1HZ, Hasan,TA1GE, and
Leonardo,TA1FR, are working from Tschanakkale in CW/SSB/PSK31 on HF.
QSLs also via bureau to TA1HZ.

LINKS: Current SOTA activities (mountain summits) are announced at:
http://www.sotawatch.org

Detailed information about current VHF activities can be found on the
VHF DX portal "Make More Miles on VHF" at: http://www.MMMonVHF.de
---
The unsuccessful DX0DX DXpedition to the Spratly Islands was postponed
until next year. Find more information at: http://www.dx0dx.net

UPCOMING CONTESTS

Mar 19: Russian DX Contest
Mar 19-21: BARTG HF RTTY Contest

IOTA collected by Fredy,DE0MST (e-mail: iota@dxhf.darc.de)

Island activities:
AS-001, VU, Andaman Islands: Some members of the ARS of India plan to show
up as VU4PB from Port Blair on South Andaman Island from Mar 15-31.
QSL via W3HNK (direct).

EU-120, G/M, English Coastal Islands: Kevan,2E0WMG, and Jonathan,G0DVJ, will
be QRV from Lundy Island from Mar 21-26. For QSL details see QRZ.com.

EU-125, OZ, Jylland West Group: Stefan,DL7AOS, will be active as 5P5K from
Roemoe Island from Mar 20 until Apr 1. He will work in "holiday style"
mainly in SSB on the usual IOTA frequencies 28460, 24950, 21260, 14260,
18128, 7055 and 3755 kHz. Stefan also wants to join the WPX Contest on
Mar 26/27. QSL via homecall (bureau/direct).

Lighthouse activities (WLOTA/ARLHS/ILLW)

CT8/G3SXW D 2640 Sao Miguel Island Mar 16/17
CT8/G5LP D 2640 Sao Miguel Island Mar 16/17
FP/W6HGF H 0328 Miquelon Mar 14-23

SB DX @ WW < KB8NW $OPDX.1002.1
Ohio/Penn DX Special Bulletin No. 1002.1

The Ohio/Penn DX PacketCluster
DX Special Bulletin No. 1002.1
BID: $OPDX.1002.1
March 15, 2011
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX
Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet
Clusters Network FO8RZ and VU2PTT for the following DX information.

FO/M, MARQUESAS ISLAND. Phil, FO8RZ, sent the following to OPDX:
"I will go tomorrow morning on Marquesas Islands for my job. QTH will
be Taiohae in the south of Nuku Hiva island (OC027). I was expected
to operate from the north of the island but I had to cancel this QTH
at last moment. South QTH is a bad QTH due to big mountains (550m to
USA/EU - 700m to JA), but I have no choice. I will operate only during
my periods of freetime:
- 16th March around 0530Z to 0900Z
- 17th March around 0530Z to 1000Z
- 17th March around 1600Z to 2000Z
My freetime may change due to changes in my job. Call sign will be
FO8RZ/P. QSL via LoTW and F8BPN Activity on 40-20-17-15-12-10 CW
Rig: 100W + HF6V
This operation may be canceled or delayed at the last moment due to
my job..... Best 73 de FO8RZ Phil"

OOOPPPSS DEPARTMENT. Couple of typo were in OPDX.1002. Please correct
the following:
* Under "CY0, SABLE ISLAND (Update)" - Jeff, N1SNB, callsign was
incorrect (not N1NSB).
* Under QSL-INFO from DB0SDX (dated March 13th) - The QSL route for
NO8DX is wrong .... it says KB8BW -- should be KB8NW

VU4, ANDAMAN ISLANDS (Press Release 4: Mar 15th). "VU4PB is now operational
but due to very bad weather with high winds and rain only two stations
were installed and ran on both 20 and 40m. We hope to get a third station
operational by the end of the day today and the fourth later during this
week.
Low band antennas will be up and running later in the week. Murphy is
keeping us good company along with the daily storms.
Please note that our 'Operating Frequencies'

<http://www.arsi.info/dxpeditions/vu4pb-mar-2011/operating-frequencies>
have been updated to avoid interference to the JA Emergency Nets which
have been notified and our Propagation Page
<http://www.arsi.info/dxpeditions/vu4pb-mar-2011/propagation>
has also been updated.
The online logs will be available by 17th March. FYI, the following
press release is available on our website at:
http://www.arsi.info/dxpeditions/vu4pb-mar-2011/press-releases

73 de Prasad VU2PTT

Editor: Ward Silver, N0AX <rate-sheet@arrl.org>

==> IN THIS ISSUE

- CQ WPX SSB - Multiplier Heaven
- WRTC2014 Qualifier - Russian DX Contest
- Kudos to K6STI
- An Analog Fade
- ESM Revealed
- Long IARU HF and Short Sweeps Results
- Time Zones Retiring
- Transequatorial Tutorial
- Welcome Back!

NEW HF OPERATORS - THINGS TO DO

One of the most popular contests with new hams is the CQ WPX SSB
<http://cqwpx.com> in which the multipliers are call sign prefixes and
everybody can everybody. New hams can even be sought after with their
2-by-3 calls, so get in there and call CQ! You can find more
information about the strange prefixes you'll hear in the Wikipedia
<http://en.wikipedia.org/wiki/ITU_prefix_%28amateur_stations%29> or in
the CTY (country) files <http://www.country-files.com/cty/> used by
your logging software.

BULLETINS

Emergency HF communications in Japan are centered on 3525, 7030, 7043,
7075, 14100, 21200, and 28.200 kHz. Please avoid these and nearby
frequencies when the bands may be open to the NW Pacific Rim.

BUSTED QSOS

No particularly erroneous items were noted in the last issue although I
continue to get email about John Denver having written "Leaving On A
Jet Plane" - lots of music fans in the Contest Update readership!

CONTEST SUMMARY
```

Complete information for all contests follows the Convesrsation section

March 19-20

- Russian DX Contest
- Oklahoma QSO Party
- North Dakota QSO Party
- Virginia QSO Party
- NAQCC Monthly QRP Sprint--CW (Mar 17)
- Feld-Hell Rolling Sprint
- 10-10 Mobile QSO Party
- BARTG HF RTTY Contest
- OK1WC Memorial Contest

March 26-27

- CQ WPX SSB Contest

==> NEWS, PRESS RELEASES, AND GENERAL INTEREST

Not wanting to steal any thunder from Hamvention award-winner W7EL, I thought it worth mentioning this time around another of the antenna modeling pioneers - Brian Beezley, K6STI. Brian's software, such as YO (Yagi Optimizer) and TA (Terrain Analyzer), were groundbreaking at their introduction, along with EZNEC. Brian's receiving loop <http://www.angelfire.com/md/k3ky/page45.html> was the first of its kind in the modern amateur literature, as well. Unfortunately for ham radio, Brian left the ham software market because of rampant pirating of his products and disregard for copyright. Just because it's "amateur" radio doesn't mean everything is free. At any rate, K6STI blazed some trails for us as well - thanks, OM.

CQ WPX SSB <http://cqwpx.com/> is coming up next weekend. In preparation, Stan EI6DX has used his Log Analyser software to parse the latest set of public WPX logs. The results <http://www.ei6dx.com/cqww-contest-analysis/cqww-activity-analyzer/> allow comparison to sets of public logs for other CQ contests. Aside from the usual breakdowns by band, mode, time, and zone there are several other comparisons such as number of logs received, logged QSOs, total calls, and validated or "real" calls. Interesting stuff!

A new Remote Beacon Network (RBN) Telnet cluster node is now available at arcluster.reversebeacon.net port 7000, using the latest AR Cluster Server Version 6 beta. The new node is running in parallel with the RBN node at telnet.reversebeacon.net port 7000, which uses the DXSpider <http://www.dxcluster.org/> node software. This new version of AR Cluster uses revised filtering syntax that makes it possible to concatenate multiple filtering commands in a single message to the cluster, which in turn makes it possible to conveniently send messages to adjust your filters <http://ab5k.net/ArcDocsVer6%5CUserManual%5CArcDx.htm> from the message buttons of typical telnet clients and logging programs. (Thanks, Pete N4ZR)

CW contesters are known for their ability to discriminate between signals with nearly the same frequency. The Tonometric <http://tonometric.com/adaptivepitch/> web site provides an Adaptive Pitch test to prove your pitch-picking proficiency. There are other exercises for rhythm and even a tone-deaf test! (Thanks, Doug K1DG)

ARRL Field Day <http://www.arrl.org/fieldday> is fast approaching and with it the opportunity to demonstrate snappy HF operating techniques to potential radiosport recruits. Why not show them the ropes while attired in your finest Field Day gear? All of this year's Field Day supplies and concupiscibles <http://www.arrl.org/shop/Field-Day-Supplies/> are will be shipping April 1st - no fooling! While you're at it, be sure to download the Field Day packet and start plotting your bonus point collection strategy!

Scrambling the contest planner plans, this year July has FIVE full weekends - a once every 823 years phenomenon. Since many yearly contests occur on the "last" full weekend of a month, be sure to check the contest web site for the correct days. Contest managers - be sure to update your web sites, too! (Thanks, Ray ND8L)

If you're ever caught without a snappy answer to a less-than-snappy question, you might want to check out K3TN's Arrgh FAQ <http://wiki.contesting.com/index.php/Arrgh_FAQ> spotted on the Internet by web-crawler Bob, N6TV.

Web Site of the Week - Have you noticed that some radio network news broadcasts still begin with that "squee-click" dating from the days of manually opening the network circuit? Or that your digital camera makes a shutter noise when it captures an image - even though it doesn't have a shutter? "The Fading Sound of Analog Technologies <http://pogue.blogs.nytimes.com/2011/03/03/the-fading-sounds-of-analog-technology/>" by David Pogue notes these and other temporal incongruities whose meaning has faded even as their aural remnants haunt our modern world. (Thanks, Bob N6TV)

WORD TO THE WISE

Exercise - everybody knows it's good for you, but what's the radiosport equivalent? How about a spotless weekend? Since in the WPX just about every other call sign is a multiplier, there is little incentive to obsess over ever bit of information from the spotting network. Test your tuning and band-picking skills by "going dark" in the WPX SSB contest - you'll become a savvier spot snagger for when it counts!

==> SIGHTS AND SOUNDS

What is "Enter-Sends-Mode" (ESM) anyway? Offered by several contest logging program, this mode lets you do a lot with the Enter key. Call CQ? Press Enter. Send the exchange? Press Enter. Acknowledge the received information and ask for more callers? Press Enter. Pioneered in the MS-DOS TR-LOG program, many top operators find it to be efficient, but it does take some getting used to. To explain ESM, the

N1MM development team has posted links to videos on using it during CW
<http://n1mm.hamdocs.com/tiki-index.php?page=Video+-+Enter+Sends+Messages%2C+CW#Video_Enter_Sends_Messages_CW>
and RTTY
<http://n1mm.hamdocs.com/tiki-index.php?page=Video+-+Enter+Sends+Messages%2C+RTTY#Video_Enter_Sends_Messages_RTTY>
operation. (Thanks, Larry K8UT)

You can get a nice view of the W3LPL antenna array
<http://snurl.com/26zqr4> online. Click on "Bird's Eye" to get a
detailed view, zoom in, and click on the compass to see images from
different perspectives. You can also expand the image to the left by
clicking on the left-arrow on the upper left corner of the picture.
(From the ARRL Propagation Bulletin ARLP10)

CQ WPX Contest Director K5ZD's "10.5 Tips for Fun and Success in the CQ
WPX Contest" webinar has been posted to Potomac Valley Radio Club's web
site <http://www.pvrc.org/> under the Recorded Webinars link for those
who missed the live version of the presentation. (Thanks, Ken K4ZW)

As if you don't listen to enough QRN, NASA recorded the sounds
<http://tinyurl.com/5rorrou> of thousands of cometary dust particles
pelting the Stardust-NExT spacecraft as it flew past Comet Tempel at
9.8 km/sec, or 24,000 mph. The audio was recorded by an instrument
aboard the spacecraft called the Dust Flux Monitor which measures sound
waves and electrical pulses from dust impacts. Think of that the next
time a big ol' bug paints a Jackson Pollack on your windshield! (From
the AMSAT <http://amsat.org/> ANS-065 Bulletin)

Make Online has posted a video demonstration
<http://blog.makezine.com/archive/2011/03/etch-circuit-boards-with-common-household-chemicals.html>
of how to use vinegar, hydrogen peroxide and salt to etch a circuit
board. (Thanks, Jeff AB6MB)

The bad news about aurora? It shuts down the HF bands. The good news?
It's fun to look at as in this video
<http://www.youtube.com/watch?v=qhROwDr7AmU> of the Mar 9th display at
the QTH of Carl WL7BDO. Needless to say, Carl didn't work much on HF
that night although I understand the VHFers found plenty of excitement
when beaming in this direction. (Thanks, Rich KL7RA)

If you like to listen to podcasts on your daily commutes, Jack WA0RJY
recommends the Astronomycast <http://www.astronomycast.com/> web site's
selection of programs. Speaking of astronomy, should the sky be clear
at sunset this week, go outside and take a look for Jupiter and Mercury
above the western horizon as described by Spaceweather
<http://spaceweather.com/>. It's a rare opportunity to see the largest
and smallest planets together in the sky.

==> RESULTS AND RECORDS

The initial results <http://www.arrl.org/contest-results-articles>
for the 2010 Sweepstakes CW contest have been released on the ARRL
Contest Branch web site and K9LA's extended writeup for the 2010 IARU
HF Championship is there, too! (Thanks, ARRL Contest Branch Manager,
Sean KX9X)

California QSO Party results <http://www.cqp.org/Results.html> have
been released for the 2010 event with a very nice writeup by Al AD6E.
The contest - already the largest of the individual state QSO parties -
continues to grow in participation each year with more than 900 logs
submitted for the 2010 contest. With the high bands finally showing
some signs of life, the CQP is in a great position to benefit from
better intra-continental propagation on 10 and 15 meters. (Thanks,
David N6EN)

Valery R5GA has published lists showing both 3830 claimed scores and
actual log submissions for the ARRL DX SSB
<http://pileup.ru/arrldx_ssb.php?year=2011> and CQ WW 160 SSB
<http://pileup.ru/cq160_ssb.php?year=2011> contests.

The Catalina Radio Club is pleased to announce that the preliminary
results of the 2010 Arizona QSO Party <http://www.azqsoparty.org/> are
now uploaded for your viewing pleasure. Also online are the results of
the 2010 Ohio QSO Party <http://www.ohqp.org/>. (Thanks, Gary KE7DX and
Jim K8MR)

CQ WW RTTY Contest Director, Ed W0YK, totaled up the different types of
logging software used to generate the 2687 logs submitted for the 2010
contest - there were 64 varieties!

OPERATING TIP

I had to strive really hard to avoid using the common abbreviation for
search-and-pounce operation in a tasteless fashion when referring you
to this article
<http://www.sciencedaily.com/releases/2011/02/110228163141.htm> about
how a full bladder improves decision making. All part of a day's work
here at the Contest Update editorial department.

==> TECHNICAL TOPICS AND INFORMATION

What could be more standardized than time? Well, lots of things,
actually - it's amazing that time zone, for example, is not defined by
an international standard. The database for time zones is actually
maintained by a single volunteer, Arthur Olson
<http://blog.jonudell.net/2009/10/23/a-literary-appreciation-of-the-olsonzoneinfotz-databa
se/>,
who is now retiring. The IANA (the folks that control Internet address
structure) is at last developing a transition strategy. A tip of the
temporal cap to Mr Olson!

The surge in solar flux (over 150 last week!) brings a renewed
vigilance on 6 meters for DX QSOs. In response, ARRL Propagation
Bulletin ARLP009

<http://www.arrl.org/w1aw-bulletins-archive/ARLP009/2011> had a nice report on 6 meter transequatorial propagation (TE) from PJ2T by N4QQ/PJ2. In case you were wondering, the surge in the solar flux topped out at 155, the highest level since 23 July 2004. CQ 10 meters!

While ol' Sol has been mighty active lately - the solar flux is back down to 107 on 15 Mar - there are still plenty of concerns about the ultimate fate of Cycle 24. The good news is that the recent deployment of solar science platforms in deep space have enabled scientists to formulate better theories about what causes and modulates the cycles. A recent NASA article <http://science.nasa.gov/science-news/science-at-nasa/2011/02mar_spotlesssun> presents one of the strongest candidates yet to explain the ups and downs of our beloved sunspots. While it doesn't predict a return to the heights of Cycle 19, a better understanding of our closest star is always a good thing. (Thanks, Jon K7ZA)

Is it more important to be loud or to hear well? From Dave, N2NL/NH2T after the recent ARRL DX Phone contest, "KH2L struggled to work K3LR on 80 meters the first night but finally made it in the log. On Sunday, he checked his 60-foot vertical and discovered it was disconnected. He (had) worked K3LR on 80 meters with his loading coil! He thought the SWR was bad only because it's normally resonant in the CW sub-band."

If you don't have a big shop of your own - take a long around to see if a Tech Shop <http://www.wired.com/gadgetlab/2011/03/techshop-san-francisco-video/> is in your neighborhood. If not, mightn't this be a good project for your club? (Thanks, Tim K3LR)

The winter months can be filled with static pops and sparks - just ask any Dakota Division cat! Working on sensitive electronics these days can be a perilous experience for tiny semiconductor junctions if the tool wielder isn't well-grounded. Glenn AC7ZN has found an inexpensive remedy that helps static charge find another path to the Earth than through your gadgets. He uses StaticGuard laundry spray on a weekly basis to form a high-resistance layer that dissipates static charge on workbench, chair, and carpet.

The memristor - a new type of electronic component - is beginning to find niches in electronic design as described in this Technology Review article <http://www.technologyreview.com/blog/arxiv/26467/?ref=rss>. While it's not about to appear on the licensing exam, you can be sure that if there is a way to use it in radio, hams will find it. (Thanks, Brian Fernandez)

Technical Web Site of the Week - Noting recent comments recently about trans-equatorial propagation (TEP) on VHF bands, Roger VK2ZRH writes, "For the benefit of newcomers to TEP, I have two web pages that each give a detailed introduction to afternoon <http://home.iprimus.com.au/toddemslie/aTEP-Harrison.htm> and evening <http://home.iprimus.com.au/toddemslie/eTEP-Harrison.htm> TEP, written

over 2006-2007 and posted in 2007. Also, the Australian IPS Radio Space Services offers an article <http://www.ips.gov.au/Category/Educational/Other%20Topics/Radio%20Communication/Transequatorial.pdf> on TEP." (From ARRL Propagation Bulletin ARLP010 <http://www.arrl.org/w1aw-bulletins-archive-propagation>)

==> CONVERSATION

Welcome Back!

I don't know about you, but my reaction to the electrifying conditions during the ARRL DX Phone contest was a huge sigh of relief. To hear 10 meters full of signals - strong signals! - to well above 28.500 MHz filled an empty spot in my radio heart that I'd nearly despaired of ever seeing filled again.

Oh sure, I love the low bands and chase gray line DX with all the enthusiasm of the next guy but those bottomless bands of 10 and 15 meters when the F2 layer lights up...well, there's nothing quite like it. We just missed the big openings during the ARRL DX CW contest - you could feel the band trying its best, leaking a little signal from the biggest stations through path closed for years. On Saturday, the dam began to crack. On Sunday, the floodgates opened!

On the East Coast where I was operating we found ourselves competing to get through to Europe. I have never been so pleased to get beaten out by the 9s and 0s! Out west, call signs from the Land of the Rising Sun filled high-band logs that had been empty for a long time. South American stations pounded in from sunrise to way past sunset. Short skip, long skip, even a smidgen of long path made an appearance.

We've been telling the new hams about the wonders of DX contesting without all the massive QRM on 20 meters and down. I'm sure they were beginning to think we were barmy or at least telling some tales. Here was the opening act for several dramas to come, when 10 and 15 swell nigh on to busting at the seams with signals nearly any station can log.

Just two months ago, we were wondering if Cycle 24 was going to flop back into the solar ocean like a spent booster, remember? Black humor made the rounds - not only was the solar minimum past, but the maximum, too! Argggh! To be sure, there will be quiet periods and disturbed days when it seems the sunspots have evaporated once again, but not for long.

So the Big Bass Bongo has been beaten and the Palos Verde Sundancers have danced their propagation dance. The Sun has heard their siren song and sung its own verses in response. Laissez les bons temps rouler!

73, Ward N0AX

==> CONTESTS

16 March through 29 March

An expanded, downloadable version of QST's Contest Corral in PDF format <http://www.arrl.org/contest-calendar> is available. Check the sponsor's Web site for information on operating time restrictions and other instructions.

HF CONTESTS

NAQCC Monthly QRP Sprint--CW, from Mar 17, 0030Z to Mar 17, 0230Z. Bands (MHz): 3.5-14. Frequencies: Monthly on 2nd Tuesday or 3rd Wednesday (alternating). Exchange: RST, S/P/C, and NAQCC member number or power. Logs due: 4 days. Rules <http://naqcc.info/>

Feld-Hell Rolling Sprint--Digital, from Mar 19, 12 PM to Mar 19, 2 PM. Bands (MHz): 1.8-28. Frequencies: Monthly on 3rd Saturday. Exchange: RST, QTH, Feld-Hell number. Rules <http://www.feldhellclub.org/>

10-10 Mobile QSO Party--Phone,CW,Digital, from Mar 19, 0001Z to Mar 19, 2359Z. Bands (MHz): 28. Exchange: Call, name, county & S/P/C, 10-10 number. Logs due: Apr 2. Rules <http://www.ten-ten.org/>

BARTG HF RTTY Contest--Digital, from Mar 19, 0200Z to Mar 21, 0200Z. Bands (MHz): 3.5-28. Exchange: 3-digit serial and 4-digit time. Logs due: May 1. Rules <http://www.bartg.org.uk/>

OK1WC Memorial Contest--Phone,CW, from Mar 19, 0500Z to Mar 19, 0800Z. Bands (MHz): 1.8 - 7. Exchange: RS(T) and serial. Logs due: 14 days. Rules <http://www.hamradio.cz/ok1wc/>

Russian DX Contest--Phone,CW, from Mar 19, 1200Z to Mar 20, 1200Z. Bands (MHz): 1.8-28. Exchange: RS(T), serial or oblast abbr. Logs due: 45 days. Rules <http://www.rdxc.org/>

Oklahoma QSO Party--Phone,CW,Digital, from Mar 19, 1300Z to Mar 20, 0200Z and Mar 20, 1400Z to Mar 20, 2000Z. Bands (MHz): 3.5-28, 50, Frequencies: Multiple operating periods; CW 3.545, 7.045, 14.045, 21.045, 28.045; Phone 3.860, 7.260, 14.260, 21.360, 28.360. Exchange: RS(T) and OK county or S/P/"DX". Logs due: Apr 30. Rules <http://www.okdxa.org/>

North Dakota QSO Party--Phone,CW, from Mar 19, 1800Z to Mar 20, 1800Z. Bands (MHz): 1.8-28, 50,144. Exchange: RST and ND county or S/P/C. Logs due: May 1. Rules <http://www.w0nd.com/>

Virginia QSO Party--Phone,CW,Digital, from Mar 19, 1800Z to Mar 21, 0100Z. Bands (MHz): 1.8-28, 50-440, Frequencies: CW 1.805, 50 kHz+ band edge; Phone 1.845,3.86,7.26,14.27,21.37,28.37; 50.130, clg freq 144/220/440. Exchange: Serial and VA county/city or S/P/C. Logs due: Apr 15. Rules <http://www.qsl.net/sterling>

CQ WPX SSB Contest--Phone, from Mar 26, 0000Z to Mar 27, 2400Z. Bands (MHz): 1.8-28. Exchange: RS and serial. Logs due: 28 days. Rules <http://www.cqwpx.com/>

VHF+ CONTESTS

Oklahoma QSO Party--Phone,CW,Digital, from Mar 19, 1300Z to Mar 20, 0200Z and Mar 20, 1400Z to Mar 20, 2000Z. Bands (MHz): 3.5-28, 50, Frequencies: Multiple operating periods; CW 3.545, 7.045, 14.045, 21.045, 28.045; Phone 3.860, 7.260, 14.260, 21.360, 28.360. Exchange: RS(T) and OK county or S/P/"DX". Logs due: Apr 30. Rules <http://www.okdxa.org/>

North Dakota QSO Party--Phone,CW, from Mar 19, 1800Z to Mar 20, 1800Z. Bands (MHz): 1.8-28, 50,144. Exchange: RST and ND county or S/P/C. Logs due: May 1. Rules <http://www.w0nd.com/>

Virginia QSO Party--Phone,CW,Digital, from Mar 19, 1800Z to Mar 21, 0100Z. Bands (MHz): 1.8-28, 50-440, Frequencies: CW 1.805, 50 kHz+ band edge; Phone 1.845,3.86,7.26,14.27,21.37,28.37; 50.130, clg freq 144/220/440. Exchange: Serial and VA county/city or S/P/C. Logs due: Apr 15. Rules <http://www.qsl.net/sterling>

==> LOG DUE DATES

16 March through 29 March

March 17 - NAQCC-EU Monthly Sprint
<http://naqcc-eu.org/SprintHelp/SprintRules.pdf>

March 18 - YL-ISSB QSO Party, CW and SSB
<http://www.ylsystem.org/qsoparty/qsodates.htm>

March 18 - SKCC Weekend Sprint <http://www.skccgroup.com/sprint/wes/>

March 19 - North American Sprint, RTTY
<http://www.ncjweb.com/sprintrules.php>

March 20 - AWA Amplitude Modulation QSO Party
<http://www.antiquewireless.org/pdf/2011am_rules.pdf>

March 21 - ARRL School Club Roundup
<http://www.arrl.org/school-club-roundup>

March 21 - DARC 10-Meter Digital Contest
<http://www.darc.de/referate/ukw-funksport/bild-und-schrift-wettbewerbe/corona-maerz/teilnahmebedingungen/>

March 21 - ARRL International DX Contest, CW
<http://www.arrl.org/arrl-dx>

March 26 - HA3NS Sprint Memorial Contest
<http://radioamator.honlapepites.hu/?PHPSESSID=e57dd37c356355de9489e83e42&p=1280>

March 29 - REF Contest, SSB
<http://concours.ref-union.org/reglements/actuels/reg_cdfhfdx.pdf>

==> 2011 NATIONAL HURRICANE CONFERENCE AMATEUR RADIO ACTIVITIES

The National Hurricane Conference <http://www.hurricanemeeting.com/>
will be held April 18-22, at the Hyatt Regency hotel in Atlanta,
Georgia. There will be several Amateur Radio activities going on during
the week. The National Hurricane Conference leadership recognizes the
valuable contribution of Amateur Radio and has again invited us to
participate with two sessions. This is always a great opportunity for
Amateur Radio.
```

On Monday, April 18, from 1:30 pm to 5:00 pm, the main Amateur Radio session titled "Amateur Radio Training Sessions: Disaster Communications Before, During and After Hurricanes" will be held.

On Tuesday, April 19, from 8:30 am to 10:00 am, an Amateur Radio session designed for Emergency Management agencies titled "Amateur Radio Rap Session --The Emergency Manager's Hidden Resource" will take place. All radio amateurs are invited at no cost to attend these National Hurricane Conference Amateur Radio sessions.

On Monday evening, April 18, from 7:00 pm to 9:00 pm, the ARRL Southeastern Division, the Georgia Tech Amateur Radio Club, Atlanta Radio Club, and several local ARES groups will host an interactive, free "NHC Workshop" for ARES and other interested Amateur Radio operators. Participants will be able to meet other like-minded radio amateurs and the presenters of the Hurricane Conference Amateur Radio sessions. The agenda: introductions, conference presenters summarize the NHC Amateur Radio presentations, emergency communications discussion, questions and answers, and door prizes.

Whether or not you are able to attend the conference during the day, you are invited to this event to hear from and meet the conference presenters and learn what went on at the conference. This workshop will be held on Georgia Tech's campus at Building 167, the Molecular Science and Engineering Building, in room G011. See the campus map <http://gtalumni.org/map/>.

For additional information see:

National Hurricane Conference <http://www.hurricanemeeting.com/>

2011 National Hurricane Conference Brochure PDF <http://www.hurricanemeeting.com/Documents/2011%20NHC%20Brochure.pdf>

National Hurricane Conference Flyer <http://www.southeastern.arrl.org/NHC_Events_Flyer2011.pdf>

ARRL Southeastern Division <http://www.southeastern.arrl.org/>

Hurricane Conference presenters are:

Julio Ripoll, WD4R, WX4NHC Amateur Radio Assistant Coordinator, National Hurricane Center <http://www2.fiu.edu/orgs/w4ehw/>

John McHugh, K4AG, Coordinator for Amateur Radio, National Hurricane Center, WX4NHC

Rob Macedo, KD1CY, Director of Operations for the VoIP Hurricane Net <http://www.voipwx.net/> and ARRL Section Emergency Coordinator, Eastern Massachusetts

Dennis Dura, K2DCD, Assistant Director of Operations for the VoIP Hurricane Net

Greg Sarratt, W4OZK, ARRL Southeastern Division Director

We encourage you to visit all the activities you can, learn more about Amateur Radio emergency communications and meet the people doing it. Hope to see you there! -- Greg Sarratt, W4OZK, ARRL Southeastern Division Director and Andrea Hartlage, KG4IUM, ARRL Southeastern Division Vice Director

==> TWITTER, OTHER METHODOLOGIES FOR ARES ALERTING

South Carolina

Greenville County, South Carolina ARES has been using Twitter <http://www.twitter.com/> for group alerts for a couple of years. County EC Johnny Allison, WD4DYH, and I set up a greenvilleares account on Twitter for this purpose only.
There are a few things that must be done for this to work. Your group user must NOT "follow" any other user so only YOUR posts are on the account's page. Anyone interested in getting the alerts from your group on their cell phone or other mobile device must set up a Twitter account and "follow" your ARES group. In the Twitter setup, there is a "mobile" option that allows you to receive alerts on your mobile device. You can turn this feature on or off for the entire account or you can select which users you are following whose posts will be forwarded to your mobile messaging. In my case, my wife's posts and the ARES group posts are the only ones I elect to forward to my phone. The options on the "mobile" tab are self-explanatory.

We run a test on the first of every month to make sure that the group is receiving the alerts, and so far each time we have needed it for real alerts, it has worked. Most alerts instruct the group to tune to our local 2-meter repeater, since you can't give a lot of info in 140 characters! We do have a fairly small group, but anyone can follow @greenvilleares to see how we operate it. -- Robert Martin, WA4HRK, Easley, South Carolina, Greenville ARES

Other Alerting Methodologies

While Twitter is certainly the easiest of the social networks to use, it's not the only thing going. Benefits of Twitter include NO smart phone required, one SMS to the team (and the world), and tracking keywords, for example: #Altus would get an SMS when that keyword #Altus is sent.

Google Latitude <http://latitude.google.com> is great for tracking operators around the field (like APRS) but with very limited messaging capability.

I like FourSquare <http://www.foursquare.com> because you can notify only your friends or your friends and Twitterland or no one, when you update. I also use LOOPT <http://www.loopt.com/> for messaging and tracking some of my family. You can use it (like FourSquare) without setting up Twitter accounts. Loopt also works with Facebook.

Facebook, while I've had concerns about their ability to keep my data secure, offers private pages that only members can join. Our SKYWARN

group here has a SKYWARN Page (search Altus SKYWARN).

Set up an e-mail list on YahooGroups <http://groups.yahoo.com/> or GoogleGroups <http://groups.google.com/>. Have the user subscribe. Let them decide how they want to get their information; for example, by e-mail and/or text to phone. One e-mail goes to all 60 of our subscribers. It's free of fees or charges. If you do this, have more than one moderator. While the user can change their own information, my experience shows that some won't.

One caveat to social media (and FourSquare) is that, if the team is using it, the team must set-up one account for team use and another account for personal use. In other words, the team must decide what service to use and strictly use only it. When I start posting personal stuff on the team account, it will quickly reduce the benefit.

I have used CallingPost <http://www.callingpost.com>, a prepaid service good for small groups. The benefit for small groups is their pricing is under $25 for 200 calls. The detractor is there's no way to call out from midnight to 0600. As a volunteer, I have experienced only three times in ten years when that was a problem. Register online <http://www.callingpost.com%20>and use the referral code 8002197092 for 10 free calls. The referral code is the same as their tollfree number.

The City of Altus uses Blackboard Connect. <http://www.blackboard.com/Platforms/Connect/Products/Blackboard-Connect.aspx>If the ARES group would contact their local emergency management office, it may be possible to piggyback on the City or County users account. Blackboard may offer a competitive product for small groups. Contact them at 800-213-7168. -- Lloyd Colston, KC5FM, Director, Altus Emergency Management <http://www.cityofaltus.org>, Altus, Oklahoma

==> N5FDL: TEN SURE-FIRE WAYS TO GROW YOUR ARES GROUP

This month, I'll share some simple ideas for growing your ARES group. You can probably implement most or all of them.

Location - Having a great location is one of the keys to success of ARES groups. Among the most important things a served agency can provide to your group is a place to hold meetings and events. Finding places to "do things" was the most difficult part of getting our group started. Now that we are established, it isn't a problem--but, we are careful to provide special support to the groups that support our program by providing meeting locations.

Dinner Meetings - If you haven't considered holding dinner meetings, you should. I was initially reluctant because of the expense to members. I didn't want anyone to avoid our meetings because they couldn't afford an expensive meal or would be unable to find something to eat at the restaurant I chose. One way to handle this is to separate mealtime from program time or select a restaurant that is OK with someone just ordering a cup of coffee. This has not turned out to be a problem. Dinner meetings can keep groups alive when non-dinner meetings

will not.

HamCrams - Creating new, emergency-minded hams may be the best way to grow your group and goes hand-in-hand with the next item. One-day licensing classes don't teach someone how to be a ham, but the license makes someone trainable and worth investing in.

Make Friends - I am a big proponent of linking ARES to Community Emergency Response Team <http://www.citizencorps.gov/cert/> (CERT) groups, church emergency preparedness, Scouts and anyone else who we can help get a license. I don't expect these people to become "ham first" volunteers, but they add significantly to the number of trained persons we can call upon. And some really do get interested in Amateur Radio as a primary hobby.

Don't Say No to People Who Want to Make You Look Good - If someone has an idea that will make your ARES group look good, by all means let them. Good judgment matters--the person has to actually be able to deliver, but make it known you are open to good ideas that aren't your own. And bask in the glow of their success. This is where future leaders come from.

Be more than just an ARES group - There is, I am led to believe, more to ham radio than emergency stuff. We've licensed lots of HamCram folks and it is a fair complaint that we don't teach them enough radio. So, I've developed events that combine emergency training with other ham activities, like antennas, DXing, and contesting. Just did the first one.

Stay in touch - I use a variety of tools to keep in touch with our members, would-be members, inactive members, area clubs and other groups. I have websites (sjham.com <http://www.sjham.com/> and n5fdl.com <http://www.n5fdl.com>), multiple free Yahoo Groups <http://groups.yahoo.com/> and have recently begun using a mailing service to distribute newsletters. I am using madmimi.com <http://www.madmimi.com/>, though mailchimp.com <http://www.mailchimp.com/> looks like a good option and offers small mailings for free and a discount for non-profits (including ARES groups). All handle subscriptions and unsubscriptions automatically.

Do Something - This seems obvious, but the more you do the more involved your members will be and the more people you will be exposed to. You will probably have to invest in some small events before attendance picks up. Accept that it may only be you and three friends to begin with, but consistency leads to growth. Take advantage of opportunities that present themselves to tie-in with other people's events and turn them into your own. Field trips to events in nearby cities are an opportunity to involve your members. Training offered by other groups, such as ICS classes, are another opportunity.

Watch for Inflection Points - This is when your program reaches "critical mass" that presents opportunities to do things that were not

possible previously, such as adding served agencies or new programs. This deserves more discussion in a future post. Just be aware when the "next big thing" becomes possible. Think big.

This isn't a growth strategy per se, but it is often much easier to hold on to an existing member or reenergize an inactive one than to bring someone totally new into your group. Interest ebbs and flows. Accept this but always remain in touch so that when someone's interest returns you're ready to welcome him or her back. (Eventually this may happen to you - the topic for a future essay).

How have you grown your group? Let me hear from you! E-mail: n5fdl@arrl.net. Visit my blog at n5fdl.com <http://www.n5fdl.com>. -- David Coursey, N5FDL, EC San Joaquin County (CA)

==> SPECTRUM MANAGEMENT BILL THREATENS AMATEUR FREQUENCIES

On February 10, Representative Peter King (R-NY-3), Chairman of the House Homeland Security Committee, introduced HR 607, the Broadband for First Responders Act of 2011. The bill been referred to the House Energy and Commerce Committee, which handles telecommunications legislation. HR 607 addresses certain spectrum management issues, including the creation and maintenance of a nationwide Public Safety broadband network. As part of that network, the bill provides for the allocation of the so-called "D-Block" of spectrum in the 700 MHz range for Public Safety use.

The D-Block consists of two, 5 megahertz-wide segments of spectrum (758-763 and 788-793 MHz) that became available when the FCC ended analog television broadcasts in June 2009 and reallocated the 698-806 MHz band for Public Safety and commercial broadband. It was anticipated that the D-Block would be auctioned for commercial use. There are several bills in Congress providing for the allocation of the D-Block for Public Safety use, and HR 607 is one of those. But HR 607 uniquely provides for the reallocation of other spectrum for auction to commercial users, in order to offset the loss of revenue that would occur as the result of the allocation of the D-Block to Public Safety instead of commercial auction. HR 607 lists the paired bands of 420-440 MHz and 450-470 MHz among the bands to be reallocated for commercial auction within 10 years of its passage. More here <http://www.arrl.org/news/spectrum-management-bill-threatens-amateur-frequencies>. - ARRL Letter

==> CELEBRATED TAMPA BAY AREA EM RETIRES

Larry Gispert, KR4X, recently retired as the Director of Emergency Management for the County of Hillsborough, Florida (Tampa Bay area). His contributions have seen him take on leadership positions in regional, state and national emergency management organizations. He has been a presenter at major national conferences around the country and in Washington, DC.

The Hillsborough Board of County Commissioners recently presented Gispert with a proclamation for his work. He was commended for his straight talk approach when dealing with Emergency Management issues. The local media regarded him as a jewel for real information. When the local world seemed to be coming apart, Gispert could always be relied upon to be the calm in the storm.

Gispert's four years as a Radioman in the U.S. Coast Guard made him an avid CW operator. He is a member of the Radio Association of North Tampa (RANT) and the Tampa Amateur Radio Club (TARC).

Professionally, Gispert had fully integrated Amateur Radio into all aspects of the EOC's operations. He was in the vanguard of implementing digital emergency radio networks in Florida. In retirement, Gispert intends to remain radio active, operating and experimenting. Here is a YouTube video <http://www.youtube.com/watch?v=MrYbtirv7XE> about Gispert. - Pete Kemp, KZ1Z, Wesley Chapel, Florida

==> NORTHERN FLORIDA ADDS D-RAT REFLECTOR

A new D-RAT <http://www.d-rats.com/> reflector has been added to the digital emergency communications assets of the ARRL Northern Florida section, reports Section Manager Paul Eakin, KJ4G: "We are happy to announce that in Tallahassee, a team of amateurs have installed the D-Rat reflector for ARES use in emergencies and for general amateur use at all other times." The new system is set up for use on the Internet and over the air on the K4WAK D-Star repeater.

The asset provides both mobile and Internet operators with the ability to communicate among one another, along with the Florida State EOC station. In the next few weeks, an e-mail function will be established to coincide with Winlink 2000 systems for both mobile operators and Internet users. The file transfer function is available now.

Two servers were installed, one being made public and a back up that can be activated if needed. The Florida EOC is equipped to handle full time service both on the local D-Star repeater and on the Internet with local ARES volunteers.

This system augments other data assets in the northern part of the state: APRS <http://www.aprs.org/>, SEDAN <http://www.fla-sedan.com/>, and W2K <http://www.winlink.org/>.

The multi-server system is being made available to all three ARRL sections in Florida and to neighbors in Georgia and Alabama for mutual assistance planning and operations. In an emergency, any section or district outside of the three states can notify the administrator of their needs and use the reflector.

The system employs the latest version of D-Rats found at http://d-rats.com/download/beta with this version to be used: d-rats-0.3.3b5-installer.exe.

Eakin thanked the Florida State EOC staff for their support and contributions to this project, as well as others who have made it possible. Special thanks went to Dan Smith, KK7DS, for his hard work in the design and implementation of this service.

==> HELP WANTED: TRAINING TOPICS FOR N5FDL

I have been wanting to do some short recorded and scripted "training topics" that people could use on ARES nets. I want to call them "The ARES Minute" and have them run about two minutes. I have been stuck on what topics I should do in the first batch of ten programs. Can readers suggest ideas that I can get started on? Each needs to be easy to describe in one sentence and teach in 90 seconds. Help! - David Coursey, N5FDL <n5fdl@arrl.net>, EC San Joaquin ARES, California

==> ARES E-LETTER NOW IN AUDIO FORM

The ARES E-Letter is now available in audio form. There are three editions currently available, including the most recent recording of the February 16 ARES® E-Letter. Edited for audio by Al Brown, KZ3AB, the ARES® E-Letter is voiced by Tony Riggs, W1FHN. Brown was licensed in 1966. He was a member of the White House Press Corps before retiring from the International Broadcasting Bureau/Voice of America (IBB/VOA). Licensed since 1955, Riggs has worked in both the commercial and public broadcasting venues. He retired after 21 years as a staff announcer and news anchor with the VOA. With more than 35,000 subscribers, the ARES® E-Letter is written by Rick Palm, K1CE <http://www.qrz.com/db/k1ce> and is published each month. Click here <http://www.arrl.org/ares-e-letter-audio-version> for the audio version of the ARES® E-Letter. - ARRL Letter

ARES/EmComm Survey

The first ARES/EmComm Survey (from last month) has garnered nearly 900 resposnes. This particular survey is still open! If you haven't checked it out yet, please access the poll by clicking here <http://www.arrl.org/ares-monthly-poll>. ARRL Headquarters will be reporting the results soon.

==> K1CE FOR A FINAL

It's T minus 3 months and counting to the launch of hurricane season -- 'nuff said! 73, Rick K1CE, Flagler County, Florida

RAC Bulletin 2011-007E - Ontario South Director's Election
2011-03-17

March 16, 2011

Ontario South Director's Election:

Two nominations were received for this position. Following a review of the documentation submitted and taking into account the constitutional and election process requirements the Committee determined that the nomination papers were complete and in order for Mr. Jeffrey Stewart, VA3WXM, and Mr. Nelson D.H. Jenking , VA3NDJ.

The Committee recommended a Ballot by Mail pursuant to Article 6 (Method of Election) in the Constitution, for Director, Ontario South Region for the completion of the 2010-2011 term. Ballots will be mailed to the applicable postal codes from the RAC Office in the near future.

Paul Burggraaf VO1PRB
RAC Corporate Secretary

** Help in EME Section from Lins, PA3CMC now as well **

We would like to inform you that we have a slight change of the
editors of the EME sections at MMMonVHF: Responcable in future for
the section "EME" is Guido, DL8EBW accompanied by Lins, PA3CMC to
get up the EME page more up to date... So please do welcome the
change in aim of more activity and attractiveness... In future you
will find here more RUMORS and INFOS taken by CHATS and direct from
USER announces - you are welcome to send your input! Please do use
our Contact Form (http://www.mmmonvhf.de/kontact.php) to reach the
EME editor! - SOURCE: The MMMonVHF Team

** The 144 MHz EME NewsLetter - Current Issue March 2011 **

Since 2003 DF2ZC publishes the 144 MHz EME NewsLetter. This is
a free service for the EME community. Bernd, DF2ZC, informed us
that the latest edition of the EME-Newsletter is now available
at: http://www.df2zc.de/newsletter - EMENL201103 [748 KB] 73
SOURCE: tnx to Bernd, DF2ZC to MMMonVHF

** Super Full Moon **

Mark your calendar. On March 19th, a full Moon of rare size and beauty
will rise in the east at sunset. It's a super "perigee moon"--the
biggest in almost 20 years. "The last full Moon so big and close to
Earth occurred in March of 1993," says Geoff Chester of the US Naval

Observatory in Washington DC. "I'd say it's worth a look." Full Moons vary in size because of the oval shape of the Moon's orbit. It is an ellipse with one side (perigee) about 50,000 km closer to Earth than the other (apogee): diagram. Nearby perigee moons are about 14% bigger and 30% brighter than lesser moons that occur on the apogee side of the Moon's orbit. Read all at:
http://science.nasa.gov/science-news/science-at-nasa/2011/16mar_supermoon/

** Great news about LU7DZ logs - WA4NJP info**

Ray did sent following message from the MMM Website: This is to inform the VHF comunity that Steve, N4PZ, while in Argentina has in his hand the logs of LU7DZ. I have offered to Steve to be the manager of these logs, I will make an anouncement as to when cards will be sent after I compile a list of calls...this will not be fast but I will try to be complete - SOURCE: tnx to Ray Rector WA4NJP direct to MMMonVHF

** Don, G3JHM SILENT KEY **

Iï¿½m saddened to hear that Don G3JHM has passed away. I last went to see him in his nursing home in Alton last July after his first stroke and I understand he had several more in the following weeks. It was clear that the stroke had affected him quite severely but he was still the super-keen VHF DXer to the end in that all he wanted to hear about during my visit was what he was missing on 6 and 4M. He took great pleasure from hearing about all the far-east QSOs that had taken place last summer and the D44 QSOs on 4M. He said that he still remembered the last 6M BBQ he came to and wanted to attend this yearï¿½s event which I told him I would be holding again. Sadly, that is not to be We will all miss Don as one of those 6M call signs we will never forget. SOURCE: Chris G3WOS via The UK Six Metre Group Announcement

BY8 EME Expedition as BJ8TA at NL97UT and OL14KQ
LATEST NEWS from Alan Kung, BA1DU, dated 2011-03-11: AMSAT-China is organizing some enthusiasts from its members to come to southwest China for experiments of EME and amateur satellite communications. The expedition team will use special technology experiments amateur radio call sign BJ8TA. BJ8TA team will be Shangri-La County(NL97ut), Yunnan Province of China during March 20-23. it will be the first

time amateur radio EME communications in grid NL, the communications scheme on the 6m, 2m and 70cm bands, using Yagi antennas with PA of one kilowatt. And then, the team will move to Yunnan Astronomical Observatory of the Chinese Academy of Sciences in Chengjiang county, it is located in grid OL14kq. The EME communications will use eleven meters diameter radio telescope antenna with gain of 29dbi on 70cm band. operations will be from March 28 to April 1. BJ8TA team will be also active on the available satellites, including AO-51, VO-52, AO-7 AO-27, FO-29, SO-50, SO-67 etc, during the expedition period.

The 9N7WL 2m EME operation will take place as part of the 9N7AN activity from the High View Resort in Dhulikhel, which is located about 25 km from Kathmandu, the capital of Nepal. This will be the first time that the DXCC entity Nepal and the Maidenhead main locator NL is activated on the 2m band via the moon! EME operation is scheduled to start on March 30th, 2011. Moonrise at 9N7WL will be at 3.30 UTC. Common moon with the US The most difficult part of the world to reach by EME during our stay in Nepal will be thesouthern part of the USA. There is no common moon with the state of Texas until Sunday April 3rd! On April 3rd there is a short window around 0000z when there is moonrise in Nepal and moonset in Texas. The following days the window size is increasing and on April 7th - the last day of our DXpedition - there is a 1,5 h window around 0300z (moonrise at 9N7WL) and a 1 h window around 1530z (moonset at 9N7WL). *This all assumes an ideal take off. The take off angle to the east (moonrise) is ex-pected to be low. To the west the minimum take off angle may be quite high, decreasing window size of common moon further at moonset..

** SJ9WL AND LG5LG, MOROKULIEN STATION, JO69CW **

Operators Hugo/PA2HW, Robert/PA2RDK, Frank/PA3CNO, Paul/PA3DFR and
Gert/PE0MGB will activate the special Swedish/Norwegian peace
monument "Morokulien" as LG5LG and SJ9WL between April 10-16th.
Activity will be on 160-6 meters using CW, SSB and the Digital modes.
The callsign will change every day at 0000z. An award will be
available for 2 contacts with each call on different bands and
different days. QSL via Bureau or direct to LA4EKA. For more details
on this station, visit: http://www.sj9wl-lg5lg.com
SOURCE: Ohio/Penn DX Bulletin #1002

** NAMIBIA, SPECIAL EVENT STATION **

The special event station V521NAM will be active on Mar 19-21 to
celebrate 21 years of the independence of Namibia. The "Namibian
Amateur Radio League" (NARL) was founded in 1990 as well. The station
will be QRV in CW, SSB and PSK on 80m-10m and also on 6m/2m/70cm and
via satellites. QSLs via the NARL QSL bureau, direct or via eQSL.
SOURCE: DXNL 1719 (Mar 16, 2011)

** Cameroon, TJ, Special Event **

Henry, TJ3AY, is now active with the special callsign, TJ3FC, until
March 30th. Activity is to commemorate the 51st anniversary of the
"Francophonie". He was spotted this past week on 80/40/12/10/6 meters
SSB. A special QSL cards has been printed (see QRZ.com). QSL via F5LGE

** Mariana Island, KH0 qrv HF and 6m **

LATEST NEWS from Kirk, WE8A, dated 2010-03-15: This is Kirk, WE8A.
A friend of mine, Yuu, K8RLY has to cancel his trip to KH0 with me
this time, so please modify the information at ADXO as follows :
WE8A as WE8A/KH0. 80m ï¿½ 6m SSB and CW. Focus on WARC, QSL: Direct
only to : 5-1-35, Daikaidori, Kobe, 652-0803 JAPAN - Please do not
send to the US Buro or JA Buro. (March 30 through April 2 2011
operation) Best regards. SOURCE: Bill, NG3K, direct to MMMonVHF

** XF2P from Isla de Lobos (IOTA NA-221, WW Loc. EL11JL) **

A group of enthusiastic Mexican ham radio operators, Ismael XE1AY, Gustavo XE1KKK, Francisco Javier XE1P, Ricardo XE1RZL, Ricardo Raymundo XE1SOV, Fernando XE1VGC, Jose XE1UYU, Martin XE1UZH, Modesto XE1UZU, Juan Manuel XE2IA, Jose XE2IVG and Ricardo XE3NMC will be active from Isla de Lobos (IOTA NA-221, WW Loc. EL11JL), Veracruz State, between 29th April and 1st May 2011. They will also activate the Lobos Island lighthouse (ARLHS MEX-035, TWLHD WLH XE-016 WLOTA 0920). QRV on all HF bands, plus 6 metres and AO27, AO51 and SO50 Satellites. Modes: CW, SSB and RTTY. QSL via XE1AY.
SOURCE: ICPO Bulletin (11-18 March 2011)

** A52JY and friends active from Bhutan (Grid Loc. NL47) **

Mat JA1JQY (A52JY), Sasi JA1KJW (A52KJ) and Kuni JA8VE (A52VE) will be active from Bhutan (Grid Loc. NL47) on 19-26th April 2011. Plans are to be QRV on 160-6 metre SSB, CW and RTTY. QSL via the operator's home callsign. SOURCE: [NG3K] via ICPO Bulletin (11-18 March 2011)

** 3D2A qrv at Viti Levu Island (IOTA OC-016, Grid Loc. RH82) **

Eddie VK4AN, Kenneth OZ1IKY, and others will be active as 3D2A from the Nadi Bay Resort, Nadi Bay, Viti Levu Island (IOTA OC-016, WLOTA 0055, Grid Loc. RH82), Fiji, between 15th March and 2nd April 2011. Activity will be on all bands (160-6m) and modes but with a concentrating on the lower bands. Operations will include participation in the BARTG RTTY and CQ WPX SSB DX Contests.
QSL via VK4AN, direct or bureau. More info at: pacific-dxers.com/

==> + PUBLIC SERVICE: AFTER DEVASTATING EARTHQUAKE, JAPAN'S RADIO
AMATEURS PROVIDE COMMUNICATIONS SUPPORT

After the 8.9 earthquake that struck near Sendai, Japan at 2:46 PM
JST (0546 UTC) on Friday, March 11, the island nation is trying to
recover. Soon after the earthquake -- which the US Geological Survey is
calling the largest to hit the island nation in 140 years -- Japan has
been rocked by tsunamis and power outages caused by trouble at a
nuclear power station. Reports from Japan tell of phone and Internet
service still up in most parts of the country. Even so, the Japan
Amateur Radio League (JARL) -- that country's IARU Member-Society --
has asked that 7.030 MHz be kept clear for emergency use. Other reports
are asking that these additional frequencies be kept clear: 3.525,
```

7.030, 7.077, 7.087, 7.097, 14.100, 21.200 and 28.200 MHz.

JA1RL, the JARL HQ station -- along with other amateurs throughout the island nation -- is maintaining the effort to support the disaster relief operation, according to IARU Region 3 Secretary Ken Yamamoto, JA1CJP. "In less damaged areas, the electric power supply is being restored gradually and local amateurs have started to establish stations at shelters," he said. Yamamoto said that JA1RL continues to operate as an emergency traffic center on 7.030 MHz, as well as 2 meters and 70 cm. It is receiving and reporting news from Japanese amateurs who are in the affected area. Using battery power or small generators, Japanese stations are active and are using various frequencies to exchange rescue and disaster relief operation information with JA1RL and others.

"While 3.525, 7.030, 7.043 and 7.075 MHz have been mentioned as in use, it's wise to keep those -- and all of the Center of Emergency frequencies -- clear of normal and non-urgent traffic," said IARU Region 3 Disaster Communications Committee Chairman Jim Linton, VK3PC, who added that there is no call for additional foreign radio amateurs in Japan.

For more on how radio amateurs in Japan are providing communications support after earthquake, click here <http://www.arrl.org/news/radio-amateurs-in-japan-provide-communications-support-after-earthquake>.
For information on how US amateurs are helping out, click here <http://www.arrl.org/news/japan-asks-radio-amateurs-to-keep-frequencies-clear-as-country-goes-into-recovery-mode-after-devasta>.
For more on how Japan, Hawaii and the Western US dealt with the immediate aftereffects of the earthquake and tsunami, click here <http://www.arrl.org/news/massive-earthquake-hits-japan-tsunami-warnings-issued>.

==> + YAESU, ICOM AND KENWOOD ISSUE STATEMENTS REGARDING EFFECTS OF EARTHQUAKE ON OPERATIONS

In a letter to the Amateur Radio community, Vertex Standard Chief Executive Officer and President Jun Hasegawa expressed his "sincere appreciation to all of you for your kind words and thoughts about us" after the devastating 8.9 earthquake that struck Japan last week <http://www.arrl.org/news/massive-earthquake-hits-japan-tsunami-warnings-issued>.
Vertex Standard is the parent company of Yaesu. All Vertex Standard employees and their families are safe and unhurt, Hasegawa said, but the company has not been able to reach many of their dealers and subcontractors who are located on the coast area: "We just hope that they are alive." Hasegawa said that a Vertex Standard factory in Fukushima was damaged in the earthquake. Even though the factory is not located near the coast and the damage was minimal, he said that Vertex Standard has decided to "disable the operation at this moment." Saying that they are working very hard to get the factory back to its normal

operation, Hasegawa said that "it may take one to two weeks to restart operation in the Fukushima factory. I would like to ask for your understanding and cooperation at this time."

According to a press release <http://www.icomamerica.com/en/features/earthquake.aspx>, no one from ICOM is known to be injured. No damage has been reported at ICOM's headquarters in Osaka, or at either of their two main factories in Wakayama; both Osaka and Wakayama are located far south of the most severely affected areas. The branch offices in Tokyo and Sendai, however, did suffer some minor damage. "Most of ICOM's facilities and systems are ready to get back to normal business, but supplier logistics, commuting issues and future power disruptions will affect our company," the press release said. "It is too soon to tell how big an impact the earthquake and its aftermath will have on ICOM. We appreciate your interest and concern."

"Thankfully, our staff in Japan is safe due to earthquake preparedness and the special construction of our buildings," said Kenwood USA President Junji Kobayashi on the Kenwood website <http://www.kenwoodusa.com/NewsArchive/2011/20fe1b7b-fe8a-4a94-b371-bb97d0fff096>.
"Power outages and interruption of mass transit have kept most of Kenwood's staff at home since the earthquake; however, we expect the infrastructure to improve in the coming week and our operations to fully resume accordingly. We appreciate the concern for our employees expressed by all those who have contacted us." Kenwood's primary office facilities in Yokohama and Hachioji were not damaged, due to their proximity further south and west of the quake's epicenter. Since Kenwood's primary manufacturing facilities are in Malaysia, electronics production is unaffected.

==> + FCC NEWS: ARRL FILES PETITION, REQUEST FOR TEMPORARY WAIVER WITH FCC REGARDING VHF VOICE AND DATA EMISSIONS

On Tuesday, March 15, the ARRL filed a Petition for Rulemaking and a Request for Temporary Waiver to authorize the use of single-time-slot Time Division Multiple Access (TDMA) emissions in the amateur bands at and above 50 MHz, wherever multiple-time-slot TDMA is authorized. The Petition asks the FCC to allow those amateurs who are presently using a Motorola narrowband (12.5 kHz) digital land mobile system -- commercially marketed as MotoTRBO -- to be used legally. Because of some restrictions in the Part 97 rules, the TDMA repeaters (which are multiple-time-slot devices) are legal, but the mobiles and portables are not because the emissions used (single-time-slot TDMA) are not authorized anywhere, due to the emission designator. Read more here <http://www.arrl.org/news/arrl-files-em-petition-em-em-request-for-temporary-waiver-em-with-fcc-regarding-vhf-voice-and-data-e>.

==> + FOCUS ON YOUTH: MEET NEW ARRL YOUTH EDITOR STERLING COFFEY, N0SSC

The ARRL welcomes its new Youth Editor, Sterling Coffey, N0SSC, of Warrenton, Missouri. Coffey is a freshman at the Missouri University of Science and Technology in Rolla, where he is studying electrical engineering. He said that since the age of five, he has been "intrigued and interested" in radio communication, crediting a gift of walkie-talkies "with a button and a letter diagram for Morse code." Read more here <http://www.arrl.org/news/youth-hamradio-fun-on-becoming-a-ham>.

==> + ARRL RECOGNIZES: NOMINATIONS FOR ARRL AWARDS NOW OPEN

Each year, the ARRL Board of Directors has the opportunity to select recipients for a number of awards in various categories that honor Amateur Radio operators. The nomination period is now open for those ARRL awards that recognize educational and technological pursuits in Amateur Radio. There are also awards to honor a young Amateur Radio operator and an outstanding ARRL Section Manager. Read more here <http://www.arrl.org/news/nominations-for-arrl-awards-now-open>.

==> + ON THE AIR: W1AW ANNOUNCES SPRING SCHEDULE

With the switch from Standard Time to Daylight Saving Time, W1AW Station Manager Joe Carcia, NJ1Q, has updated the W1AW operating schedule to reflect the change. The Eastern times have not changed, but the UTC times have. Read more here <http://www.arrl.org/news/w1aw-announces-spring-operating-schedule>.

==> ARRL PUBLICATIONS: EXAM SOFTWARE NOW INCLUDED WITH ARRL LICENSE MANUALS

Get a jump on your Amateur Radio license upgrade with ARRL license manuals. Now the manuals for the Technician, General and Amateur Extra class licenses include a CD-ROM, complete with exam review software. Each manual includes the complete question pool for its license class, including detailed explanations for all questions and answers. The ARRL Ham Radio License Manual -- Second Edition (valid through June 30, 2014), The ARRL General Class License Manual -- Sixth Edition (valid through June 30, 2011) and The ARRL Extra Class License Manual -- Ninth Edition (valid through June 30, 2012) will help you earn the privileges that come with upgrading your Amateur Radio license. Read more here <http://www.arrl.org/news/exam-software-now-included-with-arrl-license-manuals>.

==> + AMATEUR RADIO IN SPACE: HAMS INVITED TO TRACK SATELLITES

In November 2010, five research satellites were carried to orbit <http://www.arrl.org/news/hams-invited-to-listen-for-new-satellites> aboard a Minotaur V rocket from Kodiak Island, Alaska. Two of these satellites -- FASTRAC 1, known as "Sara Lily" and FASTRAC 2, referred to as "Emma" -- entered orbit as a single nanosatellite, but on March 15, scientists sent the command to have them separate. According to FASTRAC Student Program Manager Sebastian Munoz, KE5FKV, students at the University of Texas will be confirming the separation as the satellites pass: "We started one of the most exciting phases of our

project by separating both of our girls so that they can compute
on-orbit real-time relative navigation solutions while both of them are
freely drifting from one another." Munoz said that they will continue
to update the satellites' two line elements (TLEs) on their website
<http://fastrac.ae.utexas.edu/for_radio_operators/users/phpBB3/predictedorbit
.php>
for those radio amateurs interested in tracking the two nanosatellites.
"I want to thank the ham community all over the world for supporting
our project," Munoz said. "Your support has been incredible and we
really value it. We really appreciate all of your help so far and we
hope that we can continue to count on it."

==> SOLAR UPDATE

Tad "And look, the Sun is in the sky
<http://www.youtube.com/watch?v=4JDNTS2wHHo>" Cook, K7RA, reports: The
average daily sunspot numbers this week plummeted 45 points to 69,
while the average daily solar flux was off nearly 25 points to 114.5.
Last Friday, March 11, the planetary A index reached 40 due to a
powerful X1.5 class solar flare at 2323 on March 9. This is another
definite indication that Solar Cycle 24 is ramping up. After four years
of no X-class flares, there have been two in the last month. The past
few days have seen very quiet geomagnetic conditions, with the K index
in most locations at 0. The latest forecast shows quiet conditions with
planetary A index around 5 until March 27-30, when the predicted
planetary A index is expected to rise to 7, 7, 19 and 7. The predicted
solar flux for March 17-26 is 90, 85, 80, 85, 90, 95, 100, 110, 85 and
85. This Sunday is the spring equinox in the northern hemisphere, a
welcome sign for DXers everywhere. Look for more information on the
ARRL website -- including reports, anecdotes and observations on
propagation and an explanation about how the geomagnetic A index is
calculated -- on Friday, March 18. For more information concerning
radio propagation, visit the ARRL Technical Information Service
Propagation page <http://www.arrl.org/propagation-of-rf-signals>. This
week's "Tad Cookism" is brought to you by the song Cool, Cool
Considerate Men <http://www.youtube.com/watch?v=4JDNTS2wHHo> from the
musical 1776 <http://en.wikipedia.org/wiki/1776_%28musical%29>.

==> ARRL EXECUTIVE COMMITTEE TO MEET THIS WEEKEND

The ARRL Executive Committee will be meeting this weekend in Chicago.
The agenda for their March 19, 2011 meeting is now available
<http://www.arrl.org/files/media/News/ARRL_Executive_Committee_Agenda_031911.
pdf>.

==> + ARES® E-LETTER NOW AVAILABLE IN AUDIO FORM

<http://www.arrl.org/multimedia> The ARES® E-Letter is now available
in audio format <http://www.arrl.org/ares-e-letter-audio-version>.
There are three editions currently available, including the most recent
recording of the February 16 ARES® E-Letter. Edited for audio by Al
Brown, KZ3AB, the ARES® E-Letter is voiced by Tony Riggs, W1FHN. Brown

was licensed in 1966. He was a member of the White House Press Corps before retiring from the International Broadcasting Bureau/Voice of America (IBB/VOA). Licensed since 1955, Riggs has worked in both the commercial and public broadcasting venues. He retired after 21 years as a staff announcer and news anchor with the VOA. With more than 35,000 subscribers, the ARES® E-Letter is written by Rick Palm, K1CE and is published each month. Click here <http://www.arrl.org/ares-e-letter-audio-version> to subscribe to the ARES® E-Letter.

==> THIS WEEK ON THE RADIO

This week:

- March 19 -- 10-10 International Mobile Contest; AGCW VHF/UHF Contest; Feld Hell Sprint (local time)
- March 19-20 -- Oklahoma QSO Party; North Dakota QSO Party; Russian DX Contest
- March 19-21 -- Virginia QSO Party; BARTG HF RTTY Contest
- March 21 -- Run for the Bacon QRP Contest
- March 23 -- SKCC Sprint

Next week:

- March 26-27 -- CQ WW WPX Contest (SSB)

All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests>, the ARRL Contest Update <http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more info. Looking for a Special Event station? Be sure to check out the ARRL Special Event Stations Web page <http://www.arrl.org/special-event-stations>.

==> UPCOMING ARRL SECTION, STATE AND DIVISION CONVENTIONS AND EVENTS

- March 19 -- ARRL West Texas Section Convention <http://www.arrl.org/hamfests/west-texas-section-convention-56th-annual-st-patrick-s-day-hamfest>, Midland, Texas; ARRL Nebraska State Convention <http://www.arrl.org/hamfests/nebraska-state-convention-1>, Lincoln, Nebraska
- March 25 -- ARRL Maine State Convention <http://www.arrl.org/hamfests/maine-state-convention-1>, Lewiston, Maine
- March 26 -- ARRL Maryland State Convention <http://www.arrl.org/hamfests/maryland-state-convention-greater-baltimore-hamboree-computerfest>, Timonium, Maryland
- April 2 -- ARRL New Jersey State Convention <http://www.arrl.org/hamfests/new-jersey-state-convention-1>, Ewing, New Jersey

- April 21 -- ARRL Idaho State Convention
<http://www.arrl.org/hamfests/idaho-state-convention-1>, Boise, Idaho
- April 23 -- ARRL Louisiana State Convention
<http://www.arrl.org/hamfests/louisiana-state-convention-twin-city-ham-radio-
fest>,
Monroe, Louisiana; ARRL North Carolina State Convention
<http://www.arrl.org/hamfests/north-carolina-state-convention-raleigh-hamfest
>,
Raleigh, North Carolina

To find a convention or hamfest near you, click here

WIANEWS FOR WEEK COMMENCING MARCH 20 2011.

Amateur Radio we get people talking

FROM THE DELTA TO THE DMZ, VIET NAM, XV.

The situation worsens after triple disasters hit Japan

ARGENTINA HEARD IN NORTH CAROLINA ON 2 METER FM VIA WIRE ANTENNA

ALL THESE STORIES UP AND COMING IN THIS EDITION OF NEWS FROM THE WIRELESS
INSTITUTE OF AUSTRALIA FOR WEEK COMMENCING MARCH 20 2011.

OUT OF THIS WORLD

Students of Mackay State High School in Queensland talked to Astronaut
Paolo Nespoli on the International Space Station on Wednesday 2nd March
as the International Space Station passed over Australia.

Sixteen students, asked questions like, Do you get physically tired in space
even though your body does not exert force when you float and your muscles
are not working against gravity? (answer) I still get extremely tired,
we make sure we do about two hours of fitness everyday, we are tired mostly
from the long hours we do, I always look forward to sleep.

200 people including students from the school, parents and invited guests listened in the School Hall.

There was a telebridge link from the school to Tony VK5ZAI in South Australia who acted as the Earth Amateur Radio Station with a radio link to the ISS. The Ham Radio Contact Coordinator for the school is Shane Lynd, VK4KHZ. Teacher in command:- Kylie Anthes-Cole

The Mackay Amateur Radio Association put on a display of Amateur Radio Brochures and Magazines and Books and information of interest .

Channel 7 and WIN TV news were present and recorded the proceedings .

BEHIND A SUCCESSFUL ARISS CONTACT IS THE PAPER WORK!
At the end of this text you will see how a contact is meticulously planned. It is a copy of the script to the mentor, ground station, and school sent several days in advance.

(Bruce Lenahan VK4NPF Mackay Amateur Radio Association with additional audio by Felix VK4FUQ)

NSW Police recognise radio operator rescue effort

MYSAILING.COM.AU have reported how Marine Rescue Terrey Hills radio operator Ian Murdoch has been awarded the Region Commander's Certificate of Appreciation from NSW Police Assistant Commissioner Ken McKay.

Ian, together with four members of Broken Bay Water Police, received awards for their part in the rescue of six people on board the stricken yacht "Encore" which foundered in gale force conditions off Broken Bay on the afternoon of 23 October, 2008.

On that day Ian was sole radio operator at the Marine Rescue Sydney radio base and although alone, managed 75 minutes of non-stop intense pressures in a Mayday call for help. He relayed the distressed vessel's position to other vessels in the area, informed Water Police, co-ordinated a veritable fleet of responding vessels - the police launch, a passenger ferry, a bulk carrier and a training yacht - and maintained contact with the vessel until Water Police were able to take the six off the sinking vessel.

WIA
President Michael Owen VK3KI president@wia.org.au
Vice President Phil Wait VK2ASD vk2asd@wia.org.au
Secretary Sarah Thompson VK3AUD secretary@wia.org.au
Treasurer John Longayroux VK3PZ vk3pz@wia.org.au

WIA members and friends are invited to attend the formal opening of the WIA premises at Unit 20, 11-13 Havelock Road, Bayswater, Victoria at 4:00pm Saturday, April 2nd.

The premises will be named "Andersson House" in honour of Henry Andersson VK8HA.

Henry was an Honorary Life Member of the WIA, who passed away October 6 2004.

He left his property at Humpty Doo, near Darwin, to the WIA. That generous bequest provided much of the funds needed to enable the purchase.

Light refreshments will be served between 4:00pm and 6:00pm, and a memorial plaque will be unveiled at a ceremony commencing at 4:30pm.

If you would like to attend, please RSVP to the Office on (03) 9729 0440 between 10:00am and 4:00pm Monday to Friday.

Amateur Radio we get people talking

So far a few clubs are registered for our hobby's big public relations event, World Amateur Radio Day the 17th of April.

Tasmanias Central Coast Amateur Radio Club is to set up in Hiscutt Park, Melbournes EMDRC is booked at Lilydale Park, with a second EMDRC entry just received for the Jaycar carpark, corner of Springvale Road and Princes Highway, Mulgrave and last years winner Amateur Radio Victoria is set again for Point Gellibrand at Williamstown.

We know that several other clubs are talking about registration and will do so in coming days.

With only weeks to go a lot more clubs and groups of individuals should get right behind this nationwide effort to take amateur radio and show what it has to offer the public.

All it really needs is knowledgeable and well presented people to explain amateur radio, plus a well presented station.

Read the rules and plan immediately to get involved with the WIA National Field Day, read the article on the WIA website. A summary appears in this months Amateur Radio magazine.

Tune-in to world Amateur Radio gets people talking Sunday the 17th of April.

HAMS ACROSS AUSTRALIA.

VKG Roundup http://www.police.nsw.gov.au/news

Waverley Amateur Radio Society

Waverley's clubhouse has a harbour side location in the Scout Hall at Vickery Avenue, Rose Bay with easy parking and is always open on the first Saturday afternoon of each month at 1:30pm for a variety of activities or just a rag chew, with all welcome to drop in.
The next occasion will be on April 2nd.

TRASH TREASURE

Next Sunday morning will be the regular Trash & Treasure gathering at VK2WI Dural - at 63 Quarry Road - It is also the bi-monthly exam assessment for all grades, check out details on the ARNSW web site www.arnsw.org.au

A sausage sandwich is available from the BBQ for lunch and in the afternoon
the Radio Homebrew and Experimenters group meeting ...

VK4 SILENT KEYS @ 2010 - 2011 QAC YEAR

VK4MWT Tom Bowden November 14 2010 Advised by Gavin VK4ZZ
VK4SS Alan Shawsmith November 23 2010 Advised by Stepphen VK4JSS
VK4CK Colin King December 30 2010 Advised by Gary VK4AR
VK4AMO Mike O'Callaghan January 02 2011 advised by Dale VK4DMC
VK4HER Dawn Sebbens January 09 2011 advised by Margaret VK4AOE
VK4YNL Egon Frangenheim January 19 2011 advised by Gordon VK4VP
VK4DI Len Effeney February 01 2011 advised by Clive VK4ACC

Silent Key

Sadly we must advise of the passing of an Amateur and member of SCARC.

Egon Frangenheim VK4YNL passed away January 19 after a battle with cancer.
He was a frequent visitor to the club HF Net on Thursday nights and always
had an excellent signal.

Vale Egon VK4YNL 25/10/1928 to 19/1/2011

Welcome to QNews from VK4WIA. I'm Geoff Emery, VK4ZPP, and I've been thinking.

Recently I have been taking time to catch up on current trends in amateur
radio. The software defined radio is a logical evolution in electronics.
More and more computing power is being focussed in dedicated ic's for the
commercial and military markets. For the hobbyist, the implementation can be
with simple hardware and free software on the shack PC.

Whilst relaxing in front of the TV, the mind started on a train of imagination
as a result of a segment on "intelligent" prostheses. As the demands of war
injuries has spurred research, new artificial limbs with functions controlled
by body nerve pulses are achieving remarkable results for the users. Even
during the 8bit computer era, speech recognition was a topic of great
interest. The reported developments in military avionics with speech
recognition puts some awesome capacity before the multitasking combat pilot.

The studies into artificial intelligence, spurred by the robotics enthusiasts,
are producing interesting algorithms for the development of independently
operational machines.

And so what does this have to do with amateur radio? It seems that innovation
stirs the mind of many amateurs and all these streams of development could
make the ultimate contest station. Imagine keying CW with thoughts alone!
Telling the rig what band and mode to operate would make it the greatest
"look Mum - no hands" experience.

I'm Geoff Emery and that's what I think.....how about you?

This is Gordon VK4VP with news from the Sunshine Coast

Annual General Meeting
The SCARC AGM was held recently and some chair shuffling has occurred. The President is still Noel VK4NL, Richard VK4RY is Vice President.

Other changes are a new Secretary in the shape of Warwick VK4NW who replaced Gordon VK4VP after 9 years in the chair. It was mentioned that another year would have allowed entitlements for long service leave, however Gordon decided that due to the generous salary the club paid he could live in the manner he has been accustomed to for many years to come.

A new face on committee is Leicester VK4ALH and the club welcomes him. A quick dig through the archives shows that two committee members namely Harvey VK4AHW and Treasurer Keith VK4AKA are in their tenth year of service on committee.

John Moyle Field Day
The club is again doing Howells Knob west of Maleny for the annual John Moyle Field Day being held this weekend 19th and 20th of March. Members are reminded that the Sunday social BBQ on that Sunday will be held at Howells Knob. The club again thanks Mike VK4YFL for looking after the kitchen. It is thought most go for the food and operate in the contest just to while away the time between meals.

TABLELANDS RADIO AND ELECTRONICS CLUB
vk4wat@wia.org.au
www.treclub.org.au

G'day again from Far North Queensland where it is still very wet and tropical, this is Dale VK4DMC for the Tablelands Radio and Electronics Club, TREC, in Far North Queensland.

As this news goes to air TREC members are at Lake Tinaroo on the Atherton Tablelands working the John Moyle Field Day contest.

We have 4 stations on air, working both HF and VHF. So if you here VK4WAT calling "CQ CONTEST" please call and say G'day.

Conditions are damp but we are having a great time and the coffee is great.

Next weekend TREC members will be on air again providing communications support for the Far North Endurance Riders. There are 10 rides this year so we will be busy providing a safety mantle for the riders and also practicing our field operations.

Visit the TREC website at www.treclub.org.au for club information and you can also download the latest monthly club news in TREC-NEWS.

This has been Dale VK4DMC and you are listening to the WIA news.
Travel Well!

VK7
local area news :- http://reast.asn.au/news.php
vk7 local news, email vk7regionalnews-subscribe@yahoogroups.com

High above the Northern Tasmanian landscape is Mt Barrow, 1362 metres above sea level, and perched another 25 metres above that, located on the Air Services Australia tower, are the antennae for one of Australia's finest 2 metre repeaters, VK7RAA.

Unfortunately the brackets that hold the antennae to the tower are getting old, and require replacement, and in this world of safety first, the landlord has mandated replacement of these brackets with something that would appear to be quite over-engineered for the job, obviously specifying a large safety margin in their construction strength and design.

Such engineering doesn't come cheap, but With a little luck, these brackets may even outlast the tower to which they're going to be attached!

(Jason VK7ZJA, Secretary Northern Tasmanian Amateur Radio Club ntarc.net)

REAST

April Presentation - Antarctic Telecommunications

Wednesday 6th at 7:30pm will be on Antarctic Telecommunications and will be given by Peter Yates and Ian McLean who run telecommunications for the Australian Antarctic Division.

The presentation will be at the AAD Headquarters in Kingston and will include a live demonstration.

If you intend to go along then please let Warren VK7FEET know by calling him on R2/R5 or email: Committee.Member.B@reast.asn.au or calling him on mobile: 0428 927 736.

Presentation should be from 1930 to about 2130.

http://reast.asn.au/events.php#antarcticradio

(73, REAST Committee)

HOME OF THE GOOD GUYS

the Manly-Warringah Radio Society offers grants to youngsters interested in becoming Radio Amateurs.

Recently the Good Guys at the club awarded the first of its grants to Lachlan Boyle, who now sports the callsign VK2FBAH.

Not for long though, as Lachlan is already studying for his licence upgrade!

Congratulations Lachlan, who received a cheque for $100, plus a year's free membership of the club.

For more information about the First Amateur Radio License Youth Grant, visit the wia.org.au and check out vk2 clubs and the "Education" link of Manly-Warringah.

INTERNATIONAL NEWS With thanks to RSGB, Southgate AR Club, the ARRL, Amateur Radio Newsline, NZART and the WW sources of the WIA.

Change of IARU Region 3 Secretary

The Directors of IARU Region 3 very much regret to announce the resignation for personal reasons of Seiichi (Jay) Oka JA1TRC as Secretary of IARU Region 3 from 9 March 2011.

Directors have appointed Katsumi (Ken) Yamamoto JA1CJP as new Secretary.

In nominating Ken as Secretary, JARL President Shozo Hara JA1AN reaffirmed his society's strong and continuing support of IARU Region 3 and its secretary, at the same time stressing the importance of the regional secretary's independence from any member society.

Ken holds a Bachelor of Science degree in electronics engineering and worked for KDD, now KDDI, in the satellite communications field for many years.

During that time he worked in many countries, including five years stationed in the United Kingdom working with the International Maritime Satellite Organisation.

Michael Owen VK3KI, Chairman IARU Region 3 said Ken was first licensed in 1967 and today continues to have an active interest in DX and contests.

Still in JA land,

The situation worsens after the triple disasters hit Japan

Ken Yamamoto JA1CJP reports at the request of Central Emergency Communication Committee, the JARL is operating its HQ station JA1RL in Tokyo, and regional HQ stations.

Earlier it was reported that JA1RL was using 7 MHz SSB, 144 MHz SSB/FM and 430 MHz SSB/FM.

Ken, the new IARU R3 Secretary said, "Many radio amateurs are thanked for providing information and exchanging support to the rescue and disaster relief operations. Those who can operate in the affected areas are providing a lifeline for rescue teams and those at local shelters. Some stations are operating with car batteries and others with engine generators."

Ken JA1CJP said, "Another problem is the nuclear power plant where the water supply system failure caused overheating of the nuclear fuel bar. That causes some radioactive gas release from the plant and people have been evacuated from the surrounding area."

The earthquake also damaged electric power generation plants fuelled by oil or natural gas, resulting in a shortage of electricity.

The following information also from Ken JA1CJP:-

7043 kHz SSB controlled by JR3QHQ the Osaka branch manager of JARL
He is gathering incident information on radio and forwarding
onto the internet.

7075 kHz SSB is operated by JL3YSP in Wakayama occasionally.

7030 kHz which is the JARL emergency communication frequency in their band plan is in use by JA7RL (JARL regional HQ station).

The last frequency is particularly QRP relevant. There are obviously propagation factors which would limit their range but would all amateurs please make every effort to avoid interfering with emergency communications on these frequencies

JA1RL continues to operate under instruction to be an emergency traffic centre and increasingly receiving help from JARL members in the affected area.

Many other stations are active and are using various frequencies including some battery powered and others using small generators to exchange rescue and disaster relief operation information with JA1RL and others.

While 3525, 7030, 7043 and 7075 have been mentioned as in use, its wise to keep those and all of the Centre of Emergency clear of normal and non-urgent traffic. There is no call for additional foreign radio amateurs.

(sourced in the main to Jim Linton, VK3PC, Chairman IARU Region 3 Disaster Communications Committee also VU Yahoo groups).

ARGENTINA HEARD IN NORTH CAROLINA ON 2 METER FM ON WIRE ANTENNA

The recent sunspots have brought some interesting propagation. Even on some of the VHF and UHF bands.

According to W0WOI reporting over the VHF Reflector, at 16:55 U-T-C March 2, Jonathon Ballard, KI4UKF who lives in Stokes County, North Carolina heard Claudio Costa, LW2ECC in Argentina calling CQ on 144.48 MHz FM.

What really makes this interesting is that KI4UKF was using a Moxon wire antenna tacked to a wall. He said the signal was steady for several minutes at about S6, before it faded away. H e emailed Claudio, who confirmed the transmission. Claudio reported that he was using three 5/8 wave verticals and 160 watts.

AMATEUR RADIO NEWSLINE

CANADIAN HAMS ASK RAC FOR ASSISTANCE IN RIDDING PLASMA TV INTERFERENCE

Members of Canada's Niagara Peninsula Amateur Radio Club say that noise and signals originating from Plasma screen digital television sets are causing

considerable interference to their HF activities. They have asked their national society for help.

According to a news release from Radio Amateurs of Canada, complaints of this nature require specific and detailed information before it can consider taking this matter to telecommunications regulator Industry Canada. To gather this information, Radio Amateurs of Canada invited its members who own Plasma screen television receivers to report their experiences of interference.

Also they were asked to provide a description of their HF station and antenna system and the exact nature of the interference. This means what bands are affected, what the interference sounds like and any other pertinent information. Remedies should also be tried and reported such as using ferrite chokes on power cords and signal cables if interference is detected.

Amateurs with advanced instrumentation such as spectrum analysers and calibrated antennas should measure signal intensity levels at given distances; these measurements will add credibility to investigations.

Canadian hams suffering from this type of interference should send their reports to Norm Rashleigh, VE3LC, via email to ve3lc@rac.ca

THREE HAMSATS LOST IN TAURUS XL LAUNCH FAILURE

A launch failure has lead to the demise of several new ham radio birds. Bill Pasternak, WA6ITF, is in the newsroom with the details:

Three amateur radio satellites were lost when a launch booster failed to achieve orbit. The satellites were launched from Vandenberg Air Force Base in California on board an Orbital Sciences Taurus XL rocket.

According to news reports, its believed that the launchers fairing which covers the satellites on top of the rocket, did not separate properly. This added drag prevented the Taurus XL from gaining enough momentum to attain orbit.

The ham radio payload consisted of the Explorer-1, KySat-1 and Hermes. The rocket is believed to have crashed near the Antarctic.

By the way, Bill actually saw and photographed the launch from his front lawn in Santa Clarita, California. That's at least 80 miles from Vandenberg Air Force Base. He says that it was the brightest abject in the night sky. His pictures, which were a last minute idea are grab-shots taken without a tripod and are posted in his 2011 photo album on Facebook.

RSGB

ORF to operate International Marconi Day station

The Amateur Radio Section of ORF, the Austrian Broadcasting Corporation, in conjunction with the Documentary Archives Radio Communications QSL Collection will operate OE11M from 00.01 UTC on 29th April to 23.59 UTC on 1st May.

OE11M is an official International Marconi Day station and contacts made on 30 April are valid for the IMD Award. QSL via OE-Bureau or direct to OE1WHC.

Cards without SAE & new IRC or dollars to cover postage will be processed via da Bureau.

The 2011 International Museums Weekend special event will once again be a double-weekend and will take place on 18 and 19 June as well as 25 and 26 June.

Radio amateurs are encouraged to participate in this event by setting up stations in their local museums. Harry, M1BYT, who is organising the event, asks that all those intending to take part should register their museum via harry.m1byt@tiscali.co.uk

Full details of the event can be found on the International Museums Weekend website

The Hunter Radio Group contest team are operating portable at Booral near Stroud for this weekends John Moyle Contest.

Summerland Amateur Radio Club in Northern New South Wales, VK2SRC is also operating portable, this is from location QF 69 FU in the John Moyle contest on 2 metres, 70 and 23 centimetres.

Dale VK4DMC from a very wet and soggy Far North Queensland tells us that Tablelands Radio and Electronics Club, TREC, are operating from Lake Tinaroo on the Atherton Tablelands on HF and VHF using the club call-sign VK4WAT.

theTARCinc are on air from Baden Powell Campsite Toolakea Beach Rd. Bluewater.

Brendon VK8FQRP is in the John Moyle from Darwin on QRP (love that call 8FQRP) 10m station under the VK8DA callsign. As an aside Brendon has been having great success, 500mw to VK7 and VK2 over the past few weeks from the Top End!

SPECIAL EVENT STATIONS, REPEATER BEACON DX AND NET ADVICE

DX0DX mission postponed

The DXpedition to the Spratly's has been postponed to April 2012.

Team Leader Chris Dimitrijevic VK3FY said he was determined to recover as much of the costs as possible to put things right for all the Team members, Sponsors, organisations and individuals involved.

He said "It's better to concentrate on getting the best value for the assets for the January venture so that I can recover the best return for the operators."

Apologies are made by Chris VK3FY to the DX community for the changes that have been outside his control.

Earlier on it was announced that difficulties with logistics and customs were the major problems, but have since been overcome.

Chris VK3FY has personally undertaken to post the contributions, foundations, and costs on the DX0DX Yahoo group and to foundations.

(Jim Linton VK3PC, Public Affairs)

LORD HOWE

The Hellenic Amateur Radio Association of Australia are organising a DX Peditiion to Lord Howe Island in July using the club call sign VK9HR.

They are looking for CW operators and experienced SSB and digital modes operators who would be interested in attending this DXPedition.

Any interested operators please contact the President of HARAOA, Mr Tommy Horozakis VK2IR on 0413 005 511 or president@haraoa.com

(John Chalkiarakis VK3YP HARAOA Treasurer)

CPUT TO BUILD S-BAND TRANSMITTER FOR UK SATELLITE

The Cape Peninsula University of Technology South Africa has been invited by the UK to build an S-band transmitter for the first satellite to be launched by the UK Space Agency in December 2011.

UKube1 is an exciting and novel collaboration between the UK Space Agency, industry and academia, and is envisaged as the pilot for a full UK CubeSat programme.

Strathclyde University, who are coordinating the project, approached CPUT to build the transmitter. A similar unit is already under construction at CPUT for its own 3U CubeSat.

(sarl)

LOW DOWN IN THE NEWS

New sub-9kHz Amateur Radio website

Roger G3XBM brings news of a new Amateur Radio VLF sub-9kHz website.

https://sites.google.com/site/sub9khz/

This group is bringing together information more accessibly.
The original pages just grew and grew as activity at VLF just took off.
It is almost 1 year to the day since Stefan DK7FC made his first historic DX transmission on 8.97kHz. Since then they've come a VERY long way.

The new site also has a table showing the VLF DX records.

https://sites.google.com/site/sub9khz/

(southgate)

REWIND

Early Australian Callsigns, I'm Col VK4CC

Ever wondered how the Australian amateur radio prefix "VK" came about?
According to "History of Australian Radio Callsigns" by K3HZ, Dave, it came from a block of prefixes beginning with the letter V, assigned to British Commonwealth countries in 1912 to commemorate the death of Queen Victoria.

The block VH - VK was allocated to Australia but these were not assigned to Australian amateurs until 1928.

1910, after representations by the WIA, the then Postmaster General's Department began issuing experimental licenses. These used a three letter call beginning with X and did not differentiate between states until 1912 when these three letter calls were broken up into blocks according to state.

In early 1914 the experimental calls were changed again when a number representing the states was incorporated into a 1 x 2 format. The Letter X was followed by a number, for example 4 to represent Qld followed by a two letter suffix.

All licences were cancelled during WW1 and none were issued until 1922 when an A was added to the X prefix to designate "Experimental Australia" resulting in a 2 x two callsign format.

The next change in Prefix came in 1927 when an international radio conference decided that Australia should use the prefix OA to signify "Oceania Australia". The OA prefix was short lived however as yet another international radio conference in 1928 resulted in Australia amateurs finally using the VK prefix.

So if today's callsign format seems confusing spare a thought for our early amateur brethren and the many changes that they endured in only 18 short but tumultuous years.

50100 51000

kindly consider QSY freq & RTTY freq.

73 YO2MBU

BEHIND A SUCCESSFUL ARISS CONTACT IS THE PAPER WORK!

Here is how a contact is meticulously planned.

Script to the mentor, ground station, and school several days in advance.

Conferencing operator name(s):
What touchtone codes call the operator?
Ask operator to start recording

Station checks:
Station operator name(s)? Tony Hutchison
Station callsign? VK5ZAI
Tracked ISS recently?
Antenna slews in azimuth and elevation?
Flip mode enabled?
Check their clock setting.
When did they get elements?
Check ISS sub-satellite point, az, el, and rise time.
Confirm frequencies (channels not actual numbers) with station.
Can someone use an HT to do an end-to-end check?
Station will be asked for a brief overview.

Name of school McKay State High School
Location of school Mackay MC, Queensland, Australia
Name of person at school Kylie Anthes-Cole

Have first student at microphone.
Have next student move up once crewmember starts answering.

Say OVER.

Teacher (or alternate) will be asked for a one minute intro.

"Big Thanks" at the end.
Followed by a brief script.

Turn off (or set to vibrate) all phones and pagers

Everyone needs to be quiet: no cheering or clapping until the end.

May not get everyone through-

IRLP & EchoLink- John Spasojevich, AG9D

Start at T-6 minutes

Conferencing Operator Opens lines-

Hello everyone, this is Keith Pugh, W5IU, your Amateur Radio moderator for today.

Through the help of amateur radio volunteers and the crew on the ISS we hope to soon establish ham radio contact with the International Space Station as it flies more than 200 miles above the Earth, over Australia. This is all accomplished with ARISS--Amateur Radio on the International Space Station.

The ISS currently is flying over the Indian Ocean, whizzing along at around 17 thousand 500 miles an hour.

This contact will be performed using the Amateur Radio telebridge network, a world-wide network of amateur radio ground stations that enable students to contact the ISS.

ARISS is a consortium of ham radio volunteers from 9 nations that develop and operate the amateur radio station on the international space station. Some members of ARISS are the American Radio Relay League, the worldwide AMSAT Radio Amateur Satellite Corporations, CSA, ESA, JAXA, NASA, and Roscosmos. The amateur radio ground station that will establish contact with the ISS is VK5ZAI in Australia, operated by Tony Hutchison. Thanks for helping us out, Tony!

We have about 4 minutes until contact time.

Our contact for today is with McKay State High School.
The Ham Radio Contact Coordinator for the school is Shane Lynd, VK4KHZ.
We've asked teacher Kylie Anthes-Cole, to please briefly tell us about McKay State High School and the students taking part today.

(if necessary, ad lib about student events until approx T-3 minutes)
Where are the students from?
Weather at ground station and school?

T-3 minutes:
Tony, before the contact begins, please tell us about your ham radio station, where you are, and how you'll handle the conversation.

T-1 minutes:
Remember that what we are doing on ISS is an experiment---so we can never

tell the results---positive or negative until the experiment is over.
And students, don't forget to say OVER.

In about 30 seconds the station should be coming over Australia, so Tony,
it's all yours. Good luck!

Students First Names & Questions:

1. Aaron: Do you currently employ any methods to combat radiation emitted
from the sun? And if not is anything being tested or planned for this
purpose?

2. Joel: What do you see as the future for astronauts and NASA space
exploration?

3. Jasmine: What are the physical effects of going into space and coming
home?

4. Marcia: If the Earth was positioned anywhere else in our solar system,
do you think life would be able to exist?

5. Sweta: Do you get physically tired in space even though your body does
not exert any force when you float and your muscles are not working
against gravity? If you do get tired then, why?

6. Amanda: How much of a difference is it, sleeping in space compared to
sleeping on Earth?

7. Tessa: If a fish was placed in a sealed fish bowl full of water, could
it swim inside the space station? i.e. given that a fish has a swim
bladder that assists in buoyancy, without gravity, would the fish be able
to swim?

8. Amy: Does it get hot in your spacesuit?

9. Shelly: Considering the chain of technical failures that contributed to
a near catastrophic end to "Apollo 13" that was depicted in the film,
what advances in technology and safety has occurred that gives astronauts
a greater sense of safety than what they had during the early days of
space travel.

10. Rebecca: What problems do you face doing experiments up there?

11. Shane: How different is the viewing of stars in space since there is no
atmosphere around the ship.

12. Blessing: What is the Station's defence against solar flares and
radiation?

13. Diana: How does zero gravity affect bodily functions?

14. Melissa: What systems do you have on-board the ISS to monitor the weather
systems on Earth?

15. Tyler: How do you go to the toilet in space?

16. Jasmine: How do you control your movement or walking in space when you have zero gravity?

(CLOSE)

Ladies and Gentlemen, we have shared a moment of history. Amateur radio station VK5ZAI in Australia operated by Tony Hutchison, contacted Paolo Nespoli, IZ0JPA, aboard the International Space Station, talking with students at McKay State High School in Mackay, Queensland, Australia.

Now, for the international volunteer team of ARISS, including the Radio Amateur Satellite Corporations around the world, the American Radio Relay League, CSA, ESA, JAXA, NASA, and Roscosmos, this is Keith Pugh, amateur radio operator W5IU sending my greetings to all of you in amateur radio terms, 73,---best wishes.

Amateur Radio Newsline(tm) Report 1753 - March 18 2011

Amateur Radio Newsline report number 1753 with a release date of
Friday, March 18 2011 to follow in 5-4-3-2-1.

The following is a Q-S-T. An earthquake and tsunami bring death and
destruction to Japan and ham radio responds to the publics call. Also,
the Somali pirates who killed three American hams are indicted in the
USA, the Russian Federation adopts C-E-P-T licensing and the ARRL
releases a video that urges its members to save the 70 centimeter band
by opposing Congressional measure H R 607. Hear the Leagues message
right here on Amateur Radio Newsline(tm) report number 1753 coming your
way right now.

RESCUE RADIO: HAMS RESPOND IN JAPAN FOLLOWING 8.9 QUAKE AND TSUNAMI

Japan remains under its worst threat to an ever rising toll, widespread
destruction, power, fuel and water shortages follow the massive
earthquake, tsunami and failed 40-year old nuclear power station. Jim
Linton, VK3PC, has the latest developments in regard to ham radio
relief efforts taking place as we go to air:

--

IARU Region 3 Secretary, Ken Yamamoto JA1CJP said the Japan Amateur
Radio League HQ station JA1RL, and other amateur stations, are
maintaining their effort to support the disaster operation.

Ken JA1CJP said, ''In less damaged areas, the power supply is being
restored gradually, and local amateur radio club members have started
to establish stations at shelters."

The information is being coordinated, as part of an organized rescue
and relief effort. It seems likely to continue for some weeks, and
months, to come.

The 8.9 on the Richter scale quake hit off north-eastern Sendai, and
triggered a ten-meter tsunami, on last Friday.

Ken JA1CJP, quoting local news sources said, the situation is getting
worse. Some reports put the dead and missing at 11,000.

Some 55,000 houses/buildings were damaged by the earthquake and 3,000 houses washed away by the tsunami.

Rescue teams have arrived and started their activities. They came from many nations, including Australia, China, Korea, Singapore, New Zealand, USA, Germany, Switzerland and Russia.

In all, the Japanese government has received help from 91 nations and Territories, and nine international organizations.

Ken JA1CJP said another worry is leakage of radio-active gasses at the Fukushima nuclear plant, which was damaged by the earthquake and tsunami.

A shortage of fuel, disruption to rail and road transport have been reported from many affected areas, still recovering from the worst earthquake in 140 years, followed by a widespread tsunami that swept away so much.

JA1RL continues to operate under instruction to be an emergency traffic centre. Increasingly receiving help from JARL members in the affected area. It is using the 7 MHz, 144 MHz and 430 MHz.

Many other stations are active. Field stations are using various frequencies, including some battery powered and others using small generators.

Each is exchange rescue and disaster relief operation information with JA1RL and others.

While 3525, 7030, 7043 and 7075 have been mentioned as in use, it's wise to keep those, and all of the Centre of Emergency frequencies clear of normal and non-urgent traffic. There is no call for additional foreign radio amateurs.

I'm Jim Linton, VK3PC, Chairman of the IARU Region 3 Disaster Communications Committee reporting for the Amateur Radio Newsline.

--

Again, there is no call for radio amateur's from the United States or any other nation to travel to Japan. There are over 130,000 hams in that nation and they have all of the operators that they need. More on this story in upcoming Newsline reports. (JARL, JA1CJP, VK3PC)

**

RESCUE RADIO: A1 CLUB DX OF JAPAN SEEKS WORLD WIDE CLEAR EMCOMM FREQUENCIES

Meantime word from a group called A1 Club DX of Japan has issued a request that hams world-wide keep clear of several frequencies and blocks of frequencies that are being used for post quake and post tsunami relief efforts.

According to the note from club secretary JE1TRV, amateur radio operator are gathering and exchanging emergency information on a number of frequencies. On the H-F bands these are 3 dot 525 MHz+/-5KHz; 7 dot 030 MHz +/-5KHz; 14 dot 100 MHz +/-10KHz; 21.200 MHz+/-10KHz and 28.200 MHz +/10KHz. What this means is that hams should listen carefully in these spectral parcels before calling CQ for a contact.

While the frequencies on the VHF and UHF bands really are of little concern to hams outside the immediate disaster area, one never knows when a band opening might occur. So for reference sake, the needed clear channels are on these bands are 50.1, 51.000 and 51.500 MHz on 6 meters; 144.100M, 145.000M and 145.500 MHz on 2 meters and 430.1, 433.0 and 433.500 MHz in the 70 centimeter band.

Exactly what type of emergency communications was taking place was not spelled out in the A1 Club DX press release. (A1DX Club of Japan)

**

QUAKE AFTERMATH: YAESU TEMPORARILY HALTS PRODUCTION AFTER QUAKE

The CQ on-line newsroom reports that production of Yaesu radios at Vertex Standard's factory in Fukushima, Japan, has been temporarily halted. This, due to earthquake damage at that plant.

In an open letter to the amateur radio community, Vertex Standard CEO and President Jun Hasegawa expressed his gratitude for the many "kind words and thoughts about us during this difficult time."

He reports that all Vertex Standard employees and their families are OK, although the company has not been able to reach its many dealers and subcontractors located near the coast.

"We just hope that they are alive," he writes.

Hasegawa also reports that the Yaesu factory in Fukushima suffered "minimal" damage from the earthquake but has been temporarily shut down nonetheless. He says he expects it to be back in normal operation within one to two weeks and asks for everyone's understanding and cooperation.

At this time, there have been no public reports received from any of the other Japanese amateur radio manufacturers.

The closure affects only the Fukushima factory. All others remain in operation. (CQ)

**

QUAKE SCIENCE: THE POWER OF THE JAPAN QUAKE

And some stunning statistics about the awesome power of this earthquake. According to the British Broadcasting Company, experts they interviewed say that the massive shaker may have shifted Japan's main coastline by up to 13 feet to the east. This is based on the country's network of 1,200 GPS monitoring stations. The GeoNet GPS

network is the world's largest.

Also, the quake may have knocked the planet off its axis by about 6.5 inches. This says the BBC will cause the Earth to rotate a tiny bit faster and thereby shortening the day by about 1.8 millionths of a second.

The Japan Meteorological Agency has raised the quake's magnitude to 9 while the U.S. Geological Survey still has it rated at magnitude 8.9. The Japan Meteorological Agency has also officially named the tembler "The 2011 off the Pacific coast of Tohoku Earthquake." (BBC via Facebook)

**

ENFORCEMENT: 14 ALLEGED PIRATES INDICTED IN ATTACK THAT KILLED THREE HAM OPERATORS

A federal grand jury has indicted 13 suspected pirates from Somalia and one from Yemen in the February hijacking of a yacht that left three American radio amateurs and one nonamateur dead. The United States Department of Justice say that the men face piracy, kidnapping and firearms charges stemming from their efforts to hold the Americans for ransom, according to the indictment.

As previously reported, Scott Adam, K9ESO, his wife Jean, KF6RVB, and Bob Riggle, KE7IIV, were murdered by the Somali pirates. Also killed with them was Phylis Macay. The four were onboard the Adam's owned yacht the Quest off the coast of Oman, East Africa, when pirates boarded their vessel on Friday, February 18. Officials were in the process of negotiating for their release when gunfire was heard around 1 AM on Tuesday, February 22. At that point United States Naval forces responded to the gunfire. Navy Seals then boarded the yacht only to discover that all four hostages had been shot by the pirates.

The Adams', who were retired, had been sailing on their 58foot yacht delivering Bibles around the world. The indictment says at least three of the indicted men shot and killed the four Americans without provocation. They died less than a week after a Somali pirate was sentenced to more than 33 years in prison by a New York court for the 2009 hijacking of the vessel the Maersk Alabama. That hijacking ended when Navy sharpshooters killed two pirates holding the ship's American captain.

This group of pirates is the latest to be brought to Norfolk to face charges stemming from attacks on ships off the cost of Africa. Last April, a federal grand jury indicted 11 in separate attacks on two U.S. Navy ships, the USS Ashland and the USS Nicholas. The Virginia-based ships were part of an international flotilla protecting shipping in the pirateinfested waters off Africa. (Published news reports)

ENFORCEMENT: CALIFORNIA CB'er ISSUED $7000 NAL FOR REFUSING FCC STATION INSPECTION

A California CB'er operator has been issued a $7000 Notice of Apparent Liability for Forfeiture. In its March 10th release the FCC says that that Ira Jones who they identify as the owner and operator of a Citizens Band radio station in the city of Merced, apparently willfully and repeatedly violated section 303(n) of the Communications Act and section 95.426(a) of the Commission's rules by failing to permit inspection of the CB radio station. Amateur Radio Newsline's Norm Seeley, KI7UP, has the details:

--

The story on this one began on March 19, 2010, agents from the Enforcement Bureau's San Francisco Office responded to a complaint regarding interference within the radio communication system equipment of the Merced County Fire Department. The agents observed that transmissions by a CB radio station on 27.165 MHz appeared to match the audio distortion received on the fire departments frequency of 154.4 MHz. The agents then monitored the transmissions on frequency 27.165 MHz and used radio direction finding techniques to locate the source of the signal associated with the interference to a CB radio station operating from Ira Jones's residence in Merced.

On March 26, 2010, agents from the San Francisco Office again monitored 27.165 MHz and used radio direction finding techniques to locate the source of the signal creating the audio rectification interference to a CB radio station operating from Jones's residence in Merced, California. Later the same day, the agents approached Jones's residence and attempted to conduct a station inspection. At that time they were denied access to Jones home and his C-B radio gear. The same thing happened when the agents accompanied by to Merced Police officers attempted a station inspection on August 27th.

And it did not end there. On September 1, 2010, the San Francisco FCC Office received another complaint from the Merced County Fire Department stating that Jones had resumed CB radio station operation at approximately 5:30 p.m.. Also that the interference within the Merced County Fire Department radio communication system equipment had also resumed. Now, almost a year after receiving its first complaint from the Merced Fire Department the FCC has issued Jones the $7000 Notice of Apparent Liability to Monetary Forfeiture. He was also warned that operation of his CB radio station with more power than authorized under the Part 95 rules could result in additional sanctions and monetary forfeitures.

For the Amateur Radio Newsline, I'm Norm Seeley, KI7UP, reporting from Scottsdale, Arizona, from the Amateur Radio Newsline.

--

Jones was given the customary 30 days to pay or to file an appeal. The FCC release did not say whether or not the Merced Fire Department is still receiving the alleged interference from Jones C-B station operation. (FCC)

**

ENFORCEMENT: CALIFORNIA UNLICENSED BROADCASTER ISSUED $25000 NAL

The FCC has also issued a $25,000 Notice of Apparent Liability to Monetary Forfeiture to a California resident identified as Gabriel Garcia. This for his alleged operation of an unlicensed station on various FM frequencies in the city of San Jose. Interference that the FCC says was to Federal Aviation Administration operations in that city. Bill Pasternak, WA6ITF, is in our newsroom with this one:

--

The case began in March 2010. That's when the FCC received a complaint from the Federal Aviation Administration about interference to the Aviation Services band from an unlicensed station on 92.9 MHz calling itself KNRG. FCC San Francisco field agents used RF direction-finding equipment to trace the source of the signal to a roof antenna at a San Jose residence. The agents took field-strength measurements and determined they were more than 1,957 times greater than the maximum permissible level for a non-licensed Part 15 transmitter and therefore required a license.

The FCC agents proceeded to inspect the station. During the inspection, the landlord identified Gabriel Garcia as the operator of the station. The FCC issued a Notice of Unlicensed Operation to Garcia, detailing penalties for continuing to operate the unlicensed station.

That May, the San Francisco field office received another complaint about an unlicensed station at 93.7 MHz in San Jose. The agents again traced the transmission to a different residence of Garcia. They again issued another Notice of Unlicensed Operation to Garcia.

In June 2010, the San Francisco field office received more complaints from the FAA about the KNRG station. Again it traced the signal to Garcia's residence and issued a third Notice of Unlicensed Operation to him. In July, the agents went through the same drill for an unlicensed operation on 104.3 MHz originating from another Garcia residence in San Jose. This time, the field agents saw Garcia leave and then return to the residence. They issued a fourth Notice of Unlicensed Operation to Garcia.

Now the FCC has made good to impose a penalty on Garcia's unlicensed radio operations by issuing him the $25,000 proposed fine. The base fine for operating an unlicensed station is $10,000. However the agency

found that Garcia operated on multiple frequencies, on multiple occasions. As such it found his behavior as being particularly egregious for conduct that apparently interfered with the FAA's Aviation Radio Services band. Based on this evidence, the commission fined him $25,000.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF, in the Newsroom in Los Angeles.

--

As is always the case, Garcia was given the usual 30 days to pay up or to file his appeal. Meantime, there's no word if Garcia has taken his station off the air of if its still in operation. Maybe one of our listens in San Jose can take a listen to the FM broadcast band and let us know. (FCC)

**

RADIO JUSTICE: HAMS REPORTEDLY FOIL COPPER THIEVES

Ham radio appears to have foiled an attempt by copper thieves to do their illegal deed. This as a Paris, Texas, woman and Detroit man, along with three juveniles, were arrested by Paris police after stealing copper wiring from the old police and court building.

While details are sketchy Paris Police Department officers responded to a possible burglary call at the building after a person saw the suspects leave and followed them to Paris Iron and Metal. According to Matt Birch, public information officer for Paris Police Department they then reported what they knew to Paris Police who in turn collared the suspects.

More is on line at tinyurl.com/47tfrao (Via e-mail)

**

HAM HAPPENINGS: 14th ANNUAL INTERNATIONAL LIGHTHOUSE AND LIGHTSHIP WEEKEND

The 14th annual Lighthouse and Lightship Weekend will be held as a fun event in the weekend of August 20th and 21st. Already 135 registrations have been received and it is on track to nudge last year's total of 447. Germany and Australia traditionally account for most entries and their enthusiasm shows again this year.

Of particular interest will be DA2011LH. This is a special event callsign at Campen Lighthouse. To inquire about the International Lighthouse and Lightship Weekend visit the website at http://illw.net. (VK3PC)

**

HAM HAPPENINGS: AUSTRIAN BROADCASTING CORPORATION TO OPERATE INTERNATIONAL MARCONI DAY

The Amateur Radio Section of the Austrian Broadcasting Corporation, in conjunction with the Documentary Archives Radio Communications QSL Collection will operate station O-E11-M from 0000 hours UTC on April 29th to 23:59 UTC on May 1st. O-E-11-M is an official International Marconi Day station and contacts made on April 30th are valid for the International Marconi Day Award. If you do work this station QSL via the O E bureau or direct to OE1WHC. (Southgate)

**

HAM HAPPENINGS: EAA AIRVENTURE IN WISCONSIN IN JULY

And while its still ma bit down the road, the Fox Cities Amateur Radio Club Inc will operate July 27th to the 31st from EAA Airventure 2011.

Airventure is the largest air show and fly-in in the world held every year in Oshkosh Wisconsin. Special events station W9ZL will be on the air from 1500 to midnight UTC from the EAA grounds. Operation will use 7.250 and 14.250 on the H-F bands and 52.550 FM on 6 meters.

QSL with a large self addressed stamped envelope to FCARC AirVenture 2011, PO Box 2346, Appleton Wisconsin, 54912. (AB9AH)

**

BREAK 2

This is ham radio news for today's radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

**

RESTRUCTURING: RUSSIAN FEDERATION ADOPTS CEPT LICENSING

It should soon be easier to use amateur radio gear while visiting the Russian Federation. This, following its decision to join the CEPT Radio Amateur License agreement.

At a recent meeting the Russian State Commission for Radio Frequencies, it was decided that the Russian Federation will accept CEPT Recommendation for the CEPT Radio Amateur License and the CEPT Novice permit. The commission plans to advise CEPT Working Group R A of its decision in the near future. Working Group R A will be meeting in May and September.

IARU Region 1 says that it considers this a major step forward to eventually permit worldwide radio amateur roaming. CEPT licensing means that all nations accepting this recommendation also accept any other signatory's ham license, subject to certain limitations as valid in those nations as well. (Press Release)

**

HAM RADIO NEAR SPACE: MISSISSIPPI MIDDLE SCHOOL TO LAUNCH NEAR SPACE BALLOON

A group of students from Olde Towne Middle School in Ridgeland, Mississippi is preparing for a trip to space. Or at least as close as they can get.

The OTMS Radio and Technology Club, along with the school's Science Team, are planning a near-space balloon launch at 9 AM CDT on March 26th, conditions permitting.

The balloon -- nicknamed Titans in Space -- will use the call sign KC5NXD and is expected to reach an altitude of 94,825 feet. It will launch from the Madison County Career and Technology Center in Gluckstadt. Preflight will begin at 90 minutes before the scheduled launch. The preflight and launch will be stream-cast live on the Internet at www.ustream.tv/user/kc5nxd. You can also follow along on Twitter.

The project is led by Bill Richardson, N5VEI. He is encouraging radio amateurs to follow the balloon via APRS on 144.39 MHz, on http://aprs.fi with the call sign kc5nxd-11 and via a 2 meter voice beacon on 146.565 MHz. A 20 meter beacon at 14.079 or 14.080.5 MHz will offer telemetry as well. According to Richardson, the group will be using a special balloon-modified version of FLdigi, called dl FLdigi. Ground stations wanting to receive the balloon's telemetry using the program and a sound card interface can find the software can find it free at www.w1hkj.com (ARRL, Southgate, Others)

**

HAM RADIO IN SPACE: TWIN FASTRAC SATELLITES COMMANDED TO SEPARATE

Sebastian Munoz, KE5FKV, the FASTRAC Student Program Manager reports that the two amateur Radio FASTRAC AX.25 satellites have successfully separated in space. According to Munoz, on Monday, March 14th, a command was sent to the two birds to have them part ways. They did just that and are now in autonomous operation.

Munoz adds that FASTRAC 1 nick named "Sara Lily" has its Beacon on 437.345 MHz FM using AX.25 at 1200 bits per second. FASTRAC 2 also known as "Emma" has its Beacon on 145.825 MHz FM also running AX.25 protocol at 1200 bits per second. More on both birds is on-line at tinyurl.com/25sykwb (Southgate)

**

HAM RADIO IN SPACE: TWO MORE ASTRONAUTS PASS THEIR AMATEUR EXAM

Two more Astronauts are now licensed radio amateurs. According to AMSAT, Luca Parmitano, who is slated to fly on Expedition 36 and Chris Cassidy who is assigned Expedition 35 both passed their amateur radio license exams on March 8th.

On March 9th, Michael Hopkins completed his ARISS introductory course and is currently preparing for his amateur radio license exam. Hopkins is slated to fly with Expedition 37 in September of 2013.

Lastly, an ARISS refresher course was provided to Chris Hadfield, KC5RNJ/VA3OOG on March 11. Hadfield is currently scheduled for Expedition 34 in November of 2012. (AMSAT)

**

WORLDBEAT: LUXEMBOURG INAUGURATES NEW 60 METER BEACON

A new 60 meter beacon is on the air in Luxembourg. Operating with the callsign LX0HF its reportedly has been putting a good signal into the United Kingdom and other parts of Europe.

LX0HF operates on a frequency of 5 dot 205 dot 25 kHz. It is understood that the contact for the beacon is LX2A or LX7I of the Luxembourg Amateur Radio Society. (Southgate)

**

DX

In DX, UA0SC, UA0SE, UA0SW and RZ0SR will be active portable 6W from Senegal through March 28th. QSL via the operator's home callsign unless you work them using the call 6V7D during the Russia DX Contest on March 19-20th and the CQ WPX SSB Contest from March 26-27th. QSL for those contacts go only to UA0SE.

VE3DZ is on the air from Barbados as 8P9AA through March 29th. Activity is on all HF bands using CW, SSB and RTTY. He is expected to be in the CQWW WPX SSB Contest as 8P3A. QSL both callsigns via VE3DZ.

Lastly, 11 year old Y-L operator JF1VGZ along with JA1MFR will be active as KH7ERI and WN1Y portable KH0 from Saipan between March 25th and the 29th. QSL via JF1VGZ direct. Also, check out their Web page at www.qrz.com/db/kh7eri

(Above from various DX news sources)

**

THAT FINAL ITEM: A FEW IMPORTANT WORDS ABOUT HR-607 FROM THE ARRL

And finally this week, the ARRL has released a new video that urges its members to respond to their Congressional representatives in opposition to H-R 607. This is a measure now in committee that if passed as written would lead to the demise of most of the amateur 70 centimeter ham band as we know it today.

As we said, the ARRL has directed this video message to its members but in reality every ham in the United States and its possessions will be affected if HR-607 is passed into law as written. While we have no way to bring you the video portion of this message we can give you the audio. It runs three minutes and is perhaps the most important three

minute message ever issued by the league. Here with it is ARRL Chief Development Officer Mary Hobart, K1MMH:

--

"In February, Congressman Peter King of New York Chairman of the House Homeland Security Committee, introduced H.R. 607, called the "Broadband for First Responders Act of 2011." It has been referred to the House Energy and Commerce Committee

"The bill would create a nationwide Public Safety broadband network. As part of that network, the Bill provides for the allocation of the so-called "D-Block" of spectrum in the 700 MHz range for Public Safety use. These are part of the old UHF television frequencies no longer in use.

"We have no problem with that. But the bill also includes other frequencies that are to be taken and sold to commercial users. The bands to be sold at auction include the paired frequencies of 420-440 MHz and 450-470 MHz.

"420 to 440 Mhz is most of our amateur 70-cm band, It is one of the primary bands used by Amateur Radio operators. And this is a major problem.

"This band is already used by hundreds of thousands of handytalkies, thousands of Amateur Radio Emergency Service volunteers, severe weather spotters, weak signal operations, thousands of repeater systems, mobile operators Amateur Radio satellite communications, radio location beacons, amateur radio's nationwide system of digital and text communications, and more.

"This band is not just used for hobby activity, But used in the development of new radio technologies. And very important in continuing to meet our promises to provide communications for emergency groups with whom we have formal agreements.

"The National Public Telecommunications Council shares our concern and believes that the bill needs to be amended.

"420 to 440 MHz is already being heavily used for public service operations - by Amateur Radio operators. While the ARRL obviously supports the work of Public Safety organizations we vigorously oppose HR 607 in its present form. As it is written HR 607 is a direct threat to our limited spectrum and we encourage ARRL members to voice your opposition to this bill

"Here's how you can help. Write a letter for your congressional representative, but send it to ARRL's legislative consultants Chwat & Co. They will collect and hand-deliver your letter along with our message. You can find a sample letter, the name of your representative and where to send it for hand delivery, to be sure it gets to them, at http://www.arrl.org/sample-letter.

"Also please consider donating to the ARRL Spectrum Defense Fund. Our Amateur Radio frequencies are precious. We can't afford to have them taken away and sold at auctions. It's the donations from hams who care about preserving our frequencies that make our vigilance and defense of our bands possible.

"Don't just talk about it - do it. And please do it now."

--

According to one source, much of the credit for this new video goes to Al Petrunti, KA1TCH, of NewDay HD and video editor and graphics designer Kevin O'Dell, N0IRW. To view the video as well as hearing the audio, please take your web browser to tinyurl.com/607video. (Various)

GB2RS NEWS

Sunday 20th March 2011

The news headlines:

* News from Japan

* G4FSU appointed as HF Manager

* GB4FUN supporter, silent key

After the 8.9 earthquake that struck near Sendai, Japan at 0546UTC on 11 March, Japan has been rocked by tsunamis and power outages caused by trouble at a nuclear power station. Some 55,380 houses/buildings were damaged by the earthquake and 3,000 houses washed away by the tsunami. The RSGB has sent a message of support to the JARL who, although based in Tokyo, has still felt the quakes but has suffered no damage. Sadly, the Yaesu factory in Fukushima has been damaged. Thankfully, no staff were injured, although it will take a week or two to get the factory up and running as it is just 60km from the nuclear power station. Sadly, many of the subcontractors used by several of the manufacturers in Japan are based near the coast; it is unclear what has happened to these businesses. The Japan Amateur Radio League HQ station, JA1RL, along with other amateurs throughout the island nation, is maintaining the effort to support the disaster relief operation. JA1RL continues to operate as an emergency traffic centre on 7.030MHz as well as 2 metres and 70cm. While 3.525, 7.030, 7.043 and 7.075MHz have been mentioned as in use, it's wise to keep those and all of the Centre of Emergency frequencies clear of normal and non-urgent traffic. In less damaged areas, the electric power supply is being restored gradually and local amateurs have started to establish stations at shelters. Our thoughts are with all those affected by this situation.

Following the decision by John, G3WKL to step down as HF Manager and the post being advertised in RadCom, the Board has approved the appointment of Ian Greenshields, G4FSU to this honorary position. Apart from a having a very successful career as an RF and microwave communications engineer, Ian is well versed in radio spectrum matters. This is on account of his role, since 2005, of Secretary to the IARU Region 1 HF Committee. Recently, the IARU has appointed him as a Technical Consultant that will require regular involvement in ITU and CEPT matters. Ian's other amateur radio interests include managing the speaker programme for the HF Convention between 2003 and 2009, and HF DXing and contesting.

The RSGB has been saddened to hear of the death of Waters & Stanton's long time service engineer Michael Wheaton, G4ZPE. Michael, known as ZIPY, was a larger than life character who was involved in amateur radio for many years. He was involved in the fitting out of GB4FUN Mark 1 and gave much of his time to stripping the vehicle when the current GB4FUN was commissioned. Those involved with the GB4FUN project remember Michael as a true gentleman and outstanding man who always assisted with kit and repairs for GB4FUN. Our condolences to his family, he will be sorely missed by all his friends, RSGB staff and work colleagues at Waters & Stanton. Unfortunately, due to circumstances beyond our control, the posting of the April RadCom has been delayed. Copies will go into the post on 21 March, for delivery around 25 March. Our apologies for the inconvenience to Members.

There is a reunion of ex-members of the Radio Security Service on Sunday 17 April in the Mansion at Bletchley Park. It will include an illustrated lecture on how radio amateurs helped to win the war. More than a thousand amateur volunteers listened on the short wave bands, in secret in their own homes, for illicit signals in the UK. What they uncovered were the transmitters of the German Secret Service operating all over Europe and beyond. Beside penetrating the most secret aspects of the service they also learnt about spies sent here, some of whom were 'turned' to work under the supervision of radio amateurs, notably Ronnie Reed, G2RX. More can be learned at http://secretlisteners.org.

Early notice now of an event that may be of interest to UK Intermediate students and any keen home brew enthusiast. The Torbay Amateur Radio Society will be hosting a Buildathon on Sunday 5 June in Newton Abbot, Devon. The project will be a 'Manhatten-style' 40m Sudden receiver with VFO by G3RJV. The Bath Buildathon crew will be providing tools and test equipment, assisting and mentoring any student who needs guidance. Enquiries to Pam Halliwell via the Torbay ARS website www.tars.org.uk/.

And now for the details of rallies and events for the coming week

The 27th Yeovil QRP Convention will take place today, 20 March, in Digby Hall, Hound Street, Sherborne, Dorset DT9 3AA. The venue is adjoining the central shopping car park. Doors open at 9.30am and talk-in is provided on S22. There will be trade stands, lectures and a Bring & Buy. CP, TS, LEC, B&B, C, DIS. Contact Derek, M0WOB, 01935 414 452.

For an unusual day, the Northern Ireland Bunker will be open to the public on Saturday 26 March from 11am till 4pm, at 60 Derrylettiff Road, Portadown. This bunker has been restored by Allistair, 2I0ROC. More details can be found at www.nibunker.co.uk or by contacting Allistair on 0792 116 7775.

The Spring Militaria & Electronics & Radio Amateur Hangar Sale will take place on 27 March at the Hack Green Secret Nuclear Bunker, Nantwich, Cheshire, CW5 8AP. Doors open at 10am and admission is £2.50. Visitors will find civil, military and vintage radio equipment plus vehicle spares and more. Contact Rod Siebert on 01270 623353.

Now for the news of special events

The Humber Fortress DX Amateur Radio Club will be putting GB0BB on the air again today, 20 March, from Fort Paull in East Yorkshire. The station will celebrate the 6th anniversary of the Blackburn Beverley XB259 aircraft. Operators and guests are welcome. See qrz.com for details of the event.

John Taylor, G3OWO is celebrating his 50 years in radio communication with GB5OWO. He will be active on all bands from 160m to 70cm from his home in Preston, Lancashire until 28 March. John will be using as many modes as possible with the emphasis on PSK31 & CW. More information and photographs can be found on QRZ.com. Until 3 April, GB8HBW and GB0CMR will be on the air celebrating 85 years of Hospital Radio in the UK. GB8HBW will be operating in the Newbury area and GB0CMR is in Hinckley for Castle Mead Radio.

On 21 March, the Namibian Amateur Radio League celebrate its 21st birthday. At the same time Namibia will celebrate 21 years of its own independence. To commemorate these two events the NARL has been issued the special event callsign V521NAM. All amateurs in Namibia are allowed to use the special event callsign on 19 to 21 March but they will be required to send in their logs so the NARL QSL Bureau can send out special QSL cards to all worked stations. All incoming QSL's should be via sent via the bureau or electronically using e-qsl. More on this special event operation is on the web at www.qsl.net/narl. (NARL)

North Cork Radio Group will be active EI1NC/P from the Old Governors House at Cork City Gaol and Radio Museum on 20 March. The Gaol houses the restored 6CK radio broadcast studio in addition to an audio visual dedicated to Marconi and his Irish connections along with a wide collection of nostalgic artefacts from the golden age of Irish radio.

Paul Robinson 2E1EUB will be active on the amateur radio satellites from Scotland signing 2M1EUB/P for a week starting Sunday, March 20. He will be operating from his van that he's spent all winter setting-up. Weather permitting he hopes to be on the mountains rather than below them. He will start from grid square IO87RJ in East Scotland and will be travelling around the surrounding area. More information on QRZ.com.

And now the HF DX news compiled from 425 DX News and other sources

VE3ZIK will be once again active portable 9A from Croatia until 30 March. He also plans to be active in the Russian DX Contest, the CQ WPX SSB Contest and mentions that there is a good chance he will be on from Vrana Lake as well. QSL via DK8ZZ, via the bureau, Logbook of the World, eQSL or direct. E-mail Bureau requests for QSLs can go to ve3zik@gmail.com.

A0SC, UA0SE, UA0SW and RZ0SR will be working from Senegal until 28 March. During RDXC and WPX contests they will be active as 6V7D. Before and after they will use 6W/home calls. They will be working on all HF bands and all modes. QSL for 6V7D via UA0SE otherwise, QSL via their home callsigns.

Joe, 9N7WL, Ernst, 9N7AN, Georg, DL4SVA and Franz, DL9GFB plan to be active from Nepal in a period stretching from mid-March to early-April 2011. Beginning 16 March, Ernst, 9N7AN will commence solo activity from Kathmandu, with the main part of the DXpedition starting on 26 March once the rest of the team arrive in Nepal. They will operate all bands/modes until 8 April.

Kevan, 2E0WMG and Jonathan,G0DVJ will be on the air from Lundy Island from 21 to 26 March. For QSL details see QRZ.com. Stefan, DL7AOS will be active as 5P5K from Roemoe Island from 20 March until 1 April. He will work in holiday style mainly in SSB on the usual IOTA frequencies. QSL via his home callsign either via the bureau or direct.

Now the contest news

On 22 March, the 50MHz UK Activity Contest takes place from 2000 to 2230UTC. Using all modes, the exchange is signal report, serial number and locator. Also on 22 March, the SHF UK Activity Contest takes place between 2000 and 2230UTC. Using all modes the on the 2.3 to 10GHz bands, the signal report is signal report, serial number and locator. On 24 March, the SSB leg of the 80m Club Championships takes place between 2000 and 2130UTC. The exchange is signal report and serial number. Next weekend, 26 and 27 March, the CQWW WPX SSB contest takes place between 0000 and 2359UTC. On the 1.8 to 28MHz bands, the exchange is signal report and serial number.

And now the solar factual data for the period from the 7th to the 13th of March, compiled by Neil Clarke, G0CAS on the 14th of March.

Four hundred years ago on the 9th of March 1611, a German student named Johannes Fabricius spotted black spots on the sun's surface through his newly invented telescope. Though he was not the first to observe sunspots, he was the first to publish a scientific paper on the subject several months later. This publication opened a door to four more centuries of solar research, which is still ongoing. He wrote, "Several weeks of observations suggested that neither clouds nor planets nor stars caused the dark spots on the sun." He came to the conclusion that the spots were a phenomenon of the sun itself and that they moved in the same direction at a fairly constant speed, disappearing off one edge and reappearing approximately two weeks later on the other. Johannes Fabricius unfortunately died in 1616 at the young age of 29, so he barely saw even the early stages of sunspot research. But four centuries after his sighting, the legacy of the sunspot mystery he discovered lives on.

Solar activity was high on the 7th, 8th and the 9th. On the remaining days, activity was moderate except for the 11th and the 13th that were low. The largest solar flare of the period was an X1 on the 9th. Eighteen M class solar flares took place along with numerous C class solar flares. The solar disc for the first few days was dominated by four large sunspot groups but this reduced to two by the end of the period. Solar flux levels increased to peak at 155 units on the 8th, the highest level since July 2004. Levels then declined to 113 by the

13th. The average was 134 units. The 90 day solar flux average on the 13th was 93, that's three units up on last week. X-ray flux levels started the period at C1.7 units but declined everyday to B3.8 by the 13th. The average was B8.3 units. Geomagnetic activity started at quiet levels but at around 0600 on the 10th the arrival of a magnetic disturbance was detected at the ACE spacecraft. This first storm seems to be related to a coronal mass ejection from a large solar flare that took place on the 7th. The Ap index was 20 units. Following on from this, a coronal hole disturbance arrived the next day and the Ap index on the 11th was 40 units. This disturbance continued into the next day when the Ap was 13 units. The average was Ap 14 units. Solar wind data from the ACE spacecraft saw solar wind speeds increase from 320 kilometres per second on the 8th to 600 by the morning of the 12th. Particle densities were low except for the 10th and the 11th when an increase to 22 particles per cubic centimetre occurred. Bz on the quiet days varied between minus 6 and plus 3 nanoTeslas. During the 11th variations to minus 13 and plus 12 nanoTeslas took place. Interestingly, the Bz remained negative from 0500 on the 7th to 0230 on the 9th, that's a continuous 45 and a half hours. The magnetic field was weak so no aurora occurred.

And now the solar forecast. During this present increase in solar activity, one of the largest regions is due to return into view around the middle of this week. Therefore, solar activity could increase as the week progresses. Obviously, much will depend on how active this region is on its return. Solar flux levels should also increase and could be up to the 120's. Provided that no coronal mass ejections heads our way then geomagnetic activity is expected to be quiet for most of the week. MUFs during daylight hours at equal latitudes should be around 24MHz for the south and 21MHz for the north. Darkness hour lows should be about 10MHz. Paths this week to Australia should have a maximum usable frequency with a 50 per cent success rate of around 27MHz. The optimum working frequency with a 90 per cent success rate will be about 21MHz. The best time to try this path will be between 0800 and 1200 hours.

And that's all for this week from the propagation team.

Next, the Local News:

Please note that details of all RSGB-affiliated clubs and societies

can be found on the RSGB website, including email addresses

and website links where known.

[Note to Newsreaders: Please read the local news items appropriate to the service area of your

transmission.]

NEWS FOR THE MIDLANDS On Monday 21 March, Gloucester Amateur Radio & Electronics Society is having a talk and demonstration by Martin, G4ENZ

on the Perseus Software Defined Radio. Contact Anne, 2E1GKY, on 01452 548478, daytime.

On Monday 21 March, Leicester Radio Society is holding a committee meeting and night on the air. Contact Alex, G8FCQ, on 0753 120 1640.

On Monday 21 March, South Birmingham Radio Society is having a committee meeting. Contact Don, on 0121 458 1603.

On Monday 21 March, South Normanton Alfreton & District Amateur Radio Club is having a talk on EMC by Don Beattie, G3BJ. Details from A Lawrence, 2E0BQS, by email to adylawri@btinternet.com.

On Monday 21 March, Welland Vallet Amateur Radio Society is having a talk and demonstration of Bonito Software. Details from Peter River, G4XEX on 01858 432105.

On Tuesday 22 March, Derby & District Amateur Radio Society is holding the club's annual general meeting. Contact Richard Buckby, by email to radio@dadars.org.uk.

On Tuesday 22 March, Loughborough & District Amateur Radio Club is having a talk on What keeps your lights on by George, G4EUF. More information from Chris, G1ETZ, on 01509 504 319.

On Wednesday 23 March, Hinckley Amateur Radio Society is having club member mini talks. Details from John, M0JAV, on 07836 731544.

On Wednesday 23 March, Lincoln Short-Wave Club is having a talk on software defined radio by John Roger, M0JAV. For more information contact Pam Rose, G4STO, on 01427 788356.

On Wednesday 23 March, March Midland Amateur Radio Society is planning for the 80th anniversary in June as well as continuing the training classes. Details from Norman, G8BHE, on 01214 229 787.

On Wednesday 23 March, Telford & District Amateur Radio Society is having a 2m DF evening, bring along your kit and get it checked out . Contact Mike, G3JKX, on 01952 299 677. On Thursday 24 March South Birmingham Radio Society is holding training classes with Dave Murphy, G8OWL. Contact Don, on 0121 458 1603.

On Friday 25 March Coventry Amateur Radio Society is having a President's Night. Contact John, G8SEQ, on 07958 777363.

On Friday 25 March Hucknall Rolls Royce Amateur Radio Club is having a general club meeting. More information from Dave Wilde, G1YAI, on 0844 4355593.

On Friday 25 March Lincoln Short-Wave Club is taking part in the CQWW WWPX contest over the whole weekend. For more information contact Pam Rose, G4STO, on 01427 788356.

On Friday 25 March Nunsfield House Amateur Radio Group is working on its RSGB project. Details from Ken Frankcom, G3OCA, on 01332 720976.

On Friday 25 March South Birmingham Radio Society is having a construction evening. Contact Don, on 0121 458 1603.

On Saturday 26 March Lincoln Short-Wave Club is putting G5FZ on the air and working around the shack. For more information contact Pam Rose, G4STO, on 01427 788356.

NEWS FOR THE NORTH OF ENGLAND On Monday 21 March Macclesfield & District Radio Society is looking at forthcoming practical projects. More information from Roger Bell, M0GMG, on 0771 258 9163.

On Monday 21 March Scarborough Amateur Radio Society is having a talk on the experiences gained on the contruction of a K2 Elecraft transceiver by Robert Clutson, G0WHO. Details from Jerry Scarr, G6LBL, on 01751 476601.

On Monday 21 March Sheffield Amateur Radio Club is holding a mini flea market & quiz night. More information from Peter Day, G3PHO, by email to sarc@g3pho.org.uk.

On Monday 21 March Thornton Cleveleys Amateur Radio Society is having a talk on the NARSA rally. Details on the web at www.tcars.org.uk.

On Tuesday 22 March Chester & District Amateur Radio Society is having a familiarisation evening on the K3 transceiver at Burley Hall. Details from Barbara Green on 07957 870770.

On Tuesday 22 March Otley Amateur Radio Society is taking part in the 50MHz UK Activity contest with callsign G3XNO and holding a natter night. Contact Paul, 2E0PAK, on 07768 996370.

On Wednesday 23 March Denby Dale Radio Club is having a talk on QRP by George Dobbs, G3RJV. Note this will be held at Shelley Cricket Club, HD8 8HN. Details from Richard, M0RBG, on 07976 220126. On Wednesday 23 March Hornsea Amateur Radio Club is having a talk on DF theory. Contact Gordon MacNaught, G3WOV, on 01377 240573.

On Wednesday 23 March Mid-Cheshire Amateur Radio Society is having a short talk by G8SIG. Contact Peter Paul Fox, G8HAV, on 01606 553401.

On Thursday 24 March, Grimsby Amateur Radio Society is having a club night. More details from Cliff, G4YHP on 01472 328 830.

On Thursday 24 March Ripon & District Amateur Radio Society is having a club night on the air. Details from Rob Hall, M0RBY, on 0787 608 5631.

On Thursday 24 March South Manchester Radio and Computer Club is having an equinox junk sale. Details from Ron, G3SVW, on 0161 969 3999.

On Friday 25 March East Cleveland Amateur Radio Club is having a night on the air. For more information contact Alistair, G4OLK, on 01642 475 671.

NEWS FOR NORTHERN IRELAND Mid Ulster Amateur radio club will be holding a Foundation course in April over one weekend. For anyone interested in getting a foot on the amateur ladder, registration is on Friday 25

March between 7 and 8.30pm at the Place Initative, Ardress Park, Portadown, BT62 3TP. For more information, check out www.muarc.com or contact Martin, MI0YMF on 02838852712. Please note you must attend the registration to take part in the course.

NEWS FOR SCOTLAND The Livingston and District Amateur Radio Society will be holding a Foundation level examination at the Crofthead Farm Community Education Centre, Livingston on Tuesday 12 April at 7:30pm. Candidates must register by 29 March at the latest. Contact Norman Stewart on 07740 946192 for further details.

On Tuesday 22 March Livingston & District Amateur Radio Society is having a Morse code practice evening. Details from Norman, on 07740 946192.

On Wednesday 23 March, Ayr Amateur Radio Group is having a presentation on garden aerials. More details from Tom Ferguson, GM1OST on 01292 532 088.

On Wednesday 23 March, Lothians Radio Society is having a talk on Expedition Senegal by Tom Wylie, GM4FDM. Details from Andy Sinclair by e-mail to lrs_secretary@moosedata.com.

On Wednesday 23 March West of Scotland Amateur Radio Society is working on homebrew projects & licence training. More information from Fred Coombes, 2M0BIN, on 01415 715512.

On Thursday 24 March Aberdeen Amateur Radio Society is having a surprise talk. More information from Lewis, GM4AJR, on 01224 575 663. On Friday 25 March West of Scotland Amateur Radio Society is having presentations, guest speakers, a quiz and a raffle. More information from Fred Coombes, 2M0BIN, on 01415 715512.

NEWS FOR THE SOUTH EAST and EAST ANGLIA Listeners in the London area who received the East London 2 metre Sunday evening reading will be aware that this was discontinued some months ago due to a lack of volunteer readers. The RSGB is pleased to announce that two have now come forward. Starting this Sunday, 20th March, Steve, 2E0SPW in Chislehurst and Steve, G0TDJ in Crayford will be teaming up to read the news at 19.00 hours on 145.525MHz to serve the Kent and London areas. Furthermore, they will provide a second reading for 70cm listeners at 20.00 hours via the Bromley repeater GB3OK that has its output on 430.900MHz. Up until now there have been few readings on Sunday evenings in the South East, and it is expected that the coverage will extend over a wide area. The two Steves will appreciate reception reports during their after-news nets. At a later date it may be possible to put out the transmissions on both bands at the same time.

On Monday 21 March, Braintree & District Amateur Radio Society is holding a construction evening. Details from John, M5AJB on 01787 460 947.

On Monday 21 March, Burnham Beeches Radio Club is having a code cracking evening with Ian, M1FHU. More information from Dave, G4XDU on 01628 625 720.

On Monday 21 March, Felixstowe & District Amateur Radio Society is holding their annual general meeting. More information from Paul, G4YQC, by e-mail to pjw@btinternet.com.

On Monday 21 March, Surrey Radio Contact Club is holding a fix-it, advice, chin wag and move it on evening. Details from John, G3MCX on 020 8688 3322.

On Tuesday 22 March Chelmsford Amateur Radio Society is having a club net night. Contact Martyn, G1EFL, on 01245 469 008.

On Tuesday 22 March, Dorking & District Radio Society is holding an evening looking at home construction techniques with Bob Burns, G3OUU. More information from Garth, G3NPC on 01737 359472.

On Tuesday 22 March, Harwell Amateur Radio Society will hold a shack activity night. Details from Malcolm, G8NRP on 01235 524844.

On Tuesday 22 March, Horndean & District Amateur Radio Club has Ronald Hewlett, G3UKU looking at a signal level project. More information from Stuart, G0FYX on 023 9247 2846.

On Wednesday 23 March Chesham & District Amateur Radio Society is having a night on the air with CW practice. More details from Terry, G0VFW, on 01442 831 491.

On Wednesday 23 March, Hastings Electronics & Radio Club is having a talk on the career of a merchant navy radio electronics officer in the 1970s and 1980s by Tim, G4EOA. Details from Gordon on 01424 431 909. On Wednesday 23 March Havering & District Amateur Radio Club is having a talk on Yaesu Communications - Amateur and Marine Products by Paul Bigwood. Details from John, M0UKD, on 07890 222111.

On Wednesday 23 March, Newbury & District Amateur Radio Society is having a talk by Richard, G3ZGC on his experiences of life at sea centred around the radio side. More infroamtion from Rob, G3LMW on 01635 862737.

On Wednesday 23 March Norfolk Amateur Radio Club is having a talk on The RSGB what it can do for you by the President of the RSGB, Dave Wilson, M0OBW. Details from Chris Danby, G0DWV, on 01603 898678.

On Wednesday 23 March Worthing & District Amateur Radio Club is having a discussion evening. Contact Phil, G4UDU, on 01903 816684.

On Thursday 24 March, Echelford Amateur Radio Society is holding a Bring & Buy and natter night. Details from John, G4GSC on 01784 451898.

On Thursday 24 March, Edgware & District Radio Society is holding a round table discussion in defence of DAB led by John, G3SJE. Contact Mike, G4RNW on 020 8950 0658.

On Thursday 24 March King's Lynn Amateur Radio Club is having a club night and 2m club net. Contact Ray, G3RSV, by email to ral-g3rsv@supanet.com.

On Thursday 24 March, Lowestoft & District PYE Amateur Radio Club is having a night in the shack. Details from Lee, 2E1LJL on 01502 564242.

On Thursday 24 March Norfolk Amateur Radio Club is taking part in the RSGB SSB Club Contest. Details from Chris Danby, G0DWV, on 01603 898678.

On Thursday 24 March, Shefford & District Amateur Radio Society is having a discussion on the club project with Richard, G3NII. Details from David, G8UOD, on 01234 742 757.

On Friday 25 March Cambridge & District Amateur Radio Club is having a discussion evening asking is your equipment earthed. Details from Ron, G3KBR, on 01223 501712.

On Friday 25 March, Loughton & Epping Forest ARS is having a night on the air. Contact Marc Litchman, G0TOC on 020 8502 1645

On Friday 25 March Mid-Sussex Amateur Radio Society is having a radio night. Contact Peter, G4AKG, on 01444 239371.

On Friday 25 March, Waterlooville Amateur Radio Club is holding the EGM. Details from Rich, G4IBW on 0239 268 0852.

On Friday 25 March, Wimbledon & District Amateur Radio Society is having an evening on radio topics with Andres, G4ADM. Details from Andrew Maish, G4ADM on 020 8335 3434.

NEWS FOR THE SOUTH WEST On Sunday 20 March, Yeovil Amateur Radio Club is holding the QRP Convention in Digby Hall, Yeovil. Details from Steve Crask, G7AHP by e-mail to steve@g7ahp.co.uk. On Monday 21 March, Appledore & District Amateur Radio Club is holding the AGM. More information from Brian Jewell, M0BRB on 01237 473251.

On Wednesday 23 March Cornish Radio Amateur Club is running its Foundation course. Details from Steve, G7VOH, on 01209 844939.

On Wednesday 23 March Thornbury & South Gloucestershire Amateur Radio Club is having a night on the air. Contact Tony, G0WMB, on 01454 417048.

On Thursday 24 March Swindon & District Amateur Radio Club is having a club talk. Contact Den, M0ACM, on 07810 317750.

On Thursday 24 March Yeovil Amateur Radio Club is having a talk on my kite aerial by M0WOB. Contact Steve Crask, G7AHP, by email to steve@g7ahp.co.uk.

On Friday 25 March North Bristol Amateur Radio Club is having a talk on railways and signals by Paul, G8YMM. Contact Dick, on 01454 218362.

On Friday 25 March Torbay Amateur Radio Society is having a presentation night with buffet. For more information contact Dave, G6FSP, by email to g6fsp@tars.org.uk.

NEWS FOR WALES On Monday 21 March Dragon Amateur Radio Club is having a talk on SOTA and Mountain Rescue' by members of the Aberglaslyn Mountain Rescue Team. More information from Stewart Rolfe, GW0ETF, on 07833 620733.

On Monday 21 March Llanelli Amateur Radio Society is having a social evening. Contact Craig, MW0MXT, on 01269 840292.

On Thursday 24 March, Marches Amateur Radio Society is having a night on the air. Details from Dave MW0AYM on 01691 777242.

SARL NEWS - SUNDAY 20 MARCH 2011

You are listening to ZS6SRL, the official radio station of the South African Radio League, the national body for amateur radio in South Africa, with a news bulletin every Sunday at 08:15 CAT in Afrikaans and at 08:30 CAT in English. To listen to a web stream, visit www.sarl.org.za, click on 'ARMI' and follow the links for details. PLEASE NOTE: for audio via Echolink, connect to ZS0JPL-R.

You can download this bulletin and previous ones from www.sarl.org.za and also subscribe to receive future bulletins by e-mail. Your newsreader this morning is (name), (call sign), on 145,725 and 7,066 MHz from Pretoria, with relays on 7,066 and 3,695 MHz SSB.

In the news today

NEW AMATEUR RADIO REGULATIONS IMMINENT

RUSSIAN FEDERATION ADOPTS CEPT LICENSING

SA AMSAT SPACE SYMPOSIUM FINAL PROGRAMME NOW ON THE WEB

THREE SABS SUB-COMMITTEES TO DEAL WITH ASPECTS OF COMMUNICATION TECHNOLOGY

You are listening to ZS6SRL. Stay tuned for more details on these and other important and interesting news items.

NEW AMATEUR RADIO REGULATIONS IMMINENT

According SARL's contact at ICASA, the ICASA Council is expected to approve the final regulations at its meeting on Wednesday. This means that the new regulations and the table of amateur radio frequency allocations could be gazetted coming Friday or the week after. Which of the SARL recommendations discussed at the public hearing have been incorporated remains unknown. The SARL's request for information was declined.

RUSSIAN FEDERATION ADOPTS CEPT LICENSING

Following on a decision by the Russian State Commission for Radio Frequencies to join the CEPT Radio Amateur License agreement, it should soon be easier to use amateur radio gear while visiting the Russian Federation.

The commission plans to advise CEPT Working Group R A of its decision in the near future. Working Group R A will be meeting in May and

September. IARU Region 1 says that it considers this a major step forward to eventually permit worldwide radio amateur roaming. CEPT licensing means that all nations accepting this recommendation also accept any other signatory's amateur radio license, subject to certain limitations as valid in those nations as well. South Africa is a signatory to the CEPT agreement and on publication of new radio regulations, will return to full reciprocity.

SA AMSAT SPACE SYMPOSIUM FINAL PROGRAMME NOW ON THE WEB

Could South Africa soon have its own satellite launch facilities? Two new amateur satellites to be designed and built in South Africa, receiver design for the SKA leads in world technology and RaDAR- Rapid Deployed Amateur Radio- are just four of the many presentations at the 2011 SA AMSAT Space Symposium to be held on Saturday 2 April 2011 at Talk 100 Auditorium at Vodaworld in Midrand.

The symposium provides a platform for discussion and interaction on various aspects of Space for both the professional and hobbyists who have an interest in the many fascinating aspects of space activities. The symposium will be opened by Dr Sandile Malinga, the CEO of the recently established South African National Space Agency (SANSA) with a key note address.

To register for the Symposium visit www.amsatsa.org.za for details and the registration form. The cost is R300 if booked before 26 March, after that R350. Students can register for R275. The fee includes lunch and refreshments.

THREE SABS SUB-COMMITTEES TO DEAL WITH ASPECTS OF COMMUNICATION TECHNOLOGY

The SABS technical committee 74 (TC74) has established three sub-committees which have be tasked with the development and approval of communication equipment standards. Of main interest for Amateur Radio is committee TC74D which is tasked with standards for communication systems utilising the electromagnetic spectrum. TC 74 will remain the oversight committee.

On the PLC front, ESKOM is considering the use of power line communication in the frequency range up to 500 kHz for remote network management and metering. Members of the TC62, TC73, TC74 and TC80 will soon meet to discuss the process to be used to establish a standard. The issue of Broadband PLT is currently being handled by a joint workgroup of TC73 and TC80. This workgroup, designated WG6, is chaired by the SARL representative, Hans van de Groenendaal, ZS6AKV. It is not likely that the Broadband PLT work will move to the group considering the low frequency PLC.

The term PLC and PLT are confusing. ICASA uses PLT for the broadband application while the power utilities refer to it as PLC. The principal of operation is the same just the frequency of operation differs.

Low frequency PLC does not pose a material threat to amateur radio while the high frequency version could potentially create havoc on the HF bands. Final regulations are still awaiting review by the ICASA Council. Although the draft regulations do not include the notching of Amateur frequencies there are acceptable mitigation rules in place should radio amateurs experience interference from PLT.

CHANGES ON THE SARL COUNCIL

Louw Erasmus, ZS6LME, has resigned from Council and has withdrawn his nomination for election on the 2010/2011 Council. SARL President, Dennis Green, informing Council of Louw's resignation at the Strategic Indaba held last weekend, extended his thanks to Louw for his contribution to the SARL and amateur radio and wished him well for the future.

AGM DOCUMENTATION

The Annual General meeting of the SARL will be held during the National Convention on Saturday 16 April 2011. The Agenda, financial reports and other AGM documents are now available for download from the member's only section of www.sarl.org.za. Select the members only button on the top right hand of the home page and enter your P.I.N.

CONTEST NEWS

The final results of the SARL Digital Contest held on the 27th February is as follows:

1st ZS6A 494 points 2nd ZS6GRL 443 points 3rd ZS6WR 335 points 4th ZS6AKU 312 points 5th ZS2I 264 points

The winner of the Lucky Draw prize is Peter Roos, ZS6PGR.

Congratulations to all the winners.

The full results will be published in HF Happenings.

HAMNET SIMULATED EMERGENCY CONTEST 6TH MARCH, 2011-03-18.

Nineteen logs and one check log were received.

Scores are as follows:

Singe Operator Stationary Mobile: ZS4N, 1 896 points ZR4DEF, 1 030 points ZS6AGF, 630 points ZS4BS, 228 points

Single operator Base Station: ZS5ML, 1 320 points ZS2A ,1 260 points ZS6YH ,1 200 points ZS6ADY, 1 100 points ZS5DU, 1 072 points ZS6ARQ ,1 005 points ZS2J, 882 points ZS6JDV, 780 points ZS6NJV, 465 points ZS4TW, 370 points ZS2EC, 350 points ZR6MS, 330 points ZR6DHC, 144 points

Single Operator Portable ZS2U, 738 points ZS6BNE, 396 points

There were no multi-operator portable entries.

Winner of the lucky draw is ZS2A.

PROPAGATION REPORT

Hannes Coetzee, ZS6BZP, reports that the solar activity is at moderate levels. Departing sunspot 1 169 erupted during the late hours of March 16th and hurled a spectacular coronal mass ejection (CME) over the sun's western limb. New sunspot 1 173 was numbered on Wednesday and is located in the southern hemisphere. This region is not yet capable of producing strong solar flares. The effective sunspot number is expected to be around 30 for the coming week.

15 m will provide the best opportunities for DX followed by 20. With the higher sunspot activity 10 m will also open from time to time. Conditions to India will be good from the afternoon till after sunset. During the late afternoons conditions will be good towards Europa. Good contacts with the USA are possible during the evening. Contacts with Australia are possible on 20 m after sunset. Openings to Brazil and South America are possible during the afternoons. With the good 15 and 20 m openings 17 m will also be full of surprises.

For the CW and digital enthusiasts 30 m may be very rewarding with openings to many parts of the world.

Locally is 40 m the work horse for contacts around the country with 20 and 30-m also being very useful for contacts over the longer distances. 80 m will be best during the early mornings and late afternoons as well as over the shorter distances.

80 m is the frequency of choice during the evenings.

Please visit www.spaceweather.co.za for further information.

DIARY OF EVENTS 20 March - SARL VHF/UHF analogue and digital contest still on the go and finishes at 12:00 CAT today. 25 March - SAiSAT briefing session at the NARC. 2 April - SA AMSAT Space Symposium at Vodaworld, book at www.amsatsa.org.za. 15-16 April - SARL National Convention at Vaal University for Technology.

SARL News invites clubs and individuals to submit news items of interest to radio amateurs and shortwave listeners. Submit news items - if possible - in both English and Afrikaans to www.sarl.org.za/newsinbox.asp, not later than the Thursday preceding the bulletin date.

The SARL also invites you to listen to Amateur Radio Today every Sunday morning at 10:00 CAT on 145,750 MHz in the Pretoria area, with relays on 7 082, 7 205 and 17 560 kHz. There is also a podcast by ZS6RO. For a web-stream and Echolink by ZS6FCS, visit www.sarl.org.za, click on 'ARMI' and follow the links. A repeat transmission can be heard on Mondays at 22:05 CAT on 3 215 kHz. Sentech sponsors the ARMI transmissions on the non-amateur frequencies.

You have listened to a bulletin of the South African Radio League, compiled by George, ZS6NE.

Thank you for listening, 73.

IARU Region 3: First Week of Japan Disaster
JARL HQ station JA1RL and other amateur stations are maintaining the effort to support disaster relief operation which is being captured by audio and vision.

IARU Region 3 Secretary, Ken Yamamoto JA1CJP said, "In less damaged areas, the power supply is being restored gradually and local amateur radio club members have started to establish stations at shelters either on HF, VHF or UHF bands."

Ken Yamamoto said, "The radio amateurs in the affected areas are also making use of UHF repeaters for communications between shelters and local disaster relief centres. According to reports from the shelters, they are generally shortages of food, drinking water, fuel and medical goods. This is mainly due to difficulty of transportation because of road situation and staff shortage."

He said "JA1RL continues to operate under instruction to be an emergency traffic centre. Using the 7 MHz, 144 MHz and 430 MHz bands it is receiving help from JARL members in the affected areas. Field stations are using various frequencies, including some battery powered and others using small generators. Each is exchanging rescue and disaster relief operation information with JA1RL and others. While 3525, 7030, 7043 and 7075 have been mentioned as in use, it's wise to keep those, and all of the Centre of Emergency frequencies clear of normal and non-urgent traffic. There is no call for additional foreign radio amateurs."

Ken JA1CJP notes that JARL has received many e-mail messages from radio amateur radio societies and individual hams of many nations and territories in all six continents.

"These messages convey their condolences, sympathies and prayers for the people in Japan. JARL appreciates them very much and is encouraged by them." he said.

"I have also picked up some update information from news sources. The situation is getting worse. On March 17, police announced 5,178 people have been killed and 8,913 are missing. The numbers are sharply rising as most affected areas become accessible by search and rescue teams." he said.

The teams are from Australia, China, Korea, Singapore, New Zealand, USA, Germany, Switzerland and Russia.

The status of Fukushima nuclear plant is still serious and local residents within 20km radius have been evacuated.

It has been a week since the 8.9 on the Richter scale quake, the worst in 140 years, hit off Sendai triggering a ten-metre tsunami.

Statements issued by Vertex Standard Yaesu said its centre at Fukushima was currently out of action, while Icom and Kenwood are located elsewhere and not suffered the same outage. No reports have been received from other manufacturers at this time.

Jim Linton, VK3PC, Chairman IARU Region 3 Disaster Communications Committee.

Message from Break-In Editor
"The Break-In Editor John Walker ZL3IB has advised that he is assuming Break-In will be published as usual although it maybe slightly late."

****

>From The Business Manager ZL2DL
Debby says...
Branch Circular
The March Branch Circular has now been posted out to all Secretaries. If you do not receive this within the next 5 days please get back to me.

Included in the mail out are your branch membership details. If there is someone missing from your list whom you believe should be there, can you please confirm with them that they have made their 2011 subscription. If so, please contact me with details of when and how they paid, so that I can confirm and update my records.

Election Results
Elections close officially at 12 noon on Monday 21st March. Any votes received after this date will be voided. Any payments sent in an election envelope will be destroyed unopened, as these are to be used ONLY for voting purposes.

The Results of the election will be available on the web site on Monday evening following the count and official confirmation by the Returning Officer.

Candidates will be notified first, either by phone or e-mail.

Break In
Break In is due out at the beginning of April. At this stage all is confirmed that it will be posted as usual, given that these are produced and posted from Christchurch.

All thirteen remits will be included in Break In, therefore no prior publication of this is permissible in accordance with Clause 6.6. e of the NZART Constitution.

Talk soon...Debby ZL2DL

NZART Conference 2011
Queen's Birthday Weekend June 3-6 2011
Upper Hutt Branch 63 NZART cordially invites NZART Members and their guests to join us at the Upper Hutt NZART Conference 2011.

Venue
This year's Conference is being held at the Silverstream Retreat which is located near the Upper Hutt suburb of Silverstream and just north of the entrance to Stokes Valley. It is easily accessible from the nearby State Highway 2 and State Highway 58 (Hayward's Hill Road). Physical address is:

Corner Eastern Hutt Rd & Reynolds Bach Drive, Lower Hutt 5019

Free Internet access on site via Wi-Fi will be available.

Provisional programme
The programme will include lectures and forums by several guest speakers, the NZART AGM plus the usual AREC, AMSAT-ZL, OTC, SPAM, WARO and other section meetings, forums and AGMs. An exciting range of other talks, displays and trading tables has been organised.

Guest Speakers
The Conference is planning for an opening address from local Member of Parliament, Chris Hipkins, as well as the Conference Chairman.

Friday
Registrations will commence on Friday afternoon from 4.00 pm at the Silverstream

Retreat, from the Boardwalk complex. For those staying on site, all registration and accommodation will be handled by the Conference Registration team.

Saturday
The registration desk will be open from 7.30am at the Boardwalk area, again for all registration and accommodation inquiries and requests. The Conference will commence at 8.30am, with the official opening commencing at 9.00am. After the welcoming speeches there will be a morning tea break at 9.30am for 30 minutes, with the conference recommencing at 10.00am. The Alternative Programme will commence after the morning tea break. The day should end around 5.00pm with enough time to go back to your accommodation before 6.00pm before pre- dinner drinks at the Boardwalk. Then at 7.00pm the Conference Dinner will commence. The after dinner speaker is well known broadcaster Ian Johnstone. Entertainment will follow.

Sunday
At 8.30am the WARO AGM will start with other AGM's and forums at 9.00 am. The day should end again around 5.00pm for members to refresh before 6.00 pm for pre-dinner drinks at the Boardwalk. At 7.00pm comes the closing dinner.

For more information, please contact:
Email: uh.conference2011@gmail.com
Post: UH Conference 2011, 204 Plateau Road, Te Marua, Upper Hutt 5018, Wellington.

ATTENTION: SCHOOL RADIO CLUBS
"School Skeds"

Arrange Lunch-time QSOs!
Please provide the NZART Webmaster with the following detail to display here!

The club callsign you will be using:
Your preferred listening/operating frequency:
Preferred week-day(s) (Monday ... Friday):
Your on-air operating start time:
The name of your club/school:
The personal callsign of the Trustee who will be supervising your station:
Other information you wish to have made known:

Contacts with other school radio clubs in addition to contacts with other amateur stations are encouraged.

A Note About School Radio Clubs and Callsigns:
The official publication of the Radio Spectrum Management Group (RSM) of the Ministry of Economic Development (MED), known as Public Information Brochure 46, PIB 46 - Edition 011 February 2011 - "Radio operator certificate and callsign rules" is downloadable from:

http://www.rsm.govt.nz/cms/pdf-library/resource-library/publications/pib-46/pib46-edition-011-feb-2011.pdf/view

It makes this provision for Radio Club Stations to train unqualified persons live, on-air, under the direct supervision of a qualified amateur radio operator:

"8. Club Stations
For the purposes of establishing a club station callsign record, the named trustee must hold a General Amateur Operator's Certificate (GAOC).

Club station trustees may authorise the use of the suffix "XT" with the club's permanent callsign for the purposes of instructing and training prospective amateur operator candidates in practical on-air operating procedures. Provided they are directly supervised at all times by a GAOC holder, candidates may take an active part in general communication, operate transmitter controls, and engage in calling and signing off procedures.

A log of contacts made under a candidate's name using the XT callsign, must be kept by the trustee for 1 year after the last contact is made by a candidate."

XT = Examination Trainee

Some school radio club callsigns are included in the list of Branch and Organisation callsigns on page 2-49 of the NZART 2010-2011 Callbook (use the

CD-ROM version).

If your school radio club does not yet have its own club callsign and its own qualified Station Trustee, a qualified radio amateur from the local Branch of NZART may be able to assist.

Reports Are Encouraged!
Please tell us about your club's achievements, trials and successes and your personal experiences!

Send to: webmaster@nzart.org.nz?subject=WEB_ENTRY_SCHOOL_SKEDS

Rugby World Cup 2011
NZART Council has declared the Rugby World Cup to be a Special Event and encourages you to use the ZM prefix. In declaring this a special event it allows hams to use the ZM prefix eg ZM3TNT. In it's April "Business Update", RSM states: "To Promote the Rugby World Cup, New Zealand Amateurs are encouraged to use the ZM callsign prefix during September and October 2011".

A Map of New Zealand has been placed on the NZART website with game locations linked to contact details of local branches, any planned special events, on air events, and local repeater frequencies. Branches are to be encouraged to invite visiting hams to attend meetings and any special events. Any proposed changes or additions to this are to be forwarded to myself or the NZART webmaster.

Suggested special event call signs are as listed below

ZL6RWCN Northern Districts
ZL6RWCC Central Districts
ZL6RWCM Midlands Districts
ZL6RWCS Southern Districts

Anyone interested in picking up any these callsigns and being a trustee may contact myself zl3tnt@nzart.org.nz for further details

Individuals are encouraged to apply for "RWC" suffix callsigns and print QSL Cards.

My thanks are extended to Paul Ormandy ZL4PW for his assistance in putting this project together.

Ann Fraser ZL3TNT

Transmission of Data and
Power Wirelessly Through Submarine Hulls
This will cause a number of concerns to Governments around the world, but a very interesting wireless techniques nevertheless.

Steel walls are no match for Tristan Lawry. The doctoral student at Rensselaer Polytechnic Institute has developed and demonstrated an innovative new system that uses ultrasound to simultaneously transmit large quantities of data and power wirelessly through thick metal walls, like the hulls of ships and submarines.

http://news.rpi.edu/update.do?artcenterkey=2836&setappvar=page%281%29

Long Path PSK?
Here is an interesting one for the infoline _ long path PSK?

Interesting visual effects indicating only previously talked about but not seen visually delayed signals.

73 de ZL1GWE John

>Date: 17/03/2011 03:16 a.m.

>Subject: [ibmham] I have a question - Long Path PSK?

I was operating PSK on 30 Meters last night and noted something unusual. In the waterfall there were two identical QSO's trailing across the Superbrowser in DM780. (see samples attached). After the first I noted three others in the next 45 minutes. I was able to contact the stations and determine they were all operating between 30 & 50 watts, one with a beam pointed toward Europe and the others using verticals. None had remote transmitters or other fancy configurations, just basic set ups.

Other than the identical wave form and text decoded, I also noted the second signal was approximately 2,000hz above the base signal (I didn't think at the time to look down as well) and the delay varied by the distance, ie the closer the transmitting station, the greater the delay. You can see the Italian station was much less of a delay than K0SU in Colorado Springs. I was also told by one of the operators that my transmission was doing the same thing on his waterfall.

>From this I have made the following conclusions:

Delay seems consistent with Long Path signals.

Multiple stations causing the effect and others not causing the effect, and the one station confirming I was doing the same thing to him, indicates it is not an internal radio artifact.

My questions are:
Is this truly a Long Path signal?
If not what is it?
Why the frequency shift? (Most baffling to me of all.)

Any suggestions, ideas, thoughts or references on the subject?

(See attached file: DM780-Screenshot-2011-03-15-232951 Long Path K0SU.jpg)(See attached file: DM780-Screenshot-2011-03-15-235840 Long path it9ccb.jpg)

Because of the size of the above screenshot files, they are available on the NZART Web at:

http://www.nzart.org.nz/assets/pix-1/dm780-screenshot-2011-03-15-235840-long-path-it9ccb.jpg

> What software can I use to run SSTV on an OS2 machine?

You can compile any linux soft.

Just install the gcc for os2
http://packages.debian.org/stable/hamradio/

"linux might be easier "

Or look for wubi, that is linux on win.

os2 is win compatible?

The Ohio/Penn DX PacketCluster
DX Bulletin No. 1003
BID: $OPDX.1003
March 21, 2011
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, NJ1Q, W1HEO, WB2KSK, K3LR, NG3K & ADXO, N4AA & QRZ DX, KH6BZF, N6VR, KL7JR, N7NG, K8PT, K8YSE, W8GEX (60m News), W9ILY, AT International, DK8JB, DL1SBF, DL7MAE & The DX News Letter, DxCoffee.com, DXItalia.it, DX-World.Net, EA5RM, F5NQL, F6AJA & Les Nouvelles DX, FO8RZ, I1JQJ/IK1ADH & 425 DX News, OZ6OM & 50 MHz DX News, Pete's-DX-Newsdesk, OE1WHC, RSGB IOTA Web Site, VA3RJ & ICPO, VHF-DX-Portal (MMMonVHF), VK3QB, VU2PTT and VU2TS for the following DX information.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 13th-March, through Sunday, 20th-March there were 224 countries active. Countries available: 3A, 3B8, 3D2, 3DA, 3V, 3W, 4J, 4L, 4O, 4S, 4X, 5B, 5H, 5N, 5R, 5T, 5X, 5Z, 6W, 6Y, 7P, 7Q, 7X, 8P, 8R, 9A, 9G, 9H, 9J, 9K, 9L, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A2, A3, A4, A5, A6, A7, A9, AP, BV, BY, C3, C6, C9, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, CY0, D2, D4, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FK, FM, FO, FP, FR, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HC, HH, HI, HK, HL, HP, HR, HS, HZ, I, IS, J2, J3, J6, J7, J8, JA, JT, JY, K, KG4, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ4, PJ7, PY, PZ, R1FJ, S2, S5, SM, SP, ST, SU, SV, SV5, SV9, T2, T30, T7, T8, TA, TF, TG, TI, TJ, TK, TL, TR, TU, TY, TZ, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V8, VE, VK, VK0M, VP2E, VP2M, VP2V, VP5, VP6, VP8, VP8/h, VP8/o, VP9, VR, VU, VU4, XE, XF4, XU, XX9, YA, YB, YI, YK, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD9, ZF, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

3D2, FIJI (Update). Operators Eddie/VK4AN and Kenneth/OZ1IKY are now active as 3D2A and 3D2DX, respectively, from Nadi Bay, Viti Levu. Eddie will stay active until April 4th, while Kenneth will only operate until March 30th. As previously reported, their activities will be from a

"3-story 2-br luxury a/c apartment in Nadi with roof top antennas including a full-size 160m Inverted Vee or delta-loop, Spiderbeam, DX-88 and other antennas!" Activity will be on all bands (160-6m) and modes but concentrating on the lower bands. Operations will include participation in the BARTG RTTY (this past weekend) and CQ WPX SSB DX Contests. More details are available at their "Pacific DXers" Web page at: http://pacific-dxers.com

4A, REVILLAGIGEDO (Update). The 4A4A team is now QRT from Socorro Island (NA-030). Their 18 days of operation netted 4A4A with 73088 QSOs with 19309 unique callsigns (37171/CW, 26730/SSB and 9187/RTTY). QSL via EB7DX direct. All QSOs will be confirmed via LoTW automatically. The DXpedition's Web site is: http://www.revillagigedo2011.com
Online log available at: http://www.revillagigedo2011.com/en/log.html

5D, MOROCCO. Operators Stefano/IK2QEI, Matteo/IK2SGC and Rich/N6KT will be active with the special callsign 5D5A from CN3A contest station during the CQWW WPX SSB Contest (March 26-27th) as a Multi-2 entry. QSL via I2WIJ or LoTW.

8P, BARBADOS. Operators Cal/WF5W, Bill/K5WAF, Bob/WB5IUU and Paul/W5PF will be active as 8P9CW, 8P9WF, 8P9UU and 8P9PF, respectively, from Barbados (NA-021) between March 24th and April 3rd. Activity will be on the HF bands using CW, SSB and RTTY. QSL via W5PF.

9M6, EAST MALAYSIA. Valery, UA3QNS, is now active as 9M6/UA3QNS from Sabah (OC-088) until March 23rd. Activity this past week was on 40/30/20/17/15/12/10 meters using CW and SSB. He was also heard in the Russian DX Contest this past weekend. QSL via the Bureau. He will upload to LoTW.
Online log is available at: http://www.clublog.org/logsearch/9M6/UA3QNS

9N, NEPAL (Update). Operators Dov/4Z4DX/9N7DX and XYL Anat/9N7YL will be active between April 13-30th. Activity will be mainly 20/15/10/6 meters using
mostly CW, RTTY and PSK31. QSL via 4Z4DX. Dov has activated a new Web page for this operation at: http://www.9n7dx.com

CY0, SABLE ISLAND (Update). Operators Randy/N0TG, Jeff/N1SNB and Wayne/K8LEE went QRT from Sable Island (NA-063) on Monday, March 14th. No other details were provided. QSL all callsigns via N0TG, direct or by the Bureau. They will have an "Online QSL Request Service" (OQRS) on their Web site for both direct and Bureau QSLs (see "How to QSL") at: http://www.CY0dxpedition.com

DAYTON HAMVENTION NEWS (TopBand Dinner Banquet). It was announced by George/K8GG and George/W8UVZ, Dayton's TopBand Dinner team, that John, VE3EJ, will do a presentation at their dinner banquet called "TopBand Operations from VP8ORK". Dinner will be held 7:30 PM Friday, May 20th, at the Crowne Plaza Hotel. Complete details are available at the following Web page at: http://topbanddinner.com
Tickets are still available.

EF8, CANARY ISLANDS. Look for EF8M from Santa Maria de Guia, Las Palmas Gran Canaria (AF-004, DIE S-005, WLOTA L 0969), to be on the air during the CQWW WPX CW Contest (May 28-29th) as a Single-Op/All-Band/High-Power entry. QSL via UA3DX.

FM, MARTINIQUE. Oliver F6ARC, will once again be active as FM/F6ARC from Martinique (NA-107) between April 6-21st. Activity will be holiday style probably on 160-30 meters CW. QSL via his home callsign, by the Bureau or direct (QRZ.com).

FO/M, MARQUESAS (Wrap-Up). Phil, FO8RZ, informs OPDX that he has written a little story about his FO8RZ/P mini-Dxpedition to Nuku Hiva, Marquesas Island (OC-027), and it is available here at:
http://f5phw.hamlogs.net/articles.php?lng&pgE5
Also, his log from Nuku Hiva is available online at:
http://www.clublog.org/charts/?c8RZ/P
All info about FO8RZ is availabe on: http://f5phw.hamlogs.net

HI, DOMINICAN REPUBLIC (Update). Operators "Yukon John"/KL7JR and XYL Claire/WL7MY are currently active as HI3/KL7JR and HI3/WL7MY from Hispaniola Island (NA-096) until June 5th. "Yukon John" informs OPDX that he is working the world on HF using a 75 foot long Inverted L running north/south in the coconut trees from Costambar on the north coast of Hispaniola Island. Operating position is 100 feet from the ocean. E-mail for skeds. See updated bio at QRZ.com. QSL via KL7JR (QRZ.com). QSLing will start until around July.

IOTA NEWS.....
EU-042. Operators Mathias/DJ9MD, Jens/DK8MIL, Jan/DK7JAN and Thomas/DK9BTX will be active as DF0TM from Sylt Island (GIA/DID N-016, WLOTA 2057) between April 15-18th. Activity will be on all HF bands and modes. QSL by the Bureau or direct (see DF0TM on QRZ.com). For possible updates, see the Web site at: http://www.df0tm.de

EU-055. Helge, LA1QDA, will once again be active from his summer QTH on Sotra Island between July 11-31st. Activity will be on 80-6 meters using mainly SSB and CW. QSL via his home callsign, direct or by the Bureau.

EU-120. (Update) Operators Kevan/2E0WMG and Jonathan/G0DVJ will be active from Lundy Island (English Coastal Islands, WLOTA 1997, GFF-103) between March 21-26th. Activity will be on all HF bands, 80-10 meters. Look for G0DVJ to be on both CW and SSB while 2E0WMG will only be on SSB. Kevan states, "This is a holiday style activation so no firm operating schedule will be planned other than a few times below where we have specific plans. We will be looking for DX calling on or near the IOTA frequencies below. Jonathan will be competing in the 80m RSGB SSB Club Championship Contest on Thursday, March 24th, between 2000-2130z. Some non contest activity will take place on 80m for at least an hour prior to the start of the contest (with either call) on or near 3685 kHz and possibly after the

contest also. Most activity on SSB will center around the IOTA frequencies of 3755, 7055, 14260 and 18128 kHz." QSL via details on QRZ.com.

EU-123. Operators Adrian/M0PAI, Alan/G0JNJ, Arthur/M0GWF and Keith/G3VKF will be active as GS4MWS from Lamlash, Isle of Arran, between April 2-7th. Activity will be mainly on the HF bands. More details will be forthcoming on the operating times and frequencies. They also plan to Twitter from the GS4MWS operation live @gx4mws while on the island. QSL via M0PAI.

EU-125. Operators Hans/DO3HJW, Robert/DH8HD, Ralph/DL3LED, Olaf/DL4HG and Andy/DL7AT will be active as OZ0TX from Mando Island (DIA NS-003) between July 28th and August 1st. Activity will include an entry in the RSGB IOTA Contest (July 30-31st). Operations will be on all HF bands using CW and SSB. QSL via DL7AT, by the Bureau or direct.

EU-125. Operators Mike/DL4ABO (CW) and Martin/DC8MH (CW/SSB) will be active as OZ/homecall from Fano Island (DIA NS-002) between September 9-11th. Activity will be on the HF bands. QSL via their home callsigns, direct or by the Bureau.

EU-150. Members of the Portuguese DX Group (GPDX) will be active as CT7/homecall and CT7/homecall/p from Insua Island (DIP MI-001, PIP NT-001, DCFP F-006, DCP CVC-046 and CVC-047, DMHP VC-017 and VC-061, DFP FM-101, DMP 1602, DDFP CMN-12) during July. Operators mentioned are Antonio/CU8AS, Arlindo/CT1EGW, Carlos/CT1END, Joao Rafael/CT1BOP, Luis/CT1EEQ, Luis/CT4NH and Hermann/HB9CRV. Activity will be on all HF bands and modes. The group also plans to be active in the RSGB IOTA Contest (July 30-31st) using the callsign CR6W. Look for some operators to stay a few days longer on Insua Island and activate the lighthouse (ARLHS POR-028, WLOTA 2869). QSL CR6W via CS1GDX. QSL all other callsigns via their home callsigns. For more information and updates, go to: http://gpdx.netpower.pt http://www.to-mk.com/neu

EU-172. Chris, DL4FO, will be active as OZ/homecall from Tuno Island (DIA JY-009) between July 17-29th. Activity will be on all HF bands, plus 6 meters, using mainly CW. QSL via his home callsign, the Bureau is preferred.

NA-184. Rick, K6VVA, will be active as K6VVA/6 from St. George Reef in the California State North IOTA Group between April 8-9th. Activity will be on 40-15 meters using mainly CW with some SSB. However, this DXpedition is subject to weather and heli-copter landing, so dates may change slightly. QSL via N6AWD. For updates, watch: http://www.k6vva.com/iota/na184

KH0, MARIANA ISLANDS (Update). Ja operator Kirk, WE8A, will be active as WE8A/KH0 from Northern Mariana Island (OC-086) between March 30th and

April 2nd, 2011. Kirt will focus on 80-6 meters, with a focus on the 30/17/12 meter bands, using CW and SSB. His friend Yuu, K8RLY, was expected to join him on this trip, but had to cancel. QSL ONLY direct to: 5-1-35, Daikaidori, Kobe, 652-0803 JAPAN. Please do not send to the U.S. Bureau or JA Bureau.

KH6BZF PROPAGATION FORECAST/REPORT (March 21-27th)....
Mar 21 AN SOLAR REFERENCE KEYS
Mar 22 AN --------------------
Mar 23 AN BN - Below Normal
Mar 24 AN AN - Above Normal/Geomagnetic Level is QUIET
Mar 25 AN LN - Low Normal
Mar 26 AN HN - High Normal/Geomagnetic Level is UNSETTLED
Mar 27 AN DIS - Disturbed
VDIS - Very Disturbed

GEOMAGNETIC REFERENCE

QUIET - The "A" index is expected to be between
0-7 and the "K" index will be 2 or less
UNSETTLED - The "A" index is expected to be between
7-16 and "K" index will be 3 or less

KV4/NP2, U.S. VIRGIN ISLANDS. Yuriy, N2TTA, will be active as KV4FZ during the CQWW WPX SSB Contest (March 26-27th) as a Single-Op/Low-Power entry. Look for him outside the contest as NP2/N2TTA.

MJ, JERSEY (EU-013). Craig, K3PLV, will be active as MJ/K3PLV from Channel Islands between March 22-30th. Activity will be on 160-10 meters using CW, SSB and RTTY. QSL via his home callsign, direct or by the Bureau.

OX, GREENLAND (IOTA Op). Graham, G4MFX, will be in Greenland for work purposes and plans to operate as OX/G4MFX when possible, but very limited from the following dates and locations/IOTAs:
NA-018 - Sisimiut; between March 24th and April 9th
NA-018 - Ilulissat; between April 10-15th
NA-134 - Aasiaat; between April 16-18th
Operations are anticipated to take place from a hotel or in the countryside from a car. Graham will be using a FT-817ND (w/5 watts) into an end fed half-waves antenna for 40/20/17 meters. He states, "The positioning of these antennas is unlikely to be ideal (since there are no trees in Greenland). Operations will be SSB only. QSL via G4MFX (see Qrz.COM for details).

P4, ARUBA. Operators Ed/N4OC, Brian/W3BW and John/K0DQ will be active as P40M during the CQWW WPX SSB Contest (March 26-27th) as a Multi-Single entry. QSL via W3HNK. Operations will be from the P49V contest station <see http://www.p49v.com/main/page_home.html>.

P4, ARUBA. Dee, W1HEO, will be active as P4/W1HEO from Aruba (SA-036) between April 3-16th. Activity will be from the P49V contest station

and will be on 160-10 meters using CW and SSB, with emphasis on the higher HF and 30/17/12 meter bands. Operations will be on the IOTA frequencies:
CW - 10115, 14040, 18098, 21040, 24920 and 28040 kHz
SSB - 14260, 18128, 21260, 24950 and 28460 kHz
Although this is a semi-holiday outing, major effort will be devoted to maximizing operating time. A special color photo QSL will be available. QSL direct only to the W1HEO (QRZ.com address) or by the Bureau.

8P6QL QSLS NOT VIA YASME. Wayne, N7NG, President of the Yasme Foundation, informs: "The Yasme Foundation does NOT handle QSLs for any 8P6QL operation since 1981."

HR5/F2JD LOGS. Gerard, F2JD, has started his activity from Copan, Honduras as HR5/F2JD. QSL via F6AJA, and the first part of his log is now available online at: http://lesnouvellesdx.fr/voirlogs.php

S9DX QSL STATUS. Harry, DM5TI (S9DX Team Leader), announced that they have started to send out QSLs in the following sequence:
1st - To members of DX foundations with a QSL service which supported them by donation.
2nd - To individual sponsors.
3rd - To users of their QSL request system with sufficient return postage.
4th - To all direct QSL request senders with SAE and sufficient return postage.
5th - Special LoTW upload for supporters.
6th - LoTW upload, all other QSL requests not mentioned above.

QSL RECEIVED VIA LoTW: D2SG, ER4DX, GW4BLE, LP2F, PJ4A, T30AQ, T30RH and VP8ORK

QSLS RECEIVED VIA MAIL: 3G1P/3G1M, 4L5O, 9Q50ON, A25DF, EK7DX, EV8XZ, FG5GP, FM/AI5P, CT3DZ, D4C, KH6MB, LA9DFA, LP2F, NH7A, OJ0B, OX2A, OX3DB, PJ2/N2MF, PJ2A, PJ2MI, S50O, T30OU, TG7/N6HD, TM6M and ZB2FK

QSLS RECEIVED VIA THE BUREAU: 5N0OCH, 6W/IZ2DPX, 8J1ASAHI/1, 9A1CCB, 9A2GF, 9Y4W, CN2B, CQ0ODX, CQ3L, CT9L, E21YDP, E7HQ, EA1WS, LX/PA6Z, LY90FW, LZ7HQ, OE7KMJ, OH0A, OH5ZZ, OK1MCS, RA6AV, RW3XZ, RZ6HWA, SP6IHE, TA2/DL2JRM, TM5F, TO8YY, UP65PM, UR5WIF, UT0VE, VA2TG, VA3PL, VE1JS, VE3CNX, VE3MTS and ZK2DL

S2, BANGLADESH. The "Foundation with Global Children (FGC) DX Group" is now active from Bangladesh as S21YZ until March 30th. Activity is on 160-10 meters, including the 30/17/12 meter bands, and using the modes CW, SSB and RTTY. As this was being typed, S21YZ has made (as of 1311z, March 19th) 5454 QSOs with 3347 unique callsigns (4467/CW, 613/SSB and 374/RTTY). QSL via JH1AJT, direct, by the Bureau or LoTW. For more details, visit their Web pages at: http://www.s21yx.com/index.php
http://www.facebook.com/S21YX
http://twitter.com/#%21/search/s21yz

S7, SEYCHELLES. Operators Norbert/F6AXX, Romain/F8DSI and Bernard/F5HEW will be active as S79UFT from Mahe, Seychelles Islands (AF-024) between March 24th and April 15th. Activity will be on 80-10 meters using CW and some PSK. Suggested CW frequencies are: 3524, 7013, 10115, 14025, 18083, 21025, 24903 and 28025 kHz. PSK will be on the usual PSK frequencies. QSL via F6AXX, direct (QRZ.com) or by the French REF-Union Bureau.

SOUTHERN SUDAN 2011. Antonio, EA5RM, member of the Intrepid-DX/DX Friends Group planning a multi-national DXpedition to Southern Sudan, sent out the following press release this past week: "After a long way, a lot of hard work and several successful meetings with Southern Sudan Government officials of various Ministries, just today, the first amateur radio license has been issued by the new government.
Southern Sudan Government officials now understand amateur radio, and they are ready to change the actual rules and regulations as soon as possible, looking to simplify the process of obtaining a license, so that everyone can enjoy amateur radio in this new country.
We have the cooperation of both Ministries to update our license if there is a new prefix that will be assigned by ITU, and we'll be in permanent contact with the proper department helping in the development of amateur radio in Southern Sudan.
Our Dxpedition will start on July 9th from Juba so please stay tuned.
I want to thank the Government of Southern Sudan officials for their cooperation and my whole team support.......
Antonio Gonzalez, EA5RM
Juba, Southern Sudan, July 18th 2011"

SV5, DODECANESE. Fred, PA1FJ, will be active as SV5/PA1FJ/p from Pigadia village on the Island of Karpathos (IOTA EU-001, GIOTA DKS-016, MIA MGD-013, WLOTA 1570) between May 8-14th. Activity will be on 40-6 meters, using his FT-817 into a Buddistick and 2x5m dipole. QSL via his home callsign, the Bureau is preferred.

V3, BELIZE (Update). Paul, W4PGM, will be active as V31PM from Belize between March 23-30th. He is part of the contest team that will be active as V31MM during the CQ WPX SSB Contest (March 26-27th). Paul is expected to be on the air before and after the contest operating QRP PSK on 20 and 40 meters. QSL via his home callsign, direct, eQSL or LoTW.

V8, BRUNEI. John, 9M6XRO, will once again be active as V85/9M6XRO from Brunei (OC-088) between March 23-27th. He states, "I will have 80-10m capability using my IC-7000 driving an IC-2KL linear into a Butternut HF6V vertical mounted on the hotel roof. I plan to do quite a bit of RTTY this time as well as CW and SSB." QSL via M0URX, direct (w/SAE plus 1 IRC/2 USDs), by the Bureau, or LoTW. Alternatively, QSLs may be requested using M0URX's OQRS form at: http://www.m0urx.com/qsl-request-form

VISALIA DX CONVENTION NEWS (IOTA Dinner). The 16th annual "Islands On The Air" (IOTA) Dinner will be held in conjunction with the 62th annual Visalia International DX Convention on Friday, April 15th, in the Plaza Room of the Holiday Inn Hotel, 9000 W. Airport Drive, Visalia, CA 93277, phone: 559 651-5000. See the DX Convention Web site for details on the DX Convention: http://dxconvention.org
This dinner is open to all who are active in the IOTA program or want to see beautiful pictures of far away islands. If you do not desire dinner, you may sit and enjoy the IOTA program following the dinner. The IOTA Programs/Speakers (as of March) are: Martin/G3ZAY and Dominic/M0BLF, and Mike/K9AJ. The dinner will be served buffet style in the Plaza Room at a cost of 30 USDs per person (service charge and tax included). Reservations are not required, but they would like to know if you are attending. Please contact one of the two coordinators below. For additional information regarding this event, please contact:
Ray Benny/N6VR - IOTA Dinner Coordinator (Phone: 928 848-2158);
462 South Reed Road, Chino Valley, AZ 86323;
E-mail: rayn6vr@cableone.net
Will Costello/WC6DX - Phone: 831 375-8133
E-mail: wc6dx@sbcglobal.net

VU4, ANDAMAN ISLANDS (Update). Members of the Amateur Radio Society of India (ARSI) are now active as VU4PB from Port Blair through March 31st. It was announced that the group has moved their 40 and 80 CW frequencies due the JA Emergency nets, so the following are suggested operating frequencies:

BAND	CW	RTTY	SSB	Special Notes
160m	1824	-	1845	See 2
80m	3504	3584	3695	See 1 and 2
40m	7004	7044	7095	See 1 and 3
30m	10104	10144	-	
20m	14024	14084	14195	
17m	18074	18104	18145	
15m	21024	21084	21295	
12m	24894	24914	24945	
10m	28024	28084	28495	
6m	50104	-	50134	

Special Notes:
1. 80 & 40m CW frequencies shifted due to JA Emergency nets
2. On 80 & 160m listen to the operator - Up or DN splits will be used
3. On 40m SSB - we will use 7140 for NA
4. The following split frequencies will be followed as far as possible:
* CW split - up 2 to 10 kHz
* SSB split - up 5 to 15 kHz
* RTTY split - up 2 to 10 kHz
5. They will listen in the US Novice bands segments where required

QSL Manager will be W3HNK. The VU4PB does have an "Online QSL Request System" (OQRS) available at:
http://arsi.info/dxpeditions/vu4pb-mar-2011/oqrs-vu4pb
Any QSL cards received via any IARU recognized QSL Bureau will be answered in due course of time. An online log search is available at:
http://arsi.info/dxpeditions/vu4pb-mar-2011/log-search
For more details and updates, visit the VU4PB Web apge at:
http://arsi.info/dxpeditions/vu4pb-mar-2011
LAST MINUTE UPDATES (Pirate Alert). Prasad, VU2PTT, reports: "VU4PB was hit by a noticeable pirate operation on 40m CW between 1527 to 1817z on 16th March 2011. This was at a time when the 40m CW station had gone off air at 1527z. Please notify DXers that their QSOs with VU4PB made during the above period was by a Slim Op. We understand the pain this news will cause, and hope they can make QSOs on 40m with the real VU4PB soon.... We would also like to say that three of our key operators have been unable to join us at VU4PB as planned due to health and family issues, and we have been working hard to fill the gaps with the operators that we have."

XV2/XV4, VIETNAM. Mal, VK6LC, will once again be returning to Vietnam between April 10-25th. This will be a dedicated culture tour of northern Vietnam, but he plans to be active from two different locations using two callsign:
XV2LC - April 10-15th; from Ho Chi Min City
XV4LC - April 20-25th; from Mekong Delta
Activity will be on 20 meters using CW and SSB. QSL via VK6LC only direct. He does NOT use the QSL Bureau.

YJ, VANUATU (Want to go on a DXpedition?). Chris, VK3QB, reports that the members of the "Oceania Amateur Radio DX Group" (ODXG) are planning to go to Vanuatu again, but this time look for operators to join the fun and some sightseeing. Plans are to arrive in Port Vila on September 28th, to get set up. Then operate the 2 contest weekends, with relaxed DXpedition operations between October 3-7th - another 2-3 days of relaxed operations following the CW Contest, then leave Vanuatu on October 14th. Plans are still developing and depending on interest, ODXG will run multiple stations from two separate locations on the island of Efate (Port Vila) which is just a 4 hour flight from Melbourne. Any interested people should register with Chris, VK3QB. Please provide a brief overview of your interests, any relevant or special skills (many skills contribute to a successful DXpedition) that may be useful for the trip. Send via

E-mail to vk3qb@wia.org.au or call 0429 187 593.

Irish Radio Transmitters Society
Radio News Bulletin
Sunday 20th March 2011

Japanese Earthquake & Tsunami

Our heartfelt thoughts are with the people of Japan at this tragic moment in their history. We know that our fellow radio amateurs are working extremely hard in their efforts to assist in this major disaster.

The following has been received from Greg Mossop, G0DUB IARU Region 1 Emergency Communications Co-Ordinator: "Japan remains under its worst threat to an ever rising toll, widespread destruction, power, fuel and water shortages follow the massive earthquake, tsunami and failed 40-year old nuclear power station."

"IARU Region 3 Secretary, Ken Yamamoto JA1CJP said the Japan Amateur Radio League (JARL) HQ station JA1RL and other amateur stations are maintaining their effort to support the disaster relief operation."

"JA1RL continues to operate under instruction to be an emergency traffic centre and increasingly receiving help from JARL members in the affected area. It is using the 7 MHz SSB, 144 MHz SSB/FM and 430 MHz SSB/FM."

"While 3525, 7030, 7043 and 7075 have been mentioned as in use, it's wise to keep those and all of the Centre of Emergency (CoA) clear of normal and non-urgent traffic. There is no call for additional foreign radio amateurs." - Jim Linton, VK3PC, Chairman IARU Region 3 Disaster Communications Committee.

IRTS AGM Annual Dinner and Rally 2011

You are warmly welcomed to attend the IRTS AGM weekend, including Annual Dinner and Rally will be held this year on Saturday March 26th and Sunday March 27th. The event will be hosted by the Limerick Radio Club. The venue is the Radisson Blu Hotel, Ennis Road, Limerick.

For more information contact, Ger McNamara EI4GXB 087 2532512 or ei4gxb/ at /gmail/ dot/ com.

The AGM dinner tickets priced at 35 are now available from Tony Condon EI2AW at QTHR or by email to condona /at / eircom/ dot/ net.

Dave Deane EI9FBB ARRL card checker will be in attendance, please be sure to complete your paperwork correctly and bring along your cards. New applications and updates for DXCC & Worked All States will be taken on the day.

A new website for the Rally in Limerick on 27 March 2011 is now available, please go to http://limerickradiorally.com for more details.

Limerick Radio Club look forward to welcoming everyone next weekend.

IRTS News Feeds

RSS news feeds are rapidly becoming the way to publish information in a timely fashion without pushing emails and cluttering inboxes. The user initially downloads an RSS reader and subscribe to the feed by going to the relevant feed site.

Jim EI4HH has introduced a service on a trial basis for IRTS members which will publish brief details of items such as AGM and Rally details, IRTS News and Contest Dates. This is not intended to be a high through-put information service but rather an intermittent service which would keep active operators up to date with frequent snippets of relevant information.

Members should click the RSS button on the IRTS website or go to http://www.irts.ie/rss to sign up and see the feed.

Further information from Jim EI4HH at holohaj2 /at/ hotmail /dot/ com

---

South Dublin Radio Club

South Dublin Radio Club Annual General Meeting (AGM) will take place in Terenure College on Tuesday 29th March at 8pm sharp.

All members are welcome and asked to attend. Also, at the South Dublin Radio Club, amateur radio theory classes will be held on a weekly basis and morse classes will be held in the near future.

North Cork Radio Group

North Cork Radio Group will be active EI1NC/P from the old governors house at Cork City Gaol and Radio Museum on the weekend of the 19 and 20th of March, The intention of the activation is to gain publicity and awareness for the Museum as an attraction for radio enthusiast both in Cork city and for visitors to the county in general. The Gaol houses the restored 6CK radio Broadcast studio in addition to an audio visual dedicated to Marconi and his Irish connections along with a wide collection of nostalgic artefacts from the golden age of Irish radio.

Cork Radio Club

Cork Radio Club has been meeting weekly in Blackpool on the North side of Cork City for many years. Unfortunately, the premises used is no longer available to the club and following the recent annual general meeting, the club will now meet regularly once a month with additional meetings as required. The first of the monthly meetings will be held on Monday March 28th at the Community Centre on Main Street in Carrigtwohill at 2030 hours. This meeting will discuss a programme of events for the year ahead and new members are very welcome. The first field event will be for International Marconi Day on April 30th when the callsign EI5IMD will be used again at the original Marconi site at Brow Head in Crookhaven in West Cork. This year marks the 110th anniversary of Marconi's operation from Brow Head when the reception of strong signals from Poldhu in Cornwall convinced Marconi that it was possible to span the Atlantic with radio signals. Officers elected at the recent AGM were: Chairman Jeremy EI5GM, Secretary Dave EI4BZ and Treasurer Dick EI6HH. Enquiries about the club to Jeremy on 083-3317710 or Dave on 087-6290574 or by email to info /at/ corkradioclub /dot/ com

---

Northern Ireland Amateur Radio Club of the Year

Michael Clarke, MI5MTC writes and tells us that the RSGB Regional Manager for Northern Ireland, Peter Lowrie Mi5JYK has announced that Lough Erne Amateur Radio Club has retained the Regional Club of the Year Award despite stiff competition from West Tyrone Amateur Radio Club.

The Lough Erne club and twelve other regional award winners are now in the UK Final with the chance to take the overall title of RSGB National Club of the Year and a £1000 prize.

The presentation of its Regional Award will take place at Lough Erne Amateur Radio Club's Pearl Anniversary Rally on Sunday 17 April in the SHARE Centre.

The Amateur Portable Group

To celebrate the Loughcrew Equinox Sunrise, The Amateur Portable Group will be activating the Loughcrew Cairns with a portable station today Sunday 20th March. Activity will be on VHF Simplex, FM Satellite and HF, the call will be EI0Z/p.

Yaesu Temporarily Suspends Production After Earthquake

Production of Yaesu radios at Vertex Standard's factory in Fukushima, Japan, has been temporarily halted due to earthquake damage. All Vertex Standard employees and their families are said to be safe.

Items for inclusion in next week's Radio News can be submitted via e-mail to "newsteam /at/ irts / dot / ie" for automatic forwarding to

both the radio and printed news services. Urgent news items for the radio news maybe telephoned to the radio news editor, Aidan, EI7JC on 085 7100511.

Please note that items for the radio news should reach the editor no later than midday on Thursday in order to be guaranteed inclusion in the following Sunday's bulletin.

294. [RAC-Bulletin] Tsunami and the Pacific Coast of the Americas

Newsgroup: rec.radio.amateur.misc
Date: 2011-03-21 00:20:12 UTC
From: rac-bulletins@eton.ca
Message-ID: <4D869992.9050809@rac.ca>

VIA: IARU Region 2 News bulletin
>Subject: Tsunami and the Pacific Coast of the Americas
March 18, 2011

After the Tsunami which originated by the Japan Earthquake on Friday, March 11, 2011, several American countries began to issue warning, to their populations located near the Pacific Coast.

Marco Loarca, TG9ANM, ECAG AREA D of IARU R2; reported that during the day, the CRAG (Club de Radio Aficionados de Guatemala), was able to maintain communication via VHF- UHF with radio operators located near the Pacific of Guatemala.

Jorge Sierra, LU1AS, ECAG Area G of IARU R2, reported that RECNA (Red Chilena Nor Austral), monitored the frequency 7.070 and from 17:00 local time, the VHF-UHF Network was activated.

Daniel Lamoureux VE2KA, reported that there has been no damage from the Tsunami, on Western Coast of Canada.

A.R.E.S (Amateur Radio Emergency Services) of the Central California Coast, Santa Cruz County,on Friday, March 11, 2011, approximately 08:00 AM PST, reported as follows:

Sirens wailed and reverse 911 alerted residents in low lying beach zones of Santa Cruz County today for the impending danger of the Tsunami released as a result of the 8.9 earthquake in Japan.

Early Friday morning the Santa Cruz County A.R.E.S. Team activated the Santa Cruz County Tsunami Resource Net in advance of the anticipated 5 to 7 foot wave. It was expected to reach the Santa Cruz Coast around 8:00 AM.

More than 30 local A.R.E.S. radio operators staffed and manned served agencies including the Santa Cruz County Emergency Operations Center, Evacuation Centers, The Red Cross, Salvation Army Corp Canteen Truck One, Santa Cruz County Harbor Coast Guard Auxiliary and a number of local Fire Departments.

In addition to the served agencies, a number of hams provided remote observation of the coast line and communications capabilities at the evacuation centers.

As expected, the devastating Tsunami waves impacted the coast and did an estimated 15 million dollars of damage to the Santa Cruz Harbor. More than 100 boats, including fishing vessels, pleasure boats and

yachts, were either damaged or sunk as a result of the waves.

Santa Cruz was not alone in receiving significant damage as a result of the powerful waves. Crescent City, located approximately 500 miles North of Santa Cruz, also received heavy damage causing Governor Brown to declare these areas disaster zones. One person died as a result of being swept out to sea with the high waves.

Forwarded by Doug Mercer VO1DTM, Vice President Field Services
Radio Amateurs of Canada

NZART President and Executive Council Election Results 2011
The results of the election for President and Northern Region Councillors
are as follows

President
John Andrews ZL2HD 185 Votes

Simon Lewis ZL4PLM 159 Votes

Roy Symon ZL2KH 293 Votes

Roy Symon is by the above result duly elected President

Northern Region Councillors
Vaughan Henderson ZL1TGC 253 Votes

Neill Ellis ZL1TAJ 138 Votes

Phil King ZL1PK 231 Votes

Stephen Hayman ZL1TPH 143 Votes

Vaughan Henderson, Phil King & Stephen Hayman are duly elected

Central Region Councillors - No Election Required
Fred Johnson ZL2AMJ

John Andrews ZL2HD

Warren Harris ZL2AJ

Midlands - No Election Required
Ann Fraser ZL3TNT

Simon Lewis ZL4PLM

Southern Region - No Nominations received
Incoming Council to nominate a Representative Councillor

Scrutineers for this election were
Peter Norden - ZL2SJ & Mrs Joanna Gunderson from Parsons Roddick & Co, the Associations Auditors

Evan T Sayer
Returning Officer
21 March 2011

Next NZART Official Broadcast is on SUNDAY 27-MARCH-2011

Next HQ-Infoline e-mailed on SUNDAY 03-APRIL-2011

Or you could be really fancy about it and run OS/2 inside a VM under
Linux, which itself could even be running in a VM!

The possibilities for recursion are endless!

*** Welcome to rec.radio.info! ***

Welcome to rec.radio.info, a group that aims to provide a noise-free
source of information and news for the entire rec.radio hierarchy.

Two introductory articles about rec.radio.info are posted to the group
every month. You are now reading the first article, which explains what
rec.radio.info is, and answers some Frequently Asked Questions. The
second article is titled Posting Guidelines, and you only need to read
it if you want to submit an article to rec.radio.info.

You can skip to the next section of this article by searching for the
next
" -- " string. The sections available are:
- What is the purpose of rec.radio.info?
- Why are messages almost always cross posted to rec.radio.info?
- What is a 'follow-up', and what does 'moderated' mean?
- OK, so now I know what 'moderated' means. Tell me more.
- What type of material is considered inappropriate?
- I do not have access to news, how can I get the information posted to
rec.radio.info?
- Will the material appearing in rec.radio.info be archived somewhere?
- I have a regular posting with timely information, is there a way to
speed up it's delivery, or automate for more convenience?

-- What is the purpose of rec.radio.info?

The purpose or charter of rec.radio.info is to provide the Usenet
community with a resource for information, news, and facts about any and
all things radio.

All the other rec.radio groups are intended for discussions and general
chit chat about radio. Rec.radio.info will contain informational,
factual articles only. Follow-ups are redirected to an appropriate other
group, and further discussion (if any) will not take place in
rec.radio.info.
```

In order to ensure that rec.radio.info contains only appropriate articles, it was decided to create the group as a moderated newsgroup.

-- Why are messages almost always cross posted to rec.radio.info?

It provides a "tag" for each article to be assembled into a filtered presentation in rec.radio.info (even with cross-posting, only one message, with a unique Message-ID, is propagated across the net). This tag also facilitates a pre-existing method of dropping or canceling the articles locally within the discussion groups if you don't want to see them. This accommodates individuals who want to separate the bulletins from the discussions, discussions from the bulletins, as well as those who are adamant about not reading another newsgroup and wanted to see everything all in one basket.

With the total size of Usenet (in number of newsgroups and total traffic) doubling every year or so, this is no insignificant contribution to reducing information noise and chaos. Making the discussion groups a catch-all, and making extra newsgroups filters on that catch-all, is also the most realistic way to implement such a scheme (It's not intuitively obvious what the charter, contents, and general appropriate topics for each and every newsgroup are. Seeing FAQ's and charter/intro postings in the home newsgroup is beneficial for new readers).

By cross-posting one only is adding a few tens of bytes to each bulletin (to specify the extra group on the Newsgroups line), but are adding the capability for very powerful filtering features available on most news servers, listservers and readers. Your local news guru could probably explain these features in more detail.

In rn, for example, according to Leanne Phillips in her rn kill-file FAQ, add a line of the form:

/Newsgroups:.*[,]rec\.radio\.info/h:j

either in ~/News/KILL (if you don't want to see rec.radio.info articles anywhere) or ~/News/rec/radio/amateur/misc/KILL (if you don't want to see them just in rec.radio.amateur.misc). The latter method means your kill file will only be consulted during rec.radio.amateur.misc (and hence runs more efficiently), and will probably work for most people.

In nn, according to Bill Wohler in his nn FAQ, add a line of the form:

rec.radio.info:!s/:^

in ~/.nn/kill (if you don't want to see rec.radio.info articles anywhere), or put the following lines:

sequence
rec.radio.info
rec.radio.

at the end of ~/.nn/init in order to see all the rec.radio.info bulletins first, then read the remaining rec.radio.* without the

bulletins.

In slrn, according to the srln FAQ, the following scoring rule will | allow you to see rec.radio.info-crossposted bulletins, while still | filtering out most SPAM or "Velveeta" crossposted to more than 2 | newsgroups (as such articles usually do not contain a 'Followup-To:' | header): |

Score: -9999 |
Newsgroups: ,.*, |
~Followup-To: . |

More information about kill files may be obtained from Dave Fawthrop's Killfile FAQ at:

http://www.hyphenologist.co.uk/killfile/

-- What is a 'follow-up', and what does 'moderated' mean?

If you are new to Usenet and are not familiar with the terminology, you might want to read the general introductory articles found in the newsgroup news.announce.newusers. Doing so will make your life on the net much easier, and will probably save you from making silly beginner's mistakes.

If you think that at this moment you are reading an echo, a conference, or a bulletin board, I'd also strongly suggest a trip over to news.announce.newusers.

For the rest of this article, we will assume you have a basic knowledge of Usenet terminology and mechanics.

A moderated group means that any article that needs to be posted to the group has to be accepted by the moderator of the group. Since we need to ensure that followups to an article (discussion) do not show up in the rec.radio.info newsgroup, the `Followup-To:' header line contains a newsgroup that is appropriate for discussions about the specific article.

-- OK, so now I know what 'moderated' means. Tell me more.

Rec.radio.info is a moderated newsgroup, which means that all articles submitted to the group will have to be approved by the moderator first.

The current moderator of the group is the rec.radio.amateur.moderated Moderation Team. Submissions to rec.radio.info can be posted, or e-mailed to:

rec-radio-info@panix.com

Comments, criticisms, suggestions or questions about the group can be e-mailed to:

rec-radio-info-request@panix.com

But before you do so, please be sure to check out the "Posting Guidelines" article.

The influence of the moderator should be minimal and of an administrative nature, consisting chiefly of weeding out obviously inappropriate articles, while making sure correct headers etc. are used for the appropriate ones.

-- What type of material is considered inappropriate?

There are three broad categories of articles which will be rejected by the moderator:

1) Requests for information: rec.radio.info is strictly a one-way street. We receive information in our mailbox; we then post it to rec.radio.info. Requests for specific information belong in the normal discussion newsgroups. If your request gets answered, you might consider passing the answer on to rec.radio.info, though. Especially if you can edit it into a informational, rather than a discussion, format.

2) Obvious discussion articles, or articles that appear unsubstantiated.

3) Commercial stuff: a relatively unbiased test of a radio product would be accepted, but any hint of for-profit might be reason for rejection. For three reasons: This is not the purpose of the list, for-profit is a controversial topic, and this list may be passed onto Amateur Packet Radio (where for-profit is prohibited except under certain provisos).

rec.radio.swap may be more deserving of the posting in any matter.

Similarly, copyrighted material generally cannot be used. If it's TRULY worthwhile to the net, We would recommend obtaining permission from the copyright holder. Please note the source, and if permission was given. We reserve the right to make the final decision concerning appropriateness in all situations. In most cases, a brief summary of, or pointer to, the copyrighted information may be all we can allow.

-- I do not have access to news, how can I get the information posted to rec.radio.info?

Google has an excellent web interface to Usenet newsgroups. It is available at:

http://groups.google.com

It supports both reading and posting.

Another excellent web interface to at least the radio-related Usenet newsgroups is the RadioBanter site:

http://www.radiobanter.com

sponsored by the NewsgroupBanter project:

http://www.newsgroupbanter.com

It, too, supports both reading and posting.

-- Will the material appearing in rec.radio.info be archived somewhere?

Yes. See Google Groups and RadioBanter above.

Effectively this means that anything you post to rec.radio.info will be permanently stored, so your work will not be lost.

-- I have a regular posting with timely information, is there a way to speed up it's delivery, or automate for more convenience?

Yes, there is! It may take a bit of chatter with the moderator, but we are willing to take responsible people and provide them the means of posting the articles directly from their site. We will try everything we can as we fully realize that DX (distant signal) and astronomical data can be somewhat transitory. We are also willing to allow regular posters of information the same courtesy, even if the information is not as time critical.

We refer to this as self-moderation, which is partly based on the model for rec.answers/news.answers. This requires co-operation and goodwill to be beneficial to the community in the rec.radio hierarchy.

Please direct any comments, questions, or criticisms about this article to rec-radio-info-request@panix.com.

(Adapted, with permission, from the original article written by Mark Salyzyn, AG4YD, ex-VE6MGS.)

*** rec.radio.info - Posting Guidelines and Etiquette ***

Two introductory articles about rec.radio.info are posted to this group
and to rec.answers/news.answers every month. You are now reading the
second article, which explains how to submit something to
rec.radio.info, and which answers some Frequently Asked Questions about
the submission process. The first article is titled "Welcome to
rec.radio.info", and it might be a good idea to check it out as well.

-- How do I submit something to rec.radio.info?

Two possibilities. You can use your newsreading software to just post
the article to rec.radio.info, as you would do with any other
newsgroup. The difference is that the software recognizes the special
status of rec.radio.info as a moderated group, and will e-mail your
article to us, the moderation team, instead of posting it to the group.

Alternatively, you can mail your article directly to us at the following
address:

rec-radio-info@panix.com

Mailing us directly is probably (a wee bit) faster, but using the
transparency offered by the newsreading software is probably more
convenient.

If you have any questions, or wish to deal with some administrivia with
the moderation team, we suggest mailing to the following address:

rec-radio-info-request@panix.com

-- How soon will I see my article appear?

It depends on how busy we are. Your article reaches us as mail, we have
to read it first, give it the stamp of approval, and finally send it on
to the group. We will attempt to read and decide on all submissions
within 72 hours at the very least, though we will probably be able to
process submissions much faster in actual practice.
```

The site from which we moderate this newsgroup, "Public Access Internet and Unix, NYC" (Panix), is directly connected to the Internet, and articles posted at that site should appear at most major news sites, including Google Groups, the same day. The principal delay, therefore, will be the wait in the moderator's submission queue.

If you post a periodic article, and have shown to be trustworthy, we may allow you to post directly if the article is of a timely nature. See the section below on direct posting.

-- Should my article be in a specific format?

No. If it is not totally illegible, we will accept it, and if it does not have a correct subject-line we will correct it with your permission -- that's what a moderator is for.

However.

You could do us a big favor by making sure your article conforms to these simple requirements:

1) The article must present information, not discussion or requests, We will reject the article or require you to change the wording if it is worth it.
2) A good, descriptive Subject line.
3) Always mention what source you got the information from.
4) Don't forget to include a Followup-To header, at least if you don't want further discussion to automatically be forwarded to you, the poster, which is the default if the article is only posted to rec.radio.info.

As we said: if your article is appropriate we will post it even if you don't follow these guidelines, but then don't blame us for not processing it immediately. 'Perfect' articles we can send on with a couple of keystrokes. Stuff that needs minor editing is going to have to wait until we have time to do so.

Please do not waste both our and your time by posting requests, as this is an information only news group.

-- What about crossposting?

If you send something to rec.radio.info, just name any group you'd like to cross-post to in the Newsgroups field. Then, when we approve the article for rec.radio.info it will get automatically cross-posted to any other groups mentioned. This will also override the default Followup-To: poster, replacing it with the groups you cross posted to.

We would prefer if the group be cross-posted to the various discussion groups in the rec.radio.* hierarchy that are appropriate:

rec.radio.amateur.misc Amateur (ham) radio and related matters
rec.radio.amateur.packet Amateur Packet Radio discussions
rec.radio.amateur.policy Amateur Radio practices, rules, etc.
rec.radio.noncomm Non commercial radio discussions

rec.radio.shortwave International broadcasting on the 'HF' bands
rec.radio.cb Citizens Band (27 MHz) discussion
rec.radio.scanner Scanner discussions (unsupported group)

or in one of the moderated groups:

rec.radio.amateur.moderated Amateur radio practices, rules, etc.
rec.radio.broadcasting Discussion of *domestic* radio broadcasting

We will leave it up to the poster to decide which group(s) are appropriate, but reserve the right to add groups if we feel it has broader interest. We will consult with the poster first.

Notes on crossposting:

- rec.radio.broadcasting is also a moderated group. The rec.radio.broadcasting moderator prefers to review all articles himself before posting. Placing rec.radio.broadcasting before rec.radio.info on the Newsgroups line should accomplish this. We will typically abide by the rec.radio.broadcasting moderator's decision whether the article is appropriate for rec.radio.info.

- rec.radio.amateur.moderated is also a moderated group. As the rec.radio.amateur.moderated Moderation Team manages both rec.radio.amateur.moderated and rec.radio.info, we can manage crossposting and approvals for both newsgroups. The rec.radio.amateur.moderated group does not allow crossposting to other discussion newsgroups, whether moderated or unmoderated. However, we would like to manage rec.radio.info as consistently as possible with how it was done by previous moderators, including the grandfathering of existing regular postings. Therefore, the submitter can choose rec.radio.amateur.moderated or the other unmoderated rec.radio.amateur.* discussion newsgroups for crossposting, but not both.

- Any FAQ or informational posting approved by the rec.answers/news.answers moderation team that is also crossposted to any rec.radio.* newsgroup (besides just rec.radio.info) is also automatically pre-approved for rec.radio.info. See below for more information.

If you post to another moderated group, it may be better to make special arrangements with both moderators before posting by contacting us at our administrivia addresses.

In addition, cross-posts do not take up extra space; modern newsreaders can be configured to show you cross-posted articles only once anyway; not everybody reads rec.radio.info; and rec.radio.info was never meant to reduce the volume of the regular discussion newsgroups. But keep in mind that some of the mail gateways may filter out the informational postings (at request of the subscribers) to keep the load down.

You decide.

-- I have a regular posting with timely information, can I make arrangements to help speed up delivery by posting directly from my site?

Yes, there is! It may take a bit of chatter with the moderator, but we are willing to take responsible people and provide them the means of posting the articles directly from their site. We will try everything we can as we fully realize that DX (distant signal) and astronomical data can be somewhat transitory. We are also willing to allow regular posters of information the same courtesy, even if the information is not as timely.

We refer to this as self-moderation, which is partly based on the model for rec.answers/news.answers. This requires cooperation and good will to be beneficial to the community in the rec.radio.* hierarchy.

If you are currently maintaining (or plan to maintain) a radio-related periodic information posting, you may wish to consider crossposting it to rec.answers/news.answers. Postings that are approved by the rec.answers/news.answers moderators for this treatment are automatically pre-approved for crossposting to rec.radio.info (as the news.answers requirements are far more rigorous than the requirements this newsgroup ever plans to use). For more information about this option, consult the appropriate information articles and posting guidelines in rec.answers/news.answers.

Realize also, that even if your post is not approved for rec.answers/news.answers, it can still be approved for rec.radio.info. The intention is not so much to get every last bit of radio-related information on rec.answers/news.answers, but rather to provide an alternative avenue of approval (as well as grandfather existing maintainers of radio-related information and spare them additional bureaucratic hurdles). Again, crossposting to either rec.radio.info or rec.answers/news.answers, both, or neither, is at the discretion of the poster (subject to the approval of the moderators). You decide what is most appropriate for your article.

Please remember that as an information maintainer, you are not alone. There are many others on the net who maintain and post periodic information postings, using various intermediate-to-advanced features of Usenet (usually via automated tools). Various degrees of technical support and general hand-holding are available from many Usenet veterans. Send us some E-mail describing your needs to our administrative address below, and we'll try to help, or at least refer you to the right knowledgeable individual(s).

-- And Follow-ups?

If the only newsgroup you have specified is rec.radio.info, then the Followup-To: field will always be set to poster. If you do not want this, you must supply a Followup-To line of your own, and we will honor that one, as long as it is a subset of the original Newsgroups line.

If you specify newsgroups to cross-post to, then the Followup-To field will be set to include all the cross-posted groups, excepting rec.radio.info itself. Again, if you do not wish this behavior, supply your own Followup-To line.

We maintain other standards on the various RFC-1036 (news transport) header lines. For example, if the article is appropriate for passing into the Packet Radio Information Network, we encapsulate the Packet Bulletin Identifier (BID) in the Message-ID: news header line indicating the machine of origin as the ampr.org domain:

Message-ID: <$opa.55.1994@ampr.org> |

where the Packet Radio BID, in this example, is `$OPA.55', and it was posted in the year 1994, because some of the Bid numbers are cycled yearly. Hopefully, this can be used as a key to re-introduce the articles for the Packet Radio network. Also, if the article is a repost of an already existing information article in the rec.radio heirarchy, we ensure that the References: header line is linked to that previously posted article. This also helps to tag articles, and may be used for additional filtering if needed.

Since the articles are archived, please use the Summary and Keywords header lines to help one search for your article.

-- Why have I received no reply from you?

We never reject anything in silence, and we make a point of it to answer all our mail. However, E-mail, like a brain cell, can and does get lost, every now and again.

So, if you send us something, and you don't see it appear it rec.radio.info, and you still have not heard from us in reply after say, five days, you can be pretty sure that either your mail never reached us, or that our answer has never reached you. In that case, please try again (We will filter out duplicates).

Please direct any comments, questions, or criticisms about this article to rec-radio-info-request@panix.com.

(Adapted, with permission, from the original article written by Mark Salyzyn, AG4YD, ex-VE6MGS.)

DXNL 1720 - Mar 23, 2011
DX Newsletter

a free and weekly service of
DARC Committee "DX and HF contesting"
(http://www.darcdxhf.de)

editor: Helmut Schlaffer, DL7MAE
(e-mail: dxnl@dxhf.darc.de)

translation by: Bob, DL7VOA
(e-mail: dl7voa@darc.de)

A5 - BHUTAN
Zorro,JH1AJT, and Jay,JA1TRC, who are also part of the S21YZ team,
are going to be active as A51A and A51J from Bhutan from Mar 23-28.
QSL cards for both calls should be sent via bureau or direct to JH1AJT.

GJ - JERSEY, EU-013
Russell,G5XW, is expected to show up as GJ5XW on all bands from
Jersey (EU-013, WLOTA 0818) from Mar 24-28 including the WPX SSB.
QSL via G5XW, direct only!

Pete,MJ/K8PT, and Craig,MJ/K3PLV, will be active in CW, SSB and RTTY
on all bands as well from Mar 22-30. QSLs via homecalls.

S7 - SEYCHELLES, AF-024
Norbert,F6AXX, Romain,F8DSI, and Bernard,F5HEW, will be QRV from
Mahe (AF-024) signing S79UFT in CW and PSK from Mar 24 until Apr 15.
S79UFT can be found in PSK on the usual QRGs and in CW preferably on:
3524, 7013, 10115, 14025, 18083, 21025, 24903 and 28025 kHz.
QSL cards should be sent via REF bureau or direct to F6AXX.

SV5 - DODEKANES, EU-001
Martin,ON4PO, plans to be active as J45PO mostly in SSB and some PSK
between Mar 23 and Apr 2. The operations take place from the contest
station SX5P on Rhodos (EU-001). Martin and some friends will join the
upcoming WPX SSB Contest. QSL for J45PO via ON4PO, for SX5P via SV5FRD.

V3 - BELIZE
Jim,V31MM (WB2REM), Paul,V31PM (W4PGM), and Glenn,V31GB (KD2JA), will
show up from Placentia in Belize from Mar 23-30 and V31MM will be used
in the WPX SSB Contest as well. The trio plans to work in SSB and CW
on 160m-6m, especially on the WARC bands and 6m.
Unfortunately QSLs only direct via their homecalls.

V8 - BRUNEI, OC-088
John,9M6XRO, will be QRV again as V85/9M6XRO from Brunei (OC-088) from Mar 23-27. John will work in CW/SSB/RTTY on 80m-10m using an IC-7000, an IC 2KL amplifier and his Butternut HF6V antenna.
His QSL manager will be M0URX again and cards can be sent via bureau, direct or LoTW. Requests can be placed also via OQRS at:
http://www.m0urx.com/qsl-request-form

VP5 - TURKS AND CAICOS ISLANDS, NA-002
Dave,VP5/W5CW, will stay in "VP5JM Hamlet" again on the island of Providenciales (NA-002, WLOTA 1476) between Mar 23 and Apr 20. He will be QRV in CW and SSB on 160m-6m and Dave plans to use the special callsign VQ51V in following contests: SP DX Contest (Apr 2/3), JIDX CW Contest (Apr 9/10) and YU DX Contest (Apr 16/17).
QSL cards only direct to PO Box 88, Morris, OK 74445-0088, USA.

ZF2 - CAYMAN ISLANDS, NA-016
Adrian,AA5UK, will be QRV as ZF2AE from Grand Cayman (NA-016) between Mar 25 and Apr 2 and as ZF2AE/ZF8 from Little Cayman (in the WPX SSB). He works "holiday style" in SSB/RTTY/PSK31 on 40m-10m and via satellite (AO-51, SO-50, VO-52, FO-29) with an IC-7000 and a vertical.
Listen for him during his afternoons and evenings.
QSLs via bureau, direct, LoTW or eQSL to AA5UK.

8P - BARBADOS, NA-021
Cal,WF5W (8P9CW), Bill,K5WAF (8P9WF), Bob,WB5IUU (8P9UU), and Paul,W5PF (8P9PF), are going to activate Barbados (NA-021) in CW, SSB and RTTY from Mar 24 until Apr 3 (including the WPX SSB Contest).
QSL cards for all calls should be sent via bureau or direct to W5PF.

9L - SIERRA LEONE
The four Dutch HAMs Arie,PA3A, Arie,PA3AN, Ad,PA8AD, Bas,PD0CAV, and Dickson,EL2DT, plan to become active from Sierra Leone signing 9L5MS in CW, SSB and RTTY on 160m-6m from Mar 29 until Apr 18. They want to work with three stations (including amplifiers) and their antennas will be yagis (for 20m-6m) and verticals (for 30m-160m).
QSL via bureau or direct to PA3AWW.
More information about the project can be found at:
http://www.sierraleone2011.com/sl_2011/home.php
QSL cards can be requested online as well and a video announcement of their DXpedition can be found on YouTube at:
http://www.youtube.com/watch?v=-KoY7lwjcRs

9N - NEPAL
DK7AN, DK5WL, DL4SVA and DL9GFB (maybe there will be a little change due to the QRL of DL4SVA) applied for the callsign 9N7AA to be active on all HF bands plus 2m/EME between Mar 26 and Apr 8. Their QTH will be Dhulikel near Kathmandu. Their equipment includes K3 radios and amps, a Spiderbeam and HF9V for the high bands respectively verticals and dipoles for 160m-30m. If they have internet access and the power supply makes it possible they will provide an online log also. The paths to Europa and North America are diffult due to the Himalaja mountains.
The team asks everybody to listen to the OPs on the bands.

Their QSL manager will be DL4SVA, direct via Georg Tretow, PO Box 1114,
23931 Grevesmuehlen, Germany or via bureau.

FRANCE, SPECIAL EVENT STATION
Ile de la Passion was discovered 300 years ago on Apr 3, 1711. Today we
know this island with its modern name Clipperton Island. To celebrate
this some members of the Clipperton DX Club will activate the special
event station TM300CDXC from Mar 28 until Apr 11. QSL via F5IL.

PHILIPPINES / USA, SPECIAL EVENT STATIONS
Remembering the 69th anniversary of the "Bataan Death March" the
special event station 4D69DM will be activated at Mount Samat in Bataan
on Luzon Island on Apr 9. The OPs will be DU1IVT, DU1RP, DU1UGZ, DU3BS
and DU3LCA. The "Death March of Bataan" was a Japanese war crime and
took place in the Philippines in 1942.

Another special event station will be operated from the US for this
event on Mar 27. K5B will be activated by the "Mesilla Valley Radio
Club" in Las Cruces/New Mexico. The preferred frequenzies will be
in SSB on 3893, 7225, 14330 and 21337 kHz and in PSK on 14070 kHz.
More information about this event and the QSL route can be found at:
http://www.n5bl.org/bataan

SILENT KEYS: Following DXers passed away last week:
Thomas Klaus (DL2RTK), Reg Moores (G3GZT), Don Hayter (G3JHM),
Mike Wheaton (G4ZPE), Charles Kenneth Rollins (K8LGT),
Jose Daniel Bernardini (LU8EDR) and Vladimir I. Prihodko (UA4HAU)

LINKS: Current SOTA activities (mountain summits) are announced at:
http://www.sotawatch.org

Detailed information about current VHF activities can be found on the
VHF DX portal "Make More Miles on VHF" at: http://www.MMMonVHF.de
---
Are you interested to join a DXpedition to Vanuatu in October?
More information can be found at the homepage of the "Oceania Amateur
Radio DX Group": http://www.odxg.org

An online log of VU4PB is available on the website:
http://arsi.info/dxpeditions/vu4pb-mar-2011/log-search

The Visalia DX Convention will take place once again by the mid of
April. Find more information at: http://dxconvention.org

The online log of HR5/F2JD is available at:
http://lesnouvellesdx.fr/voirlogs.php

UPCOMING CONTESTS

Mar 26/27: CQ World-Wide WPX Contest, SSB

IOTA collected by Fredy,DE0MST (e-mail: iota@dxhf.darc.de)

Island activities:
AF-014, CT3, Madeira Archipelago: Helmut,CT9/DF7ZS, is going to be active
from Mar 22-29. QSL via DF7ZS. Helmut will join the WPX SSB Contest
in the single OP/allband class as CQ3L. QSLs for CQ3L via DJ6QT.

AS-155, BV, Taiwan's Coastal Islands: A group of Taiwanese OPs will be QRV
as BV100 from Shaio-Liu-Chiu Island during the WPX SSB Contest on
Mar 26/27. QSL via BV2KI (bureau/direct). See: http://www.bv100.tw/EN

EU-014, TK, Corsica Island (main): Chris,TK/F8DZY, is working from Corsica
(DIFM TK-001) between Mar 23 and Apr 17. QSL via homecall.

EU-054, I*9, Egadi Islands: A group of Italian HAMs will sign IF9A from
Favignana Island (IIA TP-011) from Mar 24-27. QSL via IT9ATF.

NA-102, FG, Guadeloupe: Gildas,F6HMQ, is active as TO11A from the island of
Guadeloupe (DIFO FG-001) between Mar 20 and Apr 1. QSL via homecall.

OC-086, KH0, Northern Mariana Islands: Eri,JF1VGZ, and Masa,JA1MFR, will
show up as KH0/KH7ERI and KH0/WN1Y from Saipan (USI NI002S) from
Mar 25-29. QSLs for both calls via JF1VGZ (direct, see QRZ.com).

OC-088, 9M/V8/YB7, Borneo (main): Valery,9M6/UA3QNS, is working from Sabah/
East Malaysia until Mar 23. QSL via homecall (bureau/direct/LoTW).

OC-164, VK6, WA State (SW Coast) South Group: John,VK6HZ/p, has been spotted
from Rottnest Island from Mar 20-27. QSL via VK6IR (bureau/direct).

G4MFX - Greenland Trip: Graham,OX/G4MFX, will be QRV from Greenland in SSB
on 40m/20m/17m with 5 watts QRP between Mar 24 and Apr 18:
Mar 24-Apr 9 Sisimiut NA-018
Apr 10-15 Ilulissat NA-018
Apr 16-18 Aasiaat Island NA-134
QSL via homecall (bureau/direct).

Lighthouse activities (WLOTA/ARLHS/ILLW)

CQ2L D 2755 Madeira Island Mar 22-29
CT9/DF7ZS D 2755 Madeira Island Mar 22-29
GJ5XW A 1622 Jersey Island Mar 24-28
IF9A E 1952 Favignana Island Mar 24-27
JW/F8DVD L 4318 Spitzbergen Apr 1-8
TK/F8DZY E 0864 Korsika Mar 23-Apr 17
TO11A J 5704 Guadeloupe Mar 20-Apr 1
VK6HZ/p K 1760 Rottnest Island Mar 20-27
ZF2AE/p LH 1042 Grand Cayman Mar 23-Apr 5
ZF2AE/ZF8 LH 1490 Little Cayman Mar 23-Apr 5
9M6/UA3QNS F 1988.3 Borneo Island until Mar 23

Hallo dear MMMonVHF friends,

please find below our lastet NEWSLETTER from the VHF-DX-Portal
"Make More Miles on VHF" (www.MMMonVHF.de), dated 2011-03-23
We attempt to distribute our Newsletter, once a week (thursday)
from now on - if any special activities will make it necessary
we will inform you with Breaking News or a Special NL-Edition.
For further detail please be so kind and watch our "News"-page
http://www.mmmonvhf.de/latest.php - you vy welcome for any
input and we do hope you will enjoy the VHF-DX-Portal MMMonVHF!
(SORRY, one day earlier this week, due to QRL trip end of 8EBW)

** EME Meeting past Weekend at the QTH of DF7KF **

A very nice and small EME Meeting took place at the QTH of Dith,
DF7KF past weekend. DL8YHR, DL7HR, PA3CSG, DM1CG, DL2OM, DK2ZF, DF2ZC,
DF7KF and DL8EBW meet together and discussed theories of antennas here
specially the used polarizations V / H / CIR). As well a big
thanks to Rolf, DK2ZF for showing us the CE0Y/CE2 expedition films
SOURCE: Guy, DL8EBW, on behalf of the MMMonVHF Team

** MMMonVHF was OFF at 22nd, march due to PROVIDER trouble **

We are sorry to announce that the pages (or part of it) was
down due to provider trouble at the 22nd, march. Several people
asked about an virus, but sure it was not in our hands... ;-)

BY8 EME Expedition as BJ8TA at NL97UT and OL14KQ
LATEST News from BD5RV, Michael, at BJ8TA 2011-03-22 15UT:

shangri-la is 3300m above the sea level. Working here is a lot more
tired than it used to be. That's why the antenna work takes longer
than expected. yesterday, we also experienced failures in the control
unit of transverter and power supply part of LNA. It also takes
several hours to get them fixed. Anyway, we are going to on air
around the moonrise here today...
SOURCE: tnx to Michael Chen, BD5RV/8, direct to MMMonVHF
Meantime they was qrv these afternoon
15:18 BJ8TA Michael 144.123 tx 1st, jt65b NL97ut
15:17 BJ8TA Michael BJ8TA is now on air NL97ut
Later the night they was as well qrv but still have had trouble...

** EN38 and EN48 Grid Expedition June 11th-16th 50 & 144 Mhz **

Greetings, A group of us from Wisconsin will be activating EN38 and
EN48 during the ARRL's June VHF Contest and for a few days after.
See our website for details: http://k9mu.com/k0w/ 73, Justin, K9MU

** 5P5K qrv from from Romo Island (IOTA EU-125, Grid Loc. JO45) **

Stefan, DL7AOS, will be using the special callsign 5P5K from Romo
Island (IOTA EU-125, DIA NS-001, Grid Loc. JO45), Jutland, Tï¿½nder
Municipality, South Denmark Region, between 20th March and 1st April
2011. QRV on 80-6 metres using a FT-857 with 500w into a vertical
antenna near the beach. He will also participate in the CQWW WPX SSB
Contest (March 26-27th) as a Single-Op/All-Band/High-Power entry.
QSL via DL7AOS, direct or bureau.
SOURCE: [OPDX Bulletin] via ICPO Bulletin (18-25 March 2011)

** VP8DMH in FC52wk First 6m EME from Antarctica! **

I am THRILLED to announce that VP8DMH is finally QRV and has a GREAT
signal tonight! I completed with him at 0202Z on March 19, 2011 when
his antenna was elevated and the moon was over 18 degrees high over
his mountains. His 73 peaked -20 dB in the speaker here on JT65A
mode. Mike was my 6m DXCC #165 (#114 via 6m EME). He also worked
W1JJ, K2ZD, W7MEM and is still going strong working people as I write
this. Degradation is -1.1 and Kp is 0.7 ... 6m EME CNDX this weekend
simply could not be any better ;-) Mike is using a K3 with PR6 preamp
M2 6M8GJ yagi (with manual aiming in az and el), and an ACOM 1000 amp
His email is good on QRZ.com and he is on the ON4KST EME chat when QRV
PSE QSL via G0VGS and send any contributions for the 6M8GJ yagi to

G8BCG, who paid for the antenna and shipping himself. GL and VY 73
SOURCE: Lance, W7GJ at [Magic Band EME]

** SV5/PA1FJ/p qrv from Pigadia village, island of Karpathos **

Fred, PA1FJ, will be active as SV5/PA1FJ/p from Pigadia village, island of Karpathos (IOTA EU-001, GIOTA DKS-016, MIA MGD-013, WLOTA 1570, WW Loc. KM35OM) on 8-14 May 2011. QRV on 40-6 metres, using a FT-817, Buddistick and 2x5m dipole. QSL via home call, bureau preferred.
SOURCE: [rsgbiota.org] via ICPO Bulletin (18-25 March 2011)

** GB1KLD from the isle of Hirta, St.Kilda on HF and 50 MHz **

Peter M0NED, Steve M6ZIX and Paul 2E0GDD plan to be active as GB1KLD from the isle of Hirta (IOSA OL02, SCOTIA DI23), St. Kilda (IOTA EU-059) between the 31st of May and 3rd of June 2011. They will have 2 stations on 80-6 metres. Some experimental FM on 10m and 6m if conditions are good. Sea conditions on the 50 mile crossing may result in a delay to station setup or extended operting days. QSL via the RSGB bureau. Updates will be on the website: http://stkilda.ukradio.eu/
SOURCE: [rsgbiota.org] via ICPO Bulletin (18-25 March 2011)

** LA1QDA qrv from Sotra Island (JP20) on HF and 50 MHz **

Helge, LA1QDA will be active from Sotra Island [Store Sotra] (IOTA EU-055, WW Loc. JP20MH) on 11-31 July 2011. He plans to be QRV on 80-6 metres, mainly SSB and CW. QSL via his home call, direct or bureau.
SOURCE: [rsgbiota.org] via ICPO Bulletin (18-25 March 2011)

** DL4FO, active as OZ/homecall in JO55 on HF and 50 MHz **

Look for Chris, DL4FO, to be active as OZ/homecall on 17-29 July 2011 from Tuno [Tunoe, Tunï¿½] Island (IOTA EU-172, DIA JY-009, WW Loc. JO55FW). Chris will be QRV on all HF bands, plus 6 metres, mainly CW. QSL via home call, bureau preferred.

Nimbusters is about taken in flames from a one named Bryan Reo and
some other Christian Identity kooks..

Yesterday, someone from the NimBoard posted a death threat to one of
BR's kook buddies..

And Stan said if another threat is posted, he was taking the
NimBusters board down for GOOD this time..

Been on NimBusters for many years.. Took Roger and co with me for one
hell of a ride and now We're all coming back now!!

Let's have fun again!!!

==> + PUBLIC SERVICE: RADIO AMATEURS IN JAPAN STILL PROVIDING
COMMUNICATIONS SUPPORT

Amateur Radio operators became involved in the rescue effort soon
after the March 11 8.9 earthquake and devastating tsunami that hit
northern Japan, and that effort continues nearly two weeks later. "In
the early stage following the earthquake and tsunami, several radio
amateurs were able to activate their stations with car batteries or
small engine generators, despite the electric power outages," IARU
Region 3 Secretary Ken Yamamoto, JA1CJP, told the ARRL. "They
transmitted rescue requests and information on the disaster situation
-- including refugee centers and their needs -- and the availability of
basic infrastructures, such as electricity, water and gas supplies."
After the earthquake and tsunami, there was no electricity, water or
gas service in many of the affected areas.

<http://www.arrl.org/images/view/News/JP_TLL0311_CT.JPG> In his
report to the ARRL, Yamamoto said that the Japan Amateur Radio League
(JARL) activated JA1RL -- its headquarters station in Tokyo -- soon
```

after the earthquake. With the help of many other amateurs, it also activated its regional headquarters station JA3RL in Osaka to communicate with the amateurs in the damaged areas, including its Tohoku headquarters station JA7RL in Sendai. "The communications were mostly on the 7 MHz band in daytime and the 3.5 MHz band at night," Yamamoto explained. "Short range communications were also made on the 144 and 430 MHz bands. The information gathered through Amateur Radio communications was reported to the rescue and disaster relief organizations for their appropriate deployment. Some other amateurs accepted health-and-welfare inquiries from the [impacted] areas and they posted the information on the Internet." Read more here <http://www.arrl.org/news/radio-amateurs-in-japan-still-providing-communications-support>.

==> + PUBLIC SERVICE: AMATEURS ASSIST WITH OCEAN RESCUE

At 10:04 AM PDT on March 21, Rex Weinheimer, KC5AGO, of Stonewall, Texas -- a member of the Maritime Mobile Service Net (MMSN) -- heard and responded to a "weak and broken MAYDAY call." The call was from the sailing vessel Gloria Jean, a 30 foot sailboat that was in the Pacific Ocean about 120 miles west of Ensenada, Mexico. Weinheimer heard the distress call on 14.300 MHz, a frequency monitored by the MMSN.

MMSN Net Controller Lee Langford, KG4DZN, told the ARRL that through the combined efforts of several net stations, the net was able to ascertain the situation and the position of the stricken vessel. MMSN operators contacted both the US and Mexican Coast Guards and both services deployed assets to the scene. The US Coast Guard dispatched an MH-60 Jayhawk helicopter from San Diego and a C-130 Hercules plane from Sacramento. According to the USCG, the Gloria Jean had no propulsion, food, water or safety equipment. Read more here <http://www.arrl.org/news/amateurs-assist-with-ocean-rescue>.

==> + FCC NEWS: FCC SEEKING COMMENTS ON ARRL PETITION REGARDING TDMA

Earlier this month, the ARRL filed a Petition for Rulemaking and a Request for Temporary Waiver with the FCC, seeking authorization of the use of single-time-slot Time Division Multiple Access (TDMA) emissions in the amateur bands at and above 50 MHz, wherever multiple-time-slot TDMA is authorized. The FCC has designated the Petition as RM-11625 and is soliciting comments on it. Comments may be filed electronically and will be accepted until April 22 . Read more here <http://www.arrl.org/news/fcc-seeking-comments-on-arrl-petition-regarding-tdma>.

==> ARRL RECOGNIZES: NOMINATIONS FOR ARRL AWARDS NOW OPEN

Each year, the ARRL Board of Directors has the opportunity to select recipients for a number of awards in various categories that honor Amateur Radio operators. The nomination period is now open for those ARRL awards that recognize educational and technological pursuits in Amateur Radio. There are also awards to honor a young Amateur Radio

operator and an outstanding ARRL Section Manager. Read more here <http://www.arrl.org/news/nominations-for-arrl-awards-now-open>.

==> + ON THE AIR: NIST TO CONDUCT TIME AND FREQUENCY USER SURVEY

The National Institute of Standards and Technology's (NIST) Time and Frequency Division is conducting a survey to learn more about its users, seeking to determine how the agency can make its services more useful in the future. NIST services include WWV, WWVH and WWVB, which provide reference time and frequency signals via radio. The NIST also provides the Internet Time Service -- which provides accurate time synchronization to computer systems -- and several other services to offer accurate time information via telephone or web pages. Radio amateurs are encouraged to complete the survey. Read more here <http://www.arrl.org/news/nist-to-conduct-time-and-frequency-user-survey>.

==> SOLAR UPDATE

Tad "The Earth turns, the Sun burns, but I die without you <http://www.youtube.com/watch?v=5L_wOdWD2t0>" Cook, K7RA, reports: For the second week in a row, all solar indicators were lower. The average daily sunspot numbers declined more than 28 points from the week before to 40.9, while the average daily solar flux was off more than 18 points to 94.8. But looking at solar images from the STEREO mission <http://stereo.gsfc.nasa.gov/>, we can see a great deal of activity about to rotate toward us over the Sun's eastern horizon. The whole "back" side of our Sun looks very busy. The NOAA forecast for March 23 for the planetary A index and solar flux still is not available, but the March 22 forecast sees solar flux for March 24-31 at 110, 115, 120, 120, 120, 125, 130 and 135. The planetary A index for the same period is predicted at 8 for March 24-25, 5 on March 26-27 and 8 on March 28-31. This indicates improving HF propagation for the near term, with geomagnetic indicators slightly unsettled, compared to recent quiet conditions. NASA has a video <http://www.youtube.com/watch?v=aTBgHd8exI4> explaining the very low sunspot activity over the past few years. Look for more information on the ARRL website on Friday, March 25. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad Cookism" is brought to you by the song Without You <http://www.youtube.com/watch?v=5L_wOdWD2t0> from the musical Rent <http://en.wikipedia.org/wiki/Rent_%28musical%29>.

==> + SILENT KEY: THORMOD "TOM" B�E, LA7OF (SK)

Thormod "Tom" B�e, LA7OF, of Horten, Norway, passed away on Monday, March 21. He was 71. B�e was President of the Norsk Radio Relae Liga, Norway's IARU Member-Society. B�e actively worked for the Amateur Radio cause throughout his adult life in both a private and professional capacity. For many years, he worked on spectrum management matters with the Norwegian administration, was extremely active in CEPT and ITU forums and served as Director of the European Radiocommunications

Office in Copenhagen from 1998-2006.

ARRL Chief Executive Officer David Sumner, K1ZZ, remembered B�e fondly: "Tom was the spokesman for Norway in Committee 5, which was responsible for all frequency allocations -- and I do mean all, as the entire radio spectrum was under review at WARC-79. Norway was an outstanding supporter of Amateur Radio at the conference, and Tom was recognized as the 'most valuable delegate' by the IARU team." Read more here <http://www.arrl.org/news/thormod-tom-b-e-la7of-sk>.

==> + ARES® E-LETTER NOW AVAILABLE IN AUDIO FORM

The ARES® E-Letter is now available in audio format <http://www.arrl.org/ares-e-letter-audio-version>. Edited for audio by Al Brown, KZ3AB, the ARES® E-Letter is voiced by Tony Riggs, W1FHN. Brown was licensed in 1966. He was a member of the White House Press Corps before retiring from the International Broadcasting Bureau/Voice of America (IBB/VOA). Licensed since 1955, Riggs has worked in both the commercial and public broadcasting venues. He retired after 21 years as a staff announcer and news anchor with the VOA. With more than 35,000 subscribers, the ARES® E-Letter is written by Rick Palm, K1CE and is published each month. Click here <http://www.arrl.org/ares-e-letter-audio-version> to subscribe to the ARES® E-Letter.

==> THIS WEEK ON THE RADIO

This week:

- March 26-27 -- CQ WW WPX Contest (SSB)

Next week:

- April 2-3 -- Missouri QSO Party; QCWA Spring QSO Party; ARCI Spring QSO Party; SP DX Contest; EA RTTY Contest
- April 5 -- ARS Spartan Sprint

All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests>, the ARRL Contest Update <http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more info. Looking for a Special Event station? Be sure to check out the ARRL Special Event Stations Web page <http://www.arrl.org/special-event-stations>.

==> UPCOMING ARRL SECTION, STATE AND DIVISION CONVENTIONS AND EVENTS

- March 25-26 -- ARRL Maine State Convention <http://www.arrl.org/hamfests/maine-state-convention-1>, Lewiston, Maine
- March 26-27 -- ARRL Maryland State Convention <http://www.arrl.org/hamfests/maryland-state-convention-greater-baltimore-hamboree-computerfest>,

Timonium, Maryland
- April 2-3 -- ARRL New Jersey State Convention
<http://www.arrl.org/hamfests/new-jersey-state-convention-1>, Ewing,
New Jersey
- April 22-24 -- ARRL Idaho State Convention
<http://www.arrl.org/hamfests/idaho-state-convention-1>, Boise, Idaho
- April 23 -- ARRL Louisiana State Convention
<http://www.arrl.org/hamfests/louisiana-state-convention-twin-city-ham-radio-
fest>,
Monroe, Louisiana; ARRL North Carolina State Convention
<http://www.arrl.org/hamfests/north-carolina-state-convention-raleigh-hamfest
>,
Raleigh, North Carolina

To find a convention or hamfest near you, click here

Amateur Radio Newsline(tm) Report 1754 - March 25 2011

(Please note that this is an extended Newsline report running 33 min, 11 seconds and containing 3 breaks.)

Amateur Radio Newsline report number 1754 with a release date of Friday, March 25, 2011 to follow in 5-4-3-2-1.

The following is a Q-S-T. The FCC offers its support to Japan in its recovery from the March 11th earthquake and tsunami; the story of Hawaii's ham radio activation as the tsunami headed its way, ARISS celebrates its 600th school contact and more radar and G-P-S jamming exercised are announced in the U-K. Find out the details are on Amateur Radio Newsline(tm) report number 1754 coming your way right now.

RESCUE RADIO: FCC OFFERS TECHNICAL EXPERTISE TO JAPAN

The FCC has offered its counterpart in Japan any assistance that it might be able to render. This, as recovery efforts continue in the wake of the March 11th earthquake and Tsunami. Bill Pasternak, WA6ITF, is in the newsroom with more:

--

According to the trade publication Radio World, soon after the devastating events occurred, the FCC made contact with officials in Japan. This, to offer any help on the telecommunications front that it might be able to supply.

Tom Sullivan is the spokesperson for the FCC International Bureau. He is quoted as saying that his agency has reached out to its regulatory contacts in Japan and is also working with the State Department and the National Telecommunications & Information Administration to consider what assistance the FCC might be able to provide.

According to Sullivan, soon after the massive earthquake that hit Haiti, the FCC took a proactive role. This included providing technical assistance on emergency communications as well as passing along offers of help from private industry.

But Sullivan also notes that Japan is a different situation. It's a nation with its own very robust communications system. He says that on

the telecommunications front Japan is very well prepared for a situations like this. Nevertheless, Sullivan says that the FCC will be able to offer its expertise should it be asked.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF, in the Newsroom in Los Angeles.

--

In the article, Tom Sullivan noted that the FCC International Bureau could serve as a contact point for anyone in industry seeking information on whether and how they might be able to help but at this point in time no telecommunications assistance requests have been received. You can read more at tinyurl.com/fccjapan. (RW, B&C)

**

RESCUE RADIO: HAWAII RACES WAS READY FOR THE MARCH 11th TSUNAMI

As Japan begins its slow journey back from the March 11th earthquake and tsunami that devastated a part of that Pacific Rim nation, and the continuing story of the reactor meltdowns at the Fukushima nuclear power plant, lost in the news coverage has been the story of ham radio emergency preparedness across the Pacific. This as the tsunami hurled itself eastward.

One of the first major population centers to begin preparing for the unknown was the state of Hawaii where Ron Hashiro, AH6RH, is the State Civil Defense RACES Coordinator. He says that he learned about the approaching sea disturbance by e-mail and that triggered the alerting system that gets the trained emergency communicators ready for whatever they may soon face:

--

AH6RH: "At that point we started the notification system of phone calls and other means of activating all of the other hams. In the meantime the radio started to get busy because other people had found out through TV, radio and other forums that there was a tsunami watch in effect and they were quite concerned."

--

Hashiro tells Newsline that the system worked flawlessly and soon the needed emergency communications nets were in operation:

--

AH6RH: "We placed phone calls to the different Amateur Radio Civil Defense coordinators on the various islands, they in turn placed phone calls and notified their people and got nets running on the different repeaters.

"On Oahu, W6BJF, Tom, ran the net, kept it active and passed messages between our Department of Emergency Management and our amateur radio

community, keeping them both informed."

--

By the time the tsunami approached Hawaiian shores all was in readiness, but thankfully Mother Nature spared Hawaii from the kind of devastation seen on the Japanese mainland:

--

AH6RH: "We are fortunate that while we were waiting for the tsunami to come, it did not pose as great a (potential) for damage as it did in Japan. Some of the islands did pick up some damage on their west facing side but it was more localized as compared to what was on Japan."

--

The bottom line is that while there was not the need for ham radio to any great extent as the tidal wave passed Hawaii, the hams of the Island state were ready if it had been a far more serious event.

Also, you can hear more with Ron Hashiro, AH6RH, about Hawaii's state wide ham radio ARES, RACES and CD preparedness system on this weeks Rain Report. Its on line right now at www.therainreport.com. (ARNewsline(tm))

**

RESCUE RADIO: THE TSUNAMI HEADS TO THE AMERICAS

After passing Hawaii the giant wave front continued its trek eastward toward the Americas. Soon nations bordering on the Pacific began to issue warnings to their populations located near the coastline. Then reports started trickling in as we hear from Amateur Radio Newsline's Bruce Tennant, K6PZW:

--

Marco Loarca, TG9ANM, is the Emergency Coordinator for Area D of the IARU's Region 2. He reports that the Club de Radio Aficionados de Guatemala was able to maintain communication via VHF and UHF with radio operators located near the nations coastline. Meantime, Jorge Sierra, LU1AS, his counterpart in Area G of reported that the Red Chilena Nor Austral monitored the frequency 7.070 MHz and beginning at 17:00 local time while the VHF and UHF emergency communications network was also activated.

In the United States, the Amateur Radio Emergency Services of California's Santa Cruz County was activated at approximately 08:00 a.m. local time. More than 30 local A.R.E.S. radio operators were made available to served agencies. These included the Santa Cruz County Emergency Operations Center, area evacuation centers, the Red Cross, a Salvation Army canteen truck, the Santa Cruz County Harbor Coast Guard

Auxiliary and a number of local Fire Departments. Also on Friday morning the Santa Cruz County A.R.E.S. Team activated the Tsunami Resource Net in advance of the anticipated 5 to 7 foot wave that was expected to reach the coastline around 8:00 AM local time.

As expected, the tsunami did impact the Pacific coast. They caused an estimated 15 million dollars of damage to Santa Cruz Harbor. More that 100 boats were either damaged or sunk as a result of the waves.

Santa Cruz was not alone in receiving significant damage as a result of the powerful tidal surge. Crescent City, located approximately 500 miles North of Santa Cruz, also received heavy damage. This lead to newly elected Governor Jerry Brown declaring these areas disaster zones. News reports say that one person died as a result of being swept out to sea with the high waves.

Lastly, on the other side of the United States northern border, Daniel Lamoureux VE2KA, reported that there was no damage from the tsunami on Canada's west coast.

That's whats known as we go to air.

For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW, in Los Angeles.

--

Our thanks to the International Amateur Radio Union for much of the information in Bruce's report. (IARU - R2 Report)

**

HAM RADIO IN SPACE: ARISS CELEBRATES 600th SCHOOL CONTACT

Amateur Radio on the International Space Station, better known by the acronym ARISS, reached a milestone on Thursday, March 17th. This, when it held its 600th space to ground contact between astronaut Cady Coleman, KC5ZTH on board the International Space Station and students from several schools in Plock and Liszyno, Poland.

The contact supported lessons about space and space exploration, communication and technology. Scout Amateur Radio Club S-P-5-Zed-B-A handled the radio connection during which the astronaut Coleman fielded 19 space related questions from the students at the two schools.

Nearly 120 people were in the audience and there was also extensive media coverage. This included newspapers, four scientific magazines, one radio magazine, a television station, national radio and two internet portals.

And less we forget, we will have more ham radio space related news later on in this weeks Amateur Radio Newsline report. (Southgate)

RESCUE RADIO: HAM RADIO REPLACES PHONES DURING HOSPITAL OUTAGE

When nurses and other caregivers picked up their phones at Childrens Hospital of Orange County at 5:30 AM on March 21, there was no dial tone. A power surge, probably from lightning, had caused failure of the central processor in the hospital's phone switch. How would they make contact with physicians and patient transport companies?

Fortunately, the lead operator at the switchboard knew just what to do. She opened her disaster book to the Amateur Radio support page and followed the established procedure for activating the Hospital Disaster Support Communications System, or HDSCS. She had several options, but this time she used an emergency tie-line to reach April Moell WA6OPS, who is head of this ARES group that specializes in helping hospitals when communications fail.

April established an on-air network and initiated a callout of HDSCS communicators by telephone and pager. Ken Simpson W6KOS and Clay Stearns KE6TZR arrived at the hospital shortly to establish a link with the outside world. More operators followed to communicate between the most important units within the hospital including the Emergency Department, Neonatal Intensive Care, Pediatric Intensive Care, and Pharmacy.

April had given her home telephone number to the Supervisor

at Orange County Communications for incoming call relay.

This resulted in several urgent messages for the hospital,

including one regarding transport of a young patient coming

in for an appendectomy.

--

(Audio from HDSCS net)

--

By 10:45 AM, some phones were working but additional repair components were being awaited from a supplier. HDSCS continued to provide unit-to-unit and hospital-to-community messaging as needed, including coordination of patient treatments and a request for blood. At 1:02 PM, the repair crew announced that the phone system was back to normal except for some voicemail functions. HDSCS members remained on station

for 30 more minutes as they always do to insure that phone systems are stable.

There's lightning here in southern California only a few days a year, but it's a definite danger to our hospital phone systems. During an intense thunderstorm last October, HDSCS members responded to St. Jude Hospital in Fullerton when a power outage caused overloading of the telephone system there.

A total of eleven HDSCS members participated in this [latest] communications emergency. They were familiar with this hospital because HDSCS has helped in communications emergencies there before, including a 22-hour external phone outage when a construction accident severed fiber optic cables in August 2006.

This is the 31st year of HDSCS service to medical facilities in Orange County and this was the 114th activation to provide support when telephones have failed or overloaded. The reasons have ranged from equipment failure, to cut cables, to natural disasters such as earthquakes, floods, and wildfires. Each member has his or her own Go-Kit, ready to take to any of the 36 supported hospitals to establish communications.

For more information on HDSCS -- and how hams in your community can organize to provide rapid response like this to hospitals -- point your Web browser to www.hdscs.org. Those are the initials for Hospital Disaster Support Communications System, followed by dot-org.

For the Amateur Radio Newsline, I'm Joe Moell. K0OV. (K0OV)

**

RESCUE RADIO: VK RADIO OPERATOR HONORED FOR HELPING SAVE SIX LIVES

The Australian MySailing dot com website reports that Marine Rescue Terrey Hills radio operator Ian Murdoch has been awarded the Region Commander's Certificate of Appreciation from New South Wales Police Assistant Commissioner Ken McKay. According to the report, Murdoch along with four members of Broken Bay Water Police, received awards for their part in the rescue of six people on board the stricken yacht Encore which foundered in gale force conditions off Broken Bay on the afternoon of October 23rd, 2008.

On that day Murdoch was sole radio operator at the Marine Rescue Sydney radio base and although alone, he managed 75 minutes of non-stop intense pressures in response to a Mayday call for help. He relayed the distressed vessel's position to other vessels in the area, informed Water Police, and coordinated a veritable fleet of responding vessels. These included a police launch, a passenger ferry, a bulk carrier and a training yacht. At the same time he maintained contact with the sinking vessel until Water Police were able to take rescue the six passengers on-board and thereby saving their lives.

The account did not say whether or not Murdoch was an Australian ham radio operator. You can read the full story in mysailing.com.au. (WIA News)

**

RADIO STANDARDS: NIST CONDUCTING TIME AND FREQUENCY USER SURVEY

The National Institute of Standards and Technology's Time and Frequency Division is conducting a survey to learn more about its users, and to find out how the can make its services more useful in the future.

NIST services include stations WWV, WWVH, and WWVB, which provide reference time and frequency signals by radio. NIST also operates its Internet Time Service, which provides accurate time synchronization to computer systems, and several other services that provide time information via telephone or web pages.

John Lowe, the manager of National Institute of Standards and Technology radio stations WWV, WWVH and WWVB in Ft. Collins, Colorado. He says that the survey should take just a few minutes to complete, and your input will be greatly appreciated.

If you use any of these services -- and what radio amateur doesn't --please complete the survey which is on-line at www.tf.nist.gov/survey. (NIST)

HAM HAPPENINGS: SOUTHWEST 75 METER VHF/UHF NET TIME CHANGE

The Sunday evening Southwest 75 Meter VHF/UHF and Above Weak Signal Net on 3 point 920 MHz has changed its operating schedule. According to a note from K6STK and WI6M, the net now begins at 5:30 p.m. Pacific Daylight Savings Time and ends one hour later at 6:30 p.m.. If you live in the region covered by this net and are into VHF/UHF weak signal work, give this group a try. (K6TSK and WI6M via the VHF Reflector)

**

HAM HAPPENINGS: AES SUPERFEST APRIL 1 - 2 IN MILWAUKEE

The annual Amateur Electronics Supply Superfest will take place on Friday, April 1st from 2:00 p.m. to 6:00 p.m. and on Saturday, April 2nd from 8:30 a.m to 3:00 p.m. at the AES Milwaukee Warehouse. This

venue is located at 5710 West Good Hope Road in Milwaukee, Wisconsin. Admission is free with many manufacturers' representatives present to answer your questions about their latest gear. This year's special guest is ARRL President Kay Craigie, N3KN. And late word that ham radio's Mr. Audio, Bob Heil, K9EID, and Radio School's Gordon West, WB6NOA will team up to conduct a ham radio oriented Audio Workshop. More about this and the entire 2011 AES Superfest is on line at www.aesham.com/superfest. (Press Release)

**

NAMES IN THE NEWS: NASA ASTRONAUT DOUG WHEELOCK, KB5BOC, TO HOST HAMVENTION FORUM

Some names in the news. First up is NASA Astronaut Doug Wheelock, KF5BOC , will be holding forth at his own forum at the 2011 Dayton Hamvention. Wheelock returned to Earth in November of 2010 after serving as Commander of the International Space Station will speak from 1:15 to 2:15 P.M. on Saturday, May 21st in Hara Arena Meeting Room 3.

During his stay on-orbit, KF5BOC along with fellow Astronaut Shannon Walker, KD5DXB, regularly participated in the Amateur Radio on the International Space Station program or ARISS program during which he made some two dozen general contacts each day he was on the air. Colonel Wheelock is expected to share his experiences about space flight and using amateur radio in space. (Dayton Hamventionr)

**

NAMES IN THE NEWS: KI6ZMV ELECTED NEWS TREASURER OF ARNEWSLINE

Leslie Monzon, KI6ZMV, of Valencia, California, has been elected as the new treasurer if the Amateur Radio Newsline. She replaces the late Andy Jarema, N6TCQ, who passed way in November of 2009.

Re-elected to the Newsline Board of Directors were incumbents Bill Pasternak, WA6ITF, as president; Davis Black, KB4KCH, as Vice President, Joe Schrader, W9JUV, as Secretary, Mark Abramowicz, NT3V as Chief Executive Officer and Don Wilkbnks, AE5DW, as Member-at Large. Abramowicz will also continue as Chairman of the Young Ham of the Year Judging Committee.

Elections were a part of the annual Amateur Radio Newsline Board of Directors Meeting held by teleconference on Sunday, March 20th. (ARNewsline(tm))

**

NAMES IN THE NEWS: G4FSU APPOINTED AS RSGB HF MANAGER

The Radio Society of Great Britain Board of Directors has approved the appointment of Ian Greenshields, G4FSU. This, following the decision by John Gould, G3WKL to step down from this honorary position.

Apart from a having a very successful career as an RF and microwave communications engineer, Greenshields is well versed in radio spectrum matters. This based on his role of Secretary to the International Amateur Radio Union Region One High Frequency Committee since 2005. Recently, the IARU also appointed G4FSU as a Technical Consultant that requires regular involvement in ITU and CEPT matters. (RSGB)

**

NAMES IN THE NEWS: NEW IARU REGION 3 SECRETARY

The Board of Directors of IARU Region 3 have announced the appointment of Ken Yamamoto, JA1CJP, as the organizations new Secretary. Yamamoto holds a Bachelor of Science degree in electronic engineering and has worked in the satellite communications field for many years. He replaces Jay Oka, JA1TRC, who has reportedly stepped down for personal reasons on March 9th. WIA News

RADIO HISTORY: BBC TO CLOSE ORDFORDNESS TRANSMITTER SITE Another famed radio transmitting site is being decommissioned. This one is owned by the British Broadcasting Company and is not one very many on this side of the Atlantic know about. Amateur Radio Newsline's Norm Seeley, has the rest of the story:

--

Unless you live in Europe or are a truly devoted low frequency DX'er here in the United States, you likely have never heard of the British Broadcasting Company's transmitter site at Ordfordness. It's an operation that sits on 648 KHz and has a five tower array beamed to Europe with very little signal off the back toward the United States. And that's what makes the signal from Ordfordness such a great catch for medium wave D-X listeners on this side of the Atlantic pond.

But all that will end on March 27th. That's when the BBC switches off this transmitter site for good.

But its demise will not go undocumented. As a historical note, Jonathan Marks, G-8-W-G-N, has released a short documentary that traces

the history of the Ordfordness transmitter site from its inception through 2003 when the video was made. Marks, who was the former producer and host of the famed Radio Netherlands Media Network program is joined by Ordfordness radio engineer Andy Matherson who explains the way in which the site operates.

It's a great tour of a historic moment in European medium wave broadcast radio. You can experience it for yourself on line at vimeo.com/20996209

For the Amateur Radio Newsline, Norm Seeley, KI7UP, in Scottsdale, Arizona.

--

Another sad moment in broadcast history, but one that Jonathan Marks, G8WGN, has taken the time to preserve. (Via e-mail)

**

HAM RADIO IN SPACE: TWO NEW ASTRO-HAMS

And a follow-up to last weeks story about a pair of Astronauts who had been tested and had passed the Amateur Service exams. Since then, Luca Parmitano has been issued the call sign KF5KDP and Chris Cassidy received KF5KDR. Both passed their tests on March 8th are slated to fly on future International Space Station expeditions. (ARISS)

**

HAM RADIO IN SPACE: AO-51 ENTERS AN ECLIPSE PERIOD

Eclipses are back for AO-51, and the length is increasing every day. According to AO-51 Command Station, Mark Hammond, N8MH, eclipses are now lasting about 1 to 2 minutes per pass. They are expected to increase in length pretty fast, gaining a minute every day or two over the coming weeks and month.

AO-51 is still running under power management in single transmitter mode on the 435.300 MHz downlink running approximately 1 point 3 watts. The satellite will be off during eclipses and probably right before and after. You'll probably still hear the transmitter cycling off and on around eclipse times, but most voice users will appreciate the stronger signals. AO-51 be in this mode until further notice. (ANS)

**

HAM RADIO IN SPACE: BJ8TA AN EME AND SATELLITE DXPEDITION

AMSAT-China Chief Executive Officer Alan Kung, BA1DU reports that his group is organizing an expedition to southwest China. This, for EME experiments and amateur satellite communications. The expedition team will use the special technology experiments amateur radio call sign BJ8TA. The group will also be active on the available satellites during the expedition period. The BJ8TA Amateur Radio EME and

Satellites Expedition is supported by the Bureau of Radio Regulation of China and Yunnan Astronomical Observatory of the Chinese Academy of Sciences. (DX News)

**

WORLDBEAT - UK: MORE RADAR AND GPS JAMMING EXERCISES PLANNED

The United Kingdom's Ministry of Defense has informed U-K telecommunications regulator Ofcom that further Global Positioning System jamming exercises will be. The dates announced are May 19th to the 26th starting at 07:00 U-T-C each day.

Also, ground based radar jamming tests will take place in the South West approaches against the remote radar head at Portreath on May 21st and 22nd using F-18 Growler aircraft. There will also be radar jamming against deployed targets in South West Wales thru from May 19th to the 26th.

Communications and airborne radar jamming will take place throughout the same period on the East Coast with aircraft operating within the North Sea Military Danger Areas. The Ministry of Defense adds that safety of life operations will take precedence over these defense test exercise activities at all times.

The purpose of these tests is to likely to determine the vulnerability of U-K defenses to jamming of vital radio based defenses. (Southgate)

WORLDBEAT - NEW ZEALAND: HAM RADIO TO CELEBRATE THE 2011 RUGBY WORLD CUP GAMES

The New Zealand Amateur Radio Transmitters or NZART Council has declared the Rugby World Cup to be a Special Event and encourages you to use the ZM prefix. According to the NZART, declaring this a special event it allows New Zealand radio amateurs the use of this special prefix during September and October. A Map of New Zealand has been placed on the NZART website with game locations linked to contact details of local branches, any planned special events, on air events, and local repeater frequencies. NZART Branches are to be encouraged to invite visiting hams to attend meetings and any special events. The New Zealand Amateur Radio Transmitters is that nation's national amateur radio society. (NZART)

**

ON THE AIR: CELEBRATING 100 YEARS OF THE REPUBLIC OF CHINA

On the air, keep an ear open for members of the Republic of China Centenary Foundation who will be activating special event station BV100 during the CQ WW WPX SSB Contest on March 26th and 27th. The operators from Taiwan will then be on the air from Shaio-Liu-Chiu Island until the end of the year as a special event is to celebrate the 100th

anniversary of their homeland. Operations will be on all bands and modes. Complete details along with an operating schedule and information as to how to earn a BV100 award is available at www.bv100.tw/en. QSL's go via BV2KI. (OPDX)

**

ON THE AIR: NEPAL COMING TO EME

The 9N7WL 2 meter EME operation will take place as part of the 9N7AN DXpedition from Nepal's High View Resort which is located about 25 kilometers from the capital city of Kathmandu. This will be the first time that the DXCC entity Nepal and the Maidenhead main locator NL is activated on the 2 meter band via the moon.

E-M-E operation is scheduled to start on March 30th. Moonrise at 9N7WL will be at 3.30 UTC. The most difficult part of the world to reach by E-M-E will be to the southern part of the USA but there is no common moon with the state of Texas until Sunday April 3rd. This expedition is slated to end on April 7th. (K5WL, DL9GFB via MMMonVHF)

**

DX

In DX, ON4AEO will be active from Botswana as A25FC between April 14th and the 18th. Operation will be on 160-10 meters using CW, SSB, RTTY and PSK. QSL via ON4CJK.

LA8HGA will be operational as JW9HGA from the Longyearbyen Amateur Radio Club station located on Spitsbergen Island, Svalbard between May 19th and the 23rd. Activity will be on the HF bands and CW only. QSL is via LA8HGA via the bureau or direct.

VE3ZIK is active portable 9A from Croatia until March 30th. He also plans to be active in the Russian DX Contest, the CQ WPX SSB Contest and mentions that there is a good chance he will be on from Vrana Lake as well. QSL via DK8ZZ, via the bureau, Logbook of the World, eQSL or direct. E-mail Bureau requests for QSLs can go to ve3zik (at) gmail (dot) com

The Hellenic Amateur Radio Association of Australia are organizing a DXpeditiion to Lord Howe Island for July. They will be using the club call sign VK9HR and the organizers are looking for CW operators and experienced SSB and digital modes operators who would be interested in attending this operation. Any interested operators please contact Tommy Horozakis, VK2IR, via e-mail to president (at) haraoa (dot) com.

Lastly, A group of Mexican operators will be on

the air from the Isla de Lobos in Veracruz State

between April 29th and May 1st. They will also

activate the Lobos Island lighthouse on all HF

bands, plus 6 meters and AO 27, AO 51 and SO 50

ham satellites. Modes used will include CW, SSB

and RTTY. QSL via XE1AY.

(Above from various DX news sources)

THAT FINAL ITEM: EMCOMM - THE PARADIGM IS

CHANGING

And finally this week, a bit of an editorial comment. While ham radio within Japan is playing a role in post quake and post tsunami recovery efforts, there appears to be little if any international long haul emergency communication on the High Frequency bands. Instead, it seems that ham radio's traditional role in this area has largely been replaced by the popular social networks. Amateur Radio Newsline's Don Wilbanks, AE5DW, takes a look at the way these Twitter and Facebook are changing the paradigm and starting to displace ham radios place in the health and welfare information flow:

--

RESCUE RADIO: THE PARADIGM SHIFTS - NO NEED FOR LONG HAUL H&W TRAFFIC

So what about ham radios traditional role in post disaster relief as a carrier of long distance health and welfare traffic in the wake of the earthquake and tsunami? So far, there has not been very much of that and here is likely the reason why.

While the earthquake did knock out a lot of local telephone service across Japan, unaffected was the island nation's multi-redundant broadband system. Indeed, within minutes of the quake hitting, residents in Japan were texting and tweeting messages to their loved ones as to what had transpired. News services were looking at these tweets on Twitter and using them as a source of information for their initial reports on the disaster. So for those living in or near any of Japan's major population centers like Tokyo, there was little impact on their personal communications with the outside world

Also unaffected was the redundant communications networks used by the worlds various broadcast entities with news bureaus in Tokyo. And when the first wave of the Tsunami came ashore the world watched it happen live from an NHK news helicopter's camera whose signal was microwaved back to Tokyo and then out around the globe.

The rural areas of Japan are a totally different matter. Some towns are still without any form of utilities including water, gas, electrical power, telephone or broadband service. And its likely to be that way for some time. And sadly, there are those coastal towns in Northern Japan that took the full brunt of the tidal waves. Most of these were destroyed with little or nothing left to even say that only recently

they had existed. So, right now, trying to get health and welfare messages into those towns still isolated is a difficult if not impossible task. Messages addressed to residents of those towns wiped away by the tsunami will likely never be delivered.

When one takes a step back and takes a look at the whole picture it's easy to see and to hear why there are so few health and welfare messages being handled on the long haul ham radio bands. In the more populated areas, ham radio was replaced by Twitter and Facebook. In rural Japan there's simply no way to get a message through.

Or to put it another way, as massive and devastating as this earthquake was, its communications needs outside Japan do not fit any of the traditional models that hams world wide are accustomed to dealing with. It also says that as long as a nation's broadband infrastructure is not severely damaged, ham radios role as the long haul carrier of health and welfare traffic is being replace by a smart phone and an account on Facebook or Twitter.

I'm Don Wilbanks, AE5DW.

--

The bottom line appears to be this. As long as a nation's broadband infrastructure and its connections to the outside world are not severely damaged, and its population is communications savvy, the various social networks now provide a far faster way to pass health and welfare messaging than ham radio can ever hope to supply. But in those circumstances where there is no other means of long haul communications, ham radio will always have a significant role to play. (ARNewsline(tm))

GB2RS NEWS

Sunday 27th March 2011

The news headlines:

* RSGB AGM date change

* New 60m beacon in Luxembourg

* Russia to join CEPT licence scheme

Due to unforeseen circumstances outside the Society's control it has proved necessary to defer the Society's AGM that had been planned for Saturday 16 April. The AGM will now take place on Saturday 14 May at the Menzies Mickleover Court, Etwall Road, Mickleover, Derby DE3 0XX. The calling notice for the AGM is in the April edition of RadCom and the financial and committee reports will appear in the May RadCom.

A new 60m beacon is on the air in Luxembourg. Operating with the callsign LX0HF it has been reported to be putting a good signal into the United Kingdom and other parts of Europe. LX0HF operates on 5205.25kHz.

At a recent meeting, the Russian State Commission for Radio Frequencies decided that the Russian Federation will join CEPT Recommendation TR 61-01, which is the CEPT Radio Amateur Licence. IARU Region 1 considers this a major step forward to achieve worldwide radio amateur roaming.

Anyone planning to take part in this year's Mills on the Air over the weekend May 14th and 15th is asked to please register their details on the Denby Dale ARS website www.g4cdd.net or get in touch with Gerald, G3SDY via g3sdy@sky.com as soon as possible.

The BBC is ceasing its 648kHz transmissions of World Service English language radio today, 27 March. Closure of the 648kHz service and medium wave frequencies to Russia continues the process of withdrawing from direct broadcasts to Europe in response to a declining number of direct listeners. However, the BBC World Service continues to be available in Europe by satellite, cable and online.

To commemorate the passing of one of its founding members, Hank Kohl K8DD, the Second Class Operators Club will be holding its first SOC CW Bash on Saturday 2 April between 0000 and 2359UTC. Any operator can take part in the Bash and, although not a contest, the SOC will be

issuing its very own special certificates for top scorers in both a QRO and QRP section. Full details at www.qsl.net/soc/k8dd_bash.htm.

And now for the details of rallies and events for the coming week

The Spring Militaria & Electronics & Radio Amateur Hangar Sale will take place today, 27 March, at the Hack Green Secret Nuclear Bunker, Nantwich, Cheshire, CW5 8AP. Doors open at 10am and admission is £2.50. Visitors will find civil, military and vintage radio equipment plus vehicle spares and more. Contact Rod Siebert on 01270 623353.

2

The South Gloucestershire Amateur Radio Rally will take place on 3 April at Avon Scouts Activity Centre, Fernhill, Almondsbury BS32 4LX, which is at the junction of the M4 & M5. Doors open at 10am. Details from Stan Goodwin, G0RYM on 07833 517370.

Now for the news of special events

Until 3 April, GB8HBW and GB0CMR will be on the air celebrating 85 years of Hospital Radio in the UK. GB8HBW will be operating in the Newbury area and GB0CMR is in Hinckley for Castle Mead Radio.

Denby Dale Amateur Radio Society will be operating GB200HNC from Tunnel End, Marsden, near Huddersfield over the weekend of 2 and 3 April. The club will be operating on all HF bands over the whole weekend from the first floor of the Visitor Centre. The event, organised by British Waterways, is a real family weekend featuring tunnel legging, craft fare, canal craft demonstrations and much, much more and will be open from 10am to 4pm each day. Full details from Richard, M0RBG, on 07976 220126 or by e-mail to m0rbg@talktalk.net.

And now the HF DX news compiled from 425 DX News and other sources

>From 2 to 7 April, the Macclesfield & District Amateur Radio Society will be operational from the Isle of Arran off the coast of Scotland. The IOTA reference is EU-123. Four club members will be transmitting on the HF bands and making as many contacts across the UK, Europe and around the world as possible. A special QSL card has been produced.

Andy, M1LOL and Ray, M1REK, both members of Stockport Radio Society, will be operating from the Isles of Barra and Vatersay EU-010 from 2 to 9 April 2011. Operating on the 80 to 10m bands, modes in use will be SSB and data, mainly PSK and RTTY.

Cal, WF5W, 8P9CW, Bill, K5WAF, 8P9WF, Bob, WB5IUU, 8P9UU and Paul, W5PF, 8P9PF will be active from Barbados (NA-021) from 24 March to 3 April. They will operate CW, SSB and RTTY, including activity during the CQ WW WPX SSB contest. QSL for all callsigns via W5PF.

Members of the Caribbean Contesting Consortium (CCC) will activate Signal Point Station on Cura£ao between 22 March and 6 April. Operators mentioned are W0CG (PJ2DX), N4RV, K2PLF and possibly others. They will

participate in the CQ WW WPX SSB Contest (26-27 March) as PJ2T (QSL via N9AG and LoTW), while outside the contest they will use PJ2/homecall or their personal PJ2 calls (QSL via home calls).

Now the contest news

This weekend, 26 and 27 March, the CQWW WPX SSB contest takes place between 0000 and 2359UTC. On the 1.8 to 28MHz bands, the exchange is signal report and serial number.

On 29 March the 70MHz UK Activity Contest will take place between 1900 and 2130UTC. Using all modes the exchange is signal report, serial number and locator.

3

The 1st RoPoCo of the year takes place on 3 April from 1900 to 2030UTC. It is an SSB event and the exchange is signal report and full postcode received.

On 3 April, the first 70MHz contest takes place between 0900 and 1200UTC. Although it doesn't attract a huge number of entries, this 3-hour contest traditionally enjoys strong support from portable stations, indeed 40% of last year's entrants signed /P. There are no multipliers in this event; it's purely a matter a trying to amass the biggest number of total kilometres worked. The exchange is signal report, serial number and locator.

In the 24-hour EA RTTY Contest on 3 and 4 April, single-ops can make a single band or all-band entry, but multi-op stations can only make an all-band entry. The timings are 1600 to 1600UTC on the 3.5 to 28MHz bands and the exchange is signal report and serial number. Although EA stations send their Province code.

If RTTY isn't your thing, the SP DX Contest also runs for 24 hours but from 1500 to 1500UTC. In it there are numerous entry categories, mainly for single ops. Multipliers in this one are the 16 Polish provinces. Using CW and SSB on the 1.8 to 28MHz bands, the exchange is signal report and serial number with SP stations sending their Province code.

And now the solar factual data for the period from the 14th to the 20th of March, compiled by Neil Clarke, G0CAS on the 21st March.

Solar activity started at moderate levels with M class solar flares taking place on the 14th and the 15th. As the large sunspot groups rotated out of view solar activity declined to very low levels by the 18th. Solar flux levels declined from 107 units on the 14th to 88 by the 18th. The average was 95 units. The 90 day solar flux average on the 20th was 94 units, that's one unit up on last week. X-ray flux levels also declined as expected from B3.8 units on the 14th to B1.2 by the 19th. Geomagnetic activity was very quiet every day, in fact on the 15th and the 16th the Ap index was zero on both days. The highest daily Ap figure was only 4. The average was Ap 2 units. Solar wind data from

the ACE spacecraft saw solar wind speeds decline from 650 kilometres per second on the 14th to 320 by the 18th. Particle densities were low every day. Bz varied no more than minus 6 and plus 8 nanoTeslas for the period and significantly less on the days that the Ap was zero.

And now the solar forecast. Yet again this week we are waiting for several old sunspot regions to return into view and see how active they are. We can now keep an eye on these regions with the STEREO spacecraft, which lets us view the Sun from all angles. Also, there are the coronagraph images from the SOHO spacecraft showing any coronal mass ejections taking place from the far side of the Sun, which could suggest solar flare activity. Solar activity could increase to moderate levels on some days. Solar flux levels should be in the 110's or even higher. Geomagnetic activity should be quiet today but could increase during the next few days due to a recurring coronal hole disturbance. Activity is expected to return to quiet levels for next weekend. MUFs during daylight hours at equal latitudes should be around 25MHz for the south and 22MHz for the north. Darkness hour lows should be about 9MHz. Paths this week to South America should have a maximum usable frequency with a 50 per cent success rate of around 30MHz. The optimum working frequency with a 90 per cent success rate will be about 24MHz. The best time to try this path will be between 1200 and 1800 hours. Seeing that we have just altered our clocks earlier this morning these times are in GMT, as always.

And that's all for this week from the propagation team.

Next, the Local News:

Please note that details of all RSGB-affiliated clubs and societies

can be found on the RSGB website, including email addresses

and website links where known.

[Note to Newsreaders: Please read the local news items appropriate to the service area of your

transmission.]

NEWS FOR THE MIDLANDS First, some advance information. M0OCT ARS is holding a weekend Foundation course and exam near Chesterfield on 11 and 12 June. There will be plenty of places but early booking is essential. For more information contact Steve, G6IBQ on 01248 275 889 or email exams@m0oct.com.

On Friday 1 April Coventry Amateur Radio Society is having a talk on planning expeditions by Chris Colclough, G1VDP. Contact John, G8SEQ, on 07958 777363.

On Friday 1 April Hucknall Rolls Royce Amateur Radio Club is having a general club meeting. More information from Dave Wilde, G1YAI, on 0844

4355593.

On Friday 1 April Nunsfield House Amateur Radio Group has a forum on global warming. Details from Ken Frankcom, G3OCA, on 01332 720976.

On Friday 1 April South Birmingham Radio Society is having a construction evening.. Contact Don, on 0121 458 1603.

On Monday 28 March Gloucester Amateur Radio & Electronics Society is having an informal evening. Contact Anne, 2E1GKY, on 01452 548478, daytime.

On Monday 28 March Leicester Radio Society is having a talk on house security and household property alarms by Kelvin, G4ZTD. More info from Alex, G8FCQ, on 0753 120 1640.

On Monday 28 March South Birmingham Radio Society is planning for VHF Field Day. Contact Don, on 0121 458 1603.

On Monday 28 March South Normanton Alfreton & District Amateur Radio Club is having an informal night. Details from A Lawrence, 2E0BQS, by email to adylawri@btinternet.com.

On Tuesday 29 March Derby & District Amateur Radio Society is on the air. Contact Richard Buckby, by email to radio@dadars.org.uk.

On Tuesday 29 March Loughborough & District Amateur Radio Club is having a practical evening. More information from Chris, G1ETZ, on 01509 504 319.

On Wednesday 30 March Hinckley Amateur Radio Society is having a junk sale with Mark, 2E0SBM. Details from John, M0JAV, on 07836 731544.

5

On Wednesday 30 March Lincoln Short-Wave Club is having a surplus equipment sale at the village hall. For more information contact Pam Rose, G4STO, on 01427 788356.

On Wednesday 30 March Midland Amateur Radio Society is having laptop computer training and Foundation classes. Details from Norman, G8BHE, on 01214 229 787.

On Wednesday 30 March Telford & District Amateur Radio Society is holding its AGM. Contact Mike, G3JKX, on 01952 299 677.

On Thursday 31 March South Birmingham Radio Society has training classes with Dave Murphy, G8OWL. Contact Don, on 0121 458 1603.

NEWS FOR THE NORTH OF ENGLAND We start with some advance information. Bolton Wireless Club will be running a foundation course beginning on 28 April. For more details and registration information, send an email to boltonwireless@gmail.com.

On Friday 1 April East Cleveland Amateur Radio Club is having a radio components catalogues evening.. For more information contact Alistair, G4OLK, on 01642 475 671.

On Friday 1 April Ripon & District Amateur Radio Society is having a practical session looking at RF burns. Details from Rob Hall, M0RBY, on 0787 608 5631.

On Saturday 2 April Denby Dale Radio Club starts its weekend event special event station for Huddersfield Narrow Canal's bicentenary celebrations at Tunnel End, Marsden. Details from Richard, M0RBG, on 07976 220126.

On Saturday 2 April Macclesfield & District Radio Society commences its week long Isle of Arran DXpedition, operating as GS4MWS/P. More information from Roger Bell, M0GMG, on 0771 258 9163.

On Sunday 3 April Grimsby Amateur Radio Society is taking part in the SSB RoPoCo contest. Contact Cliff, G4YHP, on 01472 328 830.

On Sunday 3 April Hornsea Amateur Radio Club is taking part in the SSB RoPoCo contest. Contact Gordon MacNaught, G3WOV, on 01377 240573.

On Monday 28 March Bolton Wireless Club is having a discussion evening on starting out in amateur television chaired by Derek, G1AEQ. For details, send an email to boltonwireless@gmail.com.

On Monday 28 March Macclesfield & District Radio Society is having a talk on radio valves by Dave Lucas, G0BIE. More information from Roger Bell, M0GMG, on 0771 258 9163.

On Monday 28 March Scarborough Amateur Radio Society is having a talk by VMARS member Stewart Gebbie, G8YQN, on the use of Clansman military radios in amateur radio. Details from Jerry Scarr, G6LBL, on 01751 476601.

On Monday 28 March Sheffield Amateur Radio Club is holding its AGM. More information from Peter Day, G3PHO, by email to sarc@g3pho.org.uk.

6

On Monday 28 March South Manchester Radio and Computer Club is holding its monthly technical forum. Details from Ron, G3SVW, on 0161 969 3999.

On Monday 28 March Thornton Cleveleys Amateur Radio Society is having a talk on the Humbolt Glacier by Mick Green, G4EZM. Details on the web at www.tcars.org.uk.

On Monday 28 March Workington and District Radio and IT Group Club is on the air. For more information get in touch with Barry Easdon, G0RZI, on 01946 812092.

On Tuesday 29 March Chester & District Amateur Radio Society is conducting radio operations at Waverton Institute. Details from Barbara Green on 07957 870770.

On Tuesday 29 March Otley Amateur Radio Society is taking part in the 70MHz UKAC as G3XNO. Contact Paul, 2E0PAK, on 07768 996370.

On Wednesday 30 March Grimsby Amateur Radio Society is having a natter night. Contact Cliff, G4YHP, on 01472 328 830.

On Wednesday 30 March Halifax & District Amateur Radio Society continue with Foundation and Intermediate Licence training. The club is also developing a give-away crystal set kit with which to encourage youngsters to take up electronics and amateur radio. Contact Martin, M0GQB, on 01422 341317.

On Wednesday 30 March Hornsea Amateur Radio Club is looking at static comms. Contact Gordon MacNaught, G3WOV, on 01377 240573.

On Wednesday 30 March Mid-Cheshire Amateur Radio Society is having a talk on mapping software by G0LBO. Contact Peter Paul Fox, G8HAV, on 01606 553401.

On Thursday 31 March Preston Amateur Radio Society is having a talk on SOTA. Contact Richard, M0RDZ, on 0785 587 3566.

On Thursday 31 March South Manchester Radio and Computer is having a talk on Club Rene Descartes by Dave, G4UGM. Details from Ron, G3SVW, on 0161 969 3999.

NEWS FOR NORTHERN IRELAND No news items have been received for Northern Ireland this week.

NEWS FOR SCOTLAND First, some advance information. Livingston and District Amateur Radio Society will be holding a Foundation exam at the Crofthead Farm Community Education Centre, Livingston at 7:30 pm on Tuesday 12 April. Candidates must register by 29 March at the latest. Contact Norman Stewart, GM1CNH on 07740 946192 for further details.

On Friday 1 April Cockenzie & Port Seton Amateur Radio Club is having a normal club night. More information from Bob, GM4UYZ, on 01875 811 723.

7

On Friday 1 April West of Scotland Amateur Radio Society is having presentations, guest speakers, a quiz and a raffle. More information from Fred Coombes, 2M0BIN, on 01415 715512.

On Tuesday 29 March Livingston & District Amateur Radio Society is having a club evening. Details from Norman, on 07740 946192.

On Wednesday 30 March West of Scotland Amateur Radio Society has Solder Group homebrew projects & licence training. More information from Fred Coombes, 2M0BIN, on 01415 715512.

On Thursday 31 March Aberdeen Amateur Radio Society is discussing the programme of events. More information from Lewis, GM4AJR, on 01224 575 663.

On Sunday 3 April Central Scotland FM Group is holding its AGM at Bathgate Guide Hall, Mid Street, Bathgate. Details from Crawford Ross, GM8HBY.

NEWS FOR THE SOUTH EAST and EAST ANGLIA First, some advance information. From April, Horndean & District Amateur Radio Club will be changing their meeting venue and days to the 1st and 3rd Thursday each month. The club will meet at Anders Hall, off Milton Road, Waterlooville PO7 6AW. The first Horndean & District Amateur Radio Club meeting at the new venue will be on Thursday 7 April for a natter night and social evening. For more information contact Stuart Swain, G0FYX, on 02392 472846.

On Friday 1 April Harlow & District Amateur Radio Society is having a general chat night. More information from R C White, G0AGO, by e-mail to G0AGO@aol.com.

On Friday 1 April Mid-Sussex Amateur Radio Society is having a radio night and table top sale. Contact Peter, G4AKG, on 01444 239371.

On Friday 1 April Radio Society of Harrow is holding a surplus equipment sale. More information from Linda, G7RJL, on 0208 386 8586.

On Friday 1 April Wey Valley Amateur Radio Group is having a talk by Roger Western, G3SXW on his Sierra Leone adventure. Details on the web at www.weyvalleyarg.org.uk.

On Saturday 2 April Bittern DX Group has its annual dinner and prizegiving. Details from Linda, G0AJJ, on 01692 404154.

On Saturday 2 April Brede Steam Amateur Radio Society is at the shack. For more information contact Steve, on 01424 720815.

On Saturday 2 April Loughton & Epping Forest Amateur Radio Society commences its weekend Foundation Licence Course & Exam. Contact Marc Litchman, G0TOC, on 020 8502 1645.

On Saturday 2 April Worthing & District Amateur Radio Club is putting Worthing Museum on the air as GB2WM. Contact Phil, G4UDU, on 01903 816684.

On Sunday 3 April Worthing & District Amateur Radio Club is having a breakfast meeting in Goring. Contact Phil, G4UDU, on 01903 816684.

8

On Tuesday 29 March Chelmsford Amateur Radio Society is having a club net night. Contact Martyn, G1EFL, on 01245 469 008.

On Wednesday 30 March Chesham & District Amateur Radio Society is looking at getting started on the air with VHF and UHF handhelds. More details from Terry, G0VFW, on 01442 831 491.

On Wednesday 30 March Havering & District Amateur Radio Club is having an is having an informal evening. More information from John, M0UKD, on 07890 222111.

On Wednesday 30 March Norfolk Amateur Radio Club is having a table top sale. Details from Chris Danby, G0DWV, on 01603 898678.

On Wednesday 30 March Worthing & District Amateur Radio Club is putting GX3WOR on the air. Contact Phil, G4UDU, on 01903 816684.

On Thursday 31 March Bittern DX Group has an update on social and competitive events for the year. Details from Linda, G0AJJ, on 01692 404154.

On Thursday 31 March King's Lynn Amateur Radio Club is having a club night and 2m club net. Contact Ray, G3RSV, by email to ral-g3rsv@supanet.com.

On Thursday 31 March Lowestoft & District PYE Amateur Radio Club is having a club night at the shack. Details from Lee, 2E1LJL, on 01502 564242.

On Thursday 31 March Shefford & District Amateur Radio Society has a talk on cinematic equipment by Paul Schimmel. Details from David, G8UOD, on 01234 742 757.

On Sunday 21 August Lowestoft & District PYE Amateur Radio Club is having a club night at the shack. Details from Lee, 2E1LJL, on 01502 564242.

NEWS FOR THE SOUTH WEST On Friday 1 April North Bristol Amateur Radio Club is holding a committee meeting and preparing for the South Gloucester Rally sales. More information from Dick on 01454 218362.

On Friday 1 April Saltash & District Amateur Radio Club is having a talk by the keeper of GB3WD. Contact Brian, M0BHG, on 01752 844321.

On Friday 1 April Torbay Amateur Radio Society is having a natter night. For more information contact Dave, G6FSP, by email to g6fsp@tars.org.uk.

On Sunday 3 April Blackmoor Vale Amateur Radio Society is having an ARDF event. Contact Tony, G0GFL, on 01258 860741.

On Sunday 3 April Thornbury & South Gloucestershire Amateur Radio Club South is running the Gloucestershire Amateur Radio Rally at Woodhouse Campsite. Contact Tony, G0WMB, on 01454 417048.

On Monday 28 March Bristol RSGB Group is having a talk by Roger Western, G3SXW, on WRTC 2010 in Russia. Details from Robin, G3TKF, on 01225 420442.

9

On Monday 28 March Exeter Amateur Radio Society is having a club night and CW practice. More information from Nick, on 01363 775756.

On Tuesday 29 March West Devon Radio Club is having a general chat night that is open to all. Further information from Jules Cuddy, M1AGY, on 01752 291588.

On Wednesday 30 March Thornbury & South Gloucestershire Amateur Radio Club is on the air. Contact Tony, G0WMB, on 01454 417048.

On Thursday 31 March South Bristol Amateur Radio Club is on the air. Details from Andrew Jenner, G7KNA, on 07838 695471.

On Thursday 31 March Swindon & District Amateur Radio Club is having an activity night. Contact Den, M0ACM, on 07810 317750.

On Thursday 31 March Yeovil Amateur Radio Club is holding a committee meeting & putting the club station on the air. Contact Steve Crask, G7AHP, by email to steve@g7ahp.co.uk.

NEWS FOR WALES On Monday 28 March Llanelli Amateur Radio Society is holding a junk sale & club raffle. Contact Craig, MW0MXT, on 01269 840292.

WIANEWS FOR WEEK COMMENCING MARCH 27 2011.

Titanic Anniversary (VO1MGY) Operation

INTERNATIONAL DYNAMIC RANGE DAY

600th ARISS ham radio school contact

JEFF'S WALK 2 - EAST to WEST for NETS.

VK4WIP Club Station in the CQ WPX

ALL THESE STORIES UP AND COMING IN THIS EDITION OF NEWS FROM THE WIRELESS
INSTITUTE OF AUSTRALIA FOR WEEK COMMENCING MARCH 27 2011.

NEWS FROM LAST WEEK MARCH 20 HAS BEEN REPOSTED IN TEXT AT THE CONCLUSION
OF THIS WEEKS NEWS. This due to the "unformatting" of news script where every
word ran straight into each other!

INTERNATIONAL DYNAMIC RANGE DAY

Last Friday was deemed "Dynamic Range Day".

This has been set up to try to get recording producers to "drop their levels"
and show some light and shade!

In order to achieve super-high levels on CD's the music has it's dynamic range reduced - roughly speaking, that's the difference between the loudest and quietest moments in the music.

The effect is now so extreme that we have reached a bizarre situation where Justin Bieber's CD is louder than Motorhead, AC/DC or Sex Pistols!

The fatal flaw of this "Loudness War" in a nutshell is "it doesn't sound good."

Research shows there is no connection between "loudness" and sales

People don't notice loudness when comparing songs

Modern music players undo loudness by using ReplayGain

Most listeners just turn loud music down !

So - "loud" music on CD has no benefit on the radio, online, on an mp3 player, or in your CD player and yet almost every new release is crushed to within an inch of it's life.

Enter "Dynamic Range Day".

WIA
President Michael Owen VK3KI president@wia.org.au
Vice President Phil Wait VK2ASD vk2asd@wia.org.au
Secretary Sarah Thompson VK3AUD secretary@wia.org.au
Treasurer John Longayroux VK3PZ vk3pz@wia.org.au

No it is not JUST a Field Day

Being close to the John Moyle Memorial National Field Day now leaves most of the clubs thinking that another event, is just more of the same.

Tune in to the World - Amateur Radio gets people talking, is our hobby's big public relations event.

It will be in celebration of World Amateur Radio Day, the 17th of April. That is just a few weeks away.

Rules and the scoring method are available on the WIA website. All it needs a little advance planning, a publicly accessible venue, suitable station equipment, signage and most importantly people who are very presentable and knowledgeable.

Posters and uniforms are available on the website. This is an opportunity to get right behind the Tune in to the World - Amateur Radio gets people talking - and take our hobby out to the public.

Already more than a dozen clubs have indicated that they're ready to show the general public what they, and the hobby of amateur radio, has to offer - what's your club doing?.

Everyone gets enjoyment from being involved and comes away feeling they have put something back into the hobby they enjoy so much.

Remember Amateur Radio Day on the 17th of April, get involved, visit the WIA website and sign up - it only needs three or more to be involved with a public station.

(Jim Linton VK3PC)

OPEN HOUSE

WIA members and friends are invited to attend the formal opening of the WIA premises at Unit 20, 11-13 Havelock Road, Bayswater, Victoria at 4:00pm Saturday, April 2nd.

The premises will be named "Andersson House" in honour of Henry Andersson VK8HA. Henry was an Honorary Life Member of the WIA, who passed away October sIX 2004. He left his property at Humpty Doo, near Darwin, to the WIA. That generous bequest provided much of the funds needed to enable the purchase.

Light refreshments will be served between 4:00pm and 6:00pm, and a memorial plaque will be unveiled at a ceremony commencing at 4:30pm.

If you would like to attend, please RSVP to the Office on)03) 9729 0400 between 10:00am and 4:00pm Monday to Friday.

(IN TEXT EDITION ONLY)

WIA AGM

The WIA and the Darwin Amateur Radio club want to invite you to Darwin, Australia's Northern Tropical capital for the WIA Annual Conference being held over the weekend of 27, 28, 29th of May at Mirrambeena Resort .

A welcome dinner by the sea at the Beautiful Darwin Trailer Boat Club on Friday night.

Saturday morning for the Annual General Meeting and forums.

Saturday afternoon will see presentations based around Technology for the bush and life in the top end.

The conference dinner on Saturday night at the lovely Treetops restaurant finishes off the Saturday events.

For Partners we have set up a tour of some special places in Darwin led by the team from The DARC side.

On Sunday we are going to Litchfield National Park. Bring your togs and swim or just cool off in the pristine water falls and rockholes. Take a look at the magnetic anthill phenomenon, and join in a barbecue lunch at the very pretty Wangi falls.

Sunday evening why not join DARC for tea at the famous Mindil Markets and watch a beautiful sunset over Fannie bay whilst eating your choice of specialty food from one of the many different food stalls.

So why not register on the wia website now and come to Darwin for a great weekend of fun and fellowship with fellow Amateurs.

Register now on www.wia.org.au book your tickets and we will see you here on the 27th of may 2011.

This is Spud on behalf of the Wia and the Darwin amateur radio club.

UP UP AND AWAY

Optus will add a new satellite, Optus 10, to it's A/NZ fleet making it the largest in the company's and Australia's history.

Optus 10 will be delivered in 2013 and built in Palo Alto, California, by Space Systems/Loral. This follows the expansion of Australia's satellite fleet with the state-of-the-art D-Series satellites launched in 2006,7 and9.

Optus provides satellite services to Australia and NZ government departments, premium companies and broadcasters including Foxtel, ABC, SBS, Seven Network, Nine Network, Globecast Australia, UBI and Sky TV New Zealand.

Optus managing director Optus wholesale and satellite, Vicki Brady, said Optus was the only full service telecommunications provider in Australia with the ability to harness the additional capability that satellite communication offers.

It launched the first of Australia's satellite fleet 25 years ago.

(ARNNET)

99.7 FM

This is the channel set aside on Melbourne for the majority of International Sporting Events.

It's alive this weekend with the trackside commentary from the Albert Park Grand Prix Circuit in South Melbourne with the running of the 2011 Formula 1(tm) Qantas Australian Grand Prix, a stellar line-up of elite motor racing!

DOWN THE BAND A BIT

98.7FM is Community radio station 3RPP and they are shooting for an Easter deadline to be on air at new studios at the former Mornington High School.

The project is a combined effort of Mornington Peninsula Rotary clubs, The group is holding a raffle in which two cars, a cruising holiday and a television are up for grabs.

Radio Port Phillip broadcasts around the clock on 98.7FM.

2EC's AM TX off air due to floods

Heavy rain over the past 24 hours has caused flash flooding throughout the New South Wales south coast and Illawarra regions, putting one of 2EC's transmitters off air. The station's AM 765 transmitter site at Kalaru has been affected by the flooding.

2EC Program Director Kimmi Saker told radioinfo:
"Our tech is waiting for water to recede to be able to get into the site and get it cranked again. In the meantime 765 AM listeners can get there 105.5 FM frequency."

THE ANSWER IS BLOWIN' IN THE WIND

Transmission services provider Broadcast Australia has refitted a remote transmission site to be powered primarily by renewable energy.

The Mount Owen site, serving Queenstown and Zeehan, Tasmania, will use site-generated wind and solar power to meet fully the site's 8 kW power needs 80 percent to 90 percent of the time.

The site broadcasts national and commercial analogue and digital radio and television services and supports critical radio communications for local emergency services.

According to Broadcast Australia Energy Systems Engineer Gary Cafe, the power demands for digital television and other new services were starting to exceed the capacity of the existing mains power feed. Given the remoteness of the facility, and the presence of strong prevailing south-westerly winds, Mount Owen was a good candidate for onsite renewable energy generation, especially compared to the cost of upgrading the mains power feeder lines.

(SOURCED TO RADIOWORLD).

HAMS ACROSS AUSTRALIA.

JEFF'S WALK 2 - EAST to WEST for NETS.

The walk starts on the morning of the 24th April and Jeff will be in Lismore on the evening of the 25th.

Maybe you would like to join Jeff as there will probably be some sort of a gathering maybe sausage sizzle or BBQ.

Jeff is currently calling/listening most evenings
7045 at 1730
3612 at 1830

(AEST: Qld time).

Oxley Region Amateur Radio Club annual Field Day

June Long Weekend Saturday and Sunday 11 and 12 June.

This year the venue will be the Tacking Point Surf Club hall in Matthew Flinders Drive, Lighthouse Beach, Port Macquarie.

It is important to book accommodation as soon as possible as there
will be a lot of visitors staying in the Port for the WinterSun Festival
which also runs over that June Long Weekend.

The ORARC Field Day theme is the club's 40th birthday and there will be
all the usual activities and attractions including the foxhunts both Saturday
and Sunday and trade displays on Sunday.

The Field Day dinner will be at the Tacking Point Golf Club 6pm on Saturday
night.

Welcome to QNews from VK4WIA. I'm Geoff Emery, VK4ZPP, and I've been thinking.

During the floods occurring to central and southern Queensland and the following devastation of Cyclone Yasi, in the north, there was much wondering what preparedness and participation was occurring, in the relief efforts by radio amateurs. As if to underline the strength of catastrophic weather we are experiencing, came the earthquake in Christchurch and Japan and the following tsunami.

Whilst we grieve for the loss of life and the devastation that so many people have suffered, I feel we should be also be looking at what we as an interest group should be learning and adopting procedures which can offer practical help in times of disaster and catastrophe.

This may seem to be a hobby horse of mine but unless we learn from experiences around the world we will never be an effective community resource. Remember the often quoted saying, "Unless we learn the lessons of history we are bound to repeat its mistakes".

According to statements released by WIA News, the AREC teams and JARL teams were rapidly deployed to assist the first responders with communications around the earthquake zones. Implicit in this is the level of training which allows interoperability amongst the responding services as well as the availability of equipment to use.

The question is now, have we and could we respond in an emergency the way our ZL and JA colleagues have?

I'm Geoff Emery and that's what I think....how about you?

CLUBBING - TO SUPPLY NEWS ITEMS:-
email qnews@wia.org.au

Redcliffe and District Radio Club
www.redclifferadioclub.org.au/

I'm Ray, VK4CF with news from Redcliffe Amateur Radio club.

The news begins on a sad note with the passing away of Club member Geary Fawke passed away peacefully yesterday after a long illness with cancer.

His funeral will be held next Wednesday 30th March at 1pm - the Holy Cross Catholic Church, Anzac Ave, Kippa Ring.

While Geary did not have a callsign, he had been an active member of the club over a long period and had donated his caravan to the club to become the communications centre for all club field activities. The club is deeply saddened and wishes to pass on to his son, Mathew and his family, our deepest sympathy.

The third Monday night of the month is the clubs technical talk night. Due to the John Moyle weekend, there was no technical talk this month but in April, Kevin VK4UH, will detail his part of the Lord Howe Island DX expedition conducted in January 2011. In May, Roger, VK4ZLQ & Peter VK4EA, will discuss the success of the Stubb Filters that were used on the John Moyle field day

weekend.

A welcome visitor to the club house last Monday night was Marsha, N8FE, the mother of James, VK4TJF. Marsha calls herself the IRON MAIDEN. Her husband and both of her sons are all licensed amateurs. She said it was good to get away from the cold in the US and catch-up with family and friends in Australia. She said that she should be back down under in 2 more years.
James, VK4TJF, is also putting together a listing of all hf, vhf and uhf nets around Australia and could interested club secretary's could the details of your club nets to James via the Redcliffe club website, he will enter the details into a database and send it to the WIA for publication.

Kippa Ring Shopping Centre will be National field day location for the club. This will provide a wide range of exposure for the club as well as the BBQ fund raiser at Bunnings at Rothwell in June this year.

The John Moyle weekend started out warm and humid on the Friday as the antennas went up but turned to drizzle early Saturday morning and then to rain about lunchtime Saturday and continued for the rest of the weekend. Peter, VK4EA led the activity and was ably supported by brothers Andy, VK4KY and Glenn, VK4FZ and quite a few others including Geoff, VK4FNRS.

About 30 club members braved the miserable conditions to make in excess of 800 contacts mostly on the lower bands. Despite the rain and a few mechanical problems the weekend was a good one and the first wet field day for the club in 7 years. The final scores are still being worked out, and the result appears promising. More details next week.

So now it's 73 from Ray, VK4CF.

EDUCATION YOUTH AND ADVANCEMENT OF AMATEUR RADIO
www.hamcollege.com.au

Manly-Warringah Radio Society

Eight candidates did the club's Foundation training course and assessments a few weeks back and all eight candidates passed with flying colours and one went straight on to pass his Standard theory test.

Congratulations to all candidates, and welcome to Amateur Radio!

Manly-Warringah Radio Society meets every Wednesday at the 1st Terrey Hills Guides Hall, Beltana Avenue, Terrey Hills at 7.30 p.m.

The Hornsby and Districts Amateur Radio Club will be running an exam session on the morning of Saturday 16th April at Waitara in northern Sydney, for all grades of licence. Please notify the Club by 8th April as this allows time for the exam papers can be ordered. The best way is via the form at: hadarc.org.au

The club generally meets on the second and fourth Tuesdays of each month, however as the 26th is a catch-up holiday for ANZAC Day calling on Easter Monday, there will be no formal meeting this month.

hadarc.org.au/education.html

(Julian Sortland, VK2YJS, Publicity Officer, HADARC)

INTERNATIONAL NEWS With thanks to RSGB, Southgate AR Club, the ARRL,
Amateur Radio Newsline, NZART and the WW sources of the WIA read by Jason 2LAW.

QUAKE SCIENCE: THE POWER OF THE JAPAN QUAKE

And some stunning statistics about the awesome power of this earthquake.
According to the BBC, experts they interviewed say that the massive shaker may have shifted Japan's main coastline by up to 13 feet to the east. This is based on the country's network of 1,200 GPS monitoring stations. The GeoNet GPS network is the world's largest.

Also, the quake may have knocked the planet off its axis by about 6.5 inches. This says the BBC will cause the Earth to rotate a tiny bit faster and thereby shortening the day by about 1.8 millionths of a second.

The Japan Meteorological Agency has raised the quake's magnitude to 9 while the U.S. Geological Survey still has it rated at magnitude 8.9. The Japan Meteorological Agency has also officially named the trembler "The 2011 off the Pacific coast of Tohoku Earthquake."

14 ALLEGED PIRATES INDICTED IN ATTACK THAT KILLED 3 HAMS

A federal grand jury has indicted 13 suspected pirates from Somalia and one from Yemen in the February hijacking of a yacht that left three American radio amateurs and one non-amateur dead. The United States Department of Justice say that the men face piracy, kidnapping and firearms charges stemming from their efforts to hold the Americans for ransom, according to the indictment.

As previously reported, Scott Adam, K9ESO, his wife Jean, KF6RVB, and Bob Riggle, KE7IIV, were murdered by the Somali pirates. Also killed with them was Phylis Macay. The four were onboard the Adam's owned yacht the Quest off the coast of Oman, East Africa, when pirates boarded their vessel on Friday, February 18. Officials were in the process of negotiating for their release when gunfire was heard around 1 AM on Tuesday, February 22. At that point United States Naval forces responded to the gunfire. Navy Seals then boarded the yacht only to discover that all four hostages had been shot by the pirates.

The Adams', who were retired, had been sailing on their 58-foot yacht delivering Bibles around the world. The indictment says at least three of the indicted men shot and killed the four Americans without provocation. They died less than a week after a Somali pirate was sentenced to more than 33 years in prison by a New York court for the 2009 hijacking of the vessel the Maersk Alabama.
That hijacking ended when Navy sharpshooters killed two pirates holding the ship's American captain.

This group of pirates is the latest to be brought to Norfolk to face charges stemming from attacks on ships off the cost of Africa. Last April, a federal grand jury indicted 11 in separate attacks on two U.S. Navy ships, the USS Ashland and the USS Nicholas. The Virginia-based ships were part of

an international flotilla protecting shipping in the pirate-infested waters off Africa.

RUSSIAN FEDERATION ADOPTS CEPT LICENSING

It should soon be easier to use amateur radio gear while visiting the Russian Federation. This, following its decision to join the CEPT Radio Amateur License agreement.

At a recent meeting the Russian State Commission for Radio Frequencies, it was decided that the Russian Federation will accept CEPT Recommendation for the CEPT Radio Amateur License and the CEPT Novice permit. The commission plans to advise CEPT Working Group R A of its decision in the near future. Working Group R A will be meeting in May and September.

IARU Region 1 says that it considers this a major step forward to eventually permit worldwide radio amateur roaming. CEPT licensing means that all nations accepting this recommendation also accept any other signatory's ham license, subject to certain limitations as valid in those nations as well.

WEIRD AND WONDERFUL

Russia's secret weapon: inflatable tanks

THEY may look like real tanks and missiles, but some of the weapons in Russia's arsenal may not all be what they seem for the army is making increasing use of inflatable replicas - decoys deployed in a cunning attempt to deceive potential enemies.

This kind of technology has existed in the army for a long time, since World War II.

Serbia used similar decoys during the country's bombardment by NATO forces in 1999 and the Alliance actually destroyed fewer genuine targets than it thought!

When a real tank and a false one stand side by side, they make almost no difference, both emit the same heat and reflect radio waves in the same way as real ones.

Another bonus is that they are easy to deploy - a tank inflates in minutes.

Titanic Anniversary (VO1MGY) Operation

Friday, April 15th is the anniversary of the Titanic disaster. To recognize this anniversary, Admiralty House Naval Museum, St. John's, Newfoundland and the Society of Newfoundland Radio Amateurs, Amateur Radio will be operational with call sign VO1MGY, 2000 UTC and continue till Saturday 16th.

CW and SSB modes on 20 and 40 meters.

Amateur Radio at Spirit of Speyside Whisky Festival

Moray Firth Amateur Radio Society is celebrating the Spirit of Speyside Whisky Festival by running three Special Event stations, one located at Strath Isla distillery in Keith (callsign GB3SWF) another located at the Craigel lachie Distillery (callsign GB2SWF) and a third at Glenfarclas Distillery (GB4SWF).

The objective of this exercise is to contact as many amateur radio stations as possible, worldwide, to promote Scotland's iconic dram - malt whisky. Each station will operate on the Shortwave (HF) bands, principally 80m, 40m and 20m SSB.

The Festival invites visitors to celebrate Scotland's national drink through an inventive and wide-ranging programme of whisky-inspired events - some educational, all of them fun.

Further details can be found on their website www.spiritofspeyside.com

AWARDS

Plenty of action!

Tony Hambling VK3VTH has scored well by activating nine new parks for the Keith Roget Memorial National Parks Award.

His marathon 300-kilometre round tour of the Gippsland parks follows news that Peter Fraser VK3ZPF put Wilsons Prom National Park on air earlier

Tony VK3VTH said contacts from National Parks included Kevin VK0KEV at Macquarie Island. He made the achievement despite fading conditions.

The rules for the Keith Roget Memorial National Parks Award have been updated following the declaration of new parks taking the total to 45, an increase of 10 since the award was revived in 2008.

Tony VK3VTH has activated 19 of the 45 parks.

A full list of the National Parks and the rules are in the awards section of the Amateur Radio Victoria website.

The aim of the award is to encourage portable use of up to the 45 designated areas across the state and has the support of Parks Victoria.

BBC TO ACCEPT ADVERTISING

The BBC World Service Global News Director Peter Horrocks has told Members of Parliament the BBC has decided to retain a daily hour-long Hindi-language news program on shortwave.

Over the next year, the BBC will seek commercial sponsors for BBC Hindi programs; if sufficient funding sources do not materialize by March 2012, then the service will be closed, according to press reports.

Hindi had been one of six services to be pulled completely from shortwave.

A further seven services were to be pulled entirely from the airwaves.

By 2014, the BBC World Service expected to remove almost all non-English-language programming from shortwave in favour of the Internet and local FM rebroadcast partners.

November through March 0900 UTC 7.068 MHz

600th ARISS ham radio school contact

ARISS (Amateur Radio on the International Space Station) reached a milestone on Thursday, March 17 when it held its 600th contact between on-orbit astronaut Cady Coleman, KC5ZTH and students from several schools in Plock and Liszyno, Poland.

The contact supported lessons about space and space exploration, communication and technology. Scout Amateur Radio Club SP5ZBA handled the radio connection during which the astronaut fielded 19 space related questions.

Nearly 120 people were in the audience.

There was extensive media coverage that included newspapers, four scientific magazines, one radio magazine, a television station, national radio (two programs) and two internet portals.

WW SPECIAL INTEREST GROUP --- MILITARY

Radio Security Service reunion at Bletchley Park

Maybe you are lucky enough to be visiting G-Land in April?

Well there is a reunion of ex-members of the Radio Security Service on Sunday 17th April in the Mansion at Bletchley Park.

It will include an illustrated lecture on how radio amateurs helped to win the war. More than a thousand amateur volunteers listened on

the short wave bands, in secret in their own homes, for illicit signals in the UK. What they uncovered were the transmitters of the German Secret Service operating all over Europe and beyond.

Beside penetrating the most secret aspects of the service they also learnt about spies sent here, some of whom were 'turned' to work under the supervision of radio amateurs, notably Ronnie Reed, G2RX. More can be learned at http://secretlisteners.org.

(rsgb)

MILITARY MADNESS

Just to show the more things change the more things stay the same...

Radio and Radio on HF is playing a huge part in Operation Odysses Dawm. (Doesn't have the same ring about it does it as Operation Desert Storm!)

6877 kHz is used as a "gee up" channel, possibly from a Commando Solo Aircraft and is commanding Libyan naval officers not to board their ships. No doubt 6877 was the main Libyan Naval Channel, or shall we say "frequency".

The Milcom Monitoring Post website has been reporting on the use of HF in the enforcement of the no fly zone, see http://mt-milcom.blogspot.com/

REWIND

"On behalf of the countless souls who would have died but for them, we salute all who have served our profession with skill and dedication through the years. 73"

These words closed, at 2359 on the 31st December 1999, the final morse telegraphy service transmission from an Australian Maritime Coastal Station. The first station opened in Melbourne on 8th February 1912 with a second station in Hobart opened a few weeks later.

The final transmission was sent simultaneously from Melbourne and Perth also keying transmitters in Sydney, Townsville and Darwin. The service which opened in the early years of the 20th century closed in the last minute of that century after 87 years.

** EDITOR'S SPECIAL NOTICE: This week's bulletin was sent out earlier than normal to accommodate the late CQWW WPX SSB Contest announcements. Also, we wanted to provide the readers with a consolidated listing of the CQWW WPX SSB Contest participants.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Friday, 18-March, through Friday, 25th-March there were 226 countries active. Countries available: 3A, 3B8, 3D2, 3DA, 3V, 3W, 4J, 4L, 4O, 4S, 4X, 5A, 5B, 5H, 5N, 5R, 5T, 5W, 5X, 5Z, 6W, 6Y, 7P, 7Q, 7X, 8P, 8R, 9A, 9G, 9H, 9J, 9K, 9L, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A2, A4, A5, A6, A7, A9, AP, BV, BY, C3, C6, C9, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, D6, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FH, FK, FM, FO, FP, FR, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HB0, HC, HC8, HH, HI, HK, HL, HP, HR, HS, HZ, I, IS, J2, J3, J5, J6, J7, J8, JA, JT, JW, JY, K, KG4, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ4, PJ7, PY, PZ, R1FJ, S2, S5, S7, SM, SP, ST, SU, SV, SV5, SV9, T7, T8, TA, TF, TG, TI, TJ, TK, TR, TT, TU, TZ, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V7, V8, VE, VK, VK0M, VK9C, VP2V, VP5, VP6, VP8, VP9, VR, VU, VU4, XE, XF4, XT, XU, XW, XX9, YA, YB, YI, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZD7, ZD9, ZF, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work

First Worry Later" (WFWL).

3A, MONACO. Dave, EI9FBB, will be active as 3A/EI9FBB April 20-22nd. Activity will be limited to the afternoons. All QSOs will be uploaded to LoTW/eQSL. For those who need a paper QSL, please QSL via "DIRECT ONLY" to his home callsign (see QRZ.com) along with sufficient postage.

3V, TUNISIA. SWL Ashraf "Ash", 3V4-002 (KF5EYY), will be active as 3V8SS from the "Radio Club Station of Tunisian Scouts" in Sousse, during the CQWW WPX SSB Contest (March 26-27th) as a Single-Op/All-Band/Low-Power entry. QSL via LoTW or to IZ8CCW. Read about Ashraf on the following Web page at: http://www.qsl.net/3v4-002

4J, AZERBAIJAN. Members of the Safari DX Activators club will be active as 4J0SFR and 4J0LH from the Absheron (ARLHS AZE-006), Shuvalan (AZE-007) and Amburan (AZE-008) lighthouses between March 25-27th. Activity is in celebration of their 150th anniversaries. Activity will be on all HF bands using CW and SSB. Operators mentioned are: CW - Boris/4K4K and Serge/4J5A; SSB - Natig/4J5T and Anar/4K6AE. QSL via 4J5T.

5X, UGANDA. Sergei, UV5EVJ, is now active as 5X1VJ from Entebbe until June 8th. Activity will be on the HF bands using CW and SSB. During the past week he has been on 30/20/17/15/12 meters. QSL via his home callsign.

A5, BHUTAN (Update). Operators Zorro/JH1AJT (SSB), Jay/JA1TRC (CW) and Zahidul/S21VA (SSB) will be active as A51A, A52J and A52VA, respectively, from Bhutan between March 23-28th. Activity will be limited to their free time from work on the HF bands. QSL via their home callsign. ADDED NOTE: All three operators may be active during the CQWW WPX SSB Contest (March 26-27th). Also, operators are expected to be in the CQWW WPX CW Contest (May 28-29th) as a Multi-Sinlge entry. Hopefully more details will be forthcoming.

B1, CHINA. A Chinese team which includes Yongjian/BA1AJ, Mark/BA1KW, Mok/BD1ES, Wang/BH1CSV, Fan/BA1RB, ChenXi/BD1WC, Qi/BG1QXU, Feng/BG1TPD, Yong/BD1DQD, BA1AAX, ZHang/BD1BYV, and foreign operators David/VO1AU and Andrey/LZ2HM will be active as B1Z from the Beijing DX Club Contesting station during the CQWW WPX SSB Contest (March 26-27th) as a Multi-2 entry. QSL via EA7FTR.

C2, NAURU (Update). It was announced that Bill, VK4FW, would lead a team of operators to activate Nauru in late 2011. Eddie, VK4AN, would be the liaison support. As per the "Pacific DXers", preliminary discussions are taking place. The callsign should be issued soon, and permission to also use 60m is being requested. If your an experienced DXers and express an interest to join them, go to the following Web page for more details at: http://pacific-dxers.com/Home.html

CR3, MADEIRA ISLAND (AF-014). Members of the CT3 Madeira Contest Team will be active as CR3A during the CQWW WPX SSB Contest (March 26-27th) as a Multi-? entry. QSL via LoTW or CQ9K. Operators mentioned are: Joe/CT3BD, Luis/CT3DL, Joe/CT3DZ, Luis/CT3EE, Duarte/CT3EN, Miguel/CT3IA, Tiago/CT3KU, Jose/CT3KY, Jose/CT3NT, Tony/CT1FFU and Nuno/CT1FJO.

CT3, MADEIRA ISLAND (AF-014). Jose, CT3FJ, will be active during the CQWW WPX CW Contest (May 28-29th) as a Single-Op/Single-Band (20m)/Low-Power entry. QSL via CT3FJ direct.

ED8, CANARY ISLANDS. Luis, EA8AY, will be active as ED8A during the CQWW WPX CW Contest (May 28-29th) as a Single-Op/All-Band entry. QSL via LoTW. Visit the stations Web page at: http://www.ea8ay.com/ed8a

FP, ST. PIERRE AND MIQUELON (Op extended). Allan, W6HGF, who was expected to be active as FP/W6HGF from Miquelon (NA-032) until March 22nd, reports: "Because of a loss of equipment in transit to the DX site, I was delayed in becoming operational, and had to send a special courior (my son-in-law) to bring the interface cables necessary to run RTTY. They arrived just in time for the BARTG, but I did not get much operation time prior, so I have decided to extend my operation here on St. Pierre and Miquelon until Sunday, March 27th, to make sure everyone that wants a RTTY contact gets a chance at one." QSL via LoTW. Look for more details and updates on: http://www.qsl.net/w6hgf

HI3, DOMINICAN REPUBLIC (Update). Operators "Yukon John"/KL7JR and XYL Claire/WL7MY are currently active as HI3/KL7JR and HI3/WL7MY from the Island of Hispaniola (NA-096) until June 5th. "Yukon John" informs OPDX that he has written an article on his Inverted L on Hamuniverse! (Many tnx to Don for posting it.) Read about it at:
http://www.hamuniverse.com/kl7jr16080meterinvertedl.html
E-mail for skeds. See updated bio at QRZ.com. QSL via KL7JR (QRZ.com). QSLing will start until around July.

HI7, DOMINICAN REPUBLIC. Marcello, IK8DNJ, has just obtained authorization to be active as HI7/IK8DNJ between April 30th and May 13th. Activity will be holiday style on 40/20/17/15/12/10 meters using SSB and the Digital modes. QSL via IZ8LKL.

HR, HONDURAS. The "DX-World.Net" reports that "Wild Bill", N2WB, is planning a DXpedition to Honduras in April/May 2011.

IOTA NEWS.....
OC-171. Craig, VK4LDX/VK8PDX, will be doing his last visit to Magnetic Island between April 17-20th, operating as VK4LDX/P. He'll arrive in the afternoon and hopes to be on air around 0800z using a Spiderbeam tribander on a 10m Spiderbeam mast, along with a vertical and 40m dipole. This location is on a small cliff and has a good water take off to North America on the long and short paths, and Europe on the long path. There is a hill blocking the short path to Europe and JA, but these are the most reliable paths. The Spiderbeam still should be heard on Asia and Europe short path. Craig will do updates during the DXpedition on his Blog page at:
http://vk4ldxoc171.blogspot.com
He intends to operate from 2100-0200z and 0600-1600z each day.

SA-095. Operators Cezar/VE3LYC and Dino/CE3PG have embarked on a project to activate Pupuya Islands for four days during the

second half of November. The operation will take place under
the auspices of the Radio Club de Chile. Given the difficulties
associated with operating from Pupuya Islands, various con-
tingencies will be considered, including radio equipment,
power, transportation, landing, and camping. A Web site will
be designed in due course where updates will be posted.

JW, SVALBARD. Frank, LA1RSA, will be active as JW1RSA from the JW5E club
station in Longyearbyen on Spitsbergen Island (EU-026) between April
9&#65533;15th. QSL JW1RSA via LA1RSA.

KH6BZF PROPAGATION FORECAST/REPORT (March 21-27th)....
Mar 28 AN SOLAR REFERENCE KEYS
Mar 29 AN --------------------
Mar 30 AN BN - Below Normal
Mar 31 AN AN - Above Normal/Geomagnetic Level is QUIET
Apr 01 AN LN - Low Normal
Mar 02 AN HN - High Normal/Geomagnetic Level is UNSETTLED
Mar 03 AN DIS - Disturbed
VDIS - Very Disturbed

GEOMAGNETIC REFERENCE

QUIET - The "A" index is expected to be between
0-7 and the "K" index will be 2 or less
UNSETTLED - The "A" index is expected to be between
7-16 and "K" index will be 3 or less

P29, PAPUA NEW GUINEA (IOTA DXpedition/Update). Just a reminder that
Derek, G3KHZ, has organized a 6th trip to P29-land in April to activate
more IOTAs in this area. Operators mentioned are Luis/CT1AGF, Derek/G3KHZ,
Mike/G3JKX, Martyn/G3UKV, Hans/SM6CVX, and non-ham Stig (from Sweden).
The flights are booked and they plan to board M/V Barbarian on April 1st.
They go first to Feni Island (OC-101, callsign P29VCX), then Nuguria
(OC-257, callsign P29NI) and finally Green Island (OC-231, callsign
P29VLR). Hans and Stig will go to Louisiade (OC-117, callsign P29VCX)
after the main DXpedition is finished between April 22-25th, and then
to Loloata (OC-240) between April 25-27th. Activity from all locations
will be on all HF bands, including 6 meters, using CW, SSB and RTTY.
They plan to have at least 4 stations on the air all the time. QSL
P29VCX and P29VLR via SM6CVX. QSL P29NI via G3KHZ. For updates and more
complete details, watch the Web page at: http://p29ni.weebly.com

P4, ARUBA. John, W6LD, will be active as P40L during the CQWW WPX SSB
Contest (March 26-27th) as a Single-Op/All-Band entry. QSL via WA3FRP.

D2CQ LOG. The Algarve STAR DX Team reports that the D2CQ log online has been updated through March 22nd, at: http://algarvedx.com

NO8DX/20 QSL STATUS. QSLs have been ordered and cards should be going out in early April. QSL via KB8NW.

PIRATE ALERT! Knut, DK5AD, informs OPDX that a station signing HZ0ZDZ has been active the last few weeks. This station is a PIRATE. Ray is definitely not active according to OZ1HET/HS and his QSL Manager GM4FDM.

VK0KEV LOGS. Kevin, VK0KEV, who is active from Macquarie Island, reports on QRZ.com: "Due to the sheer volume of requests received, I am unable to respond to E-mails. If you would like to check your entry in my log please go to: http://www.hrdlog.net/ViewLogbook.aspx?user=0kev
QSL via JE1LET (direct only)."

QSL RECEIVED VIA LoTW: 9M6/VO1ASU, EW7KF, FP/W6HGF, HA5AQ, HR5/F2JD, KG4KL, KP2DX, LA6YEA, OH6CT, P40A, V25OP, V25WY, VP2V/G3PHO, VP8NO, XE83IARU and Z21BB

QSLS RECEIVED VIA MAIL: 3C0CW, 4Z5AD, 5R8X, 9J2BO, A35AY, AH0J, AP2ARS, C6AGN, CP6XE, CY0X, D44AC, HC2/SM0COP, HL5NLQ, J39BS , KH2L, OD5NJ, OH3JR/VP9, PJ4D, PJ4W, ST2AR, T30OU, T6MB, V73QQ, V73TM, WA2USA/4, ZB2FK, ZD9T and ZL8X

QSLS RECEIVED VIA THE BUREAU: NONE REPORTED THIS WEEK!

SV5, DODECANESE (EU-001). John, N5ER, will be active as SV5/N5ER between May 15-20th. Activity will be holiday style, mainly on the lower bands in the evening and early mornings. Also, 20 meters and lower will be CW only. QSL via N5ER.

TC7, TURKEY (Special Event). Members of the Turkish group called TCSWAT (Special Wireless Activity Team) and the Giresun Radio Amateurs and Nature Sports Club (GITRAD) are proud to announce that they will activate TC7TC from Tirebolu Castle and Lighthouse between March 25-27th. This is the first time that this lighthouse will be activated. Activity will be on the HF/VHF/UHF bands and is also good for the EBLOTA Award:

http://www.tcswat.org/awards/EBLOTA/index.html
QSL via the TA Bureau or direct to YM7KK GITRAD. For more info, go
to the QRZ.com Web page or TCSWAT Web page at: http://www.tcswat.org

TK4, CORSICA. Operators Tonny/ON1DNF, Jaak/ON4PJA, Joeri/ON7IQ, Jempi/
ON7JPS and Geert/ON7QC will be active as TK4DS from a bungalow at "San
Damiano Camp" in the village Biguglia, on the Island of Corsica (EU-014)
between April 21-24th. Activity will be on all HF bands using SSB and
the Digital modes. QSL via ON4AMM direct or by the Bureau to ON4PJA. For
more details, go to the Web page (still under construction) at:
http://www.tk4ds.be

VP9, BERMUDA. Operators Wade/AA8LL and Liz/K8LIZ will be active from
Hamilton, Bermuda (NA-005), as VP9/AA8LL and VP9/K8LIZ between March
30th and April 4th. Activity will be holiday style on most HF bands.
Look for Liz to operate on SSB, while Wade operates on CW and RTTY.
Wade hopes that maybe 10 and 12 meters will be open again. All QSOs
will be uploaded to LoTW. QSL via their home callsigns, direct or by
the Bureau.

VU4, ANDAMAN ISLANDS (Update). Members of the Amateur Radio Society of
India (ARSI) are now active as VU4PB from Port Blair through March 31st.
QSL Manager will be W3HNK. The VU4PB does have an "Online QSL Request
System" (OQRS) available at:
http://arsi.info/dxpeditions/vu4pb-mar-2011/oqrs-vu4pb
Any QSL cards received via any IARU recognized QSL Bureau will be answered
in due course of time. An online log search is available at:
http://arsi.info/dxpeditions/vu4pb-mar-2011/log-search
For more details and updates, visit the VU4PB Web apge at:
http://arsi.info/dxpeditions/vu4pb-mar-2011

YB1, INDONESIA. Members of the West Java DX Association will be active
as YB1C during the CQWW WPX SSB Contest (March 26-27th) as a Multi-Single
entry. QSL via the Bureau or direct to address on QRZ.com. Operators
mentioned are YB1CCF, YB1ALL, YB1NWP, YB1KAR, YC1KAF, YC1OO, YC1MAM,
YC1HQQ, YC1BTV, YD1GCL, YD1ORZ, YD1MRI and YD1JZ.

ZD8, ASCENSION ISLAND. German operators Wolf/DK1IP, Rainer/DL7OR, Gerd/
DJ4KW, Arno/DL1CW and Werner/DJ9KH will be active as ZD8D from Ascension
Island (AF-003) between July 24th and August 9th. Activity will be on
160-10 meters, mainly on the Digital modes with some CW and SSB later.
They will be using Elecraft K3s. The team plans to participate in the
RSGB IOTA Contest (July 30-31st). A Web page is currently under con-
struction. The team is seeking sponsors, especially for an amplifier.

The following stations are expected to be active in the
CQWW WPX SSB Contest (March 26-27th, 2011)

Thanks to Bill, NG3K, for providing OPDX readers with the following
consolidated listing of the participants in the 2010 CQWW WPX SSB Contest.
For a more detailed listing (and up-to-date changes/corrections) in HTML

format, please visit Bill's Web page at:
http://www.ng3k.com/Misc/wpxs2011.html (By callsign)

SARL NEWS - SUNDAY 27 MARCH 2011

You are listening to ZS6SRL, the official radio station of the South African Radio League, the national body for amateur radio in South Africa, with a news bulletin every Sunday at 08:15 CAT in Afrikaans and at 08:30 CAT in English. To listen to a web stream, visit www.sarl.org.za, click on 'ARMI' and follow the links for details. PLEASE NOTE: for audio via Echolink, connect to ZS0JPL-R.

You can download this bulletin and previous ones from www.sarl.org.za and also subscribe to receive future bulletins by e-mail. Your newsreader this morning is (name), (call sign), on 145,725 and 7,066 MHz from Pretoria, with relays on 7,066 and 3,695 MHz SSB.

SILENT KEYS

It is with regret that it has to be announced that the keys of two radio amateurs became silent. They are:

John Du Plessis, ZS6AGQ, became silent key in November last year. He leaves his wife, Maureen.

The second one is Tony Marran, ZR2AI, of Graaff-Reinet on 19 March who leaves his wife Marie.

Our sincere condolences to the relatives and friends of the deceased.

(PAUSE)

In the news today

TDMA NEXT DEVELOPMENT IN AMATEUR RADIO?

PROGRAMMING IN WINDOWS COURSE TO BE PRESENTED IN GAUTENG

RTA GOES TO CAPE TOWN

You are listening to ZS6SRL. Stay tuned for more details on these and other important and interesting news items.

TDMA NEXT DEVELOPMENT IN AMATEUR RADIO?

Time division multiple access (TDMA) is a channel access method for shared medium networks. It allows several users to share the same frequency channel by dividing the signal into different time slots. The users transmit in rapid succession, one after the other, each using his own time slot. This allows multiple stations to share the same radio frequency channel.

On Tuesday, March 15, the ARRL filed a Petition for Rulemaking and a Request for Temporary Waiver to authorize the use of single-time-slot Time Division Multiple Access (TDMA) emissions in the amateur bands at and above 50 MHz, wherever multiple-time-slot TDMA is authorized. The ARRL -- which called its Petition "very narrow in scope" -- seeks to facilitate the use of and experimentation by radio amateurs with existing narrowband spectrum-efficient digital voice and data technology." Such technology is now in regular and increasing use in the private land mobile radio services, but its use in the Amateur Radio Service is now apparently unintentionally precluded by two specific Commission rules," the ARRL's Petition stated.

Radio amateurs are presently using a Motorola narrowband (12,5 kHz) digital land mobile system -- commercially marketed as MotoTRBO and they ask to make it legal.

The use of TDMA digital emissions in certain frequency bands in the Amateur Service is on the increase, the ARRL noted. There are numerous narrowband UHF repeater facilities now operating that use multiple slot TDMA repeaters and single slot TDMA handheld digital transceivers, principally in the 70 cm band. These systems have been installed primarily in the western part of the US and in the New York City area, but also in several Midwestern states.

The SARL is currently studying the ARRL initiative in respect of the South African Radio regulations. Comments and input are invited to artoday@sarl.org.za.

AMATEUR RADIO TODAY FREQUENCY AND TIME CHANGE

>From today the Amateur Radio Today 16 metre band frequency changes to 17 750 kHz. The time of the Monday retransmission changes to a much earlier timeslot, from 22:00 CAT to 18:30 CAT on a frequency of 3 230 kHz on an omni directional antenna. Reception reports are invited to artoday@sarl.org.za. For a full list of transmission times and relays visit www.sarl.org.za and select Amateur Radio Today for the left hand menu.

PROGRAMMING IN WINDOWS COURSE TO BE PRESENTED IN GAUTENG ON 18 JUNE

The Learning to programme in Windows course will be presented at the National Amateur Radio centre on Saturday 18 June. Booking is now open. Details can be found on www.sarl.org.za and select RTA. The course was successfully presented in Cape Town last weekend. Listen to what delegates had to say on the RTA pages on the SARL web.

RTA GOES TO CAPE TOWN FIRST

The first Radio Technology in Action programme of 2011 will be held in Cape Town on 7 May on the Bellville Campus of the Cape Peninsula University of Technology. Programme details will be available on the web later in the week.

SA AMSAT POSTPONES SPACE SYMPOSIUM

SA AMSAT has postponed the Space Symposium originally planned for 2 April to a later date. School holidays in Gauteng and too many other Amateur related activities around the same time seem to be one of the reasons for the low registration rate. A new date will be announced in due course.

SARL MEMBERSHIP NOW 1 519

The membership of the SARL reached 1 519 last week. We welcome the following new members and wish them a long and mutually beneficial association with the SARL:

Abel Van Den Heever, ZR6EBL Hendrik Swanepoel, ZR6HSW Gideon de Swardt, ZSL1008 Chris du Plessis, ZS2M Adrian Lamond, ZR6ADR Ben van der Merwe, ZR1AHB

CONTEST NEWS

The second SARL 80 m Club Contest will be run on Wednesday evening 30 March 2011 from 17:30 to 18:30 UTC. This contest is a digital contest with PSK and RTTY activity.

Do you want to get out and set up a field station? Well on Saturday 2 April you can participate in the first leg of the Rapid Deployment Amateur Radio or RaDAR contest. The contest runs from 12:00 to 18:00 UTC with activity on all amateur bands including cross band contacts via amateur satellites. QSOs via terrestrial repeaters will not be allowed. All amateur modes may be used.

Find the rules for both contests in the 2011 SARL Contest Manual.

Results.

SARL March Madness YL Sprint. Nine logs and one check log was received for the SARL March Madness YL Sprint held on Saturday 12 March 2011. Four of the logs came from YLs and the rest from non-YLs.

1st Pam Momberg, ZS6PAM, 87 points 2nd Melinda Mynhardt, ZU6MM, 61 points 3rd Dawn Snyders, ZS5ME, 58 points 4th Colette Rundle, ZS2CR, 39 points 5th Wessie Wessels, ZS2A, 35 points 6th Gideon Jannasch, ZS6GJA, 27 points 7th Bloemfontein RAC, ZS4BFN, 26 points 8th Shane Daniel, ZS4TW, 24 points 9th Nigel Burgess, ZR6NGB, 19 points 10th Denis Wheeler, ZR6DNS, 12 points

Check log, Derek Stuart, ZS2J, 14 points, and the winner of the lucky draw is Dawn Snyders, ZS5ME.

Correction to the SARL Hamnet Contest. In SARL News last Sunday, one of the call signs in the Single Operator Base Station class was incorrect. In 8th place with 780 points is Judy Pretorius, ZS6JDY, not ZS6JDV.

The results of the SARL Digital Contest announced last Sunday have been revised due to a log that went missing.

The results are as follows:

1st ZS6A ,Pierre van Deventer 494 points 2nd ZS6JR, Daniel Hubbard 450 points 3rd ZS6GRL, Geoff Levey 443 points

SARL National Field Day, Pleasant Surprise. The winner of the lucky draw in this contest is the Centurion ARC, ZS6CEN.

PROPAGATION REPORT

Hannes Coetzee, ZS6BZP, reports that the solar activity is at moderate levels. Big Sunspot 1 176 which is located in the southern hemisphere produced another low level M-Class flare during the week. There will continue to be a chance for M-Class flares around this region. In the northern hemisphere, new sunspot 1 177 was numbered on Wednesday. Two new sunspots were numbered on Thursday. Sunspot 1 178 in the southern hemisphere and 1 179 in the north are both simple regions and pose no threat for strong solar flares at this time. The effective sunspot number is expected to be around 60 for the coming week.

15 m will provide the best opportunities for DX followed by 20 m. With the higher sunspot activity 10 m will open first followed by the lower bands later during the day. Conditions to India will be good from the afternoon till after sunset. During the late afternoons conditions will be good towards Europa. Fair contacts with the USA are possible during the evening. Contacts with Australia are possible on 20 m after sunset. Openings to Brazil and South America are possible during the afternoons. With the good 15 and 20 m openings 17 m will also be full of surprises.

For the CW and digital enthusiasts 30 m may be very rewarding with openings to many parts of the world.

Locally is 40 m the work horse for contacts around the country with 20 and 30-m also being very useful for contacts over the longer distances. 80 m will be best during the early mornings and late afternoons as well as over the shorter distances.

80 m is the frequency of choice during the evenings.

Please visit www.spaceweather.co.za for further information.

DIARY OF EVENTS

30 March - Second SARL club competition on PSK and RTD, 17:30-18:30 UTC. 2 April - RaDAR competetion 12:0 - 18:0 UTC. 15-16 April - SARL National Convention at Vaal University for Technology. 7 May - RTD in Cape Town. 18 June - Programming in Windows course in Gauteng. Book at www.sarl.org.za.

SARL News invites clubs and individuals to submit news items of interest to radio amateurs and shortwave listeners. Submit news items - if possible - in both English and Afrikaans to www.sarl.org.za/newsinbox.asp, not later than the Thursday preceding the bulletin date.

The SARL also invites you to listen to Amateur Radio Today every Sunday morning at 10:00 CAT on 145,750 MHz in the Pretoria area, with relays on 7 082, 7 205 and 17 750 kHz. There is also a podcast by ZS6RO. For a web-stream and Echolink by ZS6FCS, visit www.sarl.org.za, click on 'ARMI' and follow the links. A repeat transmission can be heard on Mondays at 18:30 CAT on 3 230 kHz. Sentech sponsors the ARMI transmissions on the non-amateur frequencies.

You have listened to a bulletin of the South African Radio League, compiled by George, ZS6NE.

Thank you for listening, 73.
/EX

IRTS News Feeds

RSS news feeds are rapidly becoming the way to publish information in a timely fashion without pushing emails and cluttering inboxes. The user initially downloads an RSS reader and subscribe to the feed by going to the relevant feed site.

Jim EI4HH has introduced a service on a trial basis for IRTS members which will publish brief details of items such as AGM and Rally details, IRTS News and Contest Dates. This is not intended to be a high through-put information service but rather an intermittent service which would keep active operators up to date with frequent snippets of relevant information.

Members should click the RSS button on the IRTS website or go to http://www.irts.ie/rss to sign up and see the feed.

Further information from Jim EI4HH at holohaj2 /at/ hotmail /dot/ com

---

Russia to Adopt CEPT Licence

The Russian State Commission for Radio Frequencies decided recently to adopt CEPT

Recommendation T/R 61-01. This is the recommendation that sets out the arrangements for the CEPT licensing system. This step will increase further the facilities for radio amateurs to operate while on a short visit to another country without the necessity of obtaining a licence from the authorities of the country being visited.

Luxembourg 5 MHz Beacon

A new 60 metre beacon is operational from Luxembourg. The call sign is LX&#65533;HF and the frequency is 5205.25 kHz.

North Cork Radio Group

The North Cork Radio Group, after last year's great success, is pleased to announce their second annual rally and electronics fair at the Blarney Golf Resort, Tower, Co Cork. on Sunday September the 11th 2011.

The doors open to the public at 11.30 and the rally will run throughout the afternoon. The usual traders will be on hand with some very tasty bargains, South East Communications, Long Communications and JBT Trading.

The Hotel are also offering room deals for the rally a Room Only from 59 and Double Room inc B&B: 79 Please Contact the hotel directly for room bookings on Tel:+353 21 4384477. www.blarneygolfresort.com

Small traders are very welcome but it essential that they contact the events organiser Liam EI7GTB, Tel: 085-7039042 Email: ei7gtb / at/gmail /dot/com as soon as possible.

Further details can be found via the group's website, www.ei1nc.com.com

---

International Marconi Day

International Marconi Day takes place this year on Saturday 30th April. The Howth Martello Radio Group will be participating once again as an award station using the call-sign EI0MAR.

This is not a contest but there are several nice awards available for working the officially listed stations, each of which has an historic connection with Marconi. The event is organised by the Cornish Amateur Radio Club. For more information please visit the club's website http://crac.g4usb.net/cracblog/.

EI0MAR operates from the Martello Tower overlooking the East Pier in Howth. The tower now houses a vintage radio museum. In 1905 the British Post Office carried out wireless telegraphy experiments at the tower in Howth using Marconi equipment.

Visitors are always welcome at the museum and the group hopes to see many visitors during the IMG event in April. The HMRG's website is www.ei0mar.org where a free information booklet in PDF format can be downloaded.

The North Cork Radio Group are pleased to announce that they will be active from the Marconi Signal Station at Goleen, Mizen Head, West Cork, where Marconi sent many of his first test transmissions to America.

Further details will be posted nearer the event, however, please pencil the day free if you'd like to attend or work the station. The Official call sign for the event will be EI-0-IMD and it is hoped we will be excepted on the official International Marconi Day Awards Program.

South Dublin Radio Club

South Dublin Radio Club Annual General Meeting (AGM) will take place in Terenure College on Tuesday 29th March at 8pm sharp.

All members are welcome and asked to attend. Also, at the South Dublin Radio Club, amateur radio theory classes will be held on a weekly basis and morse classes will be held in the near future.

Cork Radio Club

Cork Radio Club will meet on Monday March 28th at the Community Centre on Main Street in Carrigtwohill at 2030 hours. This meeting will discuss a programme of events for the year ahead and new members are very welcome. Enquiries about the club to Jeremy on 083-3317710 or Dave on 087-6290574 or by email to info /at/ corkradioclub /dot/ com

---

Louth Erne Amateur Radio Club

Ireland has a rich heritage of townlands. Cratloemoyle townland, in County Clare is the place to be today (Sunday 27 March) for the IRTS AGM and the Limerick rally.

Shanaghy townland, in County Fermanagh, is the place to be in three weeks time for Ireland's next big gathering of radio amateurs and experimenters. The Lough Erne Pearl Anniversary Rally will be there, in the SHARE centre, on Sunday 17 April.

The SHARE centre is also celebrating its thirtieth anniversary. Founded in 1982 it is now Ireland's largest residential centre with a wide range of activities that include amateur radio events, courses, license examinations, and of course the Rally.

As well as bar and food facilities at modest prices, attractions alongside the Rally include family activities and an afternoon voyage round the bays and wooded islands of scenic Upper Lough Erne on board SHARE's luxury 57 seat Inishcruiser.

CQ CQ CQ Club News

Club secretaries and PRO officers are encouraged to send news items to newsteam/at/ irts/dot/ ie .

Items for inclusion in next week's Radio News can be submitted via e-mail to "newsteam /at/ irts / dot / ie" for automatic forwarding to both the radio and printed news services. Urgent news items for the radio news maybe telephoned to the radio news editor, Aidan, EI7JC on 085 7100511.

Please note that items for the radio news should reach the editor no later than midday on Thursday in order to be guaranteed inclusion in the following Sunday's bulletin.

translation by: Bob, DL7VOA
(e-mail: dl7voa@darc.de)

EL - LIBERIA
Silvano,I2YSB, and his team with Vinicio,IK2CIO, Angelo,IK2CKR,
Marcello,IK2DIA, and Stefano,IK2HKT, are travelling to Africa again
from Mar 31 until Apr 13. Their destination will be Liberia this time.
They want to work with three stations in CW, SSB and RTTY on 80m-6m but
their call is not known yet. Their pilot station will be Art,IK7JWY,
and IH9GPI takes care of their online log at: http://www.i2ysb.com
QSL cards can be sent ONLY direct via I2YSB.

JW - SVALBARD, EU-026
Francois,JW/F8DVD, will be active from the Longyearbyen radio club on
Spitsbergen (EU-026) from Apr 1-8. He works in CW and SSB on all bands.
The club has an ICOM-751, a 500 watts amplifier and a 5 ele yagi on a
30m tower. Francois confirms QSL cards via the REF bureau or direct.
Please visit also his homepage at: http://f8dvd.monsite-orange.fr

KH0 - NORTHERN MARIANA ISLANDS, OC-086
Kirk,WE8A/KH0, is expected to show up from OC-086 between Mar 30 and
Apr 2. Kirk will be QRV in CW and SSB on 80m-10m with emphasis put on
the WARC bands.
The QSL cards should be sent ONLY direct to following address:
5-1-35, Daikaidori, Kobe, 652-0803 Japan.

OX - GREENLAND, NA-018
Michael,OX/DB5MH, is making a ski trip to Greenland (NA-018) from
Mar 28 until Apr 7. He is looking forward to make as many QSOs as
possible with his battery/solar powered 5 watts radio. Michael will try
to be present on 14290 and/or 14310 kHz every day from 2000-2200 UTC.
Since he has only little power he will not call himself all the time
but reacts on other CQ calls. See also: http://www.diskoisland.de
QSL cards should be sent via bureau or direct to DB5MH.

P29 - PAPUA NEW GUINEA
Derek,G3KHZ/P29NI, is organizing his sixth trip to Papua New Guinea.
He will be accompanied by Luis,CT1AGF, Mike,G3JKX, Martyn,G3UKV, and
Hans,SM6CVX. They want to activate several IOTA islands from Apr 2-27:
Apr 2-7 Feni Island (OC-101) as P29VCX, QSL via SM6CVX
Apr 8-14 Nuguria Island (OC-257) as P29NI, QSL via G3KHZ
Apr 15-18 Green Island (OC-231) as P29VLR, QSL via SM6CVX
After that Hans,SM6CVX, plans to work alone signing P29VCX from:
Apr 22-25 Misima Island (OC-117), QSL via SM6CVX
Apr 25-27 Loloata Island (OC-240), QSL via SM6CVX
Operation will take place in CW, SSB and RTTY on all HF bands with up
to four stations simultaneously.
For more information check their website at: http://p29ni.weebly.com

P4 - ARUBA, SA-036
Dee,P4/W1HEO, will be a guest operator of the P49V contest station on
Aruba (SA-036) from Apr 3-16. Dee will be QRV in CW and SSB on 160m-10m
but especially on 30m-10m. His preferred frequencies are: 14040, 18098,
21040 and 28040 kHz in CW, and 14260, 18128, 21260, 28460 kHz in SSB.
QSL via W1HEO, via bureau or direct.

PJ2 - CURACAO, SA-006
Andy,PJ2/DK5ON, is staying on Curacao (SA-006) from Mar 19 until Apr 2.
He is using a groundplane on 40m, several dipoles for 10m/15m/20m,
a single element Quad on 20m and a wire antenna running with 100 watts.
Andy wants to receive his QSLs via bureau to his homecall or direct.

YN - NICARAGUA
YN2MG (NM5G), YN2ER (K5WQG) and YN2ET (N5ET) are working in CW, SSB and
RTTY from Nicaragua until Apr 3. QSLs for all calls via N5ET, LoTW ok.

ZA - ALBANIA
Franck,ZA/F4DTO, will be QRV again from Elbasan from Apr 2-16. Franck
works mostly in SSB on 40m-10m. He is running 100 watts into monoband
antennas. Please visit his homepage at: http://monsite.orange.fr/f4dto
QSLs via REF bureau to his homecall or direct.

5X - UGANDA
Sergei,UV5EVJ, is now active as 5X1VJ from Entebbe and will stay
there until Jun 8. He is working in CW and SSB on all bands.
QSL cards should be sent via bureau or direct to his homecall.

9L - SIERRA LEONE
The DXpedition to Sierra Leone (9L5MS) announced in the last DXNL is
probably starting on Apr 2 (instead of Mar 29) because a container
with important equipment was stuck in customs.

9N - NEPAL
The call of the German DXpedition to Nepal from Mar 27 until Apr 8
will be 9N7AN (not 9N7AA). This is also the callsign of Ernst,DK7AN,
who went to Kathmandu in advance. They will use 9N7WL on 2m via EME.
QSL cards for 9N7AN should be sent to DL4SVA, 9N7WL via DK5WL.
More information and an online log is at: http://www.160m.de/9N7AN

BULGARIA, SPECIAL EVENT STATION
Some members of the "Bulgarian Federation of Radio Amateurs" (BFRA)
are activating the special callsign LZ85R since Mar 1. This is to
celebrate the 85th anniversary of the first radio club of Bulgaria.
All operations will last until Dec 31.
The QSL manager LZ1BJ prefers to confirm via the bureau.

CZECH REPUBLIC, SPECIAL EVENT STATIONS
The FC Viktoria Plzen was founded in 1911. The actual leader of the
"Czech Premier League" is celebrating his 100th birthday with his
fans with radio license. The special event station OL1911VP is working
until Mar 31 and during the whole month of June. OL2011VP will be QRV
in April and July and last not least the station OL100VP will be active
in May and August. QSLs should be sent via bureau or direct to OK1DRQ.

PIRATE: Do not waste your time when you hear HS0ZDZ again. The holder of the
license Ray Gerrard (G3NOM) has not made a QSO since July 31, 2004. Ray
suffered a stroke in 2004 and was not active on the bands since then.
His call is abused by a pirate from time to time.
His QSL manager GM4FDM is uploading the log data of HS0ZDZ to the LoTW
at the moment. The HS0/G3NOM log has been uploaded to the LoTW already.

LINKS: Current SOTA activities (mountain summits) are announced at:
http://www.sotawatch.org

Detailed information about current VHF activities can be found on the
VHF DX portal "Make More Miles on VHF" at: http://www.MMMonVHF.de
---
You can download a video about the TJ9PF DXpedition at:
http://www.dailymotion.com/video/xhrbr6_tj9pf-daily_travel

"Yukon John" and his XYL Claire are active as HI3/KL7JR and HI3/WL7MY
from Hispaniola (NA-096). John and Claire are staying in the Dominican
Republic until Jun 5 and the QSLs will be sent starting in July. John
has written an article with many pictures about his Inverted L antenna:
http://www.hamuniverse.com/kl7jr16080meterinvertedl.html

Kevin,VK0KEV, who is going to stay on Macquarie (AN-005) for one more
year, complains about too many e-mails from DXers asking if they are
in the log. You can avoid this now by checking his logbook online at:
http://www.hrdlog.net/ViewLogbook.aspx?user=VK0KEV

UPCOMING CONTESTS

Apr 2/3: QRP-ARCI Spring QSO Party
Apr 2/3: SP DX Contest
Apr 2/3: EA RTTY Contest

IOTA collected by Fredy,DE0MST (e-mail: iota@dxhf.darc.de)

Island activities:
AF-024, S7, Seychelles = Inner Islands: A group of French OPs is signing

S79UFT from Mahe Island between Mar 24 and Apr 15. QSL via F6AXX.

EU-010, G, Isle of Barra: Ray/M1REK/p and Andy/M1LOL/p will show up from
the Isle of Barra in SSB, PSK and RTTY on 80m-10m from Apr 2-9.

EU-026, JW, Spitsbergen Island (main): Francoise,JW/F8DVD, will be QRV
from the capital Longyearbyen on Spitsbergen from Apr 1-8.
QSL via homecall (bureau/direct).

EU-123, GM/MM, Scottish Coastal Islands: Adrian,M0PAI, and other members
of the "Macclesfield and District A.R.S." will be active as GS4MWS
from Arran Island (IOSA CL-01 and SCOTIA CS-14) from Apr 2-7.
QSL via M0PAI (bureau/direct).

NA-005, Bermuda Island: Elizabeth,VP9/K8LIZ, and Wade,VP9/AA8LL, will be QRV
in CW, SSB and RTTY from Hamilton Parish between Mar 30 and Apr 4.
QSLs via homecalls (bureau/direct/LoTW).

Lighthouse activities (WLOTA/ARLHS/ILLW)

JW/F8DVD L 4318 Spitsbergen Apr 1-8

List of Solutions Manuals and Test Banks

---

contact me to : mattosbw1@gmail.com
mattosbw1(at)gmail.com

NOTE : "THIS SERVICE IS NOT AVAILABLE FOR : CHINA, INDIA, RUSSIA, PAKISTAN, IRAQ, IRAN, PHILIPPINES, NORTH KOREA, NEPAL, BANGLADESH, SRI LANKA, MALDIVES, BHUTAN & COLOMBIA".

If your wanted solutions manual is not in this list, also can ask me if is available (it is a partial list). Then if you need solutions manual only contact me by email.

"ARE NOT AVAILABLES BOOKS IN DIGITAL FORMAT", ONLY SOLUTIONS MANUALS AND TEST BANKS.

This same "list of titles" of texts with availables solutions manual and/or test banks is for download from :

http://www.megaupload.com/?d=ADDS77XH

I do not review the forums, just send me an email.

Solution Manual Introduction to Fluid Mechanics (7th Ed., Robert Fox, Philip Pritchard & Alan McDonald)
Solution Manual Fox and McDonald's Introduction to Fluid Mechanics (8th Ed., Philip Pritchard)
Solution Manual Fluid Mechanics (5th Ed., Douglas)
Solution Manual Fluid Mechanics (3rd Ed., Kundu & Cohen)
Solution Manual Fluid Mechanics (4th Ed., Kundu & Cohen)
Solution Manual Elementary Fluid Mechanics (7th Ed., Street, Watters & Vennard)
Solution Manual Fluid Mechanics with Engineering Applications (10th Ed., Finnemore & Franzini)
Solution Manual Fundamentals of Fluid Mechanics (4th Ed., Bruce Munson, Donald Young, Theodore Okiishi)
Solution Manual Fundamentals of Fluid Mechanics (5th Ed., Bruce Munson, Donald Young, Theodore Okiishi)
Solution Manual Fundamentals of Fluid Mechanics (6th Ed., Bruce Munson, Donald Young, Theodore Okiishi, Wade Huebsch)
Solution Manual Fundamentals of Fluid Mechanics - SI Units (6th Ed., Bruce Munson, Donald Young, Theodore Okiishi, Wade Huebsch)
Solution Manual A Brief Introduction to Fluid Mechanics (3rd Ed., Donald Young, Bruce Munson, Theodore Okiishi)
Solution Manual A Brief Introduction to Fluid Mechanics (4th Ed., Donald Young, Bruce Munson, Theodore Okiishi, Wade Huebsch)
Solution Manual A Brief Introduction to Fluid Mechanics (5th Ed., Donald Young, Bruce Munson, Theodore Okiishi, Wade Huebsch)
Solution Manual Engineering Fluid Mechanics (7th Ed., Clayton Crowe, Donald Elger, John Roberson)
Solution Manual Engineering Fluid Mechanics (8th Ed., Clayton Crowe, Donald Elger, John Roberson)
Solution Manual Engineering Fluid Mechanics (9th Ed., Clayton Crowe, Donald Elger, John Roberson, Barbara Williams)
Solution Manual Fluid Mechanics (Potter & Foss)
Solution Manual Mechanics of Fluids (3rd Ed., Potter)
Solution Manual Fluid Power with Applications (7th Ed., Esposito)
Solution Manual Mechanics of Fluids (4th Ed., Shames)

Solution Manual Applied Fluid Mechanics (6th Ed., Mott)
Solution Manual Applied Fluid Mechanics - SI Units (6th Ed., Mott)
Solution Manual Hydraulic Control Systems (Noah Manring)
Solution Manual Fluid Mechanics and Thermodynamics of Turbomachinery (5th Ed., S.L. Dixon)
Solution Manual Fluid Mechanics and Thermodynamics of Turbomachinery (6th Ed., S.L. Dixon & Cesare Hall)
Solution Manual The Design of High-Efficiency Turbomachinery and Gas Turbines (2nd Ed., David Gordon Wilson & Theododios Korakianitis)
Solution Manual Fundamentals of Turbomachinery (William Peng)
Solution Manual Principles of Turbomachinery in Air-Breathing Engines (Baskharone)
Solution Manual Fundamentals of Jet Propulsion with Applications (Ronald D. Flack)
Solution Manual Extended Irreversible Thermodynamics (3rd Ed., D. Jou, J. Casas-Vazquez & G. Lebon)
Solution Manual Thermodynamics : An Integrated Learning System (Schmidt, Ezekoye, Howell & Baker)
Solution Manual Design of Fluid Thermal Systems (2nd Ed., William Janna)
Solution Manual Design and Simulation of Thermal Systems (N.V. Suryanarayana & Oner Arici)
Solution Manual Introduction to Thermal and Fluids Engineering (Kaminski & Jensen)
Solution Manual Heating, Ventilating and Air Conditioning Analysis and Design (6th Ed., McQuiston)
Solution Manual Electricity, Electronics, and Control Systems for HVAC (4th Ed., Thomas Kissell)
Solution Manual Heat and Mass Transfer (Anthony Mills)
Solution Manual Heat Transfer (2nd Ed., A.F. Mills)
Solution Manual Basic Heat and Mass Transfer (2nd Ed., A.F. Mills)
Solution Manual Convective Heat and Mass Transfer (4th Ed., Kays & Crawford)
Solution Manual Advanced Engineering Thermodynamics (3rd Ed., Bejan)
Solution Manual Convection Heat Transfer (3rd Ed., Bejan)
Solution Manual Design with Constructal Theory (Adrian Bejan & Sylvie Lorente)
Solution Manual Shape and Structure, from Engineering to Nature (Adrian Bejan)
Solution Manual Thermodynamics : Concepts and Applications (Stephen Turns)
Solution Manual Heat Transfer (10th Ed., Jack Holman)
Solution Manual Principles of Heat Transfer (Kaviany)
Solution Manual Heat Convection (Latif M. Jiji)
Solution Manual Fundamentals of Momentum, Heat and Mass Transfer (5th Ed., Welty)
Solution Manual Analytical Methods for Heat Transfer and Fluid Flow Problems (Bernhard Weigand)
Solution Manual Two-Phase Flow : Theory and Applications (Clement Kleinstreuer)

Solution Manual Convective Heat Transfer (kakac)
Solution Manual An Introduction to Fluid Dynamics : Principles of Analysis and Design (Stanley Middleman)
Solution Manual An Introduction to Mass and Heat Transfer : Principles of Analysis and Design (Stanley Middleman)
Solution Manual Fundamentals of Thermodynamics (5th Ed., Richard Sonntag, Claus Borgnakke & Gordon Van Wylen)
Solution Manual Fundamentals of Thermodynamics (6th Ed., Richard Sonntag, Claus Borgnakke & Gordon Van Wylen)
Solution Manual Fundamentals of Thermodynamics (7th Ed., Claus Borgnakke & Richard Sonntag)
Solution Manual Introduction to Engineering Thermodynamics (1st Ed., Richard Sonntag & Claus Borgnakke)
Solution Manual Introduction to Engineering Thermodynamics (2nd Ed., Richard Sonntag & Claus Borgnakke)
Solution Manual Fundamentals of Engineering Thermodynamics (5th Ed., Michael Moran, Howard Shapiro)
Solution Manual Fundamentals of Engineering Thermodynamics (6th Ed., Michael Moran, Howard Shapiro)
Solution Manual Fundamentals of Engineering Thermodynamics - SI Units (6th Ed., Michael Moran, Howard Shapiro)
Solution Manual Fundamentals of Engineering Thermodynamics (7th Ed., Michael Moran, Howard Shapiro, Daisie Boettner, Margaret Bailey)
Solution Manual Fundamentals of Heat and Mass Transfer (5th Ed., Incropera, DeWitt)
Solution Manual Fundamentals of Heat and Mass Transfer (6th Ed., Incropera, DeWitt)
Solution Manual Introduction to Heat Transfer (4th Ed., Incropera, DeWitt)
Solution Manual Introduction to Heat Transfer (5th Ed., Incropera, DeWitt)
Solution Manual Radiation Detection and Measurement (3rd Ed., Glenn Knoll)
Solution Manual Radiation Detection and Measurement (4th Ed., Glenn Knoll)
Solution Manual Radiative Heat Transfer (2nd Ed., Michael Modest)
Solution Manual Computational Heat Transfer (2nd Ed., Jaluria)
Solution Manual Principles of Combustion (2nd Ed., Kenneth Kuan-yun Kuo)
Solution Manual An Introduction to Combustion : Concepts and Applications (3rd Ed., Stephen R. Turns)
Solution Manual Combustion (2nd Ed., Irvin Glassman)
Solution Manual Combustion (3rd Ed., Irvin Glassman)
Solution Manual Incompressible Flow (3rd Ed., Panton)
Solution Manual Modern Compressible Flow : With Historical Perspective (3rd Ed., John Anderson)
Solution Manual Non-Newtonian Flow : Fundamentals and Engineering Applications (R.P. Chhabra & J F Richardson)
Solution Manual Computational Techniques for Fluid Dynamics (Srinivas, K., Fletcher, C.A.J.)

Solution Manual Introduction to Computational Fluid Dynamics (A.W. Date)
Solution Manual Robot Modeling and Control (Spong, Hutchinson & Vidyasagar)
Solution Manual Introduction to Robotics: Analysis, Control, Applications (Saeed B. Niku)
Solution Manual Theory of Applied Robotics : Kinematics, Dynamics and Control (Reza N. Jazar)
Solution Manual Control of Robot Manipulators in Joint Space (R. Kelly, V. Santibáñez, A. Loría)
Solution Manual Modelling and Control of Robot Manipulators (2nd Ed., Lorenzo Sciavicco, Bruno Siciliano)
Solution Manual Robotics : Modelling, Planning and Control (Bruno Siciliano, Lorenzo Sciavicco, Luigi Villani & Giuseppe Oriolo)
Solution Manual Fundamentals of Robotic Mechanical Systems : Theory, Methods, and Algorithms (3rd Ed., Jorge Angeles)
Solution Manual Kinematic Chains and Machine Components Design (Dan B. Marghitu)
Solution Manual Kinematics, Dynamics, and Design of Machinery (2nd Ed., Waldron & Kinzel)
Solution Manual Kinematics and Dynamics of Machinery (3rd Ed., Charles E. Wilson & J. Peter Sadler)
Solution Manual Kinematics and Dynamics of Machinery - SI Units (3rd Ed., Charles E. Wilson & J. Peter Sadler)
Solution Manual Machines and Mechanisms : Applied Kinematic Analysis (3rd Ed., David H. Myszka)
Solution Manual Machines and Mechanisms : Applied Kinematic Analysis (4th Ed., David H. Myszka)
Solution Manual Mechanism Design : Analysis and Synthesis (4th Ed., Erdman, Sandor & Kota)
Solution Manual Mechanical Design : A Components Approach (2nd Ed., Peter Childs)
Solution Manual Mechanical Design of Machine Elements and Machines : A Failure Prevention Perspective (1st Ed., Collins)
Solution Manual Mechanical Design of Machine Elements and Machines : A Failure Prevention Perspective (2nd Ed., Collins, Busby & Staab)
Solution Manual Fundamentals of Machine Component Design (3rd Ed., Juvinall)
Solution Manual Fundamentals of Machine Component Design (4th Ed., Juvinall)
Solution Manual Design of Machine Elements (8th Ed., Spotts)
Solution Manual Machine Elements in Mechanical Design (4th Ed., Mott)
Solution Manual Machine Elements in Mechanical Design - SI Units (4th Ed., Mott)
Solution Manual Mechanical Design : An Integrated Approach (1st Ed., Ansel Ugural)
Solution Manual Design of Machinery (3rd Ed., Norton)
Solution Manual Design of Machinery (4th Ed., Norton)
Solution Manual Machine Design : An Integrated Approach (3rd Ed., Norton)

Solution Manual Machine Design : An Integrated Approach (4th Ed., Norton)
Solution Manual Mechanical Engineering Design (6th Ed., Shigley)
Solution Manual Mechanical Engineering Design (7th Ed., Shigley, Mischke & Budynas)
Solution Manual Shigley's Mechanical Engineering Design (8th Ed., Budynas & Nisbett)
Solution Manual Shigley's Mechanical Engineering Design (9th Ed., Budynas & Nisbett)
Solution Manual Fundamentals of Machine Elements (1st Ed., Hamrock)
Solution Manual Fundamentals of Machine Elements (2nd Ed., Hamrock)
Solution Manual Mechanics of Materials : A Modern Integration of Mechanics and Materials in Structural Design (Christopher Jenkins & Sanjeev Khanna)
Solution Manual Mechanics of Materials (3th Ed., Beer)
Solution Manual Mechanics of Materials (5th Ed., Gere & Timoshenko)
Solution Manual Mechanics of Materials (6th Ed., Gere & Timoshenko)
Solution Manual Mechanics of Materials (7th Ed., Gere & Goodno)
Solution Manual Mechanics of Materials (Ansel Ugural)
Solution Manual Mechanics of Materials : An Integrated Learning System (1st Ed., Timothy Philpot)
Solution Manual Mechanics of Materials : An Integrated Learning System (2nd Ed., Timothy Philpot)
Solution Manual Mechanics of Materials (2nd Ed., Roy R. Craig)
Solution Manual Simplified Mechanics and Strength of Materials (6th Ed., James Ambrose)
Solution Manual Engineering Applications of Dynamics (Dean Karnopp & Donald Margolis)
Solution Manual Engineering Mechanics : Statics (Arthur Boresi, Richard Schmidt)
Solution Manual Engineering Mechanics : Dynamics (Arthur Boresi, Richard Schmidt)
Solution Manual Engineering Mechanics : Statics (5th Ed., J. L. Meriam, L. G. Kraige)
Solution Manual Engineering Mechanics : Statics - SI Version (5th Ed., J. L. Meriam, L. G. Kraige)
Solution Manual Engineering Mechanics : Statics (6th Ed., J. L. Meriam, L. G. Kraige)
Solution Manual Engineering Mechanics : Statics - SI Version (6th Ed., J. L. Meriam, L. G. Kraige)
Solution Manual Engineering Mechanics : Dynamics (5th Ed., J. L. Meriam, L. G. Kraige)
Solution Manual Engineering Mechanics : Dynamics - SI Version (5th Ed., J. L. Meriam, L. G. Kraige)
Solution Manual Engineering Mechanics : Dynamics (6th Ed., J. L. Meriam, L. G. Kraige)
Solution Manual Engineering Mechanics : Dynamics - SI Version (6th Ed., J. L. Meriam, L. G. Kraige)
Solution Manual Vector Mechanics for Engineers : Statics (7th Ed., Ferdinand Beer)

Solution Manual Vector Mechanics for Engineers : Statics (8th Ed., Ferdinand Beer)
Solution Manual Vector Mechanics for Engineers : Dynamics (7th Ed., Ferdinand Beer)
Solution Manual Vector Mechanics for Engineers : Dynamics (8th Ed., Ferdinand Beer)
Solution Manual Statics : Analysis and Design of Systems in Equilibrium (Sheppard & Tongue)
Solution Manual Statics : Analysis and Design of Systems in Equilibrium - Update Edition (Sheppard & Tongue)
Solution Manual Dynamics : Analysis and Design of Systems in Motion (Sheppard & Tongue)
Solution Manual Dynamics : Analysis and Design of Systems in Motion (2nd Ed., Sheppard & Tongue)
Solution Manual Statics and Mechanics of Materials : An Integrated Approach (2nd Ed., Riley, Sturges & Morris)
Solution Manual Mechanics of Materials (6th Ed., Riley, Sturges & Morris)
Solution Manual Basic Engineering Plasticity : An Introduction with Engineering and Manufacturing Applications (David Rees)
Solution Manual Theory of Plasticity (3rd Ed. Jagabanduhu Chakrabarty)
Solution Manual Deformation and Fracture Mechanics of Engineering Materials (4th Ed., Richard Hertzberg)
Solution Manual Deformable Bodies and Their Material Behavior (Haslach & Armstrong)
Solution Manual Intermediate Mechanics of Materials (1st Ed., Barber)
Solution Manual Elasticity (2nd Ed., J.R. Barber)
Solution Manual Elasticity : Theory, Applications, and Numerics (1st Ed., Martin Sadd)
Solution Manual Elasticity : Theory, Applications, and Numerics (2nd Ed., Martin Sadd)
Solution Manual Elasticity in Engineering Mechanics (2nd Ed., Boresi)
Solution Manual Advanced Mechanics of Materials (6th Ed., Boresi)
Solution Manual Advanced Mechanics of Materials (2nd Ed., Cook & Young)
Solution Manual Metal Fatigue in Engineering (2nd Ed., Stephens, Fatemi & Fuchs)
Solution Manual Applied Mechanics for Engineering Technology (8th Ed., Keith M. Walker)
Solution Manual Applied Statics and Strength of Materials (5th Ed. Limbrunner & Spiegel)
Solution Manual Statics and Strength of Materials (Robert Mott)
Solution Manual Applied Strength of Materials (4th Ed., Mott)
Solution Manual Applied Strength of Materials (5th Ed., Mott)
Solution Manual Intermediate Dynamics for Engineers (Marcelo R.M & Crespo da Silva)
Solution Manual Engineering Mechanics : Statics (Michael Plesha, Gary Gray & Francesco Costanzo)
Solution Manual Engineering Mechanics : Dynamics (Michael Plesha, Gary Gray & Francesco Costanzo)

Solution Manual Engineering Mechanics : Statics (4th Ed., Anthony Bedford & Wallace Fowler)
Solution Manual Engineering Mechanics : Statics (5th Ed., Anthony Bedford & Wallace Fowler)
Solution Manual Engineering Mechanics : Statics - SI Units (5th Ed., Anthony Bedford, Wallace Fowler & Yusof Ahmad)
Solution Manual Engineering Mechanics : Dynamics (4th Ed., Anthony Bedford & Wallace Fowler)
Solution Manual Engineering Mechanics : Dynamics (5th Ed., Anthony Bedford & Wallace Fowler)
Solution Manual Engineering Mechanics : Dynamics - SI Units (5th Ed., Anthony Bedford, Wallace Fowler & Yusof Ahmad)
Solution Manual Elastic And Inelastic Stress Analysis (Irving Shames)
Solution Manual Thermal Stresses (2nd Ed., Noda, Hetnarski & Tanigawa)
Solution Manual Strength of Materials - A New Unified Theory for the 21st Century (Surya Patnaik & Dale Hopkins)
Solution Manual Statics and Strengths of Materials (6th Ed., Morrow & Kokernak)
Solution Manual Statics and Strengths of Materials (7th Ed., Morrow & Kokernak)
Solution Manual Engineering Mechanics : Statics (11th Ed., Hibbeler)
Solution Manual Engineering Mechanics : Statics (12th Ed., Hibbeler)
Solution Manual Engineering Mechanics : Statics - SI Units (12th Ed., Hibbeler)
Solution Manual Engineering Mechanics : Dynamics (11th Ed., Hibbeler)
Solution Manual Engineering Mechanics : Dynamics (12th Ed., Hibbeler)
Solution Manual Engineering Mechanics : Dynamics - SI Units (12th Ed., Hibbeler)
Solution Manual Mechanics of Materials (4th Ed., Hibbeler)
Solution Manual Mechanics of Materials (6th Ed., Hibbeler)
Solution Manual Mechanics of Materials (7th Ed., Hibbeler)
Solution Manual Mechanics of Materials - SI Units (7th Ed., Hibbeler)
Solution Manual Mechanics of Materials (8th Ed., Hibbeler)
Solution Manual Statics and Mechanics of Materials (Beer, Johnston, DeWolf & Mazurek)
Solution Manual Statics and Mechanics of Materials (Bedford, Liechti & Fowler)
Solution Manual Statics and Mechanics of Materials (2nd Ed., Hibbeler)
Solution Manual Statics and Mechanics of Materials - SI Units (2nd Ed., Hibbeler)
Solution Manual Statics and Mechanics of Materials (3rd Ed., Hibbeler)
Solution Manual Energy Principles and Variational Methods in Applied Mechanics (2nd Ed., Reddy)
Solution Manual The Physics of Vibrations and Waves (6th Ed., Pain)
Solution Manual Engineering Vibrations (3rd Ed., Inman)
Solution Manual Mechanical Vibrations - SI Units (4th Ed., Singiresu S. Rao)
Solution Manual Mechanical Vibrations (5th Ed., Singiresu S. Rao)
Solution Manual Theory of Vibration : An Introduction (2nd Ed., A.A. Shabana)

Solution Manual Vibration of Discrete and Continuous Systems (2nd Ed., Ahmed Shabana)
Solution Manual Introduction to Finite Element Vibration Analysis (Maurice Petyt)
Solution Manual Vibrations and Stability : Advanced Theory, Analysis, and Tools (2nd Ed., Jon J. Thomsen)
Solution Manual Dynamics and Vibration : An Introduction (Magd Abdel Wahab)
Solution Manual Mechanical Vibration (William J. Palm, III)
Solution Manual Random Vibrations : Analysis of Structural and Mechanical Systems (Loren Lutes & Shahram Sarkani)
Solution Manual Mechanical and Structural Vibrations : Theory and Applications (by Jerry H. Ginsberg)
Solution Manual Fundamentals of Structural Integrity : Damage Tolerant Design and Nondestructive Evaluation (Alten F. Grandt)
Solution Manual A First Course in the Finite Element Method (4th Ed., Daryl L. Logan)
Solution Manual Finite Element Analysis Theory and Application with ANSYS (3rd Ed., Moaveni)
Solution Manual An Introduction to the Finite Element Method (3rd Ed., J. N. Reddy)
Solution Manual Fundamentals of Finite Element Analysis (1st Ed., David V. Hutton)
Solution Manual The Finite Element Method in Engineering (4th Ed., Rao)
Solution Manual The Finite Element Method in Engineering (5th Ed., Rao)
Solution Manual The Finite Element Method and Applications in Engineering Using ANSYS (Madenci & Guven)
Solution Manual Introduction to Finite Element Analysis and Design (Nam-Ho Kim, Bhavani V. Sankar)
Solution Manual Introduction to the Finite Element Method : Theory, Programming and Applications (Erik G. Thompson)
Solution Manual The Finite Element Method : Its Basis and Fundamentals (6th Ed., Zienkiewicz, R. L. Taylor & J.Z. Zhu)
Solution Manual Fundamental Finite Element Analysis and Applications : with Mathematica and Matlab Computations (Asghar Bhatti)
Solution Manual Advanced Topics in Finite Element Analysis of Structures : With Mathematica and MATLAB Computations (Asghar Bhatti)
Solution Manual Modeling and Analysis of Dynamic Systems (3rd Ed., Close)
Solution Manual Modeling and Simulation of Dynamic Systems (Robert Woods, Jr. & Kent Lawrence)
Solution Manual System Dynamics (1st Ed., William J Palm III)
Solution Manual System Dynamics (2nd Ed., William J Palm III)
Solution Manual System Dynamics and Response (S. Graham Kelly)
Solution Manual System Dynamics for Engineering Students : Concepts and Applications (Nicolae Lobontiu)
Solution Manual Dynamic Modeling and Control of Engineering Systems (2nd Ed., J. Lowen Shearer, Bohdan Kulakowski, John Gardner)

Solution Manual System Dynamics : Modeling and Simulation of Mechatronic Systems (4th Ed., Karnopp, Margolis & Rosenberg)
Solution Manual Concepts and Applications of Finite Element Analysis (4th Ed., Cook, Malkus, Plesha & Witt)
Solution Manual Finite Element Modeling for Stress Analysis (Robert Cook)
Solution Manual Fracture Mechanics : Fundamentals and Applications (2nd Ed., T.L. Anderson)
Solution Manual Mechanical Behavior of Materials (3rd Ed., Dowling)
Solution Manual Mechanical Behavior of Materials (W.F. Hosford)
Solution Manual Mechanical Behavior of Materials (Keith Bowman)
Solution Manual Theory and Design for Mechanical Measurements (4th Ed., Figliola & Beasley)
Solution Manual Theory and Design for Mechanical Measurements (5th Ed., Figliola & Beasley)
Solution Manual Mechanical Measurements (6th Ed., Beckwith, Marangoni & Lienhard)
Solution Manual Measurement and Data Analysis for Engineering and Science (Patrick Dunn)
Solution Manual Design and Analysis of Lean Production Systems (Askin & Goldberg)
Solution Manual Computer-Aided Manufacturing (3rd Ed., Tien-Chien Chang, Richard A. Wysk, Hsu-Pin Wang)
Solution Manual Work Systems : The Methods, Measurement & Management of Work (Mikell P. Groover)
Solution Manual Automation, Production Systems, and Computer-Integrated Manufacturing (2nd Ed., Groover)
Solution Manual Automation, Production Systems, and Computer-Integrated Manufacturing (3rd Ed., Groover)
Solution Manual Fundamentals of Modern Manufacturing : Materials, Processes, and Systems (3rd Ed., Mikell Groover)
Solution Manual Fundamentals of Modern Manufacturing : Materials, Processes, and Systems (4th Ed., Mikell Groover)
Solution Manual Materials and Processes in Manufacturing (9th Ed., E. Paul DeGarmo, J. T. Black, Ronald A. Kohser)
Solution Manual DeGarmo's Materials and Processes in Manufacturing (10th Ed., E. Paul DeGarmo, J. T. Black, Ronald A. Kohser)
Solution Manual Principles of Metal Manufacturing Processes (Beddoes & Bibby)
Solution Manual Design for Manufacturing : A Structured Approach (Corrado Poli)
Solution Manual Fundamentals of Manufacturing (2nd Ed., Philip D. Rufe)
Solution Manual Engineering Materials Science (Milton Ohring)
Solution Manual Engineering Materials : Properties and Selection (8th Ed., Budinski)
Solution Manual Engineering Materials : Properties and Selection (9th Ed., Budinski)
Solution Manual Materials Science for Engineering Students (Traugott Fischer)

Solution Manual Essentials of Modern Materials Science and Engineering (James Newell)
Solution Manual Science and Design of Engineering Materials (2nd Ed., Schaffer, Saxena, et al)
Solution Manual Structure and Properties of Engineering Materiales (5th Ed., Daniel Henkel & Alan Pense)
Solution Manual Materials Selection in Mechanical Design (3rd Ed., Michael Ashby)
Solution Manual Materials Selection in Mechanical Design (4th Ed., Michael Ashby)
Solution Manual Materials : Engineering, Science, Processing and Design (1st Ed., Michael Ashby, Hugh Shercliff & David Cebon)
Solution Manual Materials : Engineering, Science, Processing and Design (2nd Ed., Michael Ashby, Hugh Shercliff & David Cebon)
Solution Manual Engineering Materials Vol. 1 : An Introduction to Properties, Applications and Design (3rd Ed., Michael Ashby & David Jones)
Solution Manual Engineering Materials Vol. 2 : An Introduction to Microstructures, Processing and Design (3rd Ed., Michael Ashby & David Jones)
Solution Manual Materials Science and Engineering : An Introduction (6th Ed., William Callister)
Solution Manual Materials Science and Engineering : An Introduction (7th Ed., William Callister)
Solution Manual Materials Science and Engineering : An Introduction (8th Ed., William Callister)
Solution Manual Fundamentals of Materials Science and Engineering : Integrated Approach (2nd Ed., William Callister)
Solution Manual Fundamentals of Materials Science and Engineering : Integrated Approach (3rd Ed., William Callister)
Solution Manual Foundations of Materials Science and Engineering (3rd Ed, Smith)
Solution Manual Foundations of Materials Science and Engineering (4th Ed, Smith & Hashemi)
Solution Manual Foundations of Materials Science and Engineering (5th Ed, Smith & Hashemi)
Solution Manual Introduction to Materials Science for Engineers (6th Ed., Shackelford)
Solution Manual Introduction to Materials Science for Engineers (7th Ed., Shackelford)
Solution Manual Introduction to Materials Science for Engineers - International Edition (7th Ed., Shackelford)
Solution Manual Manufacturing Facilities Design and Material Handling (3rd Ed., Meyers & Stephens)
Solution Manual Manufacturing Facilities Design and Material Handling (4th Ed., Stephens & Meyers)
Solution Manual Manufacturing Processes for Engineering Materials (5th Ed. Kalpakjian & Smith)
Solution Manual Manufacturing Processes for Engineering Materials - SI Units (5th Ed. Kalpakjian, Smith & Chih-Wah Kok)

Solution Manual Manufacturing, Engineering & Technology (5th Ed. Kalpakjian & Smith)
Solution Manual Manufacturing, Engineering & Technology (6th Ed. Kalpakjian & Smith)
Solution Manual Manufacturing, Engineering & Technology - SI Units (6th Ed. Kalpakjian & Smith)
Solution Manual Principles of Corrosion Engineering and Corrosion Control (Zaki Ahmad)
Solution Manual Steels : Microstructure and Properties (3rd Ed. Bhadeshia & Honeycombe)
Solution Manual Analysis and Performance of Fiber Composites (3rd Ed., Bhagwan Agarwal, Lawrence Broutman & K. Chandrashekhara)
Solution Manual Nanoengineering of Structural, Functional and Smart Materials (Mark Schulz, Ajit Kelkar, Mannur Sundaresan)
Solution Manual Applied Manufacturing Process Planning : With Emphasis on Metal Forming and Machining (Nelson, Schneider)
Solution Manual Mastering CAD/CAM (1st Ed., Ibrahim Zeid)
Solution Manual Principles of CAD/CAM/CAE (Kunwoo Lee)
Solution Manual Computer Numerical Control : Operation and Programming (3rd Ed., Stenerson & Curran)
Solution Manual Introduction to Computer Numerical Control (4th Ed., Valentino & Goldenberg)
Solution Manual Linear State-Space Control Systems (Robert L. Williams, II & Douglas A. Lawrence)
Solution Manual Gas Turbine Theory (6th Ed., H.I.H. Saravanamuttoo, G.F.C. Rogers, H. Cohen & Paul Straznicky)
Solution Manual Rocket Propulsion Elements (7th Ed., George P. Sutton & Oscar Biblarz)
Solution Manual Rocket Propulsion Elements (8th Ed., George P. Sutton & Oscar Biblarz)
Solution Manual Orbital Mechanics for Engineering Students (1st Ed., Howard Curtis)
Solution Manual Orbital Mechanics for Engineering Students (2nd Ed., Howard Curtis)
Solution Manual Atmospheric and Space Flight Dynamics : Modeling and Simulation with MATLAB and Simulink (Ashish Tewari)
Solution Manual Flight Dynamics Principles (2nd Ed., by Cook)
Solution Manual Mechanics of Flight (1st Ed., Warren F. Phillips)
Solution Manual Mechanics of Flight (2nd Ed., Warren F. Phillips)
Solution Manual Modern Flight Dynamics (David K. Schmidt)
Solution Manual Fundamentals of Airplane Flight Mechanics (David G. Hull)
Solution Manual Dynamics of Flight : Stability and Control (3rd Ed., Bernard Etkin & Lloyd Duff Reid)
Solution Manual Aircraft Rescue and Firefighting (5th Ed., IFSTA)
Solution Manual Aircraft Propulsion (Saeed Farokhi)
Solution Manual Aircraft Performance (Maido Saarlas)
Solution Manual Design of Aircraft (Thomas C. Corke)
Solution Manual Flight Performance of Fixed and Rotary Wing Aircraft (Antonio Filippone)

Solution Manual Fundamentals Of Aircraft Structural Analysis (Howard Curtis)
Solution Manual Aircraft Control and Simulation (2nd Ed., Brian Stevens & Frank Lewis)
Solution Manual Aircraft Structures for Engineering Students (3rd Ed., T.H.G. Megson)
Solution Manual Aircraft Structures for Engineering Students (4th Ed., T.H.G. Megson)
Solution Manual Introduction to Aircraft Structural Analysis (T.H.G. Megson)
Solution Manual Mechanics of Aircraft Structures (2nd Ed, C. T. Sun)
Solution Manual Principles of Helicopter Aerodynamics (1st Ed., Leishman)
Solution Manual Fundamentals of Aerodynamics (2nd Ed., Anderson)
Solution Manual Fundamentals of Aerodynamics (3th Ed., Anderson)
Solution Manual Fundamentals of Aerodynamics (4th Ed., Anderson)
Solution Manual Fundamentals of Aerodynamics (5th Ed., Anderson)
Solution Manual Aerodynamics for Engineers (5th Ed., John Bertin & Russell Cummings)
Solution Manual Introduction to Flight (5th Ed., Anderson)
Solution Manual Introduction to Flight (6th Ed., Anderson)
Solution Manual Mechatronics : Principles and Applications (Godfrey Onwubolu)
Solution Manual Mechatronics (Sabri Cetinkunt)
Solution Manual Introduction to Mechatronic Design (J. Edward Carryer, Matthew Ohline & Thomas Kenny)
Solution Manual Introduction to Mechatronics and Measurement Systems (2nd Ed., David Alciatore & Michael Histand)
Solution Manual Introduction to Mechatronics and Measurement Systems (3rd Ed., David Alciatore & Michael Histand)
Solution Manual Introduction to Mechatronics and Measurement Systems (4th Ed., David Alciatore & Michael Histand)
Solution Manual Introduction to Engineering Experimentation (2nd Ed., Wheeler & Ganji)
Solution Manual Introduction to Engineering Experimentation (3rd Ed., Wheeler & Ganji)
Solution Manual Gas Dynamics (3rd Ed., John & Keith)
Solution Manual Fundamentals of Gas Dynamics (2nd Ed, Robert D. Zucker)
Solution Manual Theory of Ground Vehicles (3rd Ed., J. Y. Wong)
Solution Manual Theory of Ground Vehicles (4th Ed., J. Y. Wong)
Solution Manual Vehicle Dynamics : Theory and Application (Reza Jazar)
Solution Manual Internal Combustion Engines : Applied Thermosciences (2nd Ed., Ferguson & Kirkpatrick)
Solution Manual Advanced Engine Performance Diagnosis (4th Ed., James Halderman)
Solution Manual Automotive Engines (8th Ed., Crouse)
Solution Manual Automotive Heating & Air Conditioning (5th Ed., Tom Birch)
Solution Manual Diagnosis and Troubleshooting of Automotive

Electrical, Electronic, and Computer Systems (5th Ed., James Halderman)
Solution Manual Automotive Brake Systems Package (4th Ed., Rehkopf)
Solution Manual Automotive Brake Systems (4th Ed., Halderman)
Solution Manual Automotive Engine Performance (2nd Ed., Halderman)
Solution Manual Automotive Engines : Theory and Servicing (6th Ed., James Halderman)
Solution Manual Automotive Fuel and Emissions Control Systems (2nd Ed., James Halderman & James Linder)
Solution Manual Automotive Science and Mathematics (Allan Bonnick)
Solution Manual Automotive Mathematics (Jason Rouvel)
Solution Manual Automotive Service Management (Andrew Rezin)
Solution Manual Automotive Technology : Principles, Diagnosis, and Service (3rd Ed., Halderman)
Solution Manual Automotive Steering, Suspension, and Alignment (4th Ed., Halderman)
Solution Manual Automatic Transmissions & Transaxles (4th Ed., Tom Birch & Chuck Rockwood)
Solution Manual Hybrid and Alternative Fuel Vehicles (Halderman & Martin)
Solution Manual Manual Drivetrains and Axles (5th Ed., Birch & Rockwood)
Solution Manual Blueprint Reading for the Machine Trades (6th Ed., Schultz & Smith)
Solution Manual Modern Welding Technology (6th Ed., Cary & Helzer)
Solution Manual Tissue Engineering (Bernhard O. Palsson & Sangeeta N. Bhatia)
Solution Manual Tissue Engineering (Clemens van Blitterswijk, et al.)
Solution Manual Tissue Mechanics (Cowin, Doty)
Solution Manual Technology and Society (3rd Ed., Hjorth, Eichler, Khan & Morello)
Solution Manual BTEC First Engineering Curriculum Support Pack (Mike Tooley)
Solution Manual BTEC First Engineering (Mike Tooley)
Solution Manual Exploring Engineering : An Introduction to Engineering and Design (1st Ed., Philip Kosky, George Wise, Robert Balmer & William Keat)
Solution Manual Exploring Engineering : An Introduction to Engineering and Design (2nd Ed., Philip Kosky, Robert Balmer, William Keat & George Wise)
Solution Manual Engineering Science (5th Ed., W. Bolton)
Solution Manual Principles of Energy Conversion (2nd Ed., Archie W. Culp)
Solution Manual Fundamentals of Renewable Energy Processes (1st Ed., Aldo da Rosa)
Solution Manual Fundamentals of Renewable Energy Processes (2nd Ed., Aldo da Rosa)
Solution Manual Alternative Energy Systems (B. K. Hodge)
Solution Manual Solar Energy Engineering : Processes and Systems (Soteris Kalogirou)

Solution Manual Solar Engineering of Thermal Processes (2nd Ed., John Duffie & William Beckman)
Solution Manual Solar Engineering of Thermal Processes (3rd Ed., John Duffie & William Beckman)
Solution Manual Energy Technology and Directions for the Future (Fanchi)
Solution Manual Power Generation Technologies (Paul Breeze)
Solution Manual Concepts in Engineering (Holtzapple & Reece)
Solution Manual Concepts in Engineering (2nd Ed., Holtzapple & Reece)
Solution Manual Foundations of Engineering (2nd Ed, Holtzapple & Dan Reece)
Solution Manual Industrial Mechanics and Maintenance (3rd Ed., Larry Chastain)
Solution Manual Mechanical and Electrical Equipment for Buildings (10th Ed., Stein, Reynolds, Grondzik, Kwok)
Solution Manual Mechanical and Electrical Equipment for Buildings (11th Ed., Grondzik, Kwok, Stein & Reynolds)
Solution Manual Mechanical & Electrical Systems in Buildings (4th Ed., Richard Janis & William Tao)
Solution Manual Engineering Drawing And Design (7th Ed., Jensen, Helsel & Short)
Solution Manual Autodesk Inventor (James M. Leake)
Solution Manual Engineering Design Graphics : Sketching, Modeling, and Visualization (1st Ed., James Leake & Jacob Borgerson)
Solution Manual Orthopaedic Biomechanics : Mechanics and Design in Musculoskeletal Systems (Donald Bartel, Dwight Davy & Tony Keaveny)
Solution Manual Science for Engineering (3rd Ed., John Bird)

List of Solutions Manuals and Test Banks

---

contact me to : mattosbw1@gmail.com
mattosbw1(at)gmail.com

NOTE : "THIS SERVICE IS NOT AVAILABLE FOR : CHINA, INDIA, RUSSIA, PAKISTAN, IRAQ, IRAN, PHILIPPINES, NORTH KOREA, NEPAL, BANGLADESH, SRI LANKA, MALDIVES, BHUTAN & COLOMBIA".

If your wanted solutions manual is not in this list, also can ask me if is available (it is a partial list). Then if you need solutions manual only contact me by email.

"ARE NOT AVAILABLES BOOKS IN DIGITAL FORMAT", ONLY SOLUTIONS MANUALS AND TEST BANKS.

This same "list of titles" of texts with availables solutions manual and/or test banks is for download from :

http://www.megaupload.com/?d=ADDS77XH

I do not review the forums, just send me an email.

- Electrical, Electronics & Computer Engineering :

Solution Manual Antenna Theory and Design (2nd Ed., Stutzman & Thiele)
Solution Manual Antennas for All Applications (3rd Ed., John Kraus & Ronald Marhefka)
Solution Manual Principles of Neurocomputing for Science and Engineering (Fredric M. Ham & Ivica Kostanic)
Solution Manual Introduction to Algorithms (2nd Ed., Cormen, et al.)
Solution Manual Algorithms (Dasgupta, et al.)
Solution Manual Applied Operating Systems Concepts (Silberschatz, Galvin & Gagne)
Solution Manual Operating System Concepts (6th Ed., Silberschatz, Galvin & Gagne)
Solution Manual Operating System Concepts (7th Ed., Silberschatz, Galvin & Gagne)
Solution Manual Operating System Concepts (8th Ed., Silberschatz, Galvin & Gagne)
Solution Manual Operating Systems Concepts with Java (6th Ed., Silberschatz, Galvin & Gagne)
Solution Manual Operating System Concepts with Java (7th Ed., Silberschatz, Galvin & Gagne)

Solution Manual Operating System Concepts with Java (8th Ed., Silberschatz, Galvin & Gagne)
Solution Manual C++ Program Design (3rd Ed., Cohoon & Davidson)
Solution Manual Java : Program Design 5.0 (Cohoon & Davidson)
Solution Manual Programming in C++ : Lessons and Applications (Timothy B. D'Orazio)
Solution Manual Applied C : An Introduction and More (Alice Fischer)
Solution Manual Programming Languages : Principles and Paradigms (1st Ed., Allen Tucker & Robert Noonan)
Solution Manual Programming Languages : Principles and Paradigms (2nd Ed., Allen Tucker & Robert Noonan)
Solution Manual Introduction to Parallel Computing (2nd Ed., Grama, Karypis, Kumar & Gupta)
Solution Manual Parallel Programming in C with MPI and Open MP (Michael J Quinn)
Solution Manual Data Communications and Network Security (Houston H. Carr & Charles Snyder)
Solution Manual Data Communications and Networks (David Miller)
Solution Manual Management Information Systems (3rd Ed., Post & Anderson)
Solution Manual Management Information Systems (4th Ed., Post & Anderson)
Solution Manual Database Management Systems (3rd Ed. Post)
Solution Manual Management Information Systems (9th Ed., James A. O'Brien, George Marakas)
Solution Manual Introduction to Systems Analysis and Design (Whitten & Bentley)
Solution Manual Systems Analysis & Design : An Active Approach (2nd Ed., Marakas)
Solution Manual An Introduction to Object-Oriented Programming with Java (4th Ed., C. Thomas Wu - Otani)
Solution Manual An Introduction to Object-Oriented Programming with Java (5th Ed., C. Thomas Wu - Otani)
Solution Manual A Comprehensive Introduction to Object-Oriented Programming With Java (C. Thomas Wu)
Solution Manual Data Structures and the Java Collections Framework (1st Ed., William Collins)
Solution Manual Data Structures and the Java Collections Framework (2nd Ed., William Collins)
Solution Manual Data Structures and the Standard Template Library (William Collins)
Solution Manual Database System Concepts (4th Ed., Silberschatz)
Solution Manual Database System Concepts (5th Ed., Silberschatz)
Solution Manual Database System Concepts (6th Ed., Silberschatz, Korth & Sudarshan)
Solution Manual Database Management Systems (3rd Ed., Ramakrishnan & Gehrke)
Solution Manual Fundamentals of Network Security (Eric Maiwald)
Solution Manual Computing Concepts (1st Ed., Haag, et al.)
Solution Manual Computing Concepts (2nd Ed., Haag et al.)

Solution Manual Microsoft Office 2003 (Haag et al.)
Solution Manual Advanced Programming Using Visual Basic .NET (2nd Ed., Julia Case Bradley & Anita Millspaugh)
Solution Manual Advanced Programming Using Visual Basic 2005 (3rd Ed., Julia Case Bradley & Anita Millspaugh)
Solution Manual Programming with Java (Julia Case Bradley & Anita Millspaugh)
Solution Manual Programming in C#.Net (1st Ed., Julia Case Bradley & Anita Millspaugh)
Solution Manual Programming in Visual C# 2005 (2nd Ed., Julia Case Bradley & Anita Millspaugh)
Solution Manual Learning Programming Using Visual Basic.Net (Bill Burrows & Joe Lanford)
Solution Manual Programming in Visual Basic.NET : Visual Basic.NET 2005 (6th Ed., Julia Case Bradley & Anita Millspaugh)
Solution Manual Programming in Visual Basic .Net : 2003 Update Edition (5th Ed., Julia Case Bradley & Anita Millspaugh)
Solution Manual Survey of Operating Systems (2nd Ed., Jane Holcombe & Charles Holcombe)
Solution Manual Principles of Voice and Data Communications (Regis J. Bates & Marcus Bates)
Solution Manual Mike Meyers' Network+ Guide To Managing and Troubleshooting Networks (Michael Meyers)
Solution Manual Introduction to Windows Server 2003 (Eric Ecklund)
Solution Manual Programming The Web : An Introduction (Barrie Sosinsky & Valda Hilley)
Solution Manual Programming The Web Using XML (Ellen Pearlman & Eileen Mullin)
Solution Manual Internet Marketing : Building Advantage in a Networked Economy (2nd Ed., Rafi Mohammed et al.)
Solution Manual Internet Technologies at Work (Fred T. Hofstetter)
Solution Manual Internet Literacy (4th Ed., Fred T. Hofstetter)
Solution Manual Software Engineering : A Practitioner's Approach (5th Ed., Roger Pressman)
Solution Manual Software Engineering : A Practitioner's Approach (6th Ed., Roger Pressman)
Solution Manual Software Engineering : A Practitioner's Approach (7th Ed., Roger Pressman)
Solution Manual Web Engineering : A Practioner's Approach (1st Ed., Roger S. Pressman & David Lowe)
Solution Manual Object-Oriented Software Engineering (Stephen Schach)
Solution Manual Object-Oriented and Classical Software Engineering (5th Ed., Steve Schach)
Solution Manual Object-Oriented and Classical Software Engineering (6th Ed., Steve Schach)
Solution Manual Object-Oriented and Classical Software Engineering (7th Ed., Steve Schach)
Solution Manual Object-Oriented and Classical Software Engineering (8th Ed., Steve Schach)
Solution Manual Introduction to Object-Oriented Analysis and Design

(Steve Schach)
Solution Manual Communication Networks (2nd Ed., Alberto Leon-Garcia & Indra Widjaja)
Solution Manual Fundamentals of Digital Logic with Verilog Design (1st Ed., Stephen Brown & Zvonko Vranesic)
Solution Manual Fundamentals of Digital Logic with Verilog Design (2nd Ed., Stephen Brown & Zvonko Vranesic)
Solution Manual Continuous and Discrete Control Systems (John Dorsey)
Solution Manual Engineering Circuit Analysis (6th Ed., William Hayt, Jack Kemmerly & Steven Durbin)
Solution Manual Engineering Circuit Analysis (7th Ed., William Hayt, Jack Kemmerly & Steven Durbin)
Solution Manual Engineering Electromagnetics (7th Ed., William Hayt & John Buck)
Solution Manual Principles of Electronic Materials and Devices (2nd Ed., Safa O. Kasap)
Solution Manual Principles of Electronic Materials and Devices (3rd Ed., Safa O. Kasap)
Solution Manual Programming in Haskell (Graham Hutton)
Solution Manual Probability and Random Processes With Applications to Signal Processing and Communications (Miller & Childers)
Solution Manual Logic in Computer Science : Modelling and Reasoning about Systems (2nd Ed., Michael Huth & Mark Ryan)
Solution Manual Introduction to Distributed Algorithms (2nd., Gerard Tel)
Solution Manual Information Theory, Inference and Learning Algorithms (David J. C. MacKay)
Solution Manual Digital Systems Engineering (William Dally & John Poulton)
Solution Manual Concepts in Programming Languages (by John Mitchell)
Solution Manual Simulation Modeling and Analysis (3rd Ed., Averill Law & David Kealton)
Solution Manual Simulation Modeling and Analysis with Expertfit Software (4th Ed., Averill Law)
Solution Manual System Modeling and Analysis : Foundations of System Performance Evaluation (Hisashi Kobayashi & Brian Mark)
Solution Manual Wireless Communications (Andrea Goldsmith)
Solution Manual Testing of Digital Systems (N. K. Jha & S. Gupta)
Solution Manual Space-Time Coding (Hamid Jafarkhani)
Solution Manual Space-Time Block Coding for Wireless Communications (Erik Larsson & Petre Stoica)
Solution Manual Smart Electronic Materials : Fundamentals and Applications (Jasprit Singh)
Solution Manual Radio-Frequency Electronics : Circuits and Applications (Jon Hagen)
Solution Manual Photonic Devices (Jia-ming Liu)
Solution Manual Networking Wireless Sensors (Bhaskar Krishnamachari)
Solution Manual Mobile Wireless Communications (Mischa Schwartz)
Solution Manual Introduction to Color Imaging Science (Hsien-Che Lee)
Solution Manual Fundamentals of Wireless Communication (David Tse &

Pramod Viswanath)
Solution Manual Fundamentals of Modern VLSI Devices (Yuan Taur & Tak H. Ning)
Solution Manual Electronic and Optoelectronic Properties of Semiconductor Structures (Jasprit Singh)
Solution Manual An Introduction to Statistical Signal Processing (Robert M. Gray)
Solution Manual An Introduction to Radio Frequency Engineering (Christopher Coleman)
Solution Manual Algebraic Codes for Data Transmission (Richard Blahut)
Solution Manual Fundamentals of Solid State Electronics (C.T. Sah)
Solution Manual Fundamentals of Solid State Engineering (2nd Ed., Manijeh Razeghi)
Solution Manual Robot Modeling and Control (Spong, Hutchinson & Vidyasagar)
Solution Manual Theory of Applied Robotics : Kinematics, Dynamics and Control (Reza N. Jazar)
Solution Manual Control of Robot Manipulators in Joint Space (R. Kelly, V. Santibáñez, A. Loría)
Solution Manual Modelling and Control of Robot Manipulators (2nd Ed., Lorenzo Sciavicco, Bruno Siciliano)
Solution Manual Robotics : Modelling, Planning and Control (Bruno Siciliano, Lorenzo Sciavicco, Luigi Villani & Giuseppe Oriolo)
Solution Manual Fundamentals of Semiconductor Fabrication (Gary S. May, Simon M. Sze)
Solution Manual Semiconductor Devices : Physics and Technology (2nd Ed, Simon M. Sze)
Solution Manual Physics of Semiconductor Devices (3rd Ed., Simon M. Sze, Kwok K. Ng)
Solution Manual Electric Machinery (6th Ed., Fitzgerald)
Solution Manual Electric Machinery Fundamentals (4th Ed., Chapman)
Solution Manual Electric Machinery and Power System Fundamentals (Chapman)
Solution Manual Local Area Networks (2nd Ed., Keiser)
Solution Manual Signals and Systems : Analysis of Signals Through Linear Systems (1st Ed., M.J. Roberts)
Solution Manual Fundamentals of Signals and Systems (M.J. Roberts)
Solution Manual Introduction to Signals and Systems (Lindner)
Solution Manual Semiconductor Physics and Devices (3rd Ed., Donald Neamen)
Solution Manual An Introduction to Semiconductor Devices (Donald Neamen)
Solution Manual Microelectronic Circuit Analysis and Design (3rd Ed., Donald Neamen)
Solution Manual Electronic Circuit Analysis and Design (2nd Ed., Donald Neamen)
Solution Manual Design for Electrical and Computer Engineers (1st Ed., Ralph Ford & Chris Coulston)
Solution Manual Fundamentals of Modeling and Analyzing Engineering Systems (Cha, Rosenberg, Dym)

Solution Manual Linear Systems (Panos J. Antsaklis & Anthony N. Michel)
Solution Manual A Linear Systems Primer (Panos J. Antsaklis & Anthony N. Michel)
Solution Manual Principles of Linear Systems (Philip E. Sarachik)
Solution Manual Linear Systems Control : Deterministic and Stochastic Methods (Elbert Hendricks, Ole Jannerup & Paul Haase Sørensen)
Solution Manual Power Systems Harmonics : Fundamentals, Analysis and Filter Design (George J. Wakileh)
Solution Manual Principles of Adaptive Filters and Self-learning Systems (Anthony Zaknich)
Solution Manual Algebraic Methods for Nonlinear Control Systems (2nd Ed., Conte, Moog & Perdon)
Solution Manual Discrete-Time Control Systems (2nd Ed., K. Ogata)
Solution Manual Modern Control Engineering - Problems B (3rd Ed., K. Ogata)
Solution Manual Modern Control Engineering (4th Ed., K. Ogata)
Solution Manual Modern Control Engineering (5th Ed., K. Ogata)
Solution Manual Modern Control Engineering - International Version (5th Ed., K. Ogata)
Solution Manual LabVIEW 8 Student Edition (Bishop)
Solution Manual LabVIEW 2009 Student Edition (Bishop)
Solution Manual Learning with LabVIEW 2009 (Bishop)
Solution Manual Introduction to Feedback Control (Li Qiu & Kemin Zhou)
Solution Manual Modeling and Simulation of Dynamic Systems (Robert Woods, Jr. & Kent Lawrence)
Solution Manual Feedback Control of Dynamic Systems (4th Ed., Gene Franklin, J.D. Powell, Abbas Emami-Naeini)
Solution Manual Feedback Control of Dynamic Systems (5th Ed., Gene Franklin, J.D. Powell, Abbas Emami-Naeini)
Solution Manual Feedback Control of Dynamic Systems (6th Ed., Gene Franklin, J.D. Powell, Abbas Emami-Naeini)
Solution Manual Feedback Control of Dynamic Systems - International Version (6th Ed., Gene Franklin, J.D. Powell, Abbas Emami-Naeini)
Solution Manual Predictive Control with Constraints (Jan Maciejowski)
Solution Manual Computer Numerical Control : Operation and Programming (3rd Ed., Stenerson & Curran)
Solution Manual Engineering Problem Solving with C (3rd Ed., Etter)
Solution Manual Engineering Problem Solving with C++ (2nd Ed., Etter)
Solution Manual Process Control Instrumentation Technology (8th Ed., Johnson)
Solution Manual Electrical Power and Controls (2nd Ed., Skvarenina & DeWitt)
Solution Manual Electronics and Computer Math (8th Ed., Deem & Zannini)
Solution Manual Circuits, Signals, and Systems for Bioengineers : A MATLAB-Based Introduction (John Semmlow)
Solution Manual VLSI Test Principles and Architectures : Design for Testability (Laung-Terng Wang, Cheng-Wen Wu & Xiaoqing Wen)
Solution Manual Mechatronics : Principles and Applications (Godfrey

Onwubolu)
Solution Manual Mechatronics (Sabri Cetinkunt)
Solution Manual Introduction to Mechatronic Design (J. Edward Carryer, Matthew Ohline & Thomas Kenny)
Solution Manual Introduction to Mechatronics and Measurement Systems (2nd Ed., David Alciatore & Michael Histand)
Solution Manual Introduction to Mechatronics and Measurement Systems (3rd Ed., David Alciatore & Michael Histand)
Solution Manual Introduction to Mechatronics and Measurement Systems (4th Ed., David Alciatore & Michael Histand)
Solution Manual Machine Vision : Theory, Algorithms, Practicalities (3rd Ed., E. R. Davies)
Solution Manual Essential Java for Scientists and Engineers (Brian D. Hahn & Katherine M. Malan)
Solution Manual Guide to Microsoft Excel 2002 for Scientists and Engineers (3rd Ed., Bernard V. Liengme)
Solution Manual 10-Key Touch Key : Developing Speed and Accuracy (Burton)
Solution Manual Introduction to C++ Programming, Brief Version (Y. Daniel Liang)
Solution Manual Introduction to C++ Programming, Comprehensive (Y. Daniel Liang)
Solution Manual C++ for Business Programmers (2nd Ed., John C. Molluzzo)
Solution Manual Introduction to Java Programming - Brief Version (7th Ed., Liang)
Solution Manual Introduction to Java Programming - Brief Version (8th Ed., Liang)
Solution Manual Introduction to Java Programming - Brief Version - International Edition (8th Ed., Liang)
Solution Manual Introduction to Java Programming - Comprehensive Version (6th Ed., Liang)
Solution Manual Introduction to Java Programming - Comprehensive Version (7th Ed., Liang)
Solution Manual Introduction to Java Programming - Comprehensive Version (8th Ed., Liang)
Solution Manual Introduction to Java Programming - Comprehensive Version - International Edition (8th Ed., Liang)
Solution Manual Introduction to Java Programming : Fundamentals First (6th Ed., Y. Daniel Liang)
Solution Manual Objects First With Java : A Practical Introduction Using BlueJ (3rd Ed., Barnes & Kolling)
Solution Manual Simply Java Programming : An Application-Driven™ Tutorial Approach (Deitel)
Solution Manual Java : An Introduction to Computing (Joel Adams, Larry R. Nyhoff & Jeffrey Nyhoff)
Solution Manual Advanced Java™ 2 Platform How to Program (Deitel & Santry)
Solution Manual SQL for SQL Server (Bijoy Bordoloi & Douglas B. Bock)
Solution Manual SQL Clearly Explained (3rd Ed., Jan Harrington)

Solution Manual An Introduction to Programming Using Visual Basic 2005 (6th Ed., Schneider)
Solution Manual An Introduction to Programming Using Visual Basic 2008 (7th Ed., Schneider)
Solution Manual An Introduction to Programming Using Visual Basic 2010 (8th Ed., Schneider)
Solution Manual Simply Visual Basic .NET (Harvey M. Deitel, Paul J. Deitel, Tem R. Nieto)
Solution Manual Simply Visual Basic 2005 (2nd Ed., Harvey & Paul Deitel)
Solution Manual Simply Visual Basic 2008 (3rd Ed., Harvey & Paul Deitel)
Solution Manual Visual Basic 2005 How to Program (3rd Ed., Deitel)
Solution Manual Visual Basic 2008 How to Program (4th Ed., Deitel)
Solution Manual Visual Basic 2010 How to Program (5th Ed., Deitel)
Solution Manual An Introduction to Programming with Visual Basic 6.0 (4th Ed., Schneider)
Solution Manual Visual Basic.Net Programming (2nd Ed., Jeffrey Tsay)
Solution Manual Simply Visual Basic .NET (Harvey & Paul Deitel & Nieto)
Solution Manual Mechatronics (Sabri Cetinkunt)
Solution Manual PC Systems, Installation and Maintenance (2nd Ed., R.P. Beales)
Solution Manual Introduction to Linear Programming (Leonid N. Vaserstein)
Solution Manual Electric Circuits Fundamentals (8th Ed., Thomas Floyd)
Solution Manual Introductory Circuit Analysis (11th Ed., Robert L. Boylestad)
Solution Manual Introductory Circuit Analysis (12th Ed., Robert L. Boylestad)
Solution Manual Principles of Electric Circuits : Conventional Current Version (8th Ed., Thomas Floyd)
Solution Manual Principles of Electric Circuits : Conventional Current Version (9th Ed., Thomas Floyd)
Solution Manual Principles of Electric Circuits : Electron Flow Version (8th Ed., Thomas L. Floyd)
Solution Manual Principles of Electric Circuits : Electron Flow Version (9th Ed., Thomas L. Floyd)
Solution Manual Contemporary Electric Circuits : Insights and Analysis (2nd ed., Strangeway, Petersen, Gassert & Lokken)
Solution Manual Introductory Electronic Devices and Circuits : Electron Flow Version (7th Ed., Paynter)
Solution Manual Introductory Electronic Devices and Circuits : Conventional Flow Version (7th Ed., Paynter)
Solution Manual Electronics Technology Fundamentals : Conventional Flow (2nd Ed., Robert T. Paynter & Toby Boydell)
Solution Manual Electronics Technology Fundamentals : Conventional Flow (3rd Ed., Robert T. Paynter & Toby Boydell)
Solution Manual Electronics Technology Fundamentals : Electron Flow (2nd Ed., Robert T. Paynter, Toby Boydell)

Solution Manual Electronics Technology Fundamentals : Electron Flow (3rd Ed., Robert T. Paynter, Toby Boydell)
Solution Manual Introductory DC/AC Circuits (6th Ed., Nigel P. Cook)
Solution Manual Introductory DC/AC Electronics (6th Ed., Nigel P. Cook)
Solution Manual Electronic Devices : Conventional Current Version (7th Ed., Floyd)
Solution Manual Electronic Devices : Conventional Current Version (8th Ed., Floyd)
Solution Manual Electronic Devices : Electron Flow Version (7th, Floyd)
Solution Manual Electronic Devices : Electron Flow Version (8th, Floyd)
Solution Manual Electronics Fundamentals : Circuits, Devices and Applications (7th Ed., Thomas L. Floyd)
Solution Manual Electronics Fundamentals : Circuits, Devices and Applications (8th Ed., Floyd & Buchla)
Solution Manual Electronic Devices and Circuit Theory (9th Ed., Boylestad, Nashelsky)
Solution Manual Electronic Devices and Circuit Theory (10th Ed., Boylestad, Nashelsky)
Solution Manual The Science of Electronics : DC/AC (David M. Buchla, Thomas L. Floyd)
Solution Manual The Science of Electronics : Digital (Floyd & Buchla)
Solution Manual The Science of Electronics: Analog Devices (Floyd & Buchla)
Solution Manual Digital Electronics : A Practical Approach (7th Ed., Kleitz)
Solution Manual Digital Electronics : A Practical Approach (8th Ed., Kleitz)
Solution Manual Digital Systems : Principles and Applications (10th Ed., Tocci, Widmer & Moss)
Solution Manual Digital Electronics with VHDL - Quartus II Version (Kleitz)
Solution Manual Digital Fundamentals (9th Ed., Floyd)
Solution Manual Digital Fundamentals (10th Ed., Floyd)
Solution Manual Digital Fundamentals with PLD Programming (Thomas L. Floyd)
Solution Manual The 8051 Microcontroller (4th Ed., MacKenzie & Chung-Wei Phan)
Solution Manual The 8051 Microcontroller and Embedded Systems (2nd Ed., Muhammad Ali Mazidi, Janice Mazidi & Rolin McKinlay)
Solution Manual INTEL Microprocessors 8086/8088, 80186/80188, 80286, 80386, 80486, Pentium, Prentium ProProcessor, Pentium II, III, 4, (7th Ed., Barry B. Brey)
Solution Manual Microcontroller Technology : The 68HC11 (5th Ed., Peter Spasov)
Solution Manual PIC Microcontroller (Muhammad Ali Mazidi, Rolin McKinlay & Danny Causey)
Solution Manual HCS12 Microcontrollers and Embedded Systems : Using

Assembly and C with CodeWarrior (Muhammad Ali Mazidi, Danny Causey & Janice Mazidi)
Solution Manual The x86 PC : Assembly Language, Design, and Interfacing (5th Ed., Muhammad Ali Mazidi, Janice Mazidi & Danny Causey)
Solution Manual The AVR Microcontroller and Embedded Systems : Using Assembly and C (Muhammad Ali Mazidi, Sarmad Naimi & and Sepehr Naimi)
Solution Manual Industrial Electronics (James A. Rehg, Glenn J. Sartori)
Solution Manual Programmable Controllers Using the Allen-Bradley SlC-500 Family (2nd Ed., Dave Geller)
Solution Manual Programmable Logic Controllers (James A. Rehg, Glenn J. Sartori)
Solution Manual Fundamentals of Programmable Logic Controllers, Sensors, and Communications (3rd Ed., Jon Stenerson)
Solution Manual An Introduction to Programming with Visual Basic 6.0, Update Edition (4th Ed., Schneider)
Solution Manual C++ Programming Today (1st Ed., Barbara Johnston)
Solution Manual C++ Programming Today (2nd Ed., Barbara Johnston)
Solution Manual Introduction to Data Communications and Networking (Wayne Tomasi)
Solution Manual Introduction to Telecommunications (2nd Ed., Martha Rosengrant)
Solution Manual Network Security Essentials : Applications and Standards (3rd Ed., William Stallings)
Solution Manual Network Security Essentials : Applications and Standards (4th Ed., William Stallings)
Solution Manual Information Security: Principles and Practices (Mark Merkow, James Breithaupt)
Solution Manual Principles and Practice of Information Security (Linda Volonino, Stephen R. Robinson)
Solution Manual Principles of Electronic Communication Systems (3rd Ed., Louis E. Frenzel)
Solution Manual Modern Electronic Communication (8th Ed., Jeff Beasley, Gary M. Miller)
Solution Manual Modern Electronic Communication (9th Ed., Jeff Beasley, Gary M. Miller)
Solution Manual Electronic Communications for Technicians (2nd ed., Tom Wheeler)
Solution Manual Concepts In Systems and Signals (2nd Ed., John D. Sherrick)
Solution Manual Understanding Fiber Optics (5th Ed., Jeff Hecht)
Solution Manual Understanding UNIX/LINUX Programming : A Guide to Theory and Practice (Bruce Molay)
Solution Manual Applying PIC18 Microcontrollers : Architecture, Programming, and Interfacing using C and Assembly (Barry Brey)
Solution Manual Electrical Power and Controls (2nd Ed., Timothy L. Skvarenina, William E. DeWitt)
Solution Manual Process Control Instrumentation Technology (8th Ed., Curtis Johnson)

Solution Manual Electrical Machines, Drives and Power Systems (6th Ed., Theodore Wildi)
Solution Manual Introduction to Vacuum Technology (David M. Hata)
Solution Manual Electronic Project Design and Fabrication (6th Ed., Ronald A. Reis)
Solution Manual Technology and Society (3rd Ed., Linda Hjorth, Barbara A. Eichler, Ahmed S. Khan, John Morello)
Solution Manual Solid State Electronic Devices (6th Ed., Ben Streetman, Sanjay Banerjee)
Solution Manual Approaching Quantum Computing (Dan C. Marinescu & Gabriela M. Marinescu)
Solution Manual Foundations of MEMS (Chang Liu)
Solution Manual Basic Electromagnetics with Applications (Nannapaneni Narayana Rao)
Solution Manual Elements of Engineering Electromagnetics (6th Ed., Nannapaneni Narayana Rao)
Solution Manual Fundamentals of Electromagnetics for Electrical and Computer Engineering (Nannapaneni Narayana Rao)
Solution Manual Digital Design (4th Ed., M. Morris Mano & Michael D. Ciletti)
Solution Manual Digital Design : Principles and Practices Package (4th Ed., John F. Wakerly)
Solution Manual VHDL: A Starter's Guide (2nd Ed., Sudhakar Yalamanchili)
Solution Manual Computer Organization and Architecture : Designing for Performance (7th Ed., William Stallings)
Solution Manual Computer Organization and Architecture : Designing for Performance (8th Ed., William Stallings)
Solution Manual Parallel Programming : Techniques and Applications Using Networked Workstations and Parallel Computers (2nd Ed., Barry Wilkinson & Michael Allen)
Solution Manual Fundamentals of Parallel Processing (Harry F. Jordan & Gita Alaghband)
Solution Manual Digital and Analog Communication Systems (7th Ed., Leon W. Couch)
Solution Manual Digital Communications (4th Ed., John Proakis)
Solution Manual Digital Communications (5th Ed., John Proakis)
Solution Manual Principles of Digital Communication and Coding (Andrew J. Viterbi, Jim K. Omura)
Solution Manual Modern Wireless Communications (Simon Haykin, Michael Moher)
Solution Manual Communication Systems Engineering (2nd Ed., John G. Proakis & Masoud Salehi)
Solution Manual ISDN and Broadband ISDN with Frame Relay and ATM (4th Ed., William Stallings)
Solution Manual Data and Computer Communications (8th Ed., William Stallings)
Solution Manual Cryptography and Network Security (4th Ed., William Stallings)
Solution Manual Cryptography and Network Security : Principles and

Practice (5th Ed., William Stallings)
Solution Manual Computer Networking with Internet Protocols (William Stallings)
Solution Manual Local and Metropolitan Area Networks (6th Ed., William Stallings)
Solution Manual Probabilistic Systems and Random Signals (Abraham Haddad)
Solution Manual Error Control Coding (2nd Ed., Shu Lin & Daniel J. Costello)
Solution Manual Wireless Communications & Networks (2nd ed., William Stallings)
Solution Manual Wireless Communications and Networking (Jon W. Mark, Weihua Zhuang)
Solution Manual Detection and Estimation Theory (Thomas Schonhoff & Arthur Giordano)
Solution Manual Signals, Systems, and Transforms (3rd Ed., Charles Phillips, John Parr & Eve Riskin)
Solution Manual Signals, Systems, and Transforms (4th Ed., Charles Phillips, John Parr & Eve Riskin)
Solution Manual Signals, Systems, and Transforms - International Version (4th Ed., Charles Phillips, John Parr & Eve Riskin)
Solution Manual Fundamentals of Signals and Systems Using the Web and Matlab (3rd Ed., Edward Kamen & Bonnie Heck)
Solution Manual Adaptive Filter Theory (4th Ed., Simon Haykin)
Solution Manual Neural Networks and Learning Machines (3rd Ed., Simon Haykin)
Solution Manual Spectral Analysis of Signals (Petre Stoica & Randolph L. Moses)
Solution Manual Fluency with Information Technology : Skills, Concepts, and Capabilities (2nd Ed., Snyder)
Solution Manual Fluency with Information Technology : Skills, Concepts, and Capabilities (3rd Ed., Snyder)
Solution Manual Fluency with Information Technology, Brief Edition (Lawrence Snyder)
Solution Manual Excel 2003 Volume II: Advanced Concepts in Excel (5th Ed., Karen Jolly)
Solution Manual Focus on Excel 2003 (Julie Hayward Spooner)
Solution Manual Comprehensive Excel 2002 for Office XP (4th Ed., Karen Jolly)
Solution Manual Ethics for the Information Age (2nd Ed., Michael Quinn)
Solution Manual Ethics for the Information Age (3rd Ed., Michael Quinn)
Solution Manual Computer Science : An Overview (8th Ed., J. Glenn Brookshear)
Solution Manual Computer Science : An Overview (9th Ed., J. Glenn Brookshear)
Solution Manual Computer Science : An Overview (10th Ed., J. Glenn Brookshear)
Solution Manual Excel 2003 Volume 1 : Core Concepts in Excel (5th Ed.,

Karen J. Jolly)
Solution Manual Concise Prelude to Programming : Concepts and Design (2nd Ed., Stewart Venit)
Solution Manual Concise Prelude to Programming (3rd Ed., Stewart Venit & Elizabeth Drake)
Solution Manual Extended Prelude to Programming : Concepts and Design (2nd Ed., Stewart Venit)
Solution Manual Extended Prelude to Programming (3rd Ed., Stewart Venit & Elizabeth Drake)
Solution Manual Logic and Design of Computer Programs (Jim Messinger)
Solution Manual Absolute C++ (2nd Ed., Walter Savitch)
Solution Manual Absolute C++ (3rd Ed., Walter Savitch)
Solution Manual Absolute C++ (4th Ed., Walter Savitch)
Solution Manual Problem Solving with C++ : The Object of Programming (5th Ed., Walter Savitch)
Solution Manual Problem Solving with C++ (6th Ed., Walter Savitch)
Solution Manual Problem Solving with C++ (7th Ed., Walter Savitch)
Solution Manual Problem Solving, Abstraction, and Design using C++ (4th Ed., Frank Friedman & Elliot Koffman)
Solution Manual Problem Solving, Abstraction & Design Using C++ (5th Ed., Frank Friedman & Elliot Koffman)
Solution Manual Starting Out with C++ : From Control Structures through Objects (5th Ed., Tony Gaddis)
Solution Manual Starting Out with C++ : From Control Structures through Objects (6th Ed., Tony Gaddis)
Solution Manual Starting Out with C++ : From Control Structures through Objects - Brief Version (6th Ed., Tony Gaddis)
Solution Manual Starting out with C++ Brief Version Updated (4th Ed., Gaddis & Krupnow)
Solution Manual Starting out with C++ Brief Version (5th Ed., Gaddis & Krupnow)
Solution Manual Starting Out with C++ : Brief Version Update, Visual C++ .NET (4th Ed., Gaddis & Krupnow)
Solution Manual Starting Out with C++ : Early Objects (5th Ed., Gaddis, Walters & Muganda)
Solution Manual Starting Out with C++ : Early Objects (6th Ed., Gaddis, Walters & Muganda)
Solution Manual Starting Out with C++ : Early Objects (7th Ed., Gaddis, Walters & Muganda)
Solution Manual C++ By Dissection (Ira Pohl)
Solution Manual Essential C++ for Engineers and Scientists (2nd Ed., Jeri Hanly)
Solution Manual C++ Coach : Essentials for Introductory Programming (Jeff Salvage)
Solution Manual C++ Primer (4th Ed., Stanley Lippman, Josée Lajoie & Barbara Moo)
Solution Manual Engineering Computation with MATLAB (1st Ed., David Smith)
Solution Manual Engineering Computation with MATLAB (2nd Ed., David Smith)

Solution Manual Absolute Java (1st Ed., Walter Savitch)
Solution Manual Absolute Java (2nd Ed., Walter Savitch)
Solution Manual Absolute Java (3rd Ed., Walter Savitch)
Solution Manual Absolute Java (4th Ed., Walter Savitch)
Solution Manual The Art and Science of Java (Eric Roberts)
Solution Manual Building Java Programs : A Back to Basics Approach (Stuart Reges & Martin Stepp)
Solution Manual Introduction to Programming in Java : An Interdisciplinary Approach (Robert Sedgewick & Kevin Wayne)
Solution Manual Java Foundations: Introduction to Program Design and Data Structures (John Lewis, Peter DePasquale & Joe Chase)
Solution Manual Starting Out with Java : Early Objects (3rd Ed., Gaddis)
Solution Manual Starting Out with Java : From Control Structures through Objects (3rd Ed., Gaddis)
Solution Manual Starting Out with Java : From Control Structures through Objects (4th Ed., Gaddis)
Solution Manual Java Software Solutions (Java 5.0 version) : Foundations of Program Design (4th Ed., Lewis & Loftus)
Solution Manual Java Software Solutions : Foundations of Program Design (5th Ed., Lewis & Loftus)
Solution Manual Java Software Solutions : Foundations of Program Design (6th Ed., Lewis & Loftus)
Solution Manual Starting Out with Java : From Control Structures through Data Structures (Gaddis & Muganda)
Solution Manual Object of Java, The: Introduction to Programming Using Software Engineering Principles (2nd Ed, David Riley)
Solution Manual Object-Oriented Programming in Java : A Graphical Approach, Preliminary Edition (Kathryn E. Sanders & Andy van Dam)
Solution Manual Starting Out with Java 5 : Control Structures to Objects (Tony Gaddis)
Solution Manual Starting Out with Java 5 : Early Objects (Tony Gaddis)
Solution Manual Introduction to Programming Using Java : An Object-Oriented Approach (2nd Ed., David Arnow, Scott Dexter & Gerald Weiss)
Solution Manual Computing with Java (2nd Ed., Art Gittleman)
Solution Manual Problem Solving with Java, Update (2nd Ed., Elliot B. Koffman & Ursula Wolz)
Solution Manual Starting Out with Alice : A Visual Introduction to Programming (Tony Gaddis)
Solution Manual Problem Solving and Program Design in C (4th Ed., Jeri Hanly & Elliot Koffman)
Solution Manual Problem Solving and Program Design in C (5th Ed., Jeri Hanly & Elliot Koffman)
Solution Manual Problem Solving and Program Design in C (6th Ed., Jeri Hanly & Elliot Koffman)
Solution Manual Starting Out with Visual Basic 2005 (3rd Ed., Tony Gaddis & Kip Irvine)
Solution Manual Starting Out with Visual Basic 6 (Tony Gaddis, Kip Irvine & Bruce Denton)
Solution Manual Starting Out with Visual Basic.Net (2nd Ed., Tony

Gaddis, Kip Irvine & Bruce Denton)
Solution Manual Computer Programming Fundamentals with Applications in Visual Basic® 6.0 (Mitchell Kerman & Ronald Brown)
Solution Manual Advanced VB.NET Alternate with VB.Net CD's (3rd Ed., Kip Irvine & Tony Gaddis)
Solution Manual Advanced Visual Basic 2005 (4th Ed., Kip Irvine & Tony Gaddis)
Solution Manual C# Software Solutions : Foundations of Program Design (John Lewis)
Solution Manual Problem Solving, Abstraction and Design Using C++, Visual C++.NET Edition (Frank Friedman & Elliot Koffman)
Solution Manual Ada 95 : Problem Solving and Program Design (3rd Ed., Michael Feldman & Elliot Koffman)
Solution Manual Programming and Problem Solving with Delphi (Mitchell Kerman)
Solution Manual C Program Design for Engineers (2nd Ed., Jeri Hanly & Elliot Koffman)
Solution Manual Data Abstraction & Problem Solving with C++ (5th ed., Frank Carrano)
Solution Manual Data Structures and Algorithm Analysis in C++ (2nd Ed., Mark Allen Weiss)
Solution Manual Data Structures and Algorithm Analysis in C++ (3rd Ed., Mark Allen Weiss)
Solution Manual Data Abstraction and Problem Solving with C++ : Walls and Mirrors (4th Ed., Frank Carrano)
Solution Manual Data Structures and Problem Solving Using C++ (2nd Ed., Mark Allen Weiss)
Solution Manual Data Structures and Algorithm Analysis in Java (2nd Ed., Mark Allen Weiss)
Solution Manual Data Structures in Java : From Abstract Data Types to the Java Collections Framework (Simon Gray)
Solution Manual Data Abstraction and Problem Solving with Java (2nd Ed., Frank Carrano & Janet Prichard)
Solution Manual Data Structures and Other Objects Using Java (3rd Ed., Michael Main)
Solution Manual Data Structures and Problem Solving Using Java (3rd Ed., Mark Allen Weiss)
Solution Manual Data Structures and Problem Solving Using Java (4th Ed., Mark Allen Weiss)
Solution Manual Java Software Structures : Designing and Using Data Structures (2nd Ed., John Lewis, Joseph Chase)
Solution Manual The Object of Data Abstraction and Structures (using Java) (David Riley)
Solution Manual Classic Data Structures in Java (Timothy Budd)
Solution Manual Data Structures in Java (Thomas A. Standish)
Solution Manual Data Structures, Algorithms and Software Principles in C (Thomas A. Standish)
Solution Manual Introduction to the Design and Analysis of Algorithms (1st Ed., Anany Levitin)
Solution Manual Introduction to the Design and Analysis of Algorithms

(2nd Ed., Anany Levitin)
Solution Manual Algorithm Design (Jon Kleinberg & Éva Tardos)
Solution Manual Data Structures and Algorithm Analysis in C (2nd Ed., Mark Allen Weiss)
Solution Manual Computer Algorithms : Introduction to Design and Analysis (3rd Ed., Sara Baase & Allen Van Gelder)
Solution Manual Artificial Intelligence : Structures and Strategies for Complex Problem Solving (6th Ed., George Luger)
Solution Manual Artificial Intelligence : A Modern Approach (2nd Ed., Stuart Russell & Peter Norvig)
Solution Manual The Complete A+ Guide to PC Repair (3rd Ed., Cheryl Schmidt)
Solution Manual The Complete A+ Guide to PC Repair (4th Ed., Cheryl Schmidt)
Solution Manual Complete Computer Repair Textbook (4th Ed., Cheryl Schmidt)
Solution Manual Computer Systems Organization and Architecture (John D. Carpinelli)
Solution Manual CMOS VLSI Design: A Circuits and Systems Perspective (3rd Ed., Neil Weste & David Harris)
Solution Manual Interactive Computer Graphics : A Top-Down Approach Using OpenGL (4th Ed., Edward Angel)
Solution Manual Interactive Computer Graphics : A Top-Down Approach Using OpenGL (5th Ed., Edward Angel)
Solution Manual File Structures : An Object-Oriented Approach with C++ (3rd Ed., Michael J. Folk, Bill Zoellick & Greg Riccardi)
Solution Manual Oracle 10g Programming : A Primer (Rajshekhar Sunderraman)
Solution Manual Databases, Types and the Relational Model (3rd Ed., C. J. Date & Hugh Darwen)
Solution Manual Fundamentals of Database Systems (5th Ed., Ramez Elmasri & Shamkant Navathe)
Solution Manual Database Systems : An Application-Oriented Approach, Introductory Version (2nd Ed., Michael Kifer, Arthur Bernstein & Philip M. Lewis)
Solution Manual Database Systems : An Application Oriented Approach, Complete Version (2nd Ed., Michael Kifer, Arthur Bernstein & Philip M. Lewis)
Solution Manual DataBase Systems : A Practical Approach to Design, Implementation and Management (4th Ed., Thomas M. Connolly & Carolyn E. Begg)
Solution Manual DataBase Systems : A Practical Approach to Design, Implementation and Management (5th Ed., Thomas M. Connolly & Carolyn E. Begg)
Solution Manual Database Systems : The Complete Book (2nd Ed., Hector Garcia-Molina, Jeffrey D. Ullman, Jennifer Widom)
Solution Manual A First Course in Database Systems (3rd Ed., Jeffrey D. Ullman, Jennifer Widom)
Solution Manual Fundamentals of Database Systems/Oracle 9i Programming (4th Ed., Ramez Elmasri, Shamkant B. Navathe & Rajshekhar Sunderraman)

Solution Manual An Introduction to Database Systems (8th Ed., C.J. Date)
Solution Manual Oracle 9i Programming : A Primer (Rajshekhar Sunderraman)
Solution Manual Elements of Information Theory (1st Ed., Thomas M. Cover & Joy A. Thomas)
Solution Manual Principles of Database Systems with Internet and Java Applications (Greg Riccardi)
Solution Manual Introduction to Data Mining (Pang-Ning Tan, Michael Steinbach & Vipin Kumar)
Solution Manual Data Mining: A Tutorial Based Primer (Richard Roiger & Michael Geatz)
Solution Manual Learning SQL : A Step-by-Step Guide Using Access (Sikha Bagui, Richard Earp)
Solution Manual Learning SQL : A Step-By-Step Guide Using Oracle (Richard Earp, Sikha Bagui)
Solution Manual Access 2007 Guidebook (6th Ed., Maggie Trigg & Phyllis Dobson)
Solution Manual Access 2003 Guidebook for Office XP (5th Ed., Maggie Trigg & Phyllis Dobson)
Solution Manual Implementing Databases in Oracle 9i (John Day & Craig Van Slyke)
Solution Manual Web 101: Making the Net Work for You (2nd Ed., Wendy Lehnert)
Solution Manual Web 101 (3rd Ed., Wendy G. Lehnert & Richard L. Kopec)
Solution Manual Web Developer Foundations : Using XHTML (2nd Ed., Terry Felke-Morris)
Solution Manual Web Development & Design Foundations With XHTML (3rd Ed., Terry Felke-Morris)
Solution Manual Web Development and Design Foundations with XHTML (4th Ed., Terry Felke-Morris)
Solution Manual Internet Effectively : A Beginner's Guide to the World Wide Web (Tyrone Adams & Sharon Scollard)
Solution Manual Light on the Web : Essentials to Making the 'Net Work for You (Wendy G. Lehnert)
Solution Manual Programming the World Wide Web (3rd Ed., Robert W. Sebesta)
Solution Manual Programming the World Wide Web (4th Ed., Robert W. Sebesta)
Solution Manual Programming the World Wide Web (5th Ed., Robert W. Sebesta)
Solution Manual Programming the World Wide Web (6th Ed., Robert W. Sebesta)
Solution Manual XML: Language Mechanics and Applications (Dwight Peltzer)
Solution Manual Practical Perl with CGI Applications (Elizabeth Chang)
Solution Manual Developing Web Applications with Active Server Pages (Thom Luce)
Solution Manual Structure and Interpretation of Signals and Systems (Edward A. Lee & Pravin Varaiya)

Solution Manual Languages and Machines : An Introduction to the Theory of Computer Science (2nd Ed., Thomas Sudkamp)
Solution Manual Languages and Machines : An Introduction to the Theory of Computer Science (3rd Ed., Thomas Sudkamp)
Solution Manual How to Break Software Security (James A. Whittaker & Herbert H. Thompson)
Solution Manual Software Quality Assurance : From Theory to Implementation (Daniel Galin)
Solution Manual Object Oriented Software Development Using Java (2nd Ed., Xiaoping Jia)
Solution Manual Introduction to the Team Software Process (Watts S. Humphrey)
Solution Manual Software Project Management : A Real-World Guide to Success (Joel Henry)
Solution Manual Software Engineering (7th Ed., Ian Sommerville)
Solution Manual Software Engineering (8th Ed., Ian Sommerville)
Solution Manual Software Engineering (9th Ed., Ian Sommerville)
Solution Manual Software Engineering (3rd Ed., Shari Lawrence Pfleeger & Joanne Atlee)
Solution Manual Software Engineering : Theory and Practice (4th Ed., Shari Lawrence Pfleeger & Joanne Atlee)
Solution Manual Object-Oriented Programming featuring Graphical Applications in Java (Michael Laszlo)
Solution Manual Project-Based Software Engineering : An Object-Oriented Approach (Evelyn Stiller & Cathie LeBlanc)
Solution Manual Engineering of Software, The: A Technical Guide for the Individual (Dick Hamlet & Joe Maybee)
Solution Manual Concepts of Programming Languages (7th Ed., Robert W. Sebesta)
Solution Manual Concepts of Programming Languages (8th Ed., Robert W. Sebesta)
Solution Manual Concepts of Programming Languages (9th Ed., Robert W. Sebesta)
Solution Manual Advanced Java : Internet Applications (2nd Ed., Art Gittleman)
Solution Manual Objects to Components with Java 2 Platform (Art Gittleman)
Solution Manual C for Java Programmers (Tomasz Muldner)
Solution Manual Pointers on C (Kenneth Reek)
Solution Manual C++ Programming with Design Patterns Revealed (Tomasz Muldner)
Solution Manual The C++ Programming Language (3rd Ed., Bjarne Stroustrup)
Solution Manual Operating Systems : A Systematic View (6th Ed., William S. Davis & T.M. Rajkumar)
Solution Manual Unix: The Textbook (2nd Ed., Syed Mansoor Sarwar, Robert Koretsky & Syed Aqeel Sarwar)
Solution Manual Operating Systems (3rd Ed., Gary Nutt)
Solution Manual LINUX & UNIX Programming Tools : A Primer for Software Developers (Syed Mansoor Sarwar & Khaled H. Al-Saqabi)

Solution Manual Addison-Wesley's Interactive Linux Tutorial and Reference (Edutrends, Inc.)
Solution Manual Linux : The Textbook (Syed Mansoor Sarwar, Robert Koretsky & Syed Aqeel Sarwar)
Solution Manual Kernel Projects for Linux (Gary Nutt)
Solution Manual OSP : An Environment for Operating System Projects (Michael Kifer & Scott A. Smolka)
Solution Manual Distributed Computing : Principles and Applications (M.L. Liu)
Solution Manual Distributed Operating Systems and Algorithm Analysis (Randy Chow & Theodore Johnson)
Solution Manual Mastering Networks : An Internet Lab Manual (Jorg Liebeherr & Magda El Zarki)
Solution Manual Computer Networking Complete Package (3rd Ed., James Kurose & Keith Ross)
Solution Manual Computer Networking : A Top-Down Approach Featuring the Internet (3rd Ed., James Kurose & Keith Ross)
Solution Manual Computer Networking : A Top-Down Approach (4th Ed., James Kurose & Keith Ross)
Solution Manual Computer Networking : A Top-Down Approach (5th Ed., James Kurose & Keith Ross)
Solution Manual Producing Great Sound for Film and Video (3rd Ed., Jay Rose)
Solution Manual Network Management : Principles and Practice (Mani Subramanian)
Solution Manual Computer Security : Art and Science (Matt Bishop)
Solution Manual Introduction to Computer Security (Matt Bishop)
Solution Manual Creating Powerful Brands (4th Ed., Leslie de Chernatony, Malcolm McDonald, Elaine Wallace)
Solution Manual How to Break Software Security (James A. Whittaker & Herbert H. Thompson)
Solution Manual Parallel Programming in C with MPI and Open MP (Michael Quinn)
Solution Manual Modern Recording Techniques (6th Ed., Miles Huber & Runstein)
Solution Manual Creating Powerful Radio : Getting, Keeping and Growing Audiences News, Talk, Information & Personality Broadcast, HD, Satellite & Internet (Valerie Geller)
Solution Manual Electronic Media Law and Regulation (5th Ed., Kenneth Creech)
Solution Manual Electronic Media Management, Revised (5th Ed., Pringle & Starr)
Solution Manual Convergent Journalism an Introduction: Writing and Producing Across Media (Quinn & Filak)
Solution Manual Flash Journalism : How to Create Multimedia News Packages (Mindy McAdams)

322. 4075 Solutions manual and Test Banks to Electrical, Electronics and Computer Engineering Books - part2

Newsgroup: rec.radio.amateur.misc
Date: 2011-03-29 18:15:11 UTC
From: BERGH <mattosbw1@gmail.com>
Message-ID: <1e0e043d-c7ba-4430-83b2-0a9a1a73b6a1@l2g2000prg.googlegroups.com>
Source record: 4612

List of Solutions Manuals and Test Banks

---

contact me to : mattosbw1@gmail.com
mattosbw1(at)gmail.com

NOTE : "THIS SERVICE IS NOT AVAILABLE FOR : CHINA, INDIA, RUSSIA, PAKISTAN, IRAQ, IRAN, PHILIPPINES, NORTH KOREA, NEPAL, BANGLADESH, SRI LANKA, MALDIVES, BHUTAN & COLOMBIA".

If your wanted solutions manual is not in this list, also can ask me if is available (it is a partial list). Then if you need solutions manual only contact me by email.

"ARE NOT AVAILABLES BOOKS IN DIGITAL FORMAT", ONLY SOLUTIONS MANUALS AND TEST BANKS.

This same "list of titles" of texts with availables solutions manual and/or test banks is for download from :

http://www.megaupload.com/?d=ADDS77XH

I do not review the forums, just send me an email.

- Electrical, Electronics & Computer Engineering :

Solution Manual Design for Electrical and Computer Engineers (J. Eric Salt & Robert Rothery)
Solution Manual Electrical Engineering : Principles and Applications (3rd Ed., Hambley)
Solution Manual Electrical Engineering : Principles and Applications (4th Ed., Hambley)
Solution Manual Electrical Engineering : Principles and Applications (5th Ed., Hambley)
Solution Manual Electronics (2nd Ed., Hambley)
Solution Manual Electronics and Communications for Scientists and Engineers (Martin Plonus)
Solution Manual Cryptography & Network Security (Behrouz A Forouzan)
Solution Manual Data Communications and Networking (3rd Ed., Behrouz A. Forouzan)
Solution Manual Data Communications and Networking (4th Ed., Behrouz A. Forouzan)
Solution Manual TCP/IP Protocol Suite (2nd Ed., Behrouz Forouzan)
Solution Manual TCP/IP Protocol Suite (3rd Ed., Behrouz Forouzan)
Solution Manual TCP/IP Protocol Suite (4th Ed., Behrouz Forouzan)

Solution Manual Local Area Networks (Behrouz A Forouzan)
Solution Manual Analog Integrated Circuits for Communication : Principles, Simulation and Design (2nd Ed., Donald Pederson & Kartikeya Mayaram)
Solution Manual Satellite Communications (2nd Ed, Pratt, Bostian, Allnutt)
Solution Manual Business Data Communications (Behrouz A Forouzan)
Solution Manual Logic and Computer Design Fundamentals (4th Ed., Mano & Kime)
Solution Manual Linear Robust Control (Michael Green, David J. N. Limebeer)
Solution Manual Adaptive Control (2nd Ed., Karl Johan Astrom, Bjorn Wittenmark)
Solution Manual Digital Control Engineering : Analysis and Design (M. Sami Fadali & Antonio Visioli)
Solution Manual Computer-Controlled Systems : Theory and Design (3rd Ed., Karl Johan Astrom & Bjorn Wittenmark)
Solution Manual Electric Circuits (7th Ed., Nilsson & Riedel)
Solution Manual Electric Circuits (8th Ed., Nilsson & Riedel)
Solution Manual Electric Circuits (9th Ed., Nilsson & Riedel)
Solution Manual Introductory Circuits for Electrical and Computer Engineering (James Nilsson, Susan Riedel)
Solution Manual Electromagnetic Noise and Quantum Optical Measurements (Hermann A. Haus)
Solution Manual Optical Fiber Communications (4th Ed., Gerd Keiser)
Solution Manual Electromagnetics (Branislav M. Notaros)
Solution Manual Electromagnetics for Engineers (Fawwaz T. Ulaby)
Solution Manual Fundamentals of Applied Electromagnetics (5th Ed., Fawwaz T. Ulaby)
Solution Manual Fundamentals of Applied Electromagnetics (6th Ed., Ulaby, Michielssen & Ravaioli)
Solution Manual Applied Electromagnetics : Early Transmission Lines Approach (Stuart Wentworth)
Solution Manual Fundamentals of Electromagnetics with Engineering Applications (Stuart Wentworth)
Solution Manual Electromagnetics for Engineers : With Applications to Digital Systems and Electromagnetic Interference (Clayton Paul)
Solution Manual MEMS & Microsystems : Design and Manufacture (1st Ed., Tai-Ran Hsu)
Solution Manual MEMS & Microsystems : Design, Manufacture, and Nanoscale Engineering (2nd Ed., Tai-Ran Hsu)
Solution Manual Probability and Statistics for Engineering and the Sciences (7th Ed., Jay L. DeVore)
Solution Manual Probability and Stochastic Processes : A Friendly Introduction for Electrical and Computer Engineers (2nd Ed., Roy Yates & David Goodman)
Solution Manual Process Systems Analysis and Control (3rd Ed. Donald Coughanowr, Steven LeBlanc)
Solution Manual Fuel Cell Engines (Matthew M. Mench)
Solution Manual Fuel Cell Fundamentals (1st Ed., Ryan O'Hayre, et. al)

Solution Manual Fuel Cell Fundamentals (2nd Ed., Ryan O'Hayre, Whitney Colella, Suk-Won Cha, Fritz Prinz)
Solution Manual Control Systems Engineering (4th Ed., Norman Nise)
Solution Manual Control Systems Engineering (5th Ed., Norman Nise)
Solution Manual Control Systems Engineering (6th Ed., Norman Nise)
Solution Manual Automatic Control Systems (8th Ed., Benjamin C. Kuo, Farid Golnaraghi)
Solution Manual Automatic Control Systems (9th Ed., Farid Golnaraghi, Benjamin C. Kuo)
Solution Manual Basic Electricity for Industry : Circuits and Machines - Canadian Edition (Doug Edgar)
Solution Manual Basic Engineering Circuit Analysis (8th Ed., Irwin & Nelms)
Solution Manual Basic Engineering Circuit Analysis (9th Ed., Irwin & Nelms)
Solution Manual Basic Engineering Circuit Analysis (10th Ed., Irwin & Nelms)
Solution Manual A Brief Introduction to Circuit Analysis (J. David Irwin)
Solution Manual Semiconductor Devices : Basic Principles (Jasprit Singh)
Solution Manual Semiconductor Device Fundamentals (Robert F. Pierret)
Solution Manual Advanced Semiconductor Fundamentals (2nd Ed., Robert F. Pierret)
Solution Manual Device Electronics for Integrated Circuits (3rd Ed., Richard S. Muller, Theodore I. Kamins)
Solution Manual Fundamentals of Semiconductor Devices (Anderson)
Solution Manual Scientific Computing (2nd Ed., Michael T. Heath)
Solution Manual Scientific Computing with Case Studies (Dianne P. O'Leary)
Solution Manual Pattern Recognition and Machine Learning (Christopher M. Bishop)
Solution Manual Modern Semiconductor Devices for Integrated Circuits (Chenming C. Hu)
Solution Manual Analysis and Design of Analog Integrated Circuits (4th Ed., Paul Gray, et al.)
Solution Manual Analysis and Design of Analog Integrated Circuits (5th Ed., Paul Gray)
Solution Manual Analysis and Design of Digital Integrated Circuits (3rd Ed., Hodges)
Solution Manual Introduction to Electric Circuits (6th Ed., Dorf & Svoboda)
Solution Manual Introduction to Electric Circuits (7th Ed., Dorf & Svoboda)
Solution Manual Introduction to Electric Circuits (8th Ed., Dorf & Svoboda)
Solution Manual Modulation, Detection and Coding (Tommy Öberg)
Solution Manual Principles of Communications: Systems, Modulation, and Noise (5th Ed., R.E. Ziemer & W.H. Tranter)
Solution Manual Principles of Communications (6th Ed., R.E. Ziemer &

W.H. Tranter)
Solution Manual The Analysis and Design of Linear Circuits (4th Ed, Thomas & Rosa)
Solution Manual The Analysis and Design of Linear Circuits : Laplace Early (4th Ed, Thomas & Rosa)
Solution Manual The Analysis and Design of Linear Circuits (5th Ed, Thomas)
Solution Manual The Analysis and Design of Linear Circuits (6th Ed, Thomas, Rosa & Toussaint)
Solution Manual Dynamic Modeling and Control of Engineering Systems (2nd Ed., J. Lowen Shearer, Bohdan Kulakowski, John Gardner)
Solution Manual Modern Control Systems (11th Ed., Dorf & Bishop)
Solution Manual Modern Control Systems (12th Ed., Dorf & Bishop)
Solution Manual System Dynamics (1st Ed., William Palm III)
Solution Manual System Dynamics (2nd Ed., William Palm III)
Solution Manual System Dynamics and Response (S. Graham Kelly)
Solution Manual System Dynamics for Engineering Students : Concepts and Applications (Nicolae Lobontiu)
Solution Manual Optimal Control (2nd Ed., Frank Lewis & Vassilis Syrmos)
Solution Manual Optimal Control Theory : An Introduction (Donald E. Kirk)
Solution Manual Power Electronics (1st Ed., Daniel W. Hart)
Solution Manual Power Electronic Circuits (Issa Batarseh)
Solution Manual Power Electronics : Circuits, Devices and Applications (3rd Ed., Muhammad H. Rashid)
Solution Manual Power Electronics : Converters, Applications, and Design (3rd Ed., Ned Mohan, Tore Undeland & William Robbins)
Solution Manual Intuitive Probability and Random Processes using MATLAB (Steven Kay)
Solution Manual Signals and Systems using MATLAB (Luis Chaparro)
Solution Manual Analog Signals and Systems (Erhan Kudeki & David C. Munson, Jr.)
Solution Manual Continuous and Discrete Time Signals and Systems (Mrinal Mandal, Amir Asif)
Solution Manual Digital Signal and Image Processing (Tamal Bose)
Solution Manual Digital Image Processing (2nd Ed., Rafael Gonzalez, Richard Woods)
Solution Manual A Wavelet Tour of Signal Processing : The Sparse Way (3rd Ed., Stephane Mallat)
Solution Manual Discrete-Time Signal Processing (2nd Ed., Alan Oppenheim, Ronald Schafer, John Buck)
Solution Manual Discrete-Time Signal Processing (3rd Ed., Alan Oppenheim & Ronald Schafer)
Solution Manual Signal Processing First (James H. McClellan, Ronald W. Schafer, Mark A. Yoder)
Solution Manual Statistical Digital Signal Processing and Modeling (Monson Hayes)
Solution Manual Digital Signal Processing (Thomas J. Cavicchi)
Solution Manual Digital Signal Processing System Design : LabVIEW-

Based Hybrid Programming (2nd Ed., Kehtarnavaz)
Solution Manual Digital Signal Processing (2nd Ed., Mitra)
Solution Manual Digital Signal Processing (3rd Ed., Mitra)
Solution Manual Digital Signal Processing (4th Ed., Mitra)
Solution Manual Digital Signal Processing (4th Ed., John G. Proakis, Dimitris K Manolakis)
Solution Manual Digital Signal Processing (Charles Schuler & Mahesh Chugani)
Solution Manual Digital Signal Processing : Fundamentals and Applications (Li Tan)
Solution Manual Digital Signal Processing : An Experimental Approach (Shlomo Engelberg)
Solution Manual Digital Signal Processing : System Analysis and Design (Paulo S. R. Diniz)
Solution Manual Digital Signal Processing : A Modern Introduction (Ashok Ambardar)
Solution Manual Engineering Optimization : Theory and Practice (4th Ed., Singiresu S. Rao)
Solution Manual Applied Optimization with MATLAB Programming (1st Ed., P. Venkataraman)
Solution Manual Applied Optimization with MATLAB Programming (2nd Ed., P. Venkataraman)
Solution Manual Introduction to Applied Optimization (2nd Ed., Urmila Diwekar)
Solution Manual Logic Synthesis and Verification Algorithms (Gary Hachtel & Fabio Somenzi)
Solution Manual Adaptive Filtering : Algorithms and Practical Implementation (3rd Ed., Paulo S. R. Diniz)
Solution Manual Introduction to Scientific Computation and Programming (Daniel T. kaplan)
Solution Manual Principles of Signal Detection and Parameter Estimation (Bernard C. Levy)
Solution Manual Electric Machines Analysis and Design Applying MatLab (Cathey)
Solution Manual Fundamentals of Electrical Engineering (Giorgio Rizzoni)
Solution Manual Principles and Applications of Electrical Engineering (4th Ed, Rizzoni)
Solution Manual Principles and Applications of Electrical Engineering (5th Ed, Rizzoni)
Solution Manual Fundamentals of Electric Circuits (2nd Ed., Alexander & Sadiku)
Solution Manual Fundamentals of Electric Circuits (3rd Ed., Alexander & Sadiku)
Solution Manual Fundamentals of Electric Circuits (4th Ed., Alexander & Sadiku)
Solution Manual MSP430 Microcontroller Basics (John Davies)
Solution Manual Programming Massively Parallel Processors : A Hands-on Approach (David Kirk & Wen-mei Hwu)
Solution Manual Embedded Systems and Software Validation (Abhik

Roychoudhury)
Solution Manual Embedded Systems Design with Platform FPGAs : Principles and Practices (Ronald Sass, Andrew Schmidt)
Solution Manual Embedded DSP Processor Design : Application Specific Instruction Set Processors (Dake Liu)
Solution Manual Embedded Microcontrollers and Processor Design (Charles Greg Osborn)
Solution Manual Embedded System Design : A Unified Hardware/Software Introduction (Vahid & Givargis)
Solution Manual Embedded Microcomputer Systems : Real Time Interfacing (2nd Ed., Jonathan W. Valvano)
Solution Manual Introduction to Programming with C++ (2nd Ed., Y. Daniel Liang)
Solution Manual Matlab : A Practical Introduction to Programming and Problem Solving (Stormy Attaway)
Solution Manual Principles of Computer System Design : An Introduction (Jerome Saltzer & M. Frans Kaashoek)
Solution Manual The Illustrated Network : How TCP/IP Works in a Modern Network (Walter Goralski)
Solution Manual Electronic Design Automation : Synthesis, Verification, and Test (Laung-Terng Wang, Yao-Wen Chang & Kwang-Ting Cheng)
Solution Manual Digital Design (Frank Vahid)
Solution Manual Digital Design with RTL Design, Verilog and VHDL (2nd Ed., Frank Vahid)
Solution Manual Digital Logic Design Principles (Balabanian & Carlson)
Solution Manual Fundamentals of Logic Design (5th Ed., Charles H. Roth)
Solution Manual Real-Time Systems and Software (Alan Shaw)
Solution Manual Introduction to VLSI Circuits and Systems (John P. Uyemura)
Solution Manual Chip Design for Submicron VLSI : CMOS Layout & Simulation (John Uyemura)
Solution Manual Classical Electrodynamics (2nd Ed., John David Jackson)
Solution Manual Objects, Abstraction, Data Structures and Design : Using C++ (Elliot B. Koffman & Paul A. T. Wolfgang)
Solution Manual Objects, Abstraction, Data Structures and Design Using Java Version 5.0 (Elliot B. Koffman & Paul A. T. Wolfgang)
Solution Manual Computer Architecture and Organization : An Integrated Approach (Murdocca & Heuring)
Solution Manual Wiley Pathways Networking Basics (1st Ed., Ciccarelli, Faulkner, FitzGerald, Dennis & Miller)
Solution Manual Software Engineering : Principles and Practice (3rd Ed., Hans van Vliet)
Solution Manual Software Design : From Programming to Architecture (Eric Braude)
Solution Manual Software Engineering : An Object-Oriented Perspective (Eric Braude)
Solution Manual Software Engineering : Modern Approaches (2nd Ed.,

Eric Braude & Michael Bernstein)
Solution Manual Neural and Adaptive Systems : Fundamentals through Simulations (José Principe, Neil Euliano & W. Curt Lefebvre)
Solution Manual Fundamentals of Electronic Circuit Design (David J. Comer & Donald T. Comer)
Solution Manual Microelectronic Circuit Design (2nd Ed., Jaeger & Blalock)
Solution Manual Microelectronic Circuit Design (3rd Ed., Jaeger & Blalock)
Solution Manual Microelectronic Circuit Design (4th Ed., Jaeger & Blalock)
Solution Manual Introduction to Microelectronic Fabrication : Volume 5 of Modular Series on Solid State Devices (2nd Ed., Richard Jaeger)
Solution Manual Microelectronic Circuits (5th Ed., Adel S. Sedra, K. C. Smith)
Solution Manual VHDL for Engineers (Kenneth Short)
Solution Manual Fundamentals of Digital Logic with VHDL Design (1st Ed., Brown & Vranesic)
Solution Manual Fundamentals of Digital Logic with VHDL Design (2nd Ed., Brown & Vranesic)
Solution Manual Fundamentals of Digital Logic with VHDL Design (3rd Ed., Brown & Vranesic)
Solution Manual CMOS Analog Circuit Design (2nd Ed., Phillip E. Allen, Douglas R. Holberg)
Solution Manual Design of Analog CMOS Integrated Circuits (Behzad Razavi)
Solution Manual Design of Integrated Circuits for Optical Communications (Behzad Razavi)
Solution Manual Fundamentals of Microelectronics, Preliminary Edition (Behzad Razavi)
Solution Manual Fundamentals of Microelectronics (1st Ed., Behzad Razavi)
Solution Manual Design with Operational Amplifiers and Analog Integrated Circuits (3rd Ed., Sergio Franco)
Solution Manual Your UNIX : The Ultimate Guide (1st Ed., Sumitabha Das)
Solution Manual Your UNIX : The Ultimate Guide (2nd Ed., Sumitabha Das)
Solution Manual Microwave Engineering (Annapurna Das)
Solution Manual Microwave Engineering (3rd Ed., David M. Pozar)
Solution Manual Microwave and RF Design of Wireless Systems (David M. Pozar)
Solution Manual Introduction to Wireless Systems (P. M. Shankar)
Solution Manual Microwave Transistor Amplifiers : Analysis and Design (2nd Ed., Guillermo Gonzalez)
Solution Manual Control Systems (Madan Gopal)
Solution Manual A First Lab in Circuits and Electronics (Yannis Tsividis)
Solution Manual Power System Analysis : Analysis and Design (John Grainger)

Solution Manual Power Systems Analysis (2nd Ed., Hadi Saadat)
Solution Manual Power Systems Analysis and Design (4th Ed., J.Duncan Glover and Mulukutla S. Sarma)
Solution Manual An Introduction to Digital and Analog Communications (2nd Ed., Simon Haykin & Michael Moher)
Solution Manual Communication Systems (4th Ed., Simon Haykin)
Solution Manual Communication Systems (5th Ed., Simon Haykin)
Solution Manual Communication Systems (4th Ed., A. Bruce Carlson, Paul B. Crilly, Janet Rutledge)
Solution Manual Communication Systems (5th Ed., A. Bruce Carlson, Paul B. Crilly)
Solution Manual Signals and Systems (2nd Ed., Simon Haykin & Barry Van Veen)
Solution Manual Introduction to Computing Systems : From bits & gates to C & beyond (1st Ed., Patt and Patel)
Solution Manual Introduction to Computing Systems : From bits & gates to C & beyond (2nd Ed., Patt and Patel)
Solution Manual Elements of the Theory of Computation (2nd Ed., Lewis & Papadimitriou)
Solution Manual Introduction to Languages and the Theory of Computation (3rd Ed., John Martin)
Solution Manual Introduction to Languages and the Theory of Computation (4th Ed., John Martin)
Solution Manual Mechanical & Electrical Systems in Buildings (4th Ed., Richard Janis & William Tao)
Solution Manual Silicon VLSI Technology : Fundamentals, Practice, and Modeling (Plummer, Deal & Griffin)
Solution Manual Dynamic Electromagnetics (Paul Diament)
Solution Manual Engineering Electromagnetics (2nd Ed., Nathan Ida)
Solution Manual Engineering Electromagnetics (Kenneth Demarest)
Solution Manual Field and Wave Electromagnetics (1st Ed., David Cheng)
Solution Manual Fundamentals of Engineering Electromagnetics (David Cheng)
Solution Manual Information Modeling and Relational Databases (2nd Ed., Terry Halpin & Tony Morgan)
Solution Manual Probability, Statistics, and Random Processes For Electrical Engineering (3rd Ed., Alberto Leon-Garcia)
Solution Manual Detection and Estimation Theory (Thomas Schonhoff & Arthur Giordano)
Solution Manual The Intel Microprocessors (8th Ed., Barry B. Brey)
Solution Manual Wireless Networking (Kumar, Manjunath & Kuri)
Solution Manual Wireless Communications : Principles and Practice (2nd Ed., Theodore S. Rappaport)
Solution Manual Digital Electronics and Design with VHDL (Volnei A. Pedroni)
Solution Manual System-on-Chip Test Architectures : Nanometer Design for Testability (Wang, Stroud & Touba)
Solution Manual Digital Design (Verilog) : An Embedded Systems Approach Using Verilog (Peter Ashenden)
Solution Manual Digital Design (VHDL) : An Embedded Systems Approach

Using VHDL (Peter Ashenden)
Solution Manual Computer Organization and Design : The Hardware/ Software Interface (3rd Ed., Patterson & Hennessy)
Solution Manual Computer Organization and Design : The Hardware/ Software Interface (4th Ed., Patterson & Hennessy)
Solution Manual Fundamentals of Computer Organization and Design (Sivarama P. Dandamudi)
Solution Manual Wireless Communications & Networking (Vijay Garg)
Solution Manual Network Flows : Theory, Algorithms, and Applications (Ravindra K. Ahuja, Thomas L. Magnanti, James B. Orlin)
Solution Manual Network Analysis, Architecture, and Design (3rd Ed., James McCabe)
Solution Manual Computer Networks : A Systems Approach (4th Ed., Peterson & Davie)
Solution Manual Computer Networks ISE : A Systems Approach (4th Ed., Peterson & Davie)
Solution Manual Digital Design and Computer Architecture (David Harris & Sarah Harris)
Solution Manual Fault-Tolerant Systems (Israel Koren & C. Krishna)
Solution Manual Computer Architecture : Pipelined and Parallel Processor Design (Michael J. Flynn)
Solution Manual Computer Architecture : A Quantitative Approach (4th Ed., Hennessy & Patterson)
Solution Manual High-Performance Embedded Computing : Architectures, Applications, and Methodologies (Wayne Wolf)
Solution Manual Pattern Recognition (3rd Ed., Theodoridis & Koutroumbas)
Solution Manual Pattern Recognition (4th Ed., Theodoridis & Koutroumbas)
Solution Manual Data Mining : Concepts and Techniques (2nd Ed., Han & Kamber)
Solution Manual Commonsense Reasoning (Erik Mueller)
Solution Manual Introduction to Data Compression (3rd Ed., Khalid Sayood)
Solution Manual Programming Language Pragmatics (2nd Ed., Michael Scott)
Solution Manual Programming Language Pragmatics (3rd Ed., Michael Scott)
Solution Manual Computer Graphics for Java Programmers (2nd Ed., Leen Ammeraal & Kang Zhang)
Solution Manual Database Modeling and Design : Logical Design (4th Ed., Teorey, Lightstone & Nadeau)
Solution Manual Computers As Components : Principles of Embedded Computing System Design (1st Ed., Wayne Wolf)
Solution Manual Computers As Components : Principles of Embedded Computing System Design (2nd Ed., Wayne Wolf)
Solution Manual Virtual Machines : Versatile Platforms for Systems and Processes (Jim Smith & Ravi Nair)
Solution Manual Comprehensive Functional Verification : The Complete Industry Cycle (Wile, Goss & Roesner)

Solution Manual User Interface Design and Evaluation (Stone, Jarrett, Woodroffe & Minocha)
Solution Manual Network Algorithmics : An Interdisciplinary Approach to Designing Fast Networked Devices (George Varghese)
Solution Manual Data Modeling Essentials (3rd Ed., Simsion & Witt)
Solution Manual A Student Guide to Object-Oriented Development (Carol Britton & Jill Doake)
Solution Manual Routing, Flow, and Capacity Design in Communication and Computer Networks (Pioro & Medhi)
Solution Manual Knowledge Representation and Reasoning (Brachman & Levesque)
Solution Manual Communication Networking : An Analytical Approach (Anurag Kumar, D. Manjunath & Joy Kuri)
Solution Manual Principles and Practices of Interconnection Networks (Dally & Towles)
Solution Manual Game Physics (David Eberly)
Solution Manual Engineering a Compiler (Keith Cooper & Linda Torczon)
Solution Manual Constraint Processing (Rina Dechter)
Solution Manual Design Methods for Reactive Systems : Yourdon, Statemate, and the UML (R. J. Wieringa)
Solution Manual Temporal Data & the Relational Model (C.J. Date, Darwen & Lorentzos)
Solution Manual Java Made Simple (2nd Ed., P. K. McBride)
Solution Manual The Firmware Handbook (Jack Ganssle)
Solution Manual Optical Networks : A Practical Perspective (2nd Ed., Ramaswami & Sivarajan)
Solution Manual Optical Networks : A Practical Perspective (3rd Ed., Ramaswami, Sivarajan & Sasaki)
Solution Manual Usability Engineering : Scenario-Based Development of Human-Computer Interaction (Rosson & Carroll)
Solution Manual The Designer's Guide to VHDL (2nd Ed., Peter Ashenden)
Solution Manual Transactional Information Systems : Theory, Algorithms, and the Practice of Concurrency Control and Recovery (Weikum & Vossen)
Solution Manual Parallel Computer Architecture : A Hardware/Software Approach (Culler, Singh & Gupta)
Solution Manual Advanced Compiler Design and Implementation (Steven Muchnick)
Solution Manual Parallel Programming with MPI (Peter Pacheco)
Solution Manual Distributed Algorithms (Nancy Lynch)
Solution Manual Electrical and Electronic : Principles and Technology (3rd Ed., John Bird)
Solution Manual Electrical and Electronic : Principles and Technology (4th Ed., John Bird)
Solution Manual Electrical Circuit Theory and Technology (3rd Ed., John Bird)
Solution Manual Electrical Circuit Theory and Technology (4th Ed., John Bird)
Solution Manual Electronic Circuits : Fundamentals & Applications (3rd Ed., Mike Tooley)

Solution Manual A Practical Guide to SysML : The Systems Modeling Language (Friedenthal, Moore & Steiner)
Solution Manual Multidimensional Signal, Image, and Video Processing and Coding (John Woods)
Solution Manual Bioelectrical Signal Processing in Cardiac and Neurological Applications (Leif Sörnmo & Pablo Laguna)
Solution Manual Foundations of Analog and Digital Electronic Circuits (Anant Agarwal & Jeffrey Lang)
Solution Manual Introduction to Linear Circuit Analysis and Modelling : From DC to RF (Luis Moura & Izzat Darwazeh)
Solution Manual Embedded Systems Architecture : A Comprehensive Guide for Engineers and Programmers (Tammy Noergaard)
Solution Manual Bioimpedance and Bioelectricity Basics (2nd Ed., Grimnes & Martinsen)
Solution Manual Simulation with Arena (5th Ed., Kelton, Sadowski & Swets)
Solution Manual Simulation Modeling and Analysis with ARENA (Tayfur Altiok & Benjamin Melamed)
Solution Manual The Visual Story : Creating the Visual Structure of Film, TV and Digital Media (2nd Ed., Bruce Block)
Solution Manual The Shut Up and Shoot Documentary Guide : A Down & Dirty DV Production (Anthony Artis)
Solution Manual Portable Video : ENG & EFP (5th Ed., Medoff & Fink)
Solution Manual Voice and Vision : A Creative Approach to Narrative Film and DV Production (Mick Hurbis-Cherrier)

The ARRL Contest Update

Published by the American Radio Relay League
**********************************************

March 30, 2011

Editor: Ward Silver, N0AX <rate-sheet@arrl.org>

==> IN THIS ISSUE

- VHF Spring Sprints Spring Forth
- MO, MT, NM QSO Parties
- Radical Changes to Poisson d'Avril Contest
- New VHF+ Radio Gear
- NIST Survey of Radio Users
- Low-Band Antennas in Mongolia
- CW Sweepstakes Results Online
- Propagation Forecast Updates
- A USB Mill
- Radiation and Radio

NEW HF OPERATORS - THINGS TO DO

For those of you getting your feet wet in the world of CW, the QRP
Amateur Radio Club's Spring QSO Party is a great mid-to-low speed
exercise for your sending and receiving skills alike. While you can
participate in the QRO class, if you dare, turn down the power on your
rig and prepared to be surprised!

BULLETINS

You HAVE filed your comments on HR 607 <http://www.arrl.org/hr-607>,
haven't you?

BUSTED QSOS

So months with five weekends come more frequently than every 823 years
as suggested in the last issue. Your editor will serve 823 seconds in
the Contest Update penalty box for insufficient skepticism and lack of
due diligence. Five-weekend months do play hob with contest scheduling,
though. (Thanks, Tom N1MM) Also, it was David N6AN (not N6EN) who gets
credit for the California QSO Party item in the previous issue.
(Thanks, Paul N6LL)

CONTEST SUMMARY
```

Complete information for all contests follows the Conversation section

April 2-3

- Poisson d'Avril (Apr 1)
- Second Class Operators CW Bash
- LZ Open 40 Meter Contest--CW
- QRP ARCI Spring QSO Party--CW
- SP DX Contest
- EA RTTY Contest
- MO QSO Party
- QCWA Spring QSO Party
- ARS Spartan Sprint--CW (Apr 5)

April 9-10

- SNS and NS Weekly Sprints--CW (Apr 8)
- EU Spring Sprints--CW
- Montana QSO Party
- Worldwide EME Contest
- Japan International DX Contest--CW
- PODXS 31 Flavors Contest
- New Mexico QSO Party
- Georgia QSO Party
- Yuri Gagarin DX Contest--CW
- VHF Spring Sprints (Apr 11)
- International Vintage Contest (Apr 11)

==> NEWS, PRESS RELEASES, AND GENERAL INTEREST

We have several new products of interest to VHF+ contesters for the coming summer VHF+ contest season. First, M2 has a brand-new solid-state kilowatt 6 meter amplifier, the 6M-1000 <http://www.m2inc.com/products/6m1000.html>. 80 watts of input power will produce the full output so your all-band radio should be able to do the job. A 2 meter version is reportedly in the works, as well. At a slightly lower output power, Kanga US <http://www.kangaus.com/> has new 6 and 2 meter converter kits, plus CW source kits for 6 and 2 meters designed by Rick KK7B. And finally, take a look at the Fall 2010 issue of CQ-VHF <http://www.cq-vhf.com/> for a 70 cm tracking beacon by WC5Z.

The ill-advised proposal <http://www.arrl.org/hr-607> to "re-purpose" some of the amateur 70 cm privileges is deflecting amateur attention from another possible use of spectrum for broadband networking. The LightSquared <http://en.wikipedia.org/wiki/LightSquared> company is proposing to place high-power microwave transmitters adjacent to the GPS downlink frequencies, something that is very alarming to the GPS community. As hams know well, if strong enough even a perfectly clean signal will cause overload problems in an insufficiently selective receiver. With GPS being a key navigation technology this issue bears watching as it continues to evolve.

Hams should be sure to use their frequency allocations because the inquisitive souls at Microsoft have devised a system

<http://www.networkworld.com/news/2011/032511-usenix-microsoft-spectrum.html?hpg1=bn> for measuring whether licensed radio frequencies are being used by those who own the rights to the spectrum. I wonder if this tool could be used to find a clear run frequency during major contests? (Thanks, Bill W7KXB)

NASA has launched a program to develop spaceflight kits for high school teachers and students to build and fly on sub-orbital flights. As reported in the 27 March AMSAT <http://amsat.org> bulletin ANS-086.07, "NASA <http://www.nasa.gov/centers/ames/news/releases/2011/11-14AR.html> says its Emerging Commercial Space Office (ECSO) is teaming with Make Magazine <http://www.makezine.com/>, and Teachers in Space <http://www.teachersinspace.org/> to help develop spaceflight kits that high school teachers and students can build and fly on suborbital flights." The rules <http://www.makezine.com/space/rules> have been published by Make and proposals are due by the end of April.

The broadcast band seems to have been around since KDKA <http://en.wikipedia.org/wiki/KDKA_%28AM%29> first went live in 1920 but it did not always have its present configuration. On 29 March 1941, channel assignments underwent a grand shuffle <http://www.wired.com/thisdayintech/2011/03/0329radio-stations-shuffle-frequencies/>, creating clear-channel frequencies and reserving others for local use. The top end of the "BC Band" moved higher to 1600 kHz, as well.

Pileup! <http://www.helsinki.fi/%7Ekorpela/PU/PU.html> editor, Ilkka OH1WZ <oh1wz@lots_of_spam-sral.fi> writes to encourage contributions to this free, on-line talkoo (joint-work) journal. The next issue is to be released at the end of May - if you have an idea for an article, contact Ilkka or his co-editors, OH7WV <oh7wv@less_spam-sral.fi> and OH6KZP <oh6kzp@just_spam-sral.fi>. Each issue has hundreds of readers in the US, Canada, Europe, and beyond!

Another online magazine is ready for your inspection, as well. The April 2011 edition of WorldRadio Online <http://www.worldradiomagazine.com/> magazine is live. Among other things, well-known propagation author and contester Carl K9LA writes the "Propagation" column - always a good read. (Thanks, Editor Richard KI6SN)

This week's Science News included an article <http://www.sciencenews.org/view/generic/id/70468/title/Suns_doldrums_likely_to_last> about sunspots, in which it is expected that the cycle will peak on schedule in 2013 or 2014 and average activity will remain in the doldrums for a while. It's that darn meridional flow, apparently! (Thanks, Bob KY7O)

Both Spock (Leonard Nimoy) and Captain Kirk (William Shatner) turned 80 during the past week - do they still blow out candles on those far-off star dates or just deactivate the photon emitters?

The New York QSO Party has changed some of its rules regarding mobile operation. Writes sponsor representative, Paul K2DB, "We have decided that there needed to be more clarification on the Mobile Category. With research and feedback, we decided that we needed to add another category to the Class Entries." See the NYQP web site for more information <http://www.nyqp.org/>.

Mike Koss W9SU, owner of Industrial Communications Engineers, Ltd <http://www.iceradioproducts.com/>. (ICE) passed away suddenly this past weekend. There is no word on the cause or on the status of ICE at this point - watch the ICE website for more information. ICE was widely known for its popular products - Mike will be missed. (Thanks, Tim K3LR)

The Zeroland QSO Party, scheduled for May 7 and 8, has been canceled. Not to worry, that same weekend is host to the 7th District QSO Party <http://www.codxc.com/new/page.asp?content=start>, the New England QSO Party <http://www.neqp.org/>, and the Nevada <http://nv.arrl.org/NQP> and Indiana <http://www.hdxcc.org/inqp> QSO Parties, 14 states worth of QSO party fun.

Web Site of the Week - The National Institute of Standards and Technology, Time and Frequency Division is conducting an online survey of radio users <http://www.tf.nist.gov/survey>. Many of us rely on these broadcasts for calibration (and to know when to start mashing the F1 key!) so be sure to log in and show that the service is appreciated. (Thanks, Mike W9RE)

WORD TO THE WISE

Frog - from a popular electrical engineering dictionary, "the top of a tower". Who knew? So I guess we have to put the plastic owl on top of the frog to get rid of crows and find True North! Be careful when you are standing on your frog!

==> SIGHTS AND SOUNDSTHE RADIO ASSOCIATION OF ERIE <HTTP://HAMGALLERY.COM/QSL/COUNTRY/USA/PENNSYLVANIA/W3GV.HTM>, NOW IN ITS 50TH YEAR, WAS FOUNDED BY THIS CARTOON'S CRYSTAL PURVEYOR, FRANK BLILEY W3GV <HTTP://HAMGALLERY.COM/QSL/COUNTRY/USA/PENNSYLVANIA/W3GV.HTM>. (THANKS, TIM K3LR)

Ken K4ZW has posted a nice album of photos <http://mongoliatrip.shutterfly.com/pictures/8> from his recent trip to Mongolia, JT. If you worked JT5DX on the low bands this past season, here are the antennas responsible. (Thanks, Dave NN1N)

Valery R5GA has been getting good reviews for his score-reporting web site <http://pileup.ru/>. He is also collecting links to YouTube videos about contest operations and they are fun to watch!

A beautiful compilation of time-lapse photography featuring the aurora borealis <http://vimeo.com/21294655> by Terje Sorgjerd is on-line for you to enjoy. (Thanks, John VA7OTC)

==> RESULTS AND RECORDS

The online package of 2010 ARRL CW Sweepstakes results <http://www.arrl.org/contest-results-articles> are now up and ready for you, including PDF line scores and log-checking reports (LCRs). (Thanks, ARRL Contest Branch Manager, Sean KX9X)

Next weekend's Montana QSO Party <http://www.fvarc.org/> features an on-line scoring web page. After the contest, upload your contact totals and multipliers along with your logs and dupe sheets for verification. Once everything has been uploaded, you'll see your results instantly displayed. (Thanks, Ken K0PP)

How good were the bands this past weekend? The KL7RA beams were doing brisk business on wide-open bands in three directions at the same time from
latitude 60 N. Welcome back spots! (Photo by KL7RA)

The results of the NY QSO Party <http://www.nyqp.org/2010plaques.php> are finished and published. From the same link, you can also link to the certificate winners. (Thanks, Paul K2DB)

Results of the 2010 MM All America Contest <http://www.powerline.com.br/cwjf/Resultado2010Port.pdf> are online, including the scores of 1164 participants; 342 from South America and 822 from North America. (Thanks, Luc PW7T)

Pre-publication results for last weekend's RTTY Sprint <http://www.ncjweb.com/sprintrttyprelim.php> are now online as well. Individual LCRs (Log Check Reports) can be requested by email <rttysprintmgr@ncjweb.com>. (Thanks, NCJ NA RTTY Sprint Manager, Ed W0YK)

Bob K0RC reports that he has, "completed the programming for a new BARTG HF Contest Log Analyzer and posted it to my web site <http://tinyurl.com/4mg8hgy>." The downloadable spreadsheet tool is based on Excel 2003 but should work with any version, including the alternate Sun product called Open Office Calc.

OPERATING TIP

If you are a guest operator at a home station, don't forget to say thanks to the host family along with the ham who invited you! While they may not have built the station, their hospitality is important to your success.

==> TECHNICAL TOPICS AND INFORMATION

Thomas NZ4O writes to let us know that, "I have dropped the LF and MF aspect of my seven day radiowave propagation forecast due to low demand. In place of it I now produce a condensed version of my HF radiowave propagation forecast. I publish it every Friday morning at 0000 UTC on my SolarCycle24.org Facebook web page <http://www.facebook.com/pages/SolarCycle24org/139198369462931?v=>, my

Solar Cycle 24 <http://www.solarcycle24.org/> web page, and on my HF/6M Radiowave Propagation Forecast eGroup <http://lists.contesting.com/mailman/listinfo/spaceweather> on Contesting.com. It is also published later in the day at eHam.net, QRZ.com and Southgate ARC. My complete HF/6M radiowave propagation and lightning QRN forecast is still available on the Solar Cycle 24 web page in section 3B."

"Hackerspaces" are popping up all over, such as LVL1 <http://www.lvl1.org/about> in Louisville, Kentucky. The group includes several hams and has the club call sign N1LVL! Take a look at the web site for all the projects they have going on, including the launch of a balloon to Europe! (Thanks, George K5KG)

Paul K2DB has uploaded a video <http://www.rdxa.com/> showing how the CW reverse beacon network works using his remote station. It shows how quickly he can get to stations with the packet CW skimmer Reverse Beacon Network. Click on the right side of the home page under Main Pages on the RDXA Library link, then Tutorials and Presentations, click on Remote CW Skimmer Demo. When you get on the air on CW and call CQ, you can run but you cannot hide!

The book "Storage Batteries - Including Operation, Charging, Maintenance and Repair <http://www.amazon.com/Storage-Batteries-George-Smith/dp/027308416X/ref=sr_1_3?ie=UTF8&s=books&qid=1301260831&sr=8-3>" by G Smith is highly recommended by Frank VK2AKG. It's a good tutorial, now in its 3rd edition, on how to take care of those expensive backup power sources!

Tower-mounted standoffs help keep coax from getting caught in a crankup tower or just hold them away from your tower legs. Bob K6UJ recommends standoffs from KF7P <http://www.kf7p.com/KF7P/CoaxArms.html>, particularly the curved standoff for supporting a dangling cable.

Here's what a single-point grounding system looks like. This one keeps George K5KG out of trouble in Sarasota, Florida's frequent thunderstorms. (Photo by N0AX)

Jim W7RY provides this link to professional grounding guidelines <http://www.maplenet-inc.com/grounding>. He also recommends the Motorola R56 Site Ground Standards and Tom W8JI's <http://www.w8ji.com/> material on grounding.

Yes sir, yes sir, three bags full - well, most tower bases take more concrete than that. How many do you need, anyway? Mickey N4MB uses this simple online calculator <http://www.sakrete.com/products/calculators.cfm/selectedCalculator/Concrete#concrete> to get the answer. He cautions the user that while almost all the input values are in feet, the depth is entered in inches!

Base loading an antenna to resonate on 160 meters or 80 meters can be tricky. Phil AD5X has addressed the subject

<http://www.ad5x.com/images/Articles/Match160.pdf> from the perspective of his 43-foot vertical antenna. There's good information in the article you can apply to many similar needs. (Thanks, Al AB2ZY)

Teflon is not supposed to stick to anything - so how can you glue it or attach it to something? Lars LA7SL recommends this special adhesive <http://www.reltekllc.com/teflon-adhesives.htm> and David G4FTC the Loctite <http://www.loctite.com/> products 406 adhesive and 770 primer. Ulf SM0NOR takes a shorter path and suggests the bondable Teflon sheet from Small Parts <http://www.smallparts.com/ptfe-sheet-bondable-etched-white/dp/B003SLF06W/ref=sr_1_3?sr=1-3&qid=1300729922>.

Technical Web Site of the Week - Remember "mill copy" and the clackety-clack as the typewriter keys hammered out another radiogram? I'll bet you can smell that typewriter oil right now! Well, that old manual or electric you just can't quite bear to part with does have a place in this digital age - but you have to convert it to use USB as described in this IEEE Spectrum article <http://spectrum.ieee.org/geek-life/hands-on/a-typewriter-is-a-terrible-thing-to-waste> about a conversion kit <http://www.etsy.com/listing/62642931/diy-usb-typewriter-conversion-kit> from hackerspace Hive 76 <http://www.hive76.org/>.

==> CONVERSATION

Radiation and Radio

With so much concern over the damaged nuclear reactors in Japan, sensitivity to the word "radiation" is very much higher than usual. In general, the public is not aware of the many meanings of the word nor are they sensitive to the differences in types of radiation. Since hams use electromagnetic radiation to communicate, it behooves us to be able to coherently explain why "our" radiation is OK and not a threat to others.

Radio waves are non-ionizing radiation <http://en.wikipedia.org/wiki/Non-ionizing_radiation> that does not contain sufficient energy to separate electrons from atoms and create ions. That effect only occurs at frequencies orders of magnitude higher than for radio signals. As you learned during your licensing studies, radio frequency energy only results in thermal (heating) effects to the body. The amount of heating depends on the frequency and power levels involved. Radio waves have not been shown to cause biological effects, such as genetic damage or cancer. Radiation from nuclear sources, such as radioactive substances, can cause biological effects because it is ionizing radiation <http://en.wikipedia.org/wiki/Ionizing_radiation>.

Furthering the confusion, the word "hot" is used to refer to both thermally hot and radioactive materials. Radioactivity can heat up materials (the inside of the Earth is kept hot from radioactive decay) but not vice versa. Only ionizing radiation from radioactive materials

has enough energy to cause significant health hazards.

Exposure to ionizing radiation is measured in sieverts - a term unfamiliar to most people. Because it is an unfamiliar measurement, we find it difficult to assess the importance of numeric values. Normal background levels of ionizing radiation are so low that even a small release of radioactivity can cause a change that sounds alarmingly high. Here is an excellent chart <http://xkcd.com/radiation/> that gives some perspective to exposure. The current one-day dose of radiation near the plants (at the moment) is shown at the left of the green part of the chart. Additional discussion and references can be found here in this blog entry <http://blog.xkcd.com/2011/03/19/radiation-chart/>. For those of you living in the mountains or taking lots of airplane rides, this information may be a bit of a surprise!

An explanation of permitted versus recommended levels of ionizing radiation was also discussed in an NPR interview on Mar 21st with Dr. Harold Swartz, professor of radiology and medicine, Dartmouth College. A transcript <http://www.wbur.org/npr/134738874/Japans-Struggles-Continue-On-Multiple-Fronts> of that interview is available online and may be of interest in explaining the relative numbers we are encountering.

Risk from exposure to radiation is not an easy thing to quantify in a single, brief statement. There are many factors involved and it is rare that we have all of the data or the expertise to evaluate that risk. Nevertheless, since we work with "radiation" every time we get on the air, it's important to be able to help our families and neighbors distinguish between what does and does not constitute a risk.

73, Ward N0AX

==> CONTESTS

30 March through 12 April

An expanded, downloadable version of QST's Contest Corral in PDF format <http://www.arrl.org/contest-calendar> is available. Check the sponsor's Web site for information on operating time restrictions and other instructions.

HF CONTESTS

Poisson d'Avril--operate ala mode, from Apr 1, 0000Z to, well, it doesn't really matter even though K1DG isn't entering this year. Bands: all-male Fleetwood Mac, you might disagree, but the sponsor gets to choose. Frequencies: all of them, get busy. Exchange: appropriate gifts, something tasteful but not too expensive. Logs due: too late - see the Rules <http://poissondavril.webs.com/>. And here <http://fi-ni-report.blogspot.com>. But not here <http://www.youtube.com/watch?v=dQw4w9WgXcQ>.

Second Class Operators CW Bash--CW, from Apr 2, 0000Z to Apr 2, 2359Z. Bands (MHz): 3.5-28. Frequencies: QRP calling frequencies. Exchange: SOC member number, name, and RST. Logs due: Apr 16. Rules <http://www.qsl.net/soc>

LZ Open 40 Meter Contest--CW, from Apr 2, 0400Z to Apr 2, 0800Z. Bands (MHz): 7. Exchange: 6-digit serial and serial from previous QSO. Logs due: 10 days. Rules <http://www.lzopen.com/>

QRP ARCI Spring QSO Party--CW, from Apr 2, 1200Z to Apr 3, 2400Z . Bands (MHz): 1.8-28. Frequencies: QRP calling frequencies. Exchange: RST, S/P/C, power or QRP ARCI number. Logs due: 30 days. Rules <http://www.qrparci.org/content/view/8346/118/>

SP DX Contest--Phone,CW, from Apr 2, 1500Z to Apr 3, 1500Z . Bands (MHz): 1.8-28. Exchange: RS(T), serial or SP province. Logs due: Apr 30. Rules <http://www.spdxcontest.info/>

EA RTTY Contest--Digital, from Apr 2, 1600Z to Apr 3, 1600Z . Bands (MHz): 3.5-28. Exchange: RST, serial or EA province. Logs due: Apr 23. Rules <http://www.ure.es/contest/428-ea-psk31-contest-english-version.html>

MO QSO Party--Phone,CW, from Apr 2, 1800Z to Apr 3, 0500Z and Apr 4, 1800Z to Apr 4, 2359Z. Bands (MHz): 1.8-28. Frequencies: Multiple operating periods; CW 1.820 and 40 kHz from band edge; Phone--1.880, 3.825, 7.220, 14.250, 21.380, 28.350. Exchange: RS(T), serial, MO county or S/P/C. Logs due: May 3. Rules <http://www.w0ma.org/>

QCWA Spring QSO Party--Phone,CW,Digital, from Apr 2, 1800Z to Apr 3, 1800Z . Bands (MHz): 1.8-28, 50+. Exchange: Call,year lic'd,name,QCWA chap or S/P/C. Logs due: 30 days. Rules <http://www.qcwa.org/qso-party.htm>

ARS Spartan Sprint--CW, from Apr 5, 0200Z to Apr 5, 0400Z. Bands (MHz): 3.5-28. Frequencies: Monthly on the first Monday evening local time. Exchange: RST, S/P/C, and power. Logs due: 2 days. Rules <http://www.arsqrp.blogspot.com/>

SNS and NS Weekly Sprints--CW, from Apr 8, 0200Z to Apr 8, 0300Z. Bands (MHz): 1.8-14. Frequencies: Weekly on Thursday evenings local time. Exchange: Serial, name, and S/P/C. Logs due: 2 days. Rules <http://www.ncccsprint.com/rules.html>

EU Spring Sprints--CW, from Apr 9, 1600Z to Apr 9, 1959Z . Bands (MHz): 3.5-14. Frequencies: 3.550,7.025,14.040. Exchange: Both callsigns, serial, name. Logs due: 15 days. Rules <http://www.eusprint.com/>

Montana QSO Party--Phone,CW,Digital, from Apr 9, 0000Z to Apr 10, 0000Z. Bands (MHz): 1.8-28, 50-432, Frequencies: CW-1.81, 3.54, 7.035, 14,04, 21.05, 28.05 SSB - 1.845, 3.810, 7.244, 14.262, 21.365, 28.325. Exchange: RS(T), S/P/C or MT county. Logs due: May 31. Rules <http://www.fvarc.org/>

Japan International DX Contest --CW, from Apr 9, 0700Z to Apr 10, 1300Z . Bands (MHz): 1.8-28. Exchange: RST, JA prefecture or CQ Zone. Logs due: 30 days. Rules <http://jidx.org/>

PODXS 31 Flavors Contest--Digital, from Apr 9, 12 Noon to Apr 9, 6 PM. Bands (MHz): 14. Frequencies: 14.070-14.080. Exchange: S/P/C and name or 070 number. Logs due: May 9. Rules <http://www.podxs070.com/>

New Mexico QSO Party--Phone,CW,Digital, from Apr 9, 1400Z to Apr 10, 0200Z. Bands (MHz): 1.8-28, 50, Frequencies: CW-1.85, 3.55, 7.045, 14.05, 21.05, 28.05, 50.095; SSB-1.85, 3.925, 7.26, 14.28, 21.38, 28.38, 50.13. Exchange: Call sign, name, and NM county or S/P/C. Logs due: May 1. Rules <http://www.swcp.com/%7En5zgt>

Georgia QSO Party--Phone,CW, from Apr 9, 1800Z to Apr 10, 0359Z and Apr 10, 1400Z to Apr 10, 2359Z . Bands (MHz): 1.8-28, 50, Frequencies: Multiple operating periods; CW 1.815, 3.545, 7.045, 14.045, 21.045, 28.045, 50.095; Phone 1.865, 3.810, 7.225, 14.250, 21.300, 28.450, 50.135. Exchange: RS(T), S/P/C or GA county. Logs due: May 15. Rules <http://gqp.contesting.com/>

Yuri Gagarin DX Contest--CW, from Apr 9, 2100Z to Apr 10, 2100Z . Bands (MHz): 1.8-28. Exchange: RST, ITU Zone. Logs due: May 7. Rules <http://gc.qst.ru/en>

International Vintage Contest--Phone,CW, from Apr 11, 0700Z to Apr, 1000Z and Apr 11, 1300Z to Apr 11, 1600Z. Bands (MHz): 7,14. Frequencies: Multiple operating periods. Exchange: RS(T), grid square. Logs due: May 30. Rules <http://www.contestvintage.beepworld.it/>

VHF+ CONTESTS

Worldwide EME Contest--Phone,CW, from Apr 9, 0000Z to Apr 10, 2400Z. Bands (MHz): 432, 3.4G. Exchange: TMO/RS(T) and "R". Logs due: Jun 25. Rules <http://www.dubus.org/>

VHF Spring Sprints--Phone,CW,Digital, from Apr 11, 7 PM to Apr 11, 11 PM. Bands (MHz): 144. Exchange: Grid Square (6-character preferred). Logs due: 14 days. Rules <http://sites.google.com/site/springvhfupsprints>

QCWA Spring QSO Party--Phone,CW,Digital, from Apr 2, 1800Z to Apr 3, 1800Z . Bands (MHz): 1.8-28, 50+. Exchange: Call,year lic'd,name,QCWA chap or S/P/C. Logs due: 30 days. Rules <http://www.qcwa.org/qso-party.htm>

Montana QSO Party--Phone,CW,Digital, from Apr 9, 0000Z to Apr 10, 0000Z. Bands (MHz): 1.8-28, 50-432, Frequencies: CW-1.81, 3.54, 7.035, 14,04, 21.05, 28.05 SSB - 1.845, 3.810, 7.244, 14.262, 21.365, 28.325. Exchange: RS(T), S/P/C or MT county. Logs due: May 31. Rules <http://www.fvarc.org/>

New Mexico QSO Party--Phone,CW,Digital, from Apr 9, 1400Z to Apr 10, 0200Z. Bands (MHz): 1.8-28, 50, Frequencies: CW-1.85, 3.55, 7.045, 14.05, 21.05, 28.05, 50.095; SSB-1.85, 3.925, 7.26, 14.28, 21.38,

28.38, 50.13. Exchange: Call sign, name, and NM county or S/P/C. Logs due: May 1. Rules <http://www.swcp.com/%7En5zgt>

Georgia QSO Party--Phone,CW, from Apr 9, 1800Z to Apr 10, 0359Z and Apr 10, 1400Z to Apr 10, 2359Z . Bands (MHz): 1.8-28, 50, Frequencies: Multiple operating periods; CW 1.815, 3.545, 7.045, 14.045, 21.045, 28.045, 50.095; Phone 1.865, 3.810, 7.225, 14.250, 21.300, 28.450, 50.135. Exchange: RS(T), S/P/C or GA county. Logs due: May 15. Rules <http://gqp.contesting.com/>

****

** MOST WANTED SQUARES & DXCCs at the VHF-DX-Portal of MMMonVHF **

Just in advance of the active meteorscatter time of the year
(with gd EME condx and the MS showers in may and june) we would
like to remember that these services are only as good as YOU (as
the USER) are doing UPDATES at our different sources...

Please do yourself and all of us the favour and check and update
periodical the following links and tools:

eMWS (MOST WANTED SQUARES) >>> www.mmmonvhf.de/emws.php
MWDXCC (MOST WANTED DXCC) >>> www.mmmonvhf.de/dxcc.php

We will spread the Result mid/end of april, early enough...

If you hear or plan yourself a trip and/or any activity use:

INPUT of VHF-ACTIVITIES >>> www.mmmonvhf.de/newsuser.php
INPUT of UPDATES to NEWS >>> www.mmmonvhf.de/newsuserup.php

Thanks in the name of all USER of MMMonVHF and the team which is
always trying to pass you as soon as possible the latest News...

** MMMonVHF MS Propagation page update - April 2011 **

After the long wintertime minimum, meteor activity starts growing in
April. Most significant shower in this period is medium-rate Lyrids,
peaking April 22nd, 23:15 UT. Sporadic Meteors annual minimum is over,

and SPO rates have started increasing towards their seasonal maximum
in late summer. Moreover, some daytime minor showers are also able to
increase overall meteor activity. Have a look to shower predictions
for April 2011 at our MS-Propagationpage (www.MMMonVHF.de/ms.php)

Announcement New DXCC 144MHz moonbounce: PJ4(FK52ud)
LATEST NEWS from Rene, PE1L, dated 2011-03-25:
PJ4X will be QRV soon from Bonaire (Locator: FK52ud) / PJ2/PE1L will be QRV soon from Curacao (Locator: FK52nc) - Rig at PJ4 is 4 x 9 Xpol yagi DF7KF, TS-2000, WA2ODO preamp and enough EME power.
Rig at PJ2 is 2 x 8 Xpol yagi, TS-2000, WA2ODO preamp and enough EME power. Frequency: TX/RX 144.124 MHz. PJ always first.
We will RX 800hz up and down and its appricated that people dont use our freq +_1kc. We'll also take a small 70cm setup (23 elem. yagi) with us hoping to get some big guns in our log. We leave April 3th and build up the station before the weekend. We try to put our first signals Thursday April 7th from PJ4 to the moon. KYFC.
See our website http://www.emelogger.com with the latest updates/blog/news and further info about the team members.
During our stay we want to upload some photo's and we want to make small impressions on YouTube if possible.

** K5N at EL58 (not DL88) in 2011--A Grid Bandits DXpedition **

LATEST K5N Activation group announcement, dated 2011-03-24:
ACTIVATING EL58 in 2011 - Due to circumstances beyond our control, the expedition to DL88 must be canceled. The logistics of that trip have become impossible for us this year. Instead, we are going to go back to EL58, the infamous Swamp Grid. Since we have been there before, the logistics will be much easier for us. In 2009, our total operating time was just a few hours less than 2 days. This time, we will be operating just a bit less than 4 full days. This should

allow us to "clean up" this grid for all those that need it. In addition, we will be operating during what should be a peak in the Es season. This will give all those that missed us the last time a chance to work this difficult grid. For all the details, please check out our new EL58 web page which may be accessed from the Grid Bandits home page (http://www.kcvhfgridbandits.com/) by clicking the DXpeditions button at the lower right. Or, just go to http://kcvhfgridbandits.com/kc_vhf_grid_bandits_044.htm.
All email concerning this event should be addressed to k5n"at"bellsouth.net, NOT to our personal email addresses.
Team K5N wishes to apologize for our change of plans, but our only other choice was to not go anywhere this year. We believe that EL58 is better than nothing! We hope to work everyone possible, so listen up for us. SOURCE: tnx to Marshall K5QE direct to MMMonVHF

** Activity on HF and 50 MHz in April from T31 (AI47DF) **

LATEST NEWS from Lance, W7GJ, dated 2011-03-28: As you probably are aware, there is an HF DXpedition heading to Kanton Island, Kiribati. They do have equipment for 6m - an IC7600 and an ACOM 1000 amplifier The local time on Kanton Island is 13 hours ahead of GMT. Here is their official website: http://www.t31a.com/
Their tentative plans are to be QRV from April 17 through 28. Although the timing of their trip does not coincide with favorable EME cndx or high enough declination to provide a window with EU, they have very graciously agreed to try JT65A during their moonrise toward the end of their trip if 6m gear was provided to them. I have purchased and shipped them a 6M7JHV on loan and W1JJ and I have loaned them a RIGblaster and the special connector cable for their IC7600. If they can be QRV on their moonrise, they hope to be QRV on 50.200, calling CQ in the first sequence...
SOURCE: tnx to Lance, W7GJ, direct to MMMonVHF and on Magic Band EME

** ZF2AE/ZF8 qrv from Little Cayman Island **

Adrian, AA5UK, will be signing ZF2AE/ZF8 from Little Cayman Island (IOTA NA-016, WLOTA 1490, Grid Loc. EK99) between 25th of March and 2nd of April 2011. QRV holiday style on 40-10 metre SSB, RTTY and PSK31 + satellite, using IC-7000 + Vertical antenna. He also plans to participate in the CQWW WPX SSB Contest as a Single-Op/All-Band /Low-Power entry. QSL direct to AA5UK.

** RADIO EXPEDITION SIERRA LEONE 2011 (IJ38JK) **

9L5MS operations change of planning!!!
LATEST NEWS from ICPO, dated 2011-03-26: There is a major change in
the planning of the DXpedition. Hereï¿½s the bottom-line We expect that
our first radio operations will start a couple of days later than
expected. Hopefully during the weekend of April 2nd. Reason for this
is that the container, that carries our antennaï¿½s and other stuff that
we need for the station (our food&water supplies and generators), is
still in the customs-process. We expect that the customs will not
release the container until 4th of April! Last Thursday March 24th we
evaluated the situation and the team have decided to go for plan B.
So whatï¿½s plan B? Plan B is that on Friday March 25th we redesigned a
new minimal antenna-farm that we can take with us on the plane. We
decided that we will take 3 fiberglass verticals that will bring us
on the air on 40m - 10m. Sorry, no verticals available for the low
bands and no RX-antennas during the first phase. Still... food, water
and electricity are a problem. We will have to figure this out when
we are in Freetown on the hospitalship Africa Mercy next week. During
that week we will also work on Mercy Ships projects as volunteers.
As soon as the material arrives we will concentrate on the Low Bands,
using beams and Receiving arrays. So we will be on the air from Sierra
Leone soon, but the exact starting date is still unknown. We will
inform you about our proceedings via our website, Twitter and the
DX-cluster. Stay tuned! 73, 9L5MS - Sierra Leone DXpedition team.

==> + PUBLIC SERVICE: HAMS HELP WHEN PHONES FAIL AT SOUTHERN CALIFORNIA
HOSPITAL
```

When nurses and other caregivers picked up their phones at Children's Hospital of Orange County in California in the early morning on March 21, there was no dial tone. A power surge caused the central processor in the hospital's phone switch to fail. Following established procedures, the lead operator at the hospital switchboard immediately activated the Hospital Disaster Support Communications System, using an off-switch tie-line to reach April Moell, WA6OPS, head of this ARES&#65533; group that specializes in helping hospitals when their communications fail. Read more here <http://www.arrl.org/news/hams-help-when-phones-fail-at-southern-california-h

ospital>.

==> PUBLIC SERVICE : WESTERN PENNSYLVANIA HAMS RESPOND AS TORNADO SWEEPS THROUGH AREA

At approximately 4:30 on the afternoon of Wednesday, March 23, severe thunderstorms started to roll into Westmoreland County, Pennsylvania, producing golf ball-sized hail and heavy winds. Members of the Westmoreland County Public Service/ARES® group began to meet on the W3CRC repeater in Derry, Pennsylvania, which serves as the main ARES®/SKYWARN repeater in Westmoreland County. Soon after, the National Weather Service issued a tornado warning for the area and the Public Service Net was opened formally at 5 PM. Walter Bashaw, W3ZEH, began taking check-ins and reports of severe weather, relaying them to the NWS in Pittsburgh. Read more here <http://www.arrl.org/news/western-pennsylvania-hams-respond-as-tornado-sweeps-through-area>.

==> + AMATEUR RADIO IN SPACE: TWO ASTRONAUTS GET THEIR HAM TICKET

Even though they aren't scheduled to go to the International Space Station until 2013, two astronauts -- Chris Cassidy and Luca Parmitano -- are now licensed amateurs. Cassidy, who received the call sign KF5KDR, is scheduled to head to the ISS in March 2013 as part of Expedition 35. Parmitano -- an Italian from the European Space Agency -- is KF5KDP; he goes to the ISS three months later in May, as part of Expedition 36.

"Our aim is to have at least one crew member licensed and trained in on-air protocol, who is somewhat excited about ham radio and the Amateur Radio on the International Space Station program, per expedition," explained ARRL ARISS Program Manager Rosalie White, K1STO. NASA ISS Ham Radio Project Engineer Kenneth Ransom, N5VHO, told the ARRL that both Cassidy and Parmitano are "excited and interested in the educational aspects of Amateur Radio on board the ISS." Read more here <http://www.arrl.org/news/two-astronauts-get-their-ham-ticket>.

==> + NCVEC DELETES QUESTION FROM AMATEUR EXTRA QUESTION POOL

Due to the FCC revising the rules concerning Spread Spectrum, the Question Pool Committee of the National Council of Volunteer Examiner Coordinator (NCVEC) has decided to delete a question from the Amateur Extra class question pool. According to QPC Chairman Rol Anders, K3RA, as of April 29 when the new Spread Spectrum rule change goes into effect, the answer to question E1F13 in the Amateur Extra class question pool will no longer be correct . Read more here <http://www.arrl.org/news/ncvec-deletes-question-from-amateur-extra-question-pool>.

==> + ARRL NEBRASKA SECTION INTRODUCES "ELMER SQUAD"

The Nebraska Elmer Squad made its first official appearance earlier this month at the ARRL Nebraska State Convention in Lincoln. Darwin

Piatt, W9HZC, and Darrel Swenson, K0AWB, were on hand to answer questions about the Squad's mission and plans. According to ARRL Nebraska Section Manager Art Zygielbaum, K0AIZ, the Squad is gathering a list of volunteer Elmers throughout the state who are willing to assist not only new Amateur Radio operators, but current operators who need some technical assistance.

"Mentoring of new or prospective hams will be an ongoing part of the mission," Zygielbaum told the ARRL. "The intent is to have Elmers participate in their local area radio clubs and give presentations on various subjects relating to Amateur Radio." Nearly a dozen hams signed up at the State Convention to be a part of the Elmer Squad.

Piatt and Swenson said that they believe that people should remember that Amateur Radio is a hobby -- and it should be fun. Both men are QRP operators and builders; part of their enjoyment comes from passing on the fun of building to others.

The Elmer Squad will be traveling around Nebraska this summer and fall, giving presentations and signing up more Elmers. In addition, Piatt and Swenson are working on a Nebraska Elmer Squad website. Zygielbaum said that this will provide a central contact point to match Elmers with those who would like assistance. Once the site is up and running, the URL will be posted on the ARRL Nebraska Section website <http://www.arrl.org/Groups/view/nebraska>.

"Our motto is 'Hey, this is a hobby -- it is supposed to be fun!'" Zygielbaum explained. "We're looking for good people to help us keep it that way."

==> + NEW MARS ROVER TO FEATURE MORSE CODE

As the Jet Propulsion Laboratory (JPL <http://marsprogram.jpl.nasa.gov/msl/>) builds the next Mars rover -- this one is named Curiosity -- to deploy to the red planet in the fall of 2011, they're having a little fun with it. Back in 2007 when the Curiosity team was putting together the rover, its wheel cleats had a raised pattern with the letters "JPL," leaving a little stamp of the rover's birthplace everywhere it rolled. "At the time, I asked whether the real rover would have those wheels, and they said, no, they weren't going to get to advertise JPL with each turn of each of the rover's six wheels; the real rover would have some other pattern," said Emily Lakdawalla of The Planetary Society <http://www.planetary.org/> in her blog <http://www.planetary.org/blog/article/00002967/>. Lakdawalla is the organization's Science and Technology Coordinator.

Lakdawalla said that there is nothing special about the shapes of the markers in Opportunity's wheels; they are just square holes through the wheels through which the wheels were bolted to the lander during cruise and landing." Opportunity is the name of the rover that went to Mars back in 2003. "But Curiosity didn't need holes in its wheels for attaching to any lander -- there isn't one. So the engineers got to

make the markers in any shape they wanted to."

But in March 2011, she saw a video <http://www.youtube.com/watch?v=G019Jci0abs> of the rover as it is today: "I had to chuckle at those 'visual odometry markers' [on its tires]. Before I explain why, I'll point out that they really are useful things to have in rover wheels. The repeating pattern of the 'visual odometry markers'...makes it fairly easy for both the rover and human operators to determine visually how far the rover has roved using rear-view imagery."

So what pattern did JPL choose to put on Curiosity's wheels? One that Lakdawalla called "very amusing. The holes are in a pattern of short squares and longer rectangles -- almost like dots and dashes. Morse code." And what does it spell out in Morse code? JPL.

According to JPL, Curiosity is about the size of a small SUV -- 10 feet long (not including the arm), 9 feet wide and 7 feet tall -- or about the height of a basketball player -- and weighs 2000 pounds. It features a geology lab, rocker-bogie suspension, a rock-vaporizing laser and lots of cameras. Curiosity will search areas of Mars for past or present conditions favorable for life and for conditions capable of preserving a record of life. It is set to launch between November 25-December 18, 2011 from Cape Canaveral, Florida and will arrive on Mars between August 6-20, 2012. The prime mission will last one Mars year, or about 23 Earth months

==> ON THE AIR : NIST TO CONDUCT TIME AND FREQUENCY USER SURVEY

The National Institute of Standards and Technology's (NIST) Time and Frequency Division is conducting a survey to learn more about its users, seeking to determine how the agency can make its services more useful in the future. NIST services include WWV, WWVH and WWVB, which provide reference time and frequency signals via radio. The NIST also provides the Internet Time Service -- which provides accurate time synchronization to computer systems -- and several other services to offer accurate time information via telephone or web pages. Radio amateurs are encouraged to complete the survey. Read more here <http://www.arrl.org/news/nist-to-conduct-time-and-frequency-user-survey>.

==> SOLAR UPDATE

Tad "The Sun is shining, it's a lovely day <http://www.youtube.com/watch?v=z36r2fmutXQ>" Cook, K7RA, reports: The activity we could see recently on our Sun's far side -- thanks to the STEREO mission <http://stereo.gsfc.nasa.gov/> -- has been rotating into view, producing some nice sunspot activity, resulting in improved upper-HF propagation. Compared to the previous week (March 17-23), the past week (March 24-30) showed average daily sunspot numbers up more than 61 points to 102.1, while the average daily solar flux was up nearly 20 points to 114.7. Geomagnetic conditions were quieter as well, and reports from readers show greatly improved propagation on 20, 15

and 10 meters. This table <http://www.swpc.noaa.gov/ftpdir/indices/DSD.txt> shows a new sunspot group on March 23, two more groups appeared March 24, two more on March 25 and another two more on March 27. The latest prediction from USAF/NOAA sees improving conditions, with the projected solar flux for March 31-April 1 at 125 and 130, then 135 on April 2-7. The predicted planetary A index is 10 and 8 on March 31 and April 1, followed by 5 on April 2-7 and 8 on April 8. Conditions should be very good for the next week, especially when compared to this time last year. Look for more information on the ARRL website -- including an updated forecast and reports from readers, as well as the latest 3-month moving average of sunspot numbers -- on Friday, April 1. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad Cookism" is brought to you by the song Avenue Q Theme <http://www.youtube.com/watch?v=z36r2fmutXQ> from the musical Avenue Q <http://en.wikipedia.org/wiki/Avenue_Q>.

==> + SILENT KEY: INTERNET PIONEER PAUL BARAN, W3KAS (SK)

Paul Baran, W3KAS -- an engineer who helped create the technical underpinnings for the ARPANET, the government-sponsored precursor to today's Internet -- died March 27 at his home in Palo Alto, California. He was 84. According to his son David, the cause of death was related to complications from lung cancer. Baran was one of the three inventors of packet-switched networks.

In the early 1960s, Baran was working on a "survivable" communications system when he thought up one of its core concepts: Breaking up a single message into smaller pieces, having them travel different, unpredictable paths to their destination and only then putting them back together. It's called packet switching and it's how everything still gets to your e-mail inbox. Read more here <http://www.arrl.org/news/internet-pioneer-paul-baran-w3kas-sk>.

==> + SILENT KEY: OWNER OF INDUSTRIAL COMMUNICATION ENGINEERS MIKE KOSS, W9SU (SK)

Mike Koss, W9SU, of Indianapolis, Indiana, passed away Monday, March 28. He was 57. According to his friend Brian Smith, W9IND, Koss was found on his workshop floor and paramedics were unable to revive him. Industrial Communications Engineers (ICE) is well known in the amateur community for surge protectors, line filters, RF switches and more.

On March 31, ICE released the following statement concerning the company: "Industrial Communication Engineers (ICE), Ltd, its employees and the Indianapolis Amateur Radio community mourn the passing of company founder Mike Koss, W9SU, on March 28, 2011. Due to Mike's sudden and unexpected death, ICE has temporarily suspended accepting new orders. We are in the process of reorganizing the company, as well as identifying and fulfilling current open orders and products returned for repair. Read more here

335. Crossposting Permitted to rec.radio.amateur.moderated

Newsgroup: rec.radio.amateur.misc
Date: 2011-04-01 06:00:03 UTC
From: rram@panix.com
Message-ID: <radio/ham-radio/moderated/crossposting-1-1301637601@panix.com>
Source record: 4625
Cross-posted to: rec.radio.amateur.antenna,rec.radio.amateur.dx,rec.radio.amateur.equipment,rec.radio.amateur.homebrew,rec.radio.amateur.misc,rec.radio.amateur.policy,rec.radio.amateur.space,rec.radio.info

```
Posted-By: auto-faq 3.3.2 beta (PGPMoose V2.0, Perl 5.005)
Archive-name: radio/ham-radio/moderated/crossposting
Revision: 1.1 2009/04/12 19:42:04
Posting-Frequency: posted monthly
URL: http://www.panix.com/~rram/usenet/rram/index.html

Changes followed by "|".

After a 30-day public discussion and feedback period to gauge reader
opinions in March of 2009:

http://groups.google.com/group/rec.radio.amateur.moderated/browse_thread/thread/d7d337db35
f23326

the rec.radio.amateur.moderated Moderation Team has decided to consider
amending its charter, and permit limited simultaneous crossposting to
rec.radio.amateur.moderated and one other unmoderated
amateur-radio-related discussion newsgroup. We are currently trying
this on a temporary basis (90 days, through early July 2009), and adopt
it permanently if successful.

Approved rec.radio.amateur.* newsgroups are those that are currently
listed in the latest version of the "List of Big Eight Newsgroups" which
is crossposted monthly to news.announce.newgroups, news.groups, and
news.lists.misc.

Approved alt.radio.amateur.* and alt.ham-radio.* newsgroups are those
that have been created consistent with the suggestions in "So You Want
to Create an Alt Newsgroup" at:

http://www.faqs.org/faqs/alt-creation-guide/

Approved regional hierarchy newsgroups are those that contain either
"radio.amateur" or "ham-radio" in their names, including
uk.radio.amateur and aus.radio.amateur.misc.

We will make every reasonable effort to keep our list of approved
newsgroups up-to-date. In case we have overlooked any, and a submission
is rejected in error as a result, the rejected submitter can E-mail us
at our administrative contact address (in the signature at the bottom of
this article, and the default Reply-To for the rejection message)
requesting that it be added, and that the article be approved. We may
still choose to reject articles crossposted to any alt.* newsgroup with
an inappropriate name, including obscene language, embedded
name-calling, or encouragement of unlawful conduct.
```

Please direct any comments, questions, or criticisms to
rec-radio-amateur-moderated-request@panix.com.

342. GB2RS NEWS Sunday 3 April 2011

Newsgroup: rec.radio.amateur.misc
Date: 2011-04-01 15:00:18 UTC
From: Newsdesk@rsgb.org.uk
Message-ID: <20110401150005.98EDC33C6C@panix2.panix.com>
Source record: 4632
Cross-posted to: uk.radio.amateur,rec.radio.amateur.misc,rec.radio.info

GB2RS NEWS

Sunday 3 April 2011

The news headlines:

* Peter Kirby leaves RSGB

* Bell Labs journal released

* GB2RAF back on the air

Peter Kirby, RSGB General Manager, has left the Society's employment after the discovery of financial irregularities on his part. For the time being, RSGB Director Don Beattie, G3BJ, will act as General Manager. The announcement was made by RSGB President Dave Wilson on 28 March 2011.

Bell Labs in the USA was responsible for a huge number of technical innovations, including the transistor. Most were documented in the Bell System Technical Journal, published from 1922 until 1983. The entire archive, now owned by Alcatel-Lucent, has now been put online and can be viewed at http://bstj.bell- labs.com.

It has now been confirmed that permanent special event station GB2RAF will be back on the air again from Saturday 9 April. Operations will be from the Air Defence Radar Museum, RAF Neatishead, Norfolk. Due to a Health and Safety fire issue, the Museum had to close down in September 2010 and consequently the permanent special event station GB2RAF has been unable to go on the air since then. GB2RAF will be back on the air every second Saturday of the month from 10am to 4pm, primarily on 80m SSB around 3.710MHz. For further information contact Terry, G4PSH QTHR or via GB2RAF. Details of both are correct on qrz.com.

Colchester Radio Amateurs has announced the cancellation of their rally. Originally planned for 31 July, the decision was prompted by falling attendance and ongoing difficulties in organising the event. The club regrets its passing after 42 years.

Over the weekend of 16 and 17 April, Jim, M0JHW will be holding another of his field days at the Sports & Social Club, Harlaxton, Grantham NG32 1HX. There will be plenty of tea and coffee and a BBQ in the afternoon. All are invited to come and meet old friends and make new ones. There will also be ample opportunity to play radio. Details from Jim by email to m0jhwjim@aol.co.uk.

On Monday 4 April two UK Coastguard MF stations are changing frequency. The Falmouth transmitter will move to 1880kHz and the Humber transmitter to 1925kHz. These frequencies are in the shared part of Top Band, where the Amateur Service is the secondary user.

And now for the details of rallies and events for the coming week

Today, Sunday 3 April, is the South Gloucestershire Amateur Radio Rally at Avon Scouts Activity Centre, Fernhill, Almondsbury BS32 4LX. The site is easily accessed from the junction of the M4 & M5. Talk-in is on S22 and there is good car parking. Entry is £2. The rally opens at 10am and there are trade stands, a car boot sale and catering. For more information contact Stan Goodwin, G0RYM, on 07833 517370. On Sunday 10 April it's the Cambridgeshire Repeater Group Annual Rally at Foxton Village Hall, Hardman Road, Foxton, Cambridge CB22 6RN. There is talk-in on S22 in advance of the 10am start, trade stands, a Bring & Buy and catering. Entry is £2. Contact Lawrence, M0LCM, on 01223 654880for more information.

Also on Sunday 10 April is the Northern Amateur Radio Societies Association Exhibition, also known as the Blackpool rally. Held at Norbreck Castle Exhibition Centre, Blackpool FY2 9AA, it opens at 10.45 for disabled visitors and 11am for everyone else. Car parking is available, there are trade stands, an RSGB book stall, Bring & Buy, club and special interest stands. For more information contact Dave, M0OBW, on 01270 761 608.

Now for the news of special events

GB2LGR is operating this weekend from the former RAF airfield at Langar, Nottinghamshire, celebrating the Battle of Britain. Operation is on HF and 2m, and details are on QRZ.com.

GB2SOE is celebrating the role of the Special Operations Executive from Tempsford Airfield, Bedfordshire, as part of the RAFARS Airfields on the Air weekend. Operation will be on or close to RAFARS net frequencies on Top Band, 80m, 40m, plus 2m. QSL direct or via bureau.

And now the HF DX news compiled from 425 DX News and other sources

The 9N7AN DXpedition to Nepal continues until 8 April. Operation is on all bands from 180m to 10m, CW SSB and RTTY. The team also plans to operate 2m EME using JT65B as 9N7WL, the first time that Nepal has been activated via this mode. More information is at www.160m.de/9N7AN.

Ray, M1REK and Andy, M1LOL are operating from the Isle of Barra, EU-010 from 2 to 9 April. They are using SSB, PSK and RTTY on 80m-10m. Ask for QSL instructions.

Francoise, JW/F8DVD is operating from Longyearbyen on Spitsbergen, EU-026 from 1 to 8 April 1-8. Main activity is on 40 and 20 metres, SSB and CW. QSL via homecall, bureau or direct.

Now the contest news

The RSGB Contest Committee is introducing an SSB version of the popular RoPoCo contest today, Sunday 3 April. In these short 80m contests, entrants send their own postcode for the first contact and receive one back. In subsequent contacts they send the postcode just received. This form of Chinese Whispers is great fun, but requires care in receiving and logging accurately. Amateurs with 80m capability are invited to give it a try. The rules are available online at www.rsgbcc.org.

>From 0900 to 1200 UTC today is the RSGB First 70MHz contest. Operating on all modes on 4m, the exchange is RST, serial number and locator.

The SP DX contest starts at 1500 UTC today and finishes the same time tomorrow, 4 April. CW or SSB can be used on all bands from 1.8 to 28MHz, and the exchange is RST plus serial number. SP stations also send their Province code. Also starting today, at 1600 UTC, is the EA RTTY contest, ends the same time tomorrow, 4 April. Contacts are in RTTY only from 3.5 to 28MHz. The exchange is RST plus serial number. EA stations also send their Province code.

On 4 April it's the RSGB 80m Club Championships, CW. Activity is 1900 to 2030 UTC; RST & serial number form the exchange.

The RSGB 144MHz UKAC is on Tuesday 5 April from 1900 to 2130 UTC. Operation is on 2m, all mode, with an exchange of RST, serial number and locator.

The EU Spring Sprint is on Saturday 9 April from 1600 to 2000 UTC. Operation is CW only from 3.5 to 14MHz. The exchange is both callsigns plus serial number plus name; RST is not required.

The weekend of 9 and 10 April sees the Japan International DX contest, from 0700-1300 UTC. CW only operation is from 1.8 to 28MHz. The exchange is RST plus CQ zone. JAs also send their Prefecture code.

And now the solar factual data for the period from the 21st to the 27th of March, compiled by Neil Clarke, G0CAS on the 28th of March.

Solar activity started and ended the period at low levels, but the days in between activity increased to moderate levels. Three M class solar flares took place, one each on the 23rd, 24th and the 25th. They were small and only just made it above the M class threshold. However, they produced sudden ionospheric disturbances and small coronal mass ejections. Solar flux levels increased from 100 units on the 22nd to 117 by the 27th. The average was 108 units. The 90 day solar flux average on the 27th was 97 units. That's three units up on last week. X-ray flux levels varied little day to day and averaged B3.9 units. Geomagnetic activity was quiet every day except for the 23rd when a recurring coronal hole disturbance arrived. The effects from this were very limited and the Ap index on the 23rd was only 10 units. The average was Ap 4 units. Solar wind data from the ACE spacecraft saw solar wind speeds increase from 300 kilometres per second on the 21st to 550 by the 23rd. Particle densities were low every day. Bz varied between minus 6 and plus 7 nanoTeslas on the 23rd and between minus 3 and plus 4 nanoTeslas on the quiet days.

And now the solar forecast. This week the quieter side of the Sun is expected to be rotating out of view. Solar activity should be most low but could increase to moderate especially during the first half of the week. Solar flux levels should decline and be around the 100 mark or slightly lower by next weekend. Geomagnetic activity is expected to be quiet till midweek but then increase as a coronal hole disturbance arrives. MUFs during daylight hours at equal latitudes should be around 24MHz for the south and 21MHz for the north. Darkness hour lows should be about 9MHz. Paths this week to India should have a maximum usable frequency with a 50 per cent success rate of around 26MHz. The optimum working frequency with a 90 per cent success rate will be about 20MHz. The best time to try this path will be between 1000 and 1400 hours UTC.

And that's all for this week from the propagation team.

Next, the Local News:

Please note that details of all RSGB-affiliated clubs and societies

can be found on the RSGB website, including email addresses

and website links where known.

[Note to Newsreaders: Please read the local news items appropriate to the service area of your

transmission.]

NEWS FOR THE MIDLANDS On Monday 4 April Gloucester Amateur Radio & Electronics Society is running its construction competition. Contact Anne, 2E1GKY, on 01452 548478, daytime.

On Monday 4 April South Birmingham Radio Society is on the air and planning for field day. Contact Don, on 0121 458 1603.

On Tuesday 5 April Derby & District Amateur Radio Society is having a junk sale. Contact Richard Buckby, by email to radio@dadars.org.uk.

On Tuesday 5 April Friskney and East Lincolnshire Communications Club is having a talk by Billy on ATC from Thorpe Camp Museum. Contact Chris, M0MFP, on 01507 442240.

On Tuesday 5 April Loughborough & District Amateur Radio Club is operating club equipment and working IRLP. More information from Chris, G1ETZ, on 01509 504 319.

On Wednesday 6 April Hinckley Amateur Radio Society is having a social evening. Details from John, M0JAV, on 07836 731544.

On Wednesday 6 April Lincoln Short-Wave Club is in the Shack. For more information contact Pam Rose, G4STO, on 01427 788356.

On Wednesday 6 April Midland Amateur Radio Society is on the air and holding training classes. Details from Norman, G8BHE, on 01214 229 787.

On Wednesday 6 April South Birmingham Radio Society has a lecture in the main hall. Contact Don, on 0121 458 1603.

On Wednesday 6 April Telford & District Amateur Radio Society having a committee meeting. HQ is closed, so there is a net on 3.675 and 144.6MHz. Contact Mike, G3JKX, on 01952 299 677.

On Thursday 7 April Hucknall Rolls Royce Amateur Radio Club has a 5 mile fox hunt. More information from Dave Wilde, G1YAI, on 0844 4355593.

On Thursday 7 April Salop Amateur Radio Society is having a calibration night with Ken, G8DIR. Details on the club website at www.salop-ars.org.uk.

On Thursday 7 April South Birmingham Radio Society is holding training classes with Dave Murphy, G8OWL. Contact Don, on 0121 458 1603.

On Friday 8 April Coventry Amateur Radio Society has the 2nd round of the 2m DF Trophy. Contact John, G8SEQ, on 07958 777363. On Friday 8 April Hucknall Rolls Royce Amateur Radio Club is having a general club meeting. More information from Dave Wilde, G1YAI, on 0844 4355593.

Amateur Radio Newsline(tm) Report 1755 - April 1, 2011

Amateur Radio Newsline report number 1755 with a release date of
Friday, April 1st, 2011 to follow in 5-4-3-2-1.

The following is a Q-S-T. Opposition grows to the proposed sell-off of
440 to 450 MHz, ham radio continues its role in Japan following the
March 11th earthquake and tsunami, a major solar storm could bring more
DX and lots of strange ham radio stories for April 1st. Hear it all on
Amateur Radio Newsline(tm) report number 1755 coming your way right
now.

(Billboard Cart Here)

RESCUE RADIO: OPPOSITION GROWS TO SELLOFF OF 420 TO 440 MHZ

An article in USA Today about the concern by radio amateurs and others
involved in rescue radio over aspects of House of Representatives
measure H R 607 is sweeping the nation and its emergency preparedness
community. And it turns out that there is growing opposition to a part
of the bill that affects the 420 to 440 MHz band. Michael Grebert,
KJ4ZZV, is here with the latest:

--

According to the U-S-A Today article, those lining up in opposition to
a provision in H-R 607 that would sell off 420 to 440 MHz as a way off
offsetting part of the cost of establishing a new nationwide
interoperable emergency system is growing. In fact, its starting to
read like a whose who in emergency communications. This includes such
notables as the National Weather Service, the International Association
of Chiefs of Police and a the National Public Safety Telecommunications
Council to name only a few.

As most of you are aware, Representative Peter King, of New York who is
the chairman of the Homeland Security Committee, introduced legislation
last month. Its purpose is to enhance emergency communications for
first responders by providing them with exclusive bansdspace for public
safety use.

Nobody opposes that idea. What is controversial is a provision of the
measure that would allow the auctioning off of 420 to 440 MHz. Those
who oppose that provision say that the spectrum in question is not just
for radio hobbyists. Rather, it is also used by hundreds of thousands

of Amateur Radio Emergency Service volunteers and severe-weather spotters working with National Weather Service and other agencies.

And among those speaking out is Harlin McEwen. McEwen s the chairman of a technology committee for the International Association of Chiefs of Police and a spokesman for the National Public Safety Telecommunications Council. Hes on record as saying that the reallocation of 420 to 440 MHz is a bad idea and one that's not good for public safety.

But the U-S-A Today article is not the only one noting that emergency responders are taking issue with Representative King's band sell-off approach. Another in-depth piece the Great Falls Montana Tribune goes into even greater detail than U-S-A Today. Among other things, the Tribune article states that there are nearly 5,000 amateur radio volunteers in Montana, and many of them provide a backup communication system that emergency responders state wide and across the country depend on. This, when cellular telephones, satellite phones or other radio systems don't work.

Ryan Nicholls, the Director of the Office of Emergency Management in Springfield, Missouri takes it even a bit further. He notes that use of ham radio volunteers is the way in which that state plans to communicate between hospitals and the Red Cross in the event of an emergency. Nicholls notes that this is even written into that city's emergency operations plan.

Both articles do a good job of pointing out the false economy of selling off the 420 to 440 MHz band.

For the Amateur Radio Newsline, I'm Michael Grebert, KJ4ZZV, in Nashville for the Amateur Radio Newsline.

--

And all this negative publicity may be taking its toll on at least one of those backing H R 607. Representative Billy Long of Missouri who is a co-sponsor of the bill is quoted in USA Today as saying that he will work to ensure that we are not cutting any vital emergency services and not adversely affecting ham radio operations.

You can read the entire USA Today article at tinyurl.com/4tvz4br. The Great Falls Tribune piece is at tinyurl.com/4typ6bg. (USA Today, Great Falls Tribune, N6ZXJ, W6RH, others)

RESCUE RADIO: HAM RADIO SUPPORT CONTINUES FOLLOWING MARCH 11TH QUAKE

Ham radio remains an important part of recovery and relief efforts in Japan. This following the earthquake and tsunami that hit on March 11th that was followed by the still ongoing problems at the Fukushima nuclear electric generating plant. Amateur Radio Newsline's Norm Seeley, KI7UP reports:

--

According to Steve Herman, W7VOA, the Japan Amateur Radio League or JARL has been involved in emergency communications support from the beginning of the triple pronged tragedy. Steve, who spent a week in Japan reporting for the Voice of America says that the initial traffic involved finding routes for those first and second responders trying reach the disaster areas. That was mainly done by JA3RL as control station. JA1RL took its place in the later stage in forming the network for communications to and between disaster scenes.

Since then, volunteer medical staff who are hams have been to disaster areas. They have been supported by both the JARL and the Japanese Self Defense Forces. Additionally, hand-held transceivers have now been supplied to evacuation centers. Japan's Ministry of Internal Affairs and Communications has provided special call signs for each H-T so that unlicensed people can use them.

As to use of the Internet by hams, Steve tells Newsline that there has been some traffic passed between Japan and Europe through WIRES chat room 0522. WIRES is Yaesu based radio to Internet connection system similar to Echolink. Details of the traffic is viewable in the Japanese language at twitter.com/#!/JARL_ARESC

And this late word from Jim Linton, VK3PC. He reports that a small amount of internal High Frequency communications for disaster relief is still being operated occasionally by some volunteer radio amateurs. But says Linton, the Japan Amateur Radio League Headquarters stations were off the air by Friday, March 25th, their local time. VHF and UHF operations are likely ongoing.

Obviously, this is an ongoing story and we will have more with it in the weeks ahead.

For the Amateur Radio Newsline, I'm Norm Seeley, KI7UP, in Scottsdale, Arizona.

--

In his note to us, W7VOA did include a ray of hope for some. He says that he spotted a number of High Frequency yagi antennas in Sendai at some houses close to where the tsunami struck. The good news is that those were intact. (W7VOA, VK3PC, JARL, others)

**

RESCUE RADIO: CHRISTCHURCH NZ QUAKE FOLLOW-UP

A follow-up to the work by hams in New Zealand following the earthquake that hit the city of Christchurch last month. Amateur Radio Newsline's Jim Meachen, ZL2BHF, brings us up to date:

--

Audio report only. Hear it by downloading the mp3 file of this weeks newscasat at www.arnewsline.org

--

Another example of ham radio emergency communications not only in first response but also has an ongoing search and rescue tool that helps to save lives. (ZL2BHF)

RESCUE RADIO: NEW JERSEY AMATEUR RADIO CLUB PROVIDES RED CROSS COMMMS DURING RECENT FLOODING

The rains came to New Jersey and ham radio was ready. Bill Pasternak, WA6ITF, is in the newsroom with more:

--

Ham radio was an essential communications tool during the recent heavy flooding in Northern New Jersey. That's where the New Providence Amateur Radio Club in the Watchung Hills area was asked to set up amateur radio stations in Red Cross vehicles which were operating in four counties heavily affected by the deluge.

The club members were tasked with supplying communications for Red Cross cars and vans which were performing damage assessment in the affected areas. Communications between these vehicles and a central Command Post at the Chapter House in Ridgewood, kept track of the progress of the appraisal process.

Three members of the NPARC Emergency Team responded on Monday March 14, and two members were present during the rest of the week. These included David Berkley, K2MUN, of Westfield, Vince Lobosco, KC2IZK, of Fanwood, Barry Cohen, K2JV of Berkeley Heights, Barb Flynn, KC2YJB of Summit, Tony Izzo, K2AMI of River Edge and Hillary Zaenchik, KC2HLA, of Basking Ridge.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF, in the newsroom in Los Angeles.

--

While some operators spent their time in the field with Red Cross personnel, others were stationed in the control center with two of the relief agency's officials. (eHam, others)

**

LICENSING: NCVEC QPC DELETES EXTRA CLASS SPREAD SPECTRUM QUESTION

The Question Pool Committee of the National Council of Volunteer Examiner Coordinator has decided to delete a question from the Amateur Extra class question pool. One dealing with Spread Spectrum technology.

In March, the FCC eliminated the requirement that amateur stations transmitting Spread Spectrum use Automatic Power Control to reduce transmitter power. At the same time, the Commission reduced the maximum power of a Spread Spectrum emission from 100 to 10 watts PEP.

According to the Question Pool Committee, when the Spread Spectrum rule change goes into effect, the answer to question E1F13 in the Amateur Extra class question pool will no longer be correct. It must be deleted by the time the new rule on Spread Spectrum goes into effect 30 days after publication in the Federal Register. (NCVEC)

**

ENFORCEMENT: FCC AFFIRMS $20,000 FINE FOR UNLICENSED OPERATION ON 156.8 MHZ

The FCC has affirmed a $20,000 monetary forfeiture issued to Vincent E. Aversa, Jr. of Indialantic, Florida. This, for his alleged willful and repeated violations of section 301 of the Communications Act of 1934 and section 80.13 of the Commission's rules.

The violations involve what the FCC claims is Aversa's purported operation of radio transmission equipment without a license on 156.80 MHz. This is the International Distress, Safety, and Calling Channel in the Marine Radio Service. It's also known as Channel 16.

On February 8, 2011, the Enforcement Bureau's Tampa, Florida Office issued a Notice of Apparent Liability for Forfeiture in the amount of $20,000 to Aversa. Since that time Aversa has not filed a response to the NAL.

Based on the information before it, the FCC has now affirmed forfeiture and has given Avisa the customary 30 days to pay the amount in full or to file an appeal. (FCC)

**

COMMUNICATION: 51% OF ALL AMERICANS ON FACEBOOK

More than half of Americans age 12 and up are communicating on Facebook. This according to Arbitron and Edison Research in their upcoming 2011 Infinite Dial Report.

Edison Research spokesman Tom Webster said they have been tracking the growth of Facebook since 2008. In that time they have watched the social network grow from 8% penetration just three years ago to 51% today. This, says Webster makes it the dominant player in social

networking, with more users than MySpace, LinkedIn and even Twitter.

The study, conducted in January, indicates that 51% of all teens, men and women have a profile on the Facebook. In another area, the research company says that back in 2001, that some 98% of those surveyed used television and 96% used radio. By comparison, in 2011, while television use remained the same, local AM/FM radio use had dropped. (Edison OnLine Reasearch)

**

NAMES IN THE NEWS: K0NEB PRESENTS HAMVENTION - THE EARLY YEARS ON YOU TUBE

A new slide show that depicts the early years of the Dayton Hamvention is now available for public viewing. The presentation titled "The Early Years" was produced by Kit Building expert Joe Eisenberg, K0NEB, of Lincoln, Nebraska for presentation at a recent meeting of the Dayton Amateur Radio Association. Set to the music of Mason Williams and Mannheim Steamroller the show contains photos from Joe's collection dating from about 1984 to 2001. This and all of Joe's slide shows are available on-line at www.youtube.com/joehusker. (K0NEB)

**

HAMVENTION NEWS: ON LINE RESERVATION SYSTEM NOW OPERATING PROPERLY

Bill Curtice, WA8APB, says that the Hamvention's on-line reservation system at www.hamvention.org is functioning properly. In a posting to thr on-line Hamvention List that he moderates, Curtice says that those in charge are aware that a month or more ago there had been a problem with Flea Market spaces that was isolated to pricing of end-cap spaces that could have caused an issue with credit card statements. This was a database error that they believed was corrected.

Curtice says that the fix required hand editing, which took time and notes that it is entirely possible that some requests were missed. If you are one of those, Curtice asks that you contact them directly and that they will be happy to remedy the situation for you.

WA8APB also notes there is some confusion about General Admission Tickets vs. Vendor Admission Tickets. Flea Market Vendors should always choose Vendor Admission, not General Admission, unless directed otherwise by the Hamvention. Curtice says that this has caused some problems as well. (WA8APB via Hamventionr List)

**

HAM HAPPENINGS: THE NORTH CORK RALLY AND ELECTRONICS FAIR IN IRELAND IN SEPTEMBER

If you are planning a trip this fall to Erin's Isle, then you might want to include stopping by Irelands North Cork Radio Group second annual rally and electronics fair on Sunday September the 11th. The

venue is the Blarney Golf Resort in Tower County Cork. The doors open to the public at 11.30 a.m. local time and the hamfest will run throughout the afternoon. Dealers on hand as of this writing include South East Communications, Long Communications and JBT Trading. Further details can be found via the group's website, www.ei1nc.com.com. (IRTS)

**

HAM HAPPENINGS: INTERNATIONAL MARCONI DAY - APRIL 30TH

And a reminder that International Marconi Day takes place this year on Saturday the 30th of April. This is not a contest but there are several nice awards available for working the officially listed stations, each of which has an historic connection with Marconi. The event is organized by the Cornish Amateur Radio Club. For more information please visit the club's website at crac.g4usb.net/cracblog. (RSGB)

**

BREAK 2

This is ham radio news for today's radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

**

WEIRD SCIENCE: MAN BECOMES DENTAL TRANSMITTER

>From the "stranger than strange file" comes this story about some odd radio transmissions. You are not going to believe where they came from. Bruce Tennant, K6PZW, tries to put the pieces together.

--

We have all heard stories about people who had dental work and then started hearing radio signals due to the amalgam in their teeth. Well, this one goes a bit further. It seems a man, who has asked us to keep his identify private, had major reconstructive jaw surgery in the medical center of the University of Southern North Dakota. This involved some dental wiring and internal jaw bracing. Somehow, some way, the new metal work came into contact with previously existing silver fillings - that combination created some sort of transmitter.

The condition was first noticed when the patient coughed. His loud coughing started reverberating through the medical center's public address system causing everyone to wonder what was going on. Then a conversation he had with his wife came through some car radios in the

hospital parking lot, specifically at the lower end of the FM broadcast band. Finally, physicians relaxing in the doctor's lounge heard loud scratching noises through a desktop FM radio - this turned out to be the patient brushing his teeth. The man himself found out what was going when his sneezing fit was heard over an MP3 player being used by a patient two floors up, who came down to see what the racket was.

Due to confidentiality riles, no one would talk to us on the record about this case. But the man in question, know known by local amateur radio clubs as the first "human repeater," has had the necessary wire adjustments for this strange phenomenon to go away. He was said to be much relieved that he can now clear his throat and not worry about blowing away someone's hearing aid.

For the Amateur Radio Newsline, I'm Bruce Tennant in Los Angeles on this first day of April.

--

A spokesman for the Federal Medical Radio Commission which investigates these weird April 1st phenomena says that this is one of those odd instances where the forces of nature and advances in technology combine to wreak havoc on the radio spectrum. None the less it is considering issuing the unlucky patient a Notice of Violation for operating as a radio transmitter without a license. (K6PZW)

**

HAM RADIO IN SPACE: SA AMSAT POSTPONES SPACE SYMPOSIUM

South Africa AMSAT has postponed its Space Symposium originally planned for April 2nd to a later date. School holidays in the city of Gauteng and too many other amateur radio related activities around the same time seem to be one of the reasons for the low registration rate. A new date will be announced in the near future. (SA AMSAT)

RADIO IN SPACE: NASA TO MAKE FINAL EFFORT TO CONTACT STUCK MARS ROVER

NASA will make a last-ditch effort to communicate with the stuck Mars rover Spirit, which fell silent a little over a year ago. The solar-powered rover became stuck in what's believed to be loose sand in April 2009. Despite efforts to maneuver it free, Spirit remained stuck and could not tilt itself toward the sun as the Martian winter approached.

Without an adequate amount of energy reaching its solar panels, it went into hibernation last March. Engineers had expected Spirit to wake up once there was maximum sunlight where it's trapped. But the South Mars summer solstice came and went earlier with no response.

Ground controllers are attempting to contact the Spirit over a wide range of frequencies and at various times during the day. This, in case the rover's internal clock stopped working and it lost track of its Earth time schedule. They also are commanding the Spirit to turn on its backup radio transmitter in case the main one failed.

If there's still no contact with Spirit within the next month, NASA says that it will scale back its listening operation for the out of service rover and then focus on collecting Mars data using Spirit's still operational twin named Opportunity. (Science OnLine)

**

DX

In DX, EI9FBB, will be operating portable 3A from Monaco from April 20th to the 22nd. Activity will be limited to the afternoons. All QSOs will be uploaded to Logbook to the World and eQSL. For those who need a paper QSL, please send yours along with sufficient postage to his home callsign as listed on QRZ.com.

UV5EVJ is on the air as 5X1VJ from Uganda through June 8th. Activity is on the HF bands using CW and SSB. QSL via his home callsign.

EA8AY will be active from the Canary Islands as ED8A during the CQWW WPX CW Contest from May 28th to the 29th as a Single-Operator, All-Band entry. QSL only via Logbook to the World.

Lastly, the United Kingdom's Macclesfield and District Amateur Radio Society will be operational from the Isle of Arran off the coast of Scotland from April 2nd to the 7th. Four club members will be transmitting on the HF bands and making as many contacts across the UK, Europe and around the world as possible. A special commemorative card will be available. QSL as directed on the air.

**

THAT FINAL ITEM: SPECTRUM USE FEES ON THROUGH THE HORIZON

And finally this week, as the U-S government looks for new ways to increase revenues without raising taxes, some of the bean counters in Washington are getting very creative. But it may be ham radio operators who wind up paying in the end. By shortwave, our April 1st roving reporter Pierre Pullinmyleg has details from the nation's capitol:

--

The bill in Congress that would auction off most of the 70-centimeter ham band to commercial interests has been getting the headlines in amateur radio news reports, but there is about to be another bill introduced that could be even worse for radio amateurs. While it would leave all of our allocations intact, this new plan calls for auctioning off the ionosphere itself, layer-by-layer, to the highest bidder. The F-Layer would be put up for bids first, because it permits the greatest

propagation distance for radio signals and because it is actually comprised of two layers, F-1 and F-2, so it is expected that it would generate higher bids than the other layers. The F-layer auction would be followed by an auction of the E-layer and finally the D-layer. Layers A through C continue to be under strict military control.

The successful bidders would pay large amounts of money up front to the U-S government and would then recover their investments by charging radio users access fees to bounce signals off of the various layers. Fees would vary by frequency, time of day and distance to be covered, and would have to be paid in advance. Radio transmitters would be programmed to send out a digital license code, which would permit signals to access the layer in question. Credits would be applied to the user's account if the ionosphere does not support the registered communication at the time of transmission.

In addition, amateurs conducting moonbounce or satellite communications would need to pay a transit fee for passing signals through each layer of the ionosphere. These fees would be higher during the day, when the D-layer is energized. The only radio transmissions that would not be subject to these fees would be those on line-of-sight paths. There would be special discounts for emergency service and military users, but everyone would have to pay something.

The bill was scheduled to be introduced today, April the first, and has not yet received a bill number.

>From the U-S Capitol subway, this is Pierre Pullinmyleg reporting for Newsline.

--

Pierre will, of course, keep you posted on any developments regarding this proposed legislation. More than likely, he will have his next report a year or so from today. (The Pierre Pullinmyleg Institute of April 1st News)

With around a dozen clubs or groups indicating they will front up waving the flag in celebration of World Amateur Radio Day, even greater participation is required to make it a day of national public relations for our hobby.

Despite clubs successfully urging that early April be chosen, a period free from contests and generally warmer weather, far less that of those expected to have signed up so far.

Unlike anything else on the calendar, World Amateur Radio Day is ideal for putting our hobby right in the faces of the general public, who either has not heard of us, or has the totally wrong image.

We have to fight so many other recreational interests to continue with the claims of being one of the fastest growing hobbies in Australia.

Tune in to the World - Amateur Radio Gets People Talking, is an opportunity to take our hobby out to the public and show them what it really has to offer.

It needs a different kind of person to head it up, one who relates easily with the public of all ages and gender. Someone who knows the hobby, and can talk about it without jargon.

Simple rules are available on the WIA website www.wia.org.au

All it needs a publicly accessible venue under a suitable agreement plus public liability insurance, station equipment, signage and people who are very presentable and knowledgeable.

Re-useable posters, display boards and uniforms are also available, but be quick.

Remember - World Amateur Radio Day on the 17th of April, get involved, it only needs three or more to form a public station.

JOHN MOYLE LOGS DUE BACK BEFORE APRIL 22ND!
READ DETAILS IN CONTEST SECTION OF WIA.ORG.AU

WIA AGM

The WIA and the Darwin Amateur Radio club want to invite you to Darwin, Australia's Northern Tropical capital for the WIA Annual Conference being held over the weekend of 27, 28, 29th of May at Mirrambeena Resort .

A welcome dinner by the sea at the Beautiful Darwin Trailer Boat Club on Friday night.

Saturday morning for the Annual General Meeting and forums.

Saturday afternoon will see presentations based around Technology for the bush and life in the top end.

The conference dinner on Saturday night at the lovely Treetops restaurant finishes off the Saturday events.

For Partners we have set up a tour of some special places in Darwin led by the team from The DARC side.

On Sunday we are going to Litchfield National Park. Bring your togs and swim or just cool off in the pristine water falls and rock holes. Take a look at the magnetic anthill phenomenon, and join in a barbecue lunch at the very pretty Wangi falls.

Sunday evening why not join DARC for tea at the famous Mindil Markets and watch a beautiful sunset over Fannie bay whilst eating your choice of specialty food from one of the many different food stalls.

So why not register on the wia website now and come to Darwin for a great weekend of fun and fellowship with fellow Amateurs.
Register now on www.wia.org.au book your tickets and we will see you here on the 27th of may 2011.

This is Spud on behalf of the Wia and the Darwin amateur radio club.

HAMS ACROSS AUSTRALIA.

Urunga Radio Convention 2010

Urunga Radio Convention is on again this Easter weekend, Saturday 23 and Sunday 24 April at the 'Senior Citizens Hall', Bowra Street, Urunga.

The longest running Fox Hunt Field Day in Australia. Two days of 'Fox Hunting', quizzes, raffles, and pre loved gear and displays.

Inquiries welcome.

C.H.A.D.A.R.C. will cater for lunches again this year. Free tea and coffee will be available for those registering. Numbers are required for the optional meal on Saturday night at the Bowling Club - please notify the Committee.

The old cups from the early days are on display at the convention, and other times at the 'Ocean View Hotel', where some of the early conventions were held. An adjoining lounge is available for those that want to get away from the activities.

'Urunga' is a quiet village ideally suited to 'Fox hunting'. It is a very relaxing environment on the Kalang River, and has old style charm, which is

ideal for families.

Close by is Coffs Harbour and Bellingen, or perhaps a drive on 'Waterfall Way' to Dorrigo and the National Park Skywalk, picnic areas and lookouts.

Visit the golf or bowling clubs, or walk to the ocean on the meandering footbridge for a spot of 'surf fishing'.

Check the 'Urunga Radio Convention'

Ken Golden VK2DGT for URC - krgolden46@hotmail.com

While in VK2, here's the latest from Amateur Radio NSW....

"Hello Listeners, I'm Terry VK2UX, President of Amateur Radio New South Wales.

The Annual General Meeting of Amateur Radio New South Wales will be held in the Centenary Builiding at our offical station, VK2WI Dural. Its on Saturday 16th April, starting at ten am.

Our special guest will be Michael Owen, VK3KI, President of the National WIA.

I invite all members to come along, meet your new Councillors, and just have a catch up and some lunch in the pleasant surrounds of VK2WI.

Then on Sunday 17th, we are opening up the VK2WI site to the public, as part of the WIA National Field Day.

But before all that - next weekend, the 9th and 10th of april, we will be conducting the second part of the WIA Emergency Communications Training course. Its also being held at VK2WI in the Centenary Building.

That's all from me; 73 and I look forward to seeing you at the AGM.

VK3

THE Royal Australian Air Force celebrated its 90th birthday this week
and some 60 antique and historic aircraft from across Australia
descended on the Ballarat Airport for the birthday.

Why Ballarat?

RAAF director of regional events, Air Commodore Rod Luke, said
Ballarat Airport was previously the Wireless Air Gunners School
and also School of Radio, until its operations were shifted to
Laverton in 1961.

TARC Does the WIA National Field Day

The WIA National Field Day will be happening on Sunday April 17th and theTARCinc will be setting up displays of different aspects of Amateur Radio on the northern side of the Sturt Street headland on The Strand from around 8am.

Hams are STILL needed to help with this activity to publicise the worthwhile hobby of Amateur Radio to the wider community so if you are in the region get along to wave the flag and have some fun as well !

VK4 SILENT KEYS @ 2010 - 2011 QAC YEAR

VK4MWT Tom Bowden November 14 2010 Advised by Gavin VK4ZZ
VK4SS Alan Shawsmith November 23 2010 Advised by Stephen VK4JSS
VK4CK Colin King December 30 2010 Advised by Gary VK4AR
VK4AMO Mike O'Callaghan January 02 2011 advised by Dale VK4DMC
VK4HER Dawn Sebbens January 09 2011 advised by Margaret VK4AOE
VK4YNL Egon Frangenheim January 19 2011 advised by Gordon VK4VP
VK4DI Len Effeney February 01 2011 advised by Clive VK4ACC
VK4CAU Frank Sleep March 24 2011 advised by Gavin VK4ZZ

Frank Sleep VK4CAU has gone Silent Key.

Frank passed away in Maryborough QLD on Thursday March 24th following a massive heart attack. He was only 66 years old and has gone well before his time.

Frank was renown throughout the land as a Master Cook, was in demand with droving and shearing teams as the Cookie they wanted.

Frank honed his cooking skills on the land and with time served in the Australian Army Catering Corps, including a stint with 85 Transport Platoon RAASC in Vietnam during the early Seventies.

To quote Nick Quigley VK4CNQ OAM,
He was the best cook of corned meat that I know of.

While he was in Rockhampton he was the cook at the now closed ANZAC Club -

When not doing quality cooking for the masses, Frank had a bit of an interest in radio and technology.

Frank was one of the founding members of the HF Radio Club Inc. and was one of the technical stalwarts behind the success of the Selective Call project. Frank was also a beta-tester for the new range of Barrett HF radio equipment now hitting the market.

Frank was also a pioneer of APRS and Packet Radio in Australia, teaming up with the likes of Ron Graham VK4BRG and Wally Watkins VK4DO to explore the technical and operational sides of these modes.

Frank was always available to help anyone out with a technical problem, helping them to find the answers in a kind and supporting way.

He also supported many WICEN and Communications Support events run by various Amateur Radio Clubs and was a participant in the WIA Counter Disaster Operations Training course held in North Queensland during May 2010.

Those of you who knew Frank and want to send him off in the best way possible
are invited to attend Franks funeral at the Rockhampton Crematorium,
this coming Monday April 4th, commencing at 1-30pm.

Our heartfelt condolences go out to XYL Hazel and family at this time of grief.

We are all still coming to terms with his passing.

Vale Frank Sleep VK4CAU -

we have lost a good bloke.

(Gavin VK4ZZ)

Welcome to QNews from VK4WIA. I'm Geoff Emery, VK4ZPP and I've been thinking.

For us the amateur radio fraternity, the ease of passing messages perhaps is
regarded as too easy. We have all these means of getting the message through
from CW, voice, video and digital text and so on. Of course, this is a great
selling point of our hobby when explaining about amateur radio to other
interest groups or individually.

There is a caution given when one of our number volunteers for a task. This may
be editing the club newsletter, doing maintenance on club equipment or giving
a presentation. That caution is don't expect to get much feedback from your own
members.

This seems to be part of the counter-productive attitude that pervades many
areas today. On the internet, it seems easier, for some to flame than to
congratulate. Letter writing has largely disappeared in favour of email.

For the team building and personal development advisors, the "hug" is a greater
motivator than the kick in the rear. I received some personal feedback recently
which was warmly received. Feedback should be personal but it doesn't have
to be face to face.

Let's keep our hobby strong and "hug" an amateur for a job
well done. You might even get a warm glow yourself.

I'm Geoff Emery and that's what I think.....how about you?

(audio uploaded)

CLUBBING - TO SUPPLY NEWS ITEMS:-
email qnews@wia.org.au

BARC
http://www.qsl.net/vk4ba
or, by E-mail to vk4ba@qsl.net

Bring your car, bring your trailer. Weather permitting, I'll bring my bike.

This is Stuart VK4MSL, announcing the Brisbane Amateur Radio Club's
BARCfest, to be held Saturday 7th May at the Mt. Gravatt Show grounds,
1600 Logan Road, Upper Mt. Gravatt. Doors open 9:30AM and admission is $7.00.

For people wishing to sell at BARCfest, there is still time to book a table. Contact Les VK4SO on 3343 7247, email vk4so@wia.org.au, or see the website: http://www.qsl.net/vk4ba/

Redcliffe and District Radio Club
www.redclifferadioclub.org.au/

Hi this Is David vk4pdr for the Redcliffe and districts amateur radio club.

Wednesday's at 7.30 pm local time we hold a trivia night on our 70 cm repeater 438.325 and don't forget the 91.5 kHz tone for access.

It is a fun night for those that join in and the prize for winning is that you get to be next weeks trivia master!

so all of you amateurs out there with inquiring minds and wishing to join in on a fun night for a hour or so come and join us.

ROCKHAMPTON
IRLP NODE 6973 ;
e-mail vk4acc@wia.org.au
Secretary Clive 4928 1173
http://www.radarc.cjb.net/

Greetings from Rockhampton and District amateur Radio Club, the RADAR Club.

This is Les VK4VIL.

The RADAR Club has held its Annual General Meeting at the city's SES building, with a good rollup of approximately 50 financial members and a new executive elected for 2011.

Long time member and Past President from 2009, Mike VK4LMB was elected to the top position. For the time being, Mike will also be the voice and station operator for RADAR on Sunday call-back.

Another well known operator, John, VK4AJS becomes Vice President and has commenced as Assets Officer, Gary VK4GZA has probably the most unrewarding job in many aspects, according to a lot of people, that of Treasurer but will no doubt do a great job.

VK4JYM Jim moves from interim Secretary to the appointment of Secretary and looks forward to a strong year.

The RADAR club continues to build its calendar on the 2011 annual events with the annual Clairview get together, comms for the Central Queensland Rally Championships and the International Lighthouse Weekend at Cape Capricorn already on paper.

I'm Les VK4VIL, assisting Media Liaison Officer Clive VK4ACC, on behalf of the Rockhampton and District Radio Club

EDUCATION YOUTH AND ADVANCEMENT OF AMATEUR RADIO
www.hamcollege.com.au

The Hornsby and Districts Amateur Radio Club will be running an exam session on the morning of Saturday 16th April at Waitara in northern Sydney, for all grades of licence. Please notify the Club by 8th April as this allows time for the exam papers can be ordered. The best way is via the form at: hadarc.org.au

The club generally meets on the second and fourth Tuesdays of each month, however as the 26th is a catch-up holiday for ANZAC Day calling on Easter Monday, there will be no formal meeting this month.

hadarc.org.au/education.html

(Julian Sortland, VK2YJS, Publicity Officer, HADARC)

Training, Education & Assessment

Congratulations to Damien VK7HDS who has upgraded to the Advanced licence and completed the assessments and requirements.

If you are in VK7 and are interested in undertaking an amateur radio exam and/or training and this could be for foundation, standard, advanced, regulations or practical then contact Reg VK7KK on 0417 391 607

or email on regemm@ozemail.com.au.

(73, Reg VK7KK, REAST Education Officer and Assessor)

INTERNATIONAL NEWS With thanks to RSGB, Southgate AR Club, the ARRL, Amateur Radio Newsline, NZART and the WW sources of the WIA.

Japan triple disaster the latest

As misery continues since the earthquake, tsunami and nuclear accident hit north-eastern Japan on 11 March, the police death toll has reached 11,603 dead and 17,258 missing.

The headquarters station of the Japan Amateur Radio League (JARL) in Tokyo, JA1RL became a disaster communication centre in the days immediately after the disaster.

International Amateur Radio Union (IARU) Region 3 Secretary, Ken Yamamoto JA1CJP reports that they transmitted rescue requests including the needs of refugee centre facilities down to the basics of electricity, water and gas supplies.

Ken JA1CJP said that hand-held VHF and UHF transceivers are now being delivered to the local disaster relief centres.

The equipment is being used to establish VHF/UHF networks for refugee centres and local disaster relief, he said.

HF communications for disaster relief are still being operated occasionally by some volunteer radio amateurs, but JARL HQ stations were off the air by Friday, 25 March.

JARL expresses its appreciation to all radio amateurs for their cooperation to keep 7.030MHz clear for disaster relief communications, said Ken JA1CJP.

While relief efforts continue, concerns are still being expressed about the crippled Fukushima plant that is the worst nuclear accident in Japan's history. The crisis has still not been overcome.
Its a worrying time for the plant damaged by the earthquake and tsunami measuring 8.9 on the Ritcher scale and the worst for that nation in 140-years.

(Jim Linton VK3PC, Chairman, IARU Region 3, Disaster Communications Committee)

NIST TO CONDUCT TIME AND FREQUENCY USER SURVEY

The National Institute of Standards and Technology's (NIST) Time and Frequency Division is conducting a survey to learn more about its users, seeking to determine how the agency can make its services more useful in the future. NIST services include WWV, WWVH and WWVB, which provide reference time and frequency signals via radio. The NIST also provides the Internet Time Service -- which provides accurate time synchronization to computer systems -- and several other services to offer accurate time information via telephone or web pages. Radio amateurs are encouraged to complete the survey.

News from the ANZAC Front

AM and CW on air event on ANZAC Day

Looking for a way to commemorate ANZAC Day on amateur radio ?

Well apart from checking into the Harry Angel Memorial Sprint
there is another, more relaxing way on the day.

Several nets will be run on 40 and 80 metres using AM or CW to commemorate
ANZAC Day.

The Townsville Amateur Radio Club Inc. will again be operating the
Club Station from the Club Rooms which are situated in a World War 2
RAAF Communications Centre.

Participants in the Friendly Afternoon Net on 7115kHz from 0600UTC on
ANZAC Day will be using using Amplitude Modulation, one of the two modes of
modulation used by ANZACS during World War 2, the Korean War, the
Malaysian conflict and insurrection and the early part of the Viet Nam war.

The TC57A TCSWAT team including Bekir TA2RX, Tevfik TA1HZ and a host of others
will be operating portable from one of the hills overlooking ANZAC
Cove during the ANZAC weekend. Operations will include CW and SSB.

Operators will be activating VK4RAN onboard museum ship HMAS
Diamantina in Brisbane.

There are lots of other nets and operators keen to be onboard with AM
or CW for this special way to further remember fallen ANZACS.

If you want to join in or find out more about this fine ANZAC Day
event please contact Mike Patterson VK4MIK, on vk4mike@yahoo.com.au

>From Denis Johnstone Contest Manager for the John Moyle Memorial Field Day.

"So far I have received about 70 logs and there has been plenty of contesting
completed during the contest.

Of course having taken part in the contest, which in many cases required you
to plan your site, pack and transport, your accommodation, food and equipment.

Then to set up your station.

This was followed by up to 24 hours operation, after which you had to pack up
your station and return to your home QTH.

It would be such a shame if you were not to complete the process of completing
your log and getting it to me. You can use electronic or snail mail, and the
full details are on the Contest Page on wia.org.au

Your log is very important to you, but it is also very important to others as
it is with this information I am able to verify the logs of other stations.

So make sure you complete your log and get it to me before the closing date
of April 22nd 2011."

(above in text editions only)

SPECIAL EVENT STATIONS, REPEATER BEACON DX AND NET ADVICE

World Amateur Radio Day
"Amateur Radio: The first technology-based social network."

Members of DXXE, Mexican Contest and DX group, will activate 4A 0 IARU
between April 18-24 to celebrate World Amateur Radio Day on April 18th
and the 86th anniversary of the founding of the IARU.
QSL via N7RO.

(No word still as to a call sign by our WIA.)

http://www.dxxe.org

DEAL IS NO DEAL!

John Fisher VK3DQ writes, and I quote

"The VK7DI activation of Deal Island IOTA OC 195 has been rescheduled for
October 2011

After waiting in the marina for six days for a suitable weather forecast
We sailed on Saturday 26th at 5am

At approx 10am we were forced to turn round and seek shelter at Cowes
Philip Island. Seas in Bass Strait were above 6mtrs and were very confused.
We waited at Cowes and checked marine forecasts Which changed from the
expected 1--2 mrs declining to half a mtr to Very Rough conditions and a
gale warning!

We them motor sailed to Watsons Passage in Westernport Bay where we tied
up to a mooring and considered our options whilst waiting for the time
before entering the marina at Yaringa

As a number of our team members were running out of their time allocated
to be away and considering the ongoing weather forecast we decided to
reschedule the trip for October we are disappointed that we did not
make it this time but safety of our team must come first.

We will post some pictures of the "Big Waves" on our QRZ website in due
course, and many thanks to all the stations who contacted us over the six days
whilst we waited."

TIMOR-LESTE DXPEDITION

The September 2011 Timor-Leste DXpedition has now received its callsign - 4W6A
- from ARCOM, the licensing authority in Dili. The team is very grateful to
ARCOM for issuing this special one-letter callsign for use on the DXpedition.

The DXpedition has a website, at www.4w6a.com, which includes profiles of the
team members, propagation predictions and lots of information about
Timor-Leste and Atauro Island, the location of the DXpedition.

Unfortunately, Franck, VK8FNCY, has had to withdraw from the DXpedition due
to health reasons. His place has been taken by Tim, M0URX, and Ant, MW0JZE.
Oliver, MW0JRX, is now resident in Darwin and has recently received his
Australian callsign, VK8DX. The other team members remain Stuart, VK8NSB;
Steve, 9M6DXX, and John, 9M6XRO. As the team now comprises six operators,

we have increased the number of stations from three to four.

The group is requesting donations from DX clubs and individuals who wish to help, in order to cover the high cost of generator hire, fuel for the generators and the boat charter to and from the island. There is a "Donations" page on the 4W6A website. Payments may be made by credit or debit card (you do not need to have a PayPal account yourself in order to make a donation).

4W6A will be QRV from Atauro Island (IOTA OC-232), Timor-Leste (East Timor), from 16 to 26 September 2011. Activity will be on all bands 10 to 160 metres, using CW, SSB and RTTY. The QSL manager is M0URX, direct (SAE plus 1 IRC / $2), via the bureau, or LoTW. The entire log will be uploaded to LoTW as soon as possible after the end of the operation or, if possible, even during the DXpedition. QSL's may also be requested using the QSL request form on the website.

73,

Steve, 9M6DXX (4W6A Team Member)

Stuie, VK8NSB (4W6SB)

Philippines / USA special event stations

Remembering the 69th anniversary of the 'Bataan Death March', the amateur radio special event station 4 D 69 DM will be activated at Mount Samat in Bataan on Luzon Island on April 9.

The "Death March of Bataan" was a Japanese war crime and took place in the Philippines in 1942.

Another special event station operated from the USA for this event back on March 27, K5B by the "Mesilla Valley Radio Club" in Las Cruces/New Mexico.

The preferred frequencies will be in SSB on 3893, 7225, 14330 and 21337 kHz and in PSK on 14070 kHz.

Update of WIA News Broadcasts and Relays

The WIA National and VK7Regional News are broadcast from the station of VK7AX at 9.00 AM & 8.00PM Sundays and 11.00 AM Monday on the following:-

6M. Repeater VK7RTV on 53.775 (IRLP 6124)
2M. Repeater VK7RTV on 146.775 (IRLP 6616)
70Cm. ATV on 444.250 Vision / 449.750 Sound in the Ulverstone Area
with the ATV program now available via Video streaming at
http://vk7ax.camstreams.com

Programs are simultaneously fed to the EchoLink Network on VK7AX-L Node 100478
ALLstar Node 27328
& Link Gateway EchoLink VK7AX-R Node 152375

In addition to the WIA News Broadcasts, Amateur Radio Related Broadcasts are produced and broadcast via the these chanels, frequencies and VOIP services at 8.00 PM daily with a repeat at 11.00 hours the following day.

73 until next time

BBC TO CLOSES ORDFORDNESS TRANSMITTER SITE

Another famed radio transmitting site has been decommissioned.

This one is owned by the British Broadcasting Company and is not one very many on this side of the world know about.

Unless you are a WIA listener/reader living in Europe or are a truly devoted low frequency DX'er, you likely have never heard of the BBC's transmitter site at Ordfordness.

It's an operation that sat on 648 KHz with a five tower array beamed to Europe. And that's what makes the signal from Ordfordness such a great catch for medium wave D-X listeners.

But all that ended March 27th. That's when the BBC switched off this transmitter site for good.

But its demise will not go undocumented.

As a historical note, Jonathan Marks, G-8-W-G-N, has released a short documentary that traces the history of the Ordfordness transmitter site from its inception. Marks, who was the former producer and host of the famed Radio Netherlands Media Network program is joined by Ordfordness radio engineer Andy Matherson who explains the way in which the site operated.

It's a great tour of a historic moment in European medium wave broadcast radio. You can experience it for yourself on line at vimeo.com/20996209

Another sad moment in broadcast history, but one that Jonathan Marks, G8WGN, has taken the time to preserve.

WW SPECIAL INTEREST GROUPS --- FINAL FRONTIER

Expedition 27 launch - NASA TV coverage

The Russian Federal Space Agency has adjusted the launch date for the next three residents of the International Space Station to Monday, April 4 (April 5 in Baikonur, Kazakhstan).

The new date enables engineers in Baikonur to complete their checkouts of the Soyuz TMA-21 spacecraft. The launch date was set after a thorough review of Soyuz systems by Russian space officials and engineers.

Russian cosmonaut and Soyuz Commander Alexander Samokutyaev, NASA Flight Engineer Ron Garan and Russian Flight Engineer Andrey Borisenko are scheduled to launch from the Baikonur Cosmodrome at 5:18 p.m. CDT on April 4 (4:18 a.m. Baikonur time on April 5).

The launch will occur less than a week before the 50th anniversary of Yuri Gagarin's historic flight from the same Baikonur launch pad to become the first human to fly in space.

For NASA Television streaming video, downlink and schedule information, visit: www.nasa.gov/ntv

NASA ordered its comet-hunting Stardust probe to burn its remaining fuel, setting off a series of events that shut down the spacecraft after a 12-year career. From launch until final rocket engine burn, Stardust travelled approximately 3.54 billion miles.

Engineers gave the order from Lockheed Martin's Denver complex, where Stardust was built.

Stardust performed one last experiment by telling engineers how much fuel was left. That will tell them how accurate their fuel calculations were and help with the design of future probes.

Stardust was launched in 1999. It completed its primary mission in 2004 by flying through a cloud of dust and gas enveloping the Wild 2 comet and capturing samples. Those were sent to Earth for study via a parachute-equipped canister.

Spacecraft don't carry fuel gauges because they don't work in zero gravity.

AO-51 ENTERS AN ECLIPSE PERIOD

Eclipses are back for AO-51, and the length is increasing every day.

According to AO-51 Command Station, Mark Hammond, N8MH, eclipses are now lasting about 1 to 2 minutes per pass. They are expected to increase in length pretty fast, gaining a minute every day or two over the coming weeks and month.

AO-51 is still running under power management in single transmitter mode on the 435.300 MHz downlink running approximately 1 point 3 watts. The satellite will be off during eclipses and probably right before and after. You'll probably still hear the transmitter cycling off and on around eclipse times but most voice users will appreciate the stronger signals.

AO-51 be in this mode until further notice. (ANS)

BJ8TA AN EME AND SATELLITE DXPEDITION

AMSAT-China Chief Executive Officer Alan Kung, BA1DU reports that his group is organizing an expedition to southwest China. This, for EME experiments

and amateur satellite communications.

The expedition team will use the special technology experiments amateur radio call sign BJ8TA. The group will also be active on the available satellites during the expedition period.

IARU REGION 3
Emergency Centre of Activity (CoA) frequencies
3.600, 7.110, 14.300, 18.160 and 21.360 MHz

At 10:04 AM PDT on March 21, Rex Weinheimer, KC5AGO, of Stonewall, Texas -- a member of the Maritime Mobile Service Net (MMSN) -- heard and responded to a "weak and broken MAYDAY call." The call was from the sailing vessel Gloria Jean, a 30 foot sailboat that was in the Pacific Ocean about 120 miles west of Ensenada, Mexico. Weinheimer heard the distress call on 14.300 MHz, a frequency monitored by the MMSN.

MMSN Net Controller Lee Langford, KG4DZN, told the ARRL that through the combined efforts of several net stations, the net was able to ascertain the situation and the position of the stricken vessel. MMSN operators contacted both the US and Mexican Coast Guards and both services deployed assets to the scene. The US Coast Guard dispatched an MH-60 Jayhawk helicopter from San Diego and a C-130 Hercules plane from Sacramento.

According to the USCG, the Gloria Jean had no propulsion, food, water or safety equipment.

SARL NEWS - SUNDAY 3 APRIL 2011

You are listening to ZS6SRL, the official radio station of the South African Radio League, the national body for amateur radio in South Africa, with a news bulletin every Sunday at 08:15 CAT in Afrikaans and at 08:30 CAT in English. To listen to a web stream, visit www.sarl.org.za, click on 'ARMI' and follow the links for details. PLEASE NOTE: for audio via Echolink, connect to ZS0JPL-R.

You can download this bulletin and previous ones from www.sarl.org.za and also subscribe to receive future bulletins by e-mail. Your newsreader this morning is (name), (call sign), on 145,725 and 7,066 MHz from Pretoria, with relays on 7,066 and 3,695 MHz SSB.

SILENT KEYS

It is with regret that it has to be announced that the keys of two radio amateurs became silent. They are:

James Timoney, ZS1TK, of Cape Town Amateur Radio Centre, at the age of 91.

The second one is Johan Du Plooy, ZS6AYO, at the age of 84, who leaves his wife, Joey.

Our sincere condolences go to the relatives and friends of the deceased.

(PAUSE)

In the news today:

PRESIDENT'S NET TONIGHT

NEW REGULATIONS RAISE CONCERNS

AMATEUR BAND ALLOCATION - GET THE FACTS

BOOK NOW FOR CRUISE DOWN MILLIONAIRES' MILE

You are listening to ZS6SRL. Stay tuned for more details on these and other important and interesting news items.

NEWS FLASH - PRESIDENT'S NET

The SARL presents a President's Net this evening starting at 19:30 CAT on repeaters in various areas. Clubs wishing to link their repeaters to the teleconference bridge should send their landline number to

artoday@sarl.org before noon today (Sunday). It will also be available on Echolink and on 3 718 kHz.

NEW REGULATIONS RAISE CONCERNS

The radio regulations were published on 31 March and came into effect on 1 April 2011. Unfortunately, a number of mistakes have crept in, which ICASA is already working on to rectify as soon as possible.

The regulation for a ZU license is incorrect; the word "under" was left out in front of the 20 years. The situation is as follows: anyone can write the class B examination. There is no age restriction, but if you are over 20 years of age you cannot apply for a class B license, also known as a ZU license. If you have a class B qualification you will be able to keep a ZU license until you reach 25, when the license falls away.

The position of current ZU license holders has not been finalised. ICASA is likely to allow a two-year grace period for persons over 25 with a class B qualification to upgrade their class B certificate to a class A and apply for a class A license. To upgrade means having to write the class A examination.

Candidates over 20 years of age who have registered for the class B examination may still write, but should note that they will not be able to apply for any Amateur Radio license. The SARL recommends that you change your registration to Class A or request that your registration is postponed till the October examination to allow you more time to study.

In line with common practice, the Regulation Syllabus for the May examination remains unchanged, since it is already midterm. Candidates will thus be examined on the regulations in force when they started their studies earlier this year. The examination papers have already been completed. In the October examination candidates will be examined on the new regulations and any amendments that may be published soon.

If you are currently a ZR, you now have the same privileges as a ZS license holder. The upgrade process falls away. The new table of amateur radio frequency allocation is incorrect. Both ZR and ZS should follow the frequencies and power limits marked as A1. ZR license holders do not have to change their callsign.

AMATEUR BAND ALLOCATION - GET THE FACTS

There is still confusion about the allocation of amateur frequencies. While the ITU agrees on frequency allocations at the World Radio Conference, these allocations are only recommendations to national regulators.

In South Africa, frequency allocation is a function of the Table of Frequency Allocations which is developed by ICASA and published in the Government Gazette. ICASA is under no obligation to automatically

incorporate what the ITU may decide.

It is ICASA's job to regulate the spectrum in the best interest of all South Africans. The expansion of the 40 metre amateur band by 100 kHz to 7 200 kHz is a good example. The ITU recommended that it should happen by a certain date. Thanks to the SARL's intervention with ICASA, a separate regulation change was published in the Government Gazette to effectively implement the 40 metre band expansion in South Africa.

If the SARL had not done this, the expansion would have only happened with the publication of the next Table of Frequency allocation, two years later. Moreover, even if the expansion appears in the Table of Frequency Allocation, it still requires a change of the regulations. That would have only happened this year.

The ITU recommends, and ICASA implements. That is why the SARL meets regularly with ICASA to ensure that amateur radio is looked after. Amateur radio is a very small part of what ICASA does. The SARL believes that we are privileged that senior ICASA officials support amateur radio and work with us to support the continued development of amateur radio in South Africa.

NEW 70 MHz SARL RECORD

Mike Bosch, ZS2FM, reports that on 29 March 2011 Pieter, V51PJ, of Rosh Pinah and Andre, ZS2ACP, of Port Elizabeth established the first-ever digital contact between Namibia and South Africa over a distance of 1 086 km. This was followed by another FSK441 contact between V51PJ and Paul, ZS6NK, of Polokwane, which is a new 70 MHz SARL digital record of 1 346 km. Congratulations to the three of you for your pioneering efforts.

FSK441 uses Frequency Shift Keying at a baud rate of 441 Hz. Four distinct tones are used, namely 882, 1 323, 1 764, and 2 205 Hz. Each encoded character uses three tone intervals and therefore requires 3/441 seconds (approximately 2,3 ms) for its transmission. FSK441 accommodates a potential "alphabet" of 48 characters. The present encoding scheme uses 43 of these characters.

BOOK NOW FOR CRUISE DOWN MILLIONAIRES' MILE

There are only 20 places left on the boat trip down Millionaire's Mile on the Vaal. Start the 2011 SARL National Convention in style on 15 April. Book now to avoid disappointment! See the Vaal and enjoy a delicious dinner on the Liquid Lounge and stand the chance to win a dual-band VHF/UHF handheld transceiver donated by Kobus, ZS1K, of Lets Play Radio. The draw will be held during the cruise. Book now. It is expected that the twenty seats to be snapped up quickly. Full details and how to book are available on www.qsl.net/zs4srk or follow the link from www.sarl.org.za. It could just be your lucky night to walk away with the dual-band radio.

NEW MEMBERS

The membership of the SARL has jumped to 1 527 as we welcome yet more new members to the SARL. We wish the following newbies a long and beneficial association:

Dirk van Vuuren - ZSL1009 Louis Bredenhann - ZSL1010 Norman Esterhuizen - ZSL1011 Neil Ritson - ZSL1012 Andrew van Heerden - ZSL1013 Jeffrey Grusd - ZS6IRQ

CONTEST NEWS

The first leg of the SARL 80 m QSO Party will be on the air on Thursday 7 April, from 17:00 to 20:00 UTC, with phone activity between 3 603 to 3 650 and 3 700 to 3 800 kHz.

The exchange is your call sign, RS signal report and operator's name. You score 10 points for every contact with a South African station and 15 points for every contact with a station outside South Africa. Logs must be submitted by 14 April to the Durban ARC, 17 Brownlee Place, Bluff, Durban, 4052, or by e-mail to zs5lp@vodamail.co.za.

PROPAGATION REPORT

Hannes Coetzee, ZS6BZP, reports that the solar activity is at moderate levels. Currently Sunspots 1 176, 1 180 and 1 183 are doing their part to make HF operators happy with some very nice DX openings during the past week. The effective sunspot number is expected to be around 75 for the coming week.

15 m will provide the best opportunities for DX followed by 20 m. With the higher sunspot activity, 10 m will open first followed by the lower bands later during the day. Conditions to India will be good from the afternoon till after sunset. During the late afternoons conditions will be good towards Europe. Fair contacts with the USA are possible during the evening. Contacts with Australia are possible on 20 m after sunset. Openings to Brazil and South America are possible during the afternoons. With the good 15 and 20 m openings, 17 m and 12 m will also be full of surprises.

For the CW and digital enthusiasts 30 m may be very rewarding with openings to many parts of the world.

Locally 40 m is the workhorse for contacts around the country with 20 and 30m also being very useful for contacts over the longer distances. 80 m will be best during the early mornings and late afternoons as well as over the shorter distances.

80 m is the frequency of choice during the evenings.

Please visit www.spaceweather.co.za for further information.

DIARY OF EVENTS

3 April - Tonight the President's Net at 19:30 CAT. 7 April - SARL 80 m QSO Party, 17:0 to 20:0 UTC. 15-16 April - SARL National Convention at Vaal University for Technology. 7 May - RTA in Cape Town. 18 June -

Programming in Windows course in Gauteng. Book at www.sarl.org.za.

SARL News invites clubs and individuals to submit news items of interest to radio amateurs and shortwave listeners. Submit news items - if possible - in both English and Afrikaans to www.sarl.org.za/newsinbox.asp, not later than the Thursday preceding the bulletin date.

The SARL also invites you to listen to Amateur Radio Today every Sunday morning at 10:00 CAT on 145,750 MHz in the Pretoria area, with relays on 7 082, 7 205 and 17 750 kHz. There is also a podcast by ZS6RO. For a web-stream and Echolink by ZS6FCS, visit www.sarl.org.za, click on 'ARMI' and follow the links. A repeat transmission can be heard on Mondays at 18:30 CAT on 3 230 kHz. Sentech sponsors the ARMI transmissions on the non-amateur frequencies.

You have listened to a bulletin of the South African Radio League, compiled by Hester van der Walt and checked by George, ZS6NE.

Thank you for listening, 73.

Message from Break-In Editor
"The Break-In Editor John Walker ZL3IB has advised that he is assuming
Break-In will be published as usual although it maybe slightly late."

****

>From The Business Manager ZL2DL
Debby says...
Rugby World Cup 2011: NZART Council has declared the Rugby World Cup to be a
Special Event and encourages you to use the ZM prefix. In declaring this a
special event it allows hams to use the ZM prefix eg ZM3TNT. In it's April
"Business Update", RSM states: "To Promote the Rugby World Cup, New Zealand
Amateurs are encouraged to use the ZM callsign prefix during September and
October 2011".

A Map of New Zealand has been placed on the NZART website with game
locations linked to contact details of local branches, any planned special

events, on air events, and local repeater frequencies. Branches are to be encouraged to invite visiting hams to attend meetings and any special events. Any proposed changes or additions to this are to be forwarded to myself or the NZART webmaster.

Suggested special event call signs are as listed below

ZL6RWCN Northern Districts
ZL6RWCC Central Districts
ZL6RWCM Midlands Districts
ZL6RWCS Southern Districts

Anyone interested in picking up any these callsigns and being a trustee may contact myself zl3tnt@nzart.org.nz for further details.

Individuals are encouraged to apply for "RWC" suffix callsigns and print QSL Cards.

My thanks are extended to Paul Ormandy ZL4PW for his assistance in putting this project together.

Ann Fraser ZL3TNT

Break In April/May issue: Due to the recent earthquake in Christchurch, the April/May issue of Break In will be dispatched from Christchurch on or about the 7th April.

I will be on leave: The office will be closed from Tuesday 13th April until Tuesday 26th April as I will be away. For any urgent enquiries, please contact your local Councillor, or nearest branch.

Talk soon...Debby ZL2DL

****

FMTAG Notes For Infoline-227
Please click HERE to go to the FMTAG Applications Being Processed

Proposals
1.. Branch 60 Taupo has applied for a 2 metre APRS Digipeater at Kururau Road, Topo50 map reference BH33 913938. The transmit and receive frequency will be 144.575 MHz. An Engineering Evaluation, in accordance with the MED's Radio Licence Certification Rules (PIB38), shows that there will be no interference to other stations.
2.. Branch 81 Waikato VHF has applied for a 2 metre Voice Repeater at Maungakawa, Topo50 map reference BC34 119.91 565.00. The transmit frequency will be 145.575 MHz and the receive frequency will be 144.975 MHz. An Engineering Evaluation, in accordance with the MED's Radio Licence Certification Rules (PIB38), shows that there will be no interference to other stations.
3.. Branch 81 Waikato VHF has applied for a 70 cm Link at Maungakawa, Topo50 map reference BC34 119.91 565.00. The transmit and receive frequency will be 434.350 MHz. An Engineering Evaluation, in accordance with the MED's Radio Licence Certification Rules (PIB38), shows that there will be no

interference to other stations.
4.. Branch 81 Waikato VHF has applied for a 70 cm Link at Te Uku, Topo50 map reference BD32 732.64 067.29. The transmit and receive frequency will be 434.350 MHz. An Engineering Evaluation, in accordance with the MED's Radio Licence Certification Rules (PIB38), shows that there will be no interference to other stations.
Final Recommendations to NZART Council
Published on the NZART website, and in NZART HQ Infoline No.224, for the information of, and inviting comments from, NZART members.

1.. Branch 83 Raglan has applied for a 2 metre Voice and Data repeater at Ward Street, Topo50 map reference BD33 007.88 154.66. The transmit frequency will be 145.350 MHz and the receive frequency will be 144.750 MHz. An Engineering Evaluation, in accordance with the MED's Radio Licence Certification Rules (PIB38), shows that there will be no interference to other stations.
2.. Branch 83 Raglan has applied for a 70 centimetre Voice and Data repeater at Ward Street, Topo50 map reference BD33 007.88 154.66. The transmit frequency will be 439.425 MHz and the receive frequency will be 434.425 MHz. An Engineering Evaluation, in accordance with the MED's Radio Licence Certification Rules (PIB38), shows that there will be no interference to other stations.
Published on the NZART website, and in NZART HQ Infoline No.225, for the information of, and inviting comments from, NZART members.

1.. Branch 74 Wellington VHF has applied to relocate its 2 metre Bulletin Board to Ngaio Reservoir, Topo50 map reference BQ31 494.92 316.02. An Engineering Evaluation, in accordance with the MED's Radio Licence Certification Rules (PIB38), shows that the transmit frequency can remain on 146.025 MHz and the receive frequency can remain on 146.625 MHz, and that there will be no interference to other stations.
2.. Branch 74 Wellington VHF has applied to relocate its 70 centimetre Bulletin Board to Ngaio Reservoir, Topo50 map reference BQ31 494.92 316.02. An Engineering Evaluation, in accordance with the MED's Radio Licence Certification Rules (PIB38), shows that the transmit frequency can remain on 434.875 MHz and the receive frequency can remain on 439.875 MHz, and that there will be no interference to other stations.
3.. Branch 74 Wellington VHF has applied to change the frequency of the 70 centimetre repeater located at Ngaio Reservoir, Topo50 map reference BQ31 494.92 316.02. The transmit frequency will be 434.550 MHz and the receive frequency will be 439.550 MHz. An Engineering Evaluation, in accordance with the MED's Radio Licence Certification Rules (PIB38), shows that there will be no interference to other stations.
Comments and Applications
Please send your comments and suggestions on the above matters and recommendations, and on any other FMTAG matters, by e-mail to: fmtag@nzart.org.nz

Applications for repeaters, beacons, digipeaters, point-to-point links, and so on, should be made on the latest version of FMTAG Form 10. The latest versions of FMTAG Form 10, and the explanatory Form 10A, are available on

the NZART web site:
http://www.nzart.org.nz/nzart/fmtag/

Completed forms should be sent by e-mail to fmtag@nzart.org.nz

END

ARISSat-1 [1] to be Switched on in Mid-April
Is everyone ready for ARISSat-1 [1] to be switched on in mid-April to commemorate the 50th anniversary of Yuri Gagarin's first manned space flight? I enjoy listening for the ISS, and my Funcube Dongle [2] has made it really easy.

Anyone working through any educational aspects with a local school? The ARISSat web site has some ideas and some of the Funcube education outreach concepts are also adaptable.

73, Jim ZL2IA

Publicity and Marketing Officer
Message From President Roy ZL2KH
It is with regret that I have to inform you that I have accepted the resignation of David Searle ZL3DWS as Marketing and Publicity Officer.

David would have been ideal for this position - but has made the decision to move with his family to Sydney - as a result of recent seismic activity in Christchurch.

73, Roy ZL2KH

That is rather sad. David was in the job for only a month.

The job is now open again.

See details at:
http://www.nzart.org.nz/council/jobs/marketing/

Jamie ZL2NN Editor

****

Call For a ZL4 Councillor
The incoming council needs the names of members in ZL4 who are interested in being councillors.

Anyone interested should contact either ZL2KH or HQ

ZL2KH

E, X and Y Callsign Suffixes to Become Available to NZ Amateurs
Following representations by NZART, Radio Spectrum Management have agreed that Amateurs will, in the future, be permitted to be issued with callsigns whose suffixes start with E (previously AREC) X and Y. The rules for callsigns using these suffixes will be the same as those for existing (A to D and F to W) callsign suffixes - see PIB 46 for details.

This change will:
1.. make additional (temporary) single letter single letter callsigns available to contest and similar operators;
2.. give a great deal of pleasure to those contesters and DXers who wish to use a more interesting and unique callsign; and
3.. allow name-based call sign combinations for those whose names start with the letter E (e.g. Ernie), X (e.g. Xavier) and Y (e.g. Young)
At the same time, RSM will extend the temporary commemorative callsign series from ZL 10 - 99 to ZL 10 ï¿½ 100.

RSM plan to include these changes in Edition 13 of PIB 46 which they expect to publish in June 2011. The new callsign series will be available for Approved Radio Examiners to allocate from the date of publication.

Don Wallace ZL2TLL NZART Administration Liaison Officer (ALO)

Long Path PSK - an Answer
Another response from the IBMHams group: to the original question about Long Path PSK:

This is called LDE (Long Delayed Echo) and I donï¿½t think anyone alive can explain the length of the delays (usually a lot more than 1/7th of a second, the length of time for a signal to go all the way around the world). I have noticed it many times in my 60 years of hamming. I cannot explain the frequency differences, though. It may be that in other than digital modes this effect was not noticeable, although in AM days, it would have caused a significant heterodyne.

John, K2CIB

regards 73 de ZL1GWE John

Invitation to School Radio Clubs to Arrange Lunch-time QSOs[1]
The Public Information Brochure 46, PIB 46 [2] called "Radio operator certificate and callsign rules", a publication from the Radio Spectrum Management Group (RSM), makes provision for Radio Club Stations to train unqualified persons live, on-air, under the direct supervision of a qualified amateur radio operator.

The club's callsign is used with a suffix "XT" (Examination Trainee), and candidates may take an active part in general communication, operate transmitter controls, and engage in calling and signing off procedures.

Reports are encouraged and should be send to:
webmaster@nzart.org.nz?subject=WEB_ENTRY_SCHOOL_SKEDS

Microsoft Scheme Sniffs Out Unused Wireless Spectrum
Volunteered equipment would map white spaces that unlicensed devices could use

By Tim Greene, Network World

March 25, 2011 10:26 AM ET

Microsoft researchers have designed a scheme for measuring whether licensed radio frequencies are actually being used so unlicensed devices can use it, something that may become necessary as demand for wireless applications grows.

The architecture, called SpecNet, would sense and map where spectrum is being used and more particularly where it's not -- so-called white spaces, according to a paper being presented next week at the USENIX Symposium on Networked Systems Design and Implementation in Cambridge, Mass.

Further details can be found at:
http://www.networkworld.com/news/2011/032511-usenix-microsoft-spectrum.html?hpg1=bn

****

New Mars Rover To Feature Morse Code
As the Jet Propulsion Laboratory (JPL http://marsprogram.jpl.nasa.gov/msl/) builds the next Mars rover -- this one is named Curiosity -- to deploy to the red planet in the fall of 2011, they're having a little fun with it. Back in 2007 when the Curiosity team was putting together the rover, its wheel cleats had a raised pattern with the letters "JPL," leaving a little stamp of the rover's birthplace everywhere it rolled. "At the time, I asked whether the real rover would have those wheels, and they said, no, they weren't going to get to advertise JPL with each turn of each of the rover's six wheels; the real rover would have some other pattern," said Emily Lakdawalla of The Planetary Society in her blog http://www.planetary.org/blog/article/00002967/. Lakdawalla is the organization's Science and Technology Coordinator.

Lakdawalla said that there is nothing special about the shapes of the markers in Opportunity's wheels; they are just square holes through the wheels through which the wheels were bolted to the lander during cruise and landing." Opportunity is the name of the rover that went to Mars back in 2003. "But Curiosity didn't need holes in its wheels for attaching to any

lander -- there isn't one. So the engineers got to make the markers in any shape they wanted to."

But in March 2011, she saw a video http://www.youtube.com/watch?v=G019Jci0abs of the rover as it is today: "I had to chuckle at those 'visual odometry markers' [on its tires]. Before I explain why, I'll point out that they really are useful things to have in rover wheels. The repeating pattern of the 'visual odometry markers'...makes it fairly easy for both the rover and human operators to determine visually how far the rover has roved using rear-view imagery." So what pattern did JPL choose to put on Curiosity's wheels? One that Lakdawalla called "very amusing. The holes are in a pattern of short squares and longer rectangles -- almost like dots and dashes.

"Morse code" And what does it spell out in Morse code? JPL .- - - .- -. .-..

According to JPL, Curiosity is about the size of a small SUV -- 10 feet long (not including the arm), 9 feet wide and 7 feet tall -- or about the height of a basketball player -- and weighs 2000 pounds. It features a geology lab, rocker-bogie suspension, a rock-vaporizing laser and lots of cameras. Curiosity will search areas of Mars for past or present conditions favorable for life and for conditions capable of preserving a record of life. It is set to launch between November 25-December 18, 2011 from Cape Canaveral, Florida and will arrive on Mars between August 6-20, 2012. The prime mission will last one Mars year, or about 23 Earth months.

http://www.themoralliberal.com/2011/04/02/morse-code-and-the-evidence-of-divine-origin/

-- quote

The world of communication was revolutionized by a man who died APRIL 2, 1872. His name was Samuel F.B. Morse, inventor of the telegraph and the Morse Code. An outstanding portrait artist in his own right, founding the National Academy of Design, Morse erected the first telegraph lines between Baltimore and the U.S. Supreme Court chamber in Washington, D.C.

The first message over this new communication system, sent in 1844, was only four words, a verse from the Bible, Numbers 23:23:

What hath God Wrought!

Samuel F.B. Morse, who graduated from Yale in 1810, was the son of educator Jedediah Morse, known as ï¿½Father of American Geography.ï¿½

Jedediah Morse stated in Charleston, Massachusetts, April 25, 1799:

Whenever the pillars of Christianity shall be overthrown, our present republican forms of government, and all the blessings which flow from them, must fall with them.

Four years before his death, Samuel F.B. Morse wrote:

The nearer I approach to the end of my pilgrimage, the clearer is the evidence of the divine origin of the Bible, the grandeur and sublimity of Godï¿½s remedy for fallen man are more appreciated, and the future is illumined with hope and joy.

-- end quote

Irish Radio Transmitters Society
Radio News Bulletin
Sunday 03rd April 2011

IRTS AGM Weekend

Limerick Radio Club hosted the 79th AGM of the IRTS last weekend. Eighty Seven (87) guests attended the Annual Dinner and invited guests included Cllr. Katlheen Leddin, Colin & Gwen Thomas G3PSM representing IARU Region 1, Conor Conran representing Comreg. Colin Thomas also passed on the best wishes of Dave Wilson M0OBW, President of RSGB and Kay Craigie N3KN President of ARRL.

On Sunday almost 200 visitors attended the Limerick Radio Club Rally, and lots of happy faces were seen leaving with boxes of goodies! The AREN MCP was in attendance which attracted a lot of interest and some potential new members. The IRTS 80M news was read by Ger McNamara EI4GXB from the same large room that Terry Genes G4POP delivered his seminar on Ham Radio Deluxe. All in all a very successful weekend was had by all and Limerick Radio Club would like to thank everyone who attended.

IRTS Awards Presented at IRTS AGM 2011

The following is a random selection of some of the awards and respective recipients presented at the IRTS AGM Limerick 2011:-

IRTS CW FD, IRTS Pete Daly Cup, presented to Jeremy, EI5GM/P

IRTS CW FD restricted, IRTS Paddy Smyth Cup, presented Dundalk Amateur Radio Society, EI0W/P.

IRTS SSB FD Open, Paddy Daly Microphone presented to Tipperary Amateur Radio Group, EI7T/P.

IRTS SSB restricted, IRTS HF Shield presented to Shannon Basin Radio Club, EI3Z/P

Full details of awards and recipients can be obtained by logging on to IRTS.ie.

AREN at IRTS AGM Limerick 2011

AREN would like to thank EI4BZ, EI5GOB, EI2IT, EI3FFB and EI7IG for their assistance with the Mobile Command Post over the weekend of the IRTS AGM. Also, AREN would like to thank the Radio Amateurs that stopped by for a chat and to ask questions. Lastly we would encourage any Radio Amateur with an interest in Emergency Communications to join the low volume google group AREN-EI, and we would encourage discussion related to the topic.

South Dublin Radio Club

South Dublin Radio Club are back operating at their totally refurbished premises in Ballyroan Community Centre, Marian Road, Rathfarnham, Dublin.

Next Tuesday April 5th Ronnie EI9ED will be travelling from Kells to give a talk, at 8pm, on Amateur Television at South Dublin Radio Club. He will explain how easy it is to get involved in the hobby and the facilities offered by the television repeater in Kingscourt Co. Cavan. Visitors as always are welcome to attend.

Tipperary Amateur Radio Group

The next meeting of the Tipperary Amateur Radio Group will take place in Raheen House Hotel, Raheen Road, Clonmel on Thursday next the 7th of April at 8.30pm All are welcome.

UK Coast Guard Frequency Changes

Two UK Coastguard stations are moving frequency to below 2MHz from April 4, 2011. These changes will be made to HMCG MF transmitting frequencies: MRCC Humber -TX on 2226 kHz will change to 1925 kHz. MRCC Falmouth - TX on 2226 kHz will change to 1880 kHz

---

THANK YOU - PAT CONWAY TROPHY

Michael Clarke Mi5MTC writes, wishing to thank the IRTS for presenting him with the Pat Conway Cup at the AGM in Limerick. Louth Erne have again won the RSGB Club of the Year Award for Northern Ireland.

They count among their members, many new amateur radio families, fathers, mothers, daughters and sons, and five women, all newly licensed from our Foundation courses in 2010. The club now has a rich programme of amateur radio activities.

The next activity is the Pearl Anniversary Rally on 17th April, the Sunday before Easter in SHARE.

On display will this large cup engraved IRTS Pat Conway EI3Z Perpetual Memorial Trophy. The club proud to have it and hope that the rally and all their other successes are an apt memorial to Ei3Z

Japan Earthquake and Tsunami

As misery continues since the earthquake, tsunami and nuclear accident hit north-eastern Japan on 11 March, the headquarters station of the Japan Amateur Radio League (JARL) in Tokyo, JA1RL, became a disaster communication centre in the days immediately after the disaster.

International Amateur Radio Union (IARU) Region 3 Secretary, Ken Yamamoto JA1CJP reports that they transmitted rescue requests including the needs of refugee centre facilities down to the basics of electricity, water and gas supplies.

Ken JA1CJP said that hand-held VHF and UHF transceivers are now being delivered to the local disaster relief centres. "The equipment is being used to establish VHF/UHF networks for refugee centres and local disaster relief," he said. "JARL expresses its appreciation to all radio amateurs for their cooperation to keep 7.030MHz clear for disaster relief communications." Ken JA1CJP, said.

DX News

A major IOTA expedition which incorporates 5 different IOTA references in Papua New Guinea has just started and the team are currently on the Feni Islands OC-101 signing P29VCX until 7 April. Then from 8 - 14 April they move to the Nuguria Islands OC-257 where the call P29NI will be used. This is followed by the Green Islands OC-231 where they will use P29VLR from 15 - 18 April. Finally the call P29VCX will firstly be used on Misima Island OC-117 on 22 - 25 April and then on Loloata Island OC-240 from 26 - 27 April. All in all this presents an opportunity to work up to 5 new ones for the IOTA Award or possibly to fill in a few slots for your DXCC Challenge.

Three French operators will be QRV from the Seychelles using the callsign S79UFT until 15 April. They will operate mainly CW with some PSK.

Our own DXer Dave EI9FBB will pay a short visit to Monaco later this month and will be active as 3A/EI9FBB from 20 - 22 April. Operation will be mainly in the afternoons and logs will be uploaded to Logbook of the World and eQSL.

Uganda has been quite easy to work in recent times. Nick 5X1NH has been very active and is still there till 14 April. Another visitor this time UV5EVJ is now signing 5X1VJ. He will be in Uganda till 8 June.

Craig VK4LDX will be QRV from Magnetic Island OC-171 from 17 - 20 April. He plans to operate SSB, PSK41 and RTTY. He will use the call VK4LDX/P.

---

9 year-old radio ham operator on YouTube

A new video of 9 year-old radio ham operator Katia Ivanova, RZ9UMA, has been posted on YouTube. The video shows Katia QRV on CW and SSB.

Items for inclusion in next week's Radio News can be submitted via e-mail to "newsteam /at/ irts / dot / ie" for automatic forwarding to both the radio and printed news services. Urgent news items for the radio news maybe telephoned to the radio news editor, Aidan, EI7JC on 085 7100511.

Please note that items for the radio news should reach the editor no later than midday on Thursday in order to be guaranteed inclusion in the following Sunday's bulletin.

355. Ohio/Penn DX Bulletin #1005

The Ohio/Penn DX PacketCluster
DX Bulletin No. 1005
BID: $OPDX.1005
April 4, 2011
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, NJ1Q, NG3K & ADXO, N4AA & QRZ DX, WP3GW, N5ER, KH6BZF, K8GI, K8JP/V31JP, K8YSE, W8GEX (60m News), 9M6DXX, AT International, DL1SBF, DL7MAE & The DX News Letter, DxCoffee.com, DXItalia.it, DX-World.Net,
F5NQL, F6AJA & Les Nouvelles DX, I1JQJ/IK1ADH & 425 DX News, JI5RPT, LA9VDA, OZ6OM & 50 MHz DX News, Pete's-DX-Newsdesk, RSGB IOTA Web Site, SM5AQD, TA1HZ, VA3RJ & ICPO, VE3LYC, VHF-DX-Portal (MMMonVHF) and VU2PTT for the following DX information.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 27th-March, through Sunday, 3rd-April there were 238 countries active. Countries available: 3A, 3B8, 3B9, 3D2, 3V, 3W, 4J, 4L, 4O, 4S, 4U1I, 4W, 4X, 5B, 5H, 5N, 5R, 5T, 5V, 5W, 5X, 5Z, 6W, 6Y, 7P, 7Q, 7X, 8P, 8Q, 8R, 9A, 9G, 9H, 9J, 9K, 9L, 9M2, 9M6, 9N, 9Q, 9U, 9V, 9Y, A4, A5, A6, A7, A9, AP, BV, BY, C3, C5, C6, C9, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FJ, FK, FM, FO, FP, FR, FW, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HB0, HC, HC8, HH, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J5, J6, J7, J8, JA, JT, JW, JY, K, KG4, KH0, KH2, KH6, KH9, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ4, PJ5, PJ7, PY, PZ, R1FJ, S2, S5, S7, SM, SP, ST, SU, SV, SV5, SV9, T7, T8, TA, TF, TG, TI, TJ, TK, TL, TR, TT, TU, TY, TZ, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V6, V7, V8, VE, VK, VK0M, VK9C, VP2E, VP5, VP8, VP9, VQ9, VR, VU, VU4, XE, XT, XU, XX9, YA, YB, YI, YJ, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZD7, ZD9, ZF, ZK2, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

4W6, TIMOR-LESTE (Update/Press Release #2 - Callsign/Web Site Announced): "The September 2011 Timor-Leste DXpedition has now received its callsign

- 4W6A - from ARCOM, the licensing authority in Dili. The team is very grateful to ARCOM for issuing this special one-letter callsign for use on the DXpedition.
The DXpedition has a Web site, at <http://www.4w6a.com>, which includes profiles of the team members, propagation predictions and lots of information about Timor-Leste and Atauro Island, the location of the DXpedition.
Unfortunately, Franck, VK8FNCY, has had to withdraw from the DXpedition due to health reasons. His place has been taken by Tim/M0URX and Ant/MW0JZE. Oliver, MW0JRX, is now resident in Darwin and has recently received his Australian callsign, VK8DX. The other team members remain Stuart/VK8NSB, Steve/9M6DXX and John/9M6XRO. As the team now comprises of six operators, we have increased the number of stations from three to four.
The group is requesting donations from DX clubs and individuals who wish to help in order to cover the high cost of generator hire, fuel for the generators and the boat charter to and from the island. There is a "Donations" page on the 4W6A Web site. Payments may be made by credit or debit card (you do not need to have a PayPal account yourself in order to make a donation).
4W6A will be QRV from Atauro Island (IOTA OC-232), Timor-Leste (East Timor), from September 16-26th, 2011. Activity will be on all bands 160-10 meters, using CW, SSB and RTTY. The QSL manager is M0URX, direct (SAE plus 1 IRC/2 USDs), via the Bureau, or LoTW. The entire log will be uploaded to LoTW as soon as possible after the end of the operation or, if possible, even during the DXpedition. QSLs may also be requested using the QSL request form on the Web site.....
73, Steve, 9M6DXX (4W6A Team Member)"

5M, LIBERIA. The I2YSB DXpedition team is now active as 5M2TT from Liberia until April 13th. The team consists of Silvano/I2YSB, Vinicio/IK2CIO, Angelo/IK2CKR, Marcello/IK2DIA and Stefano/IK2HKT. The pilot station will be Art/IK7JWY. The group plans to use 3 stations for the HF bands and one other for the 50 MHz band (w/beacon and cubical quad antenna). Activity will be on 80-6 meters using CW, SSB and RTTY. QSL via I2YSB (A OQRS is available -- See Web page for details). An online log (provided by IH9GPI) is available at:
http://www.i2ysb.com/joomla5/index.php?option=com_wrapper&view=wrapper&Itemid9
The official Web site is at: http://www.i2ysb.com
Official forum (for any comment, suggestion or to contact the pilot) is available at: http://www.hamradioweb.org/forums
The current QSO count as of April 3rd, at 1556z is: 12871 QSOs with 6245 unique callsigns (5317/SSB, 7327/CW and 227/RTTY).

9L, SIERRA LEON (Update/Change - 9L5MS DXpedition). The members of the Dutch 9L5MS DXpedition (and in close cooporation between the DAGOE Foundation and Mercy Ships) sent out the following press release on March 26th:
"There is a major change in the planning of the DXpedition. Here's the bottom-line.
We expect that our first radio operations will start a couple of days later than expected. Hopefully during the weekend of April 2nd. Reason

for this is that the container that carries our antenna's and other stuff that we need for the station (our food & water supplies and generators), is still in the customs-process. We expect that the customs will not release the container until 4th of April! Last Thursday, March 24th, we evaluated the situation and the team decided to go for plan B. So what's plan B? Plan B is that on Friday, March 25th we redesigned a new minimal antenna-farm that we can take with us on the plane. We decided that we will take 3 fiberglass verticals that will bring us on the air on 40m-10m. Sorry, no verticals available for the low bands and no RX-antennas during the first phase. Still...food, water and electricity are a problem. We will have to figure this out when we are in Freetown on the hospital ship Africa Mercy next week. During that week we will also work on Mercy Ships projects as volunteers. As soon as the material arrives we will concentrate on the Low Bands, using beams and Receiving arrays.
So we will be on the air from Sierra Leone soon, but the exact starting date is still unknown. We will inform you about our proceedings via our website, Twitter and the DX-cluster. Stay tuned!
73, 9L5MS - Sierra Leone DXpedition team."
ADDED NOTES/UPDATE: The 9L5MS team is on the air since April 2nd. They have limited antennas, power and Internet. As of 1200z, April 3rd, the first upload from the log was processed. For more details, updates and their log, visit their Web page at: http://www.sierraleone2011.com/sl_2011/home.php
You can also follow the team on Twitter: @DXpedition

A5, BHUTAN (Op Cancelled!). Hiromichi, JA1IFB, informs that operators Shigeo/JA1JQY (A52JY), Nakayama/JA1KJW (A52KJ) and Kunio/JA8VE (A52VE) have cancelled their operation from Thimphu between April 19-26th, due to the big earthquake and tsunami hitting the JA7 district on March 11th. Look for this operation to possibly be rescheduled.

B7, CHINA. A Chinese team of operators, along with some operators from Hong Kong, will activate B7P from Foshan City (WW. Grid OL63NA), nearby Guangzhou City, during the CQWW WPX CW Contest (May 28-29th) as a Multi-2 entry. Operators mentioned are Terry/BA7NQ (leader), JinQuan/BD7JC, Yang/BD7IXG, Paul/BA7JS, BD7IBS, BD7KS, Wong/VR2KW, Nelson/VR2AAW and Lam/VR2XZK. All QSLs will be sent via Bureau. For direct cards, please QSL via their manager BD7IXG.

CARIBBEAN GRIDS TO BE ACTIVATED ON THE BIRDS! Bryan, KL7CN, will be active on a holiday style DXpedition on the FM satellites from various Caribbean locations this coming week starting Sunday, April 3rd. Bryan states that he will start at /KP4 from San Juan, and then operate /MM from as many grids as he can, followed by J6/ from St. Lucia, then as V25CN from Antigua, then as a very special FS/PJ7/ operation from the border monument on St. Martin, then /KP2 from St. Croix, and finally again as /KP4. If you are on the ASMAT-BB mailing list, Bryan states, "I will attempt to send a note at the beginning of each day indicating if, when, and how operation will occur."

CARIBBEAN TOUR. Operators Torsten/DL1THM and Anja/DH2AK will be active as ZF2TH and ZF2AT respectively, from Grand Cayman Island (NA-016, WLOTA

LH-1042) between May 6-13th. Activity will be holiday style and mostly on 20 meters SSB. Most of the operation will be from the beach using a LiPo battery pack, IC-7000 and Buddipole. The two operators will also be active from New Providence Island (NA-001), Bahamas, as DL1THM/C6A and DH2AK/C6A. QSL ZF2TH and DL1THM/C6A via DL1THM, by the Bureau or direct. QSL ZF2AT and DH2AK/C6A via DH2AK, by the Bureau or direct.

CR6, PORTUGAL (Special Event). Members of the Algarve STAR DX Team will be on air as CR6A from "The Submerged Fortress" in the sea near Olhao city in the southern part of Portugal inside the CTFF-07 Natural Park, April 17th. This fortress is only accessible via boats and on very low tide. Activity will be on 40-10 meters using CW and SSB. Operators mentioned are Arlindo/CT1EGW, Jose/CT1EHX, Antonio/CT1GFK, Goncalo/CT1GPQ and Miguel/CT1IUA. All info and award references are available on: http://algarvedx.com
PLEASE NOTE: This activity is possible only in very good weather conditions. If not, it will be delayed again.

CS2, PORTUGAL (Harley-Davidson Special Event). Operators Nuno/CT2FPE, Joao/CT1EVE, Jose/CT1EUB and Virgilio/CT1ETX will be active once again as CS2HD between May 23-29th. Activity is to celebrate the 2nd Harley-Davidson meeting in Tavira-Algarve. Look for operations to be on all modes and bands. QSL via CT2FPE. More info to become available soon on QRZ.com.

EB8, CANARY ISLANDS. Operators Pekka/EA8AH, Juan/EA8CAC, Manuel/EA8ZS, Sal/EA5DY, Jose/EA5DFV and Jussi-Pekka/OH6RX will be active as EB8AH during the CQWW DX SSB Contest (October 29-30th) as a Multi/2 entry. QSL via LoTW.

FRENCH POLYNESIAN TOUR (FO, FO/A and FO/M). Yves, F6CTL, will once again be in French Polynesia as FO/F6CTL and plans to activate some of its islands between June and July. His activity will be somewhat holiday style, mainly on SSB and the Digital modes, with some possible CW, using an IC-7000 into a vertical or wire antenna. The following islands and dates were announced:
June 19-22nd - Ua Pou (OC-027); Counts for DXCC as Marquesas
June 22-26th - Ua Huka (OC-027); Counts for DXCC as Marquesas
June 27-29th - Raita (OC-067); Counts for DXCC as French Polynesia
June 30th-July 3rd – Bora Bora (OC-067); Counts for DXCC as F. Polynesia
July 3-7th - Rangiroa (OC-066); Counts for DXCC as French Polynesia
July 7-10th - Tahiti (OC-046); Counts for DXCC as French Polynesia
July 11-14th - Rimatara (OC-050); Counts for DXCC as Austral Islands
QSL via his home callsign.

HR, HONDURAS (Update). The "DX-World.Net" reports that "Wild Bill", N2WB, is planning to be active HR5/N2WB from Honduras between April 20th and May 4th. QSL via N2OO.

IOTA NEWS.....
EU-001. (Update) Members of the "DX Plus" Hellenic Amateur Radio Team will be active as SX5F from Pharmakonisi Island between May

14-22nd. Operators mentioned are Theodoros/SV1GRM, Sotirios/
SV1HER, George/SV1RP, Spiros/SV1RC, George/SV1QN, Giannis/
SV1GYG and Takis/SV2FWV. Activity will be on all HF bands
using CW, SSB and the Digital modes. QSL via the RAAG Bureau.
For more details, see Web site at: http://www.qrz.com/db/SX5F

EU-079. Members of the QLF DX Team will be active as LA6Q from More
Og Romsdal County South IOTA Group between April 8-11th.
Operators mentioned are Bjorn/LA5UKA and Trond/LA9VDA. Activity
will be on 80-10 meters using CW, SSB and RTTY. QSL cards can
be requested via E-mail to la9vda@gmail.com. For a direct QSL,
please add 3 USDs or 1 new and stamped IRC and SAE. Send it
to: Trond Johannessen, Helgedalen 13, N-1528 Moss, NORWAY.
Cards without the right postage will be sent through the
Bureau.

EU-094. A team of French and Belgian operators will activate a few
different islands in the Glenan Island chain located in the
Bretagne (Finistere South) Region IOTA Group as TM1G between
July 27th and August 3rd. The French operators mentioned are
Didier/F1LLV, Didier/F4ELJ, Jef/F6CNM, Pierre/F8DHM and Nicolas/
F8FKD. The Belgian operators mentioned are Robert/ON4LRG,
Luc/ON4LUC, Nicolas/ON4VK, Janny/ON5PO, Paul/ON6DP, Pierre/ON7PC
and Eric/ON7RN. The team plans to be active during the RSGB
IOTA Contest (July 30-31st) from St. Nicolas Island (DIFM
AT-010, FFF-200 [new one for the World Fauna and Flora Award]).
After the contest, the team will split into two groups and
activate a few different reference numbers for the DFCF, DIFM
and ARLHS awards. While one group continues to operate from St.
Nicolas Island, the second group will move to the following
islands within the Glenan Island chain: Bananec Island (DIFM
AT-064), Cigogne Island (DFCF 29-004, DIFM AT-061) and Penfret
Island (DIFM AT-059, ARLHS FRA-047). QSL via ON6DP, by the
Bureau, LoTW or e-QSL. More details and a log search are
available on the QRZ.com.

EU-110. Operators Gus/IK4RQJ, Sergio/IZ4BBF, Luca/IK3AES and Alex/
9A8AMS/IZ4AMS will be active as 9A/homecall and 9A8AMS from
Sveti Nikola (ACIA IC-016, IOCA CI-118, MIA MC-414, ARLHS
CRO-164, CLH-153, WLOTA 3152) between May 7-15th. Alex, 9A8AMS,
will focus on 160/80/6 meters using all modes while the
others operators will be active on 40-10 meters using all
modes. QSL via their home callsign, direct or by the Bureau.
QSL 9A8AMS via the address on QRZ.com.

OC-195. (Op Postponed!) The late March operation to Deal Island as
VK7DI had to be postponed due to high seas (which caused some
delays and some of the crew had work commitments looming making
the time line too tight to attempt to continue the expedition).

ISWL CELEBRATES 65! (Special Event) The International Short Wave League
(ISWL) is celebrating its 65th anniversary in 2011. Look for the following

special event stations to be on the air:
GB65ISWL - Will be on the air for the weekend of April 16-17th. Activity
will start around 1800 hours on Friday, April 15th. Modes will
be SSB and the PSK modes. Main operator will be Herbie, G6XOU.

PC65ISWL - Fred, PA0FAW, will operate as PC65ISWL between May 1-28th.
Activity will be mainly on the Digital modes and CW, with
some SSB from his home QTH, but most SSB will be from
WFF-PA-005. Fred will apply for a new EPC-number for this
callsign.

QSL information for both callsigns will be on QRZ.com. All ISWL QSL
info is available on <www.iswl.org.uk> or <www.qrz.com> or via
<www.eQSL.cc>.

JD1, OGASAWARA (Update). Operators Makoto/JI5RPT (JD1BLY), Harry/JG7PSJ
(JD1BMH) and Masaru/JE4SMQ (JD1BMT) are scheduled once again to be active
from Chichijima Island (AS-031), Ogasawara, between April 30th and May
13th. Look for the operators during the following dates:
JD1BLY: April 30th to May 7th
JD1BMT: April 30th to May 4th
JD1BMH: May 4-13th
Activity will be on 160-6 meters and the Satellites, using CW, SSB and
the Digital modes. No 6m EME. QSL via their home callsigns. Check QRZ.com
for QSL info. A logsearch will be available on the operators' Web site:
JD1BLY: http://www.ji5rpt.com/jd1/
JD1BMH: http://sapphire.es.tohoku.ac.jp/jd1bmh/
JD1BMT: http://homepage3.nifty.com/maaberu/logsjd1/logsearch.html
They also will use Twitter to inform stations of their real time
activities at: JD1BLY: http://twitter.com/jd1bly
JD1BMH: http://twitter.com/jd1bmh

JW, SVALBARD. Morten, LA9DFA, will be active as JW9DFA from Spitsbergen
(EU-026) between September 14-19th. Activity will be on the HF bands and
possibly 6 meters using mainly CW with some SSB and RTTY. He also plans
to be active during the Scandinavian Activity CW Contest (September
17-18th) as JW3C. QSL both callsigns via LA9DFA.

KH6BZF PROPAGATION FORECAST/REPORT (April 4-10th)....
Apr 04 AN SOLAR REFERENCE KEYS
Apr 05 AN --------------------
Apr 06 AN BN - Below Normal
Apr 07 AN AN - Above Normal/Geomagnetic Level is QUIET
Apr 08 AN LN - Low Normal
Apr 09 AN HN - High Normal/Geomagnetic Level is UNSETTLED
Apr 10 AN DIS - Disturbed
VDIS - Very Disturbed

GEOMAGNETIC REFERENCE

QUIET - The "A" index is expected to be between
0-7 and the "K" index will be 2 or less

UNSETTLED - The "A" index is expected to be between
7-16 and "K" index will be 3 or less

KH7, HAWAII. Mike, KH6ND, will be active as KH7X from Radio Pupukea (KH6YY) during the CQWW WPX CW Contest (May 28-29th) as a Single-Op/ All-Band entry. QSL via K2PF.

KP4, PUERTO RICO (Special Event). To commemorate the 50th anniversary of the First Man in Space (Russian pilot Yuri Gagarin who in April 12, 1961, was the first human being to go into space on an 108 minute flight), and the first flight of the Space Shuttle Columbia (Sunday morning on April 12th, 1981, known as mission STS-1, opening what is called the Shuttle era), look for special event station, N4S, to be on the air in remembrance of these two events: One which changed the course of history, and the other helped expand our knowledge of the space sciences and in the construction of the International Space Station (ISS). The special event will be active on the HF bands, 80-10 meters on SSB. The KP4IA-R (145.370 MHz) and the simplex frequency 147.480 MHz will be used for local contacts in Puerto Rico. A special electronic certificate will be issued for this occasion. For information go to <www.qrz.com/db/wp3gw> or write to wp3gw@arrl.net . They also want to remind everyone that the Arissat-1 satellite inside the ISS will be activated that same day and will send voice messages and Slow Scan TV images, plus CW and data from the new PSK1000 mode on the frequency 145.950 MHz. For more info go to <www.amsat.org> and <www.arisat1.org>.

P2, PAPUA NEW GUINEA. The "DX-World.Net" reports that Tim, KD5SSF, is now in Ukarumpa, PNG, as an American volunteering for a of couple years as an electronics technician with a translation and literacy organization. Tim has a license to operate as P29ZL and is currently getting his station set up. He mentions, "I work Monday through Friday, so my Amateur Radio activity will be restricted to evenings and Saturday/Sunday. My wife and I have other interests, so we do not spend all our spare time on the radio. My modes will be PSK31 and SSB. My radio is capable of maximum power of 100 W. I am just now getting my antennas up. I will be operating using inverted V antennas. I will be here for a while, so I am not hurrying about setting things up. I plan to try out a makeshift 20m antenna later today, and eventually put up a multi-band with 10, 15, 20, and 40 m." Going through the DXCluster spots, no QSNs have been reported yet on Tim.

PP0T, TRINDADE ISLAND. Members of the Cantareira DX Group are in the planning stages of a DXpedition to Trindade Island (SA-010) sometime this year. Specific dates have not been mentioned, but the callsign PP0T has been announced. Junior, PY2ZA, states on QRZ.com, "I'm looking for sponsors to help the DXpedition. There is the possibility of a long period of activity. We also need equipment for installation of a beacon on the island." He also mentions that if they don't find sponsors, there will not be a DXpedition. Trindade Island is ranked number 53 on the "DX Magazine's 2010 Most Wanted List". If interested in sponsoring this DXpedition, please contact Junior, PY2ZA, at: py2za@ig.com.br

For updates, watch: http://www.cantareiradx.org

KP1 LOGS NOW AVAILABLE. Jun, OE1ZKC/JH4RHF/KH2S, one of the members of
the 1993 Navassa DXpedition team, reported this past week that he
believes he now has all of the logs of the 1993 Navassa DXpedition
in hand. He is now ready to confirm any of the QSOs made by Navassa 93.
If you still need to confirm QSOs with Navassa 93 DXpedition, namely
W6IJU/KP1, NF6S/KP1, KH2S/KP1, KH2W/KP1 and KH2Y/KP1, by paper QSL,
kindly send him your QSL (or QSO data) with SASE to his OE address
(OE1ZKC address in QRZ.com) or at: Jun Tanaka, Box 1200, Vienna,
A-1400 Austria. Meanwhile, Jun will try to put all of the log data into
an electric format and upload to LoTW. He will also circulate the set

of electric log data to all of the team members and they will also be able to confirm their contacts if they want.

NO8DX/20 QSL STATUS. The QSL cards for the special event are now being sent out. However, it hard to believe that there are still individuals who do not send SASE (Where is the Elmering for these people?). Sad to say, these QSLs will be moved to the back of the pack and mailed after all others. A special thanks to those who sent a little extra, those who did not send postage will still receive their cards in the mail.

SU1SK QSL CARDS. Hawk, SM5AQD, informs OPDX reader, "I am Said's QSL Manager. I only COLLECT his QSL cards and further the QSL information to Said via the InterNet. I have NO LOGS and NO QSL cards. Said himself is sending out QSL cards from Cairo, Egypt, after receiving my information. I do this service only because Said is a very old and nice friend, on the other hand it gives you a chance to get a QSL card from SU land. I am very sorry but a QSL card via bureau is impossible to arrange for me and him. Please follow my information on QRZ.com .. ...GD DX 73 / Hawk SM5AQD"

QSL RECEIVED VIA LoTW: 6W7SK, 8P5A, 9K2HN, A45XR, CR3A, DL1TS, EA1DLU, EA1DR, EA8CN, EW7KF, EW8A, F6HKA, F8BJI, F8CMF, FY5LH, HH4/AF4Z, HH4/K4QD, HH8/N3BNA, HI8LAM, HQ2GL, HQ2W, KH2L, OE3GCU, OM4DW, OQ5M, OX3XR, P49A, PJ2/W5FKX, PV8ADI, RU3EQ, SP3DOI, T77C, TF4M, UA6GP, V4/K5MV, V44KA, V55DLH, VK4CMVI, VP2E, VP2MXF, VP5/VE3OP, VK4MA, XE2WWW, XE83IARU, YV1DIG, ZF2LC and ZL1BYZ

QSLS RECEIVED VIA MAIL: 4S7KKG, 5H3EE, 5R8X, 9Q50ON, A25DF, A35KL, A45XR, BV100, C31CT, C6AVD, CE1/K7CA, CR2X, EA1DR, F6HKA, FG/DL1CW, FJ/SM5FUG, HA3NU, HH4/K4QD, LY100SP, LY50A, NP2Q, OE3GCU, OH2BH, OH0B/OH0X, OJ0B, OY1CT, PA1CC, PJ4G, SP3DOI, T77C, TG9AHM, TT8DX, V44KA, VP9/W6PH, YJ0HA, YL3FX, YN7SU, YV5MSG, Z29KM, Z37M, ZD9T, ZL1BYZ and ZL8X

QSLS RECEIVED VIA THE BUREAU: NONE REPORTED THIS WEEK!

S7, SEYCHELLES. Operators Norbert/F6AXX, Romain/F8DSI and Bernard/F5HEW, active as S79UFT from Mahe, Seychelles Islands (AF-024), will continue to be on the air until April 15th. Activity will be on 80-10 meters using CW and some PSK. Suggested CW frequencies are: 3524, 7013, 10115, 14025, 18083, 21025, 24903 and 28025 kHz. PSK will be on the usual PSK frequencies. QSL via F6AXX, direct (QRZ.com) or by the French REF-Union Bureau. An online log is now available at: http://www.uft.net/1-s79/searchlog_adif.php

SV5, DODECANESE (Correction). John, N5ER, will be active as SV5/N5ER between May 15-20th, 2012 (not this year as reported). Activity will be holiday style, mainly on the lower bands in the evening and early mornings. Also, 20 meters and lower will be CW only. QSL via N5ER.

T31, CENTRAL KIRIBATI (Update). An international team will activate T31A from Kanton Island (OC-043) between April 17-28th. See OPDX.994 for more details. The latest update states, "Three team members will arrive in Apia

on April 6th, to inspect the equipment shipped from California and operate from 5W as time allows. The team will leave Apia on April 13th, and sail approximately 4 days. Upon arrival at Kanton, we'll set up 2 sites and begin operation. We plan 11-12 days of operation. We'll depart Kanton and arrive back in Apia on May 2nd." The T31A Web page is available at: http://www.T31A.com

T8, PALAU. Operators Masumi/JA3AVO (T88MB), Hiro/JH3PBL (T88MP) and Shota/W7AED (T88SR) will be active from Palau (OC-009) between July 20-24th. Their activity of bands and modes were not provided. QSL T88MB and T88SR via LoTW or direct to JA3AVO. QSL T88MP via JH3PBL.

TC2, TURKEY (Special Event). Members of the Turkish group called TCSWAT (Special Wireless Activity Team), in collaboration with the Giresun Radio Amateurs and Nature Sports Club (GITRAD) and the TRAC Giresun Branch, will be operating as TC2J, between April 7-10th, to commemorate the 5th anniversary of S. Fazil Turkan, TA2J (1950-2006), becoming SK. He was noted as a knowledgeable/experienced elmer and a keen CW operator (see TC2J on QRZ.com for more info). Activity will be on HF/VHF/UHF bands with an award to be available at the end. An award will be issued to those who contact this station in a minimum of three different bands or modes. The award will be issued in PDF format in electronic medium. Please send your log extract, together with your E-mail address to ta1hz@tcswat.org if you are eligible (no need to send in any IRC or GSs). Award info is available at: http://www.tcswat.org/awards/TA2J_2011/index.html

TO8, MARTINIQUE. Valeriy, R5GA/KM8W, will be active as TO8A from Martinique (NA-107) during the CQWW WPX CW Contest (May 28-29th) as a Single-Op/All-Band/High-Power entry. He will be operating from the QTH of Laurent, FM5BH.

V3, BELIZE (He is Back!). Your editor received an E-mail from a long time friend Joe, K8JP, who he has not heard from in 3 years. Joe informs OPDX, "I am finally getting back on the air after 3 years of QRT. I lost my house down here to a fire and everything in it. Then 3 weeks later, someone broke into my house in Indiana and cleaned me out. Fortunately, good friends in the FOC helped me, and I now have an IC-765 down here in Belize and an OMNI 6 in Texas at my daughter's place when I go up there to go to the VA hospital in Shreveport, LA, for medical check ups and treatments. So, I am active on 80 through 10 meters now, mainly CW, with this modest station." Joe states that he is only using 100 watts and dipoles at 30 feet/10 meters, but he is only 100 meters from the sea and that helps. He mentions, "My biggest handicap now is a bad noise on the lower bands, but I am working on a cure for the noise." QSL via KA9WON. Searching the DXCluster, Joe has been active on 30/20/17/12 meters CW. ADDED NOTE: Joe states that he will not be able to make Dayton this year, but he will try and make next year. (ed. Good to have you back Joe!)

V6, MICRONESIA. Operators Sho/JA7HMZ (V63DX), Takao/JA7AGO (V63GO) and Akio/JA7ZP (V63ZP) will be active from Pohnpei Island (OC-010) between May 22-28th. Activity will be on all bands and modes. QSL via their home callsigns. LATEST MINUTE UPDATE: DXpedition is cancelled. No reason given.

VU4, ANDAMAN ISLANDS (Update). Members of the Amateur Radio Society of India (ARSI) active as VU4PB from Port Blair went QRT at 1829z on March 31st. The team was expected to return to the mainland on April 2nd. Their last press release states, "As earlier reported we have had several instances of pirate operators masquerading as VU4PB which has spoilt the fun for numerous DXers, a real pity and one is not sure what joy it brings to those 'radio amateurs' who indulge in such activities." Remember to QSL via W3HNK. The VU4PB does have an "Online QSL Request System" (OQRS) available at: http://arsi.info/dxpeditions/vu4pb-mar-2011/oqrs-vu4pb Any QSL cards received via any IARU recognized QSL Bureau will be answered in due course of time. An online log search is available at: http://arsi.info/dxpeditions/vu4pb-mar-2011/log-search For more details and updates, visit the VU4PB Web apge at: http://arsi.info/dxpeditions/vu4pb-mar-2011

XV9, VIETNAM. Ken, JA2LLK, will be active as XV9LL from the Hotel Nikko in Hanoi starting at the end of April. Specific dates and length of stay were not provided. Activity will be on the HF bands. QSL via his home callsign.

YN, NICARAGUA. Operators Bob/N5ET (YN2ET), Keith/NM5G (YN2MG) and Eddy/ K5WQG (YN2ER) will be active as YN2ET during the CQWW WPX CW Contest (May 28-29th) as a Multi-Single entry. Look for activity by the operators outside of the contest. QSL all callsigns via N5ET. QSOs will be uploaded to LoTW after the operation is finished.

ZA, ALBANIA. Franck, F4DTO, will once again be active as ZA/F4DTO from Elbasan between now and April 16th. Activity will be mostly SSB on 40-10 meters. He will use 100 watts into monoband antennas. QSL via his home callsign, direct or by the REF Bureau. Visit Franck's Web page at: http://monsite.orange.fr/f4dto

ZD8, ASCENSION ISLAND. Mike, M0PRL, who was recently active from Rothera Station in the Antarctica as VP8DMH, is expected to be active this week as ZD8PRL from Garden Cottage on Ascension Island for about a week before heading back to the UK. QSL ZD8PRL via M0PRL. For updates, watch Mike's Twitter page at: http://twitter.com/#!/VP8DMH

ZS8, MARION ISLAND (Update). Pierre, ZS1HF/ZS8M, reports in his latest and final newletter from Marion Island: "Sadly, the 'ZS8M Dxpedition' has come to an end and we are now busy packing our belongings into containers. Sadly I was not able to work everyone, simply being restricted to a dipole (which worked extremely well), weak propagation conditions and restricted operating hours. Sadly as well, I was not able to test my SteppIR vertical due to the construction that took place, as well as the severe RFI in the new base. Will I return? I am not sure, but I will be keeping this callsign just in case I do get the chance again. I would be keen to do a trip to Gough Island, but it would be better if Louise could spend the year there with me. We need to discus this prospect. Who knows?" He also mentions, "Our supply ship, SA Agulhas, will be arriving on 11 April with the new team and... yes, there are two hams on the new team.... sadly they are NOT active. The new base will have a state of the art commercial Icom HF communications system which I specified and installed. The antenna system

is a professional broadband dipole with very good specifications, so whoever operates from here in the future will be able to operate with ease." His complete newsletter (with pictures) can be found online at: http://www.iz8epy.it/html/zs8m.html

356. [RAC-Bulletin] RAC Bulletin 2011-008E - Development of A Canadian Field Organization

Newsgroup: rec.radio.amateur.misc
Date: 2011-04-03 23:44:08 UTC
From: rac-bulletins@eton.ca

RAC Bulletin 2011-008E - Development of A Canadian Field Organization
2011-04-03

Winnipeg, Manitoba
April 2, 2011

In RAC Bulletin 2010-032 - Vision Statement 2010-11-14, RAC committed itself to the "education and elmering of new Hams", and supporting "the training and coaching of RAC volunteers to achieve exemplary results, at the municipal, provincial and national levels." The new RAC Field Training program is the recognized tool leveraged by our ARES groups.

On December 9, 2010, Vice President Field Services with the support of the Section Managers formed a "Vice President Field Services Council". The Council made the commitment to develop a Canadian "Field Organization". A major part of the new Field Organization will be the existing Field Service, which is key to providing services to the public and the Amateur Radio community. It will also incorporate new functions to better represent our interests to governments at the provincial and municipal levels, provide a strengthened public relations capability, expand the Affiliated Club program with a view to improving the input of Canadian Amateurs with respect to RAC policy development, and bring focus to promoting technical developments. On 24 March, 2011 the RAC Board unanimously approved implementation.

It is envisaged that each Section will form a similar council to oversee development of the Field Organization concept, taking into consideration its unique relationship with provincial governments, geography, relationships with existing regional associations, and the requirements of the individual clubs.

At its second meeting held on 13 January, 2011, the Council approved in principle an ARES Training Management System with the following six objectives:

1- Create a just-in-time training programme that delivers task-related skills and knowledge needed by the radio operator or team leader on the first day in a new assignment;

2- Develop the radio operator's abilities through a structured programme of practical training under the supervision of a mentor;

3- Standardize qualifications through a family of control documents
that identify job tasks, skills and knowledge, to specified standards,
and supplies trainers with prepared course materials;

4 - Promote ARES and NTS interoperability with emergency management
authorities by embracing the Incident Management/Command System
philosophy and exploiting provincially approved IMS/ICS courseware and
certifications whenever possible;

5 - Institute training quality control and continuous improvement
mechanisms; and,

6- Incorporate a professional development approach designed to groom
the leaders of tomorrow.

The Council, through a working group, is developing an updated mission
statement for the ARES. A second working group under the chair of the
Ontario Section Manager has begun development of a "Specification",
the foundation document in a training management system. While the
focus is initially on modernizing the ARES in order to stay in step
with rapidly developing national and provincial emergency management
initiatives, ultimately this document will be expanded to include all
roles within the RAC Field Organization.

The President and Vice President of Field Services extend an open
invitation to all Amateurs with expertise in any aspect of developing
the Field Organization to make contact with their Section Manager.
Contact information can be found at
http://rac.ca/en/rac/public-service/section-managers/

Geoff Bawden, VE4BAW
President, Radio Amateurs of/du Canada

Highlights of Solar and Geomagnetic Activity
21 - 27 March 2011

Solar activity ranged from very low to moderate levels. Region 1176
(S16, L=199, class/area Fki/420 on 26 March) rotated onto the
visible disk on 21 March, and produced a long duration C4 flare. Low
levels of activity continued through the 22nd. Activity increased to
moderate levels from 23-25 March as Region 1176 produced one M1
flare each day (23/0217Z, 24/1207Z, 25/2322Z). Partial halo CMEs
associated with the M1 flares on the 24th and 25th were observed.
The first had an estimated plane-of-sky speed of 421 km/s; the
second was accompanied by Type II (673 km/s), Type IV, and 10.7 cm
(170 sfu) radio emissions. A fast (approx. 850 km/s), asymmetric,
partial halo CME was observed on 26 March was attributed to Region
1180 (N25, L=162, class/area Hsx/070 on 26 March), but was not
expected to be potentially geoeffoective. Only the CME from the 24th
was expected to have geoeffective potential. Of the four remaining
active regions, Region 1178 (S15, L=172, class/area Dai/130) was the
largest.

The greater than 10 MeV proton flux at geosynchronous orbit rose
above 10 pfu on 21 March at 1950Z and reached a maximum of 14 pfu on
22 March at 0130Z and ended that day at 0335Z. The most likely
source of the event was a flare and back-sided CME.

The greater than 2 MeV electron flux at geosynchronous orbit was at
normal levels throughout the period.

The geomagnetic field was quiet for the majority of the period,
except for a few instances of unsettled conditions on 24 March due
to Coronal Hole (CH) high speed stream (HSS) effects.

Forecast of Solar and Geomagnetic Activity
30 March - 25 April 2011

Solar activity is forecast to be low for the period with C-class
flares expected and a chance for M-class flares exists based on the
```

size and magnetic complexity of Regions 1176 and 1183 (N15, L= 136, class/area Eai/250 on 28 March). Region 1176 is expected to remain on the disk through 05 April and Region 1183 will rotate off the west limb on 09 April, if it does not decay prior. Old Region 1169 which is anticipated to return on 31 March produced an M4.2/1N flare during the last rotation. Imagery from STEREO-B spacecraft as well as brightening on the east limb on GOES 15 SXI and NASA SDO AIA 193 suggest that the region may remain prominent this rotation as well.

No proton events are expected at geosynchronous orbit.

The greater than 2 MeV electron flux at geosynchronous orbit is expected to reach high levels on 01-02 April.

Geomagnetic activity is expected to range from quiet to unsettled levels. Unsettled levels are expected 30 - 31 March, 07 - 09 April, and 18 - 19 April, with a slight chance for an isolated active to minor storm period at high latitudes due to anticipated recurrent coronal holes. Predominantly quiet levels are expected for the remainder of the period.

Highlights of Solar and Geomagnetic Activity
28 March - 03 April 2011

Solar activity ranged from very low to low levels throughout the
period. C-class events were observed every day except for 02 April.
Region 1181 (S26, L=157, class/area Hsx/20 on 27 March) produced a
C1/Sf flare at 27/2326Z and Region 1178 (S15, L=172, class/area
Dai/130 on 26 March) produced a C1/Sf flare at 31/2221Z with an
associated partial halo CME that appeared to be directed southward
below the ecliptic plane. Region 1183 (N15, L=135, class/area
Eai/330 on 30 March) rotated on the disk on 27 March and contributed
four C-class events, the largest a C1 at 30/2005Z. No X-ray sensor
data was available at 27/0600Z when a CME was observed in LASCO C2
and C3 imagery. However, the CME was attributed to Region 1183 based
on limited GOES 15 SXI imagery. Type II (651 km/s S.V.) and Type IV
radio signatures were observed at 27/0511 associated with this
event. Region 1176 (S15, L=196, class/area Eko/490 on 23 March)
produced four C-class events and four CMEs during the period. The
only CME that is potentially geoeffective was associated with a
B8/Sf flare observed at 02/2347Z. At 03/0024Z, GOES-15 SXI imagery
detected material movement from the SW limb that was later observed
in SEREO-B COR2 imagery at 03/0109Z and STEREO-A COR2 imagery at
03/0409Z. Using this imagery, a plane-of-sky speed of approximately
650 km/s was assigned. This CME appeared to be directed southward
out of the ecliptic plane but it was a very large event and has the
potential to cause enhanced activity at Earth.

No proton events were observed at geosynchronous orbit.

The greater than 2 MeV electron flux at geosynchronous orbit was at
moderate levels from 28 - 29 March and then decreased to normal
levels from 30 March - 01 April. An increase to moderate levels was
observed on 02 April and high levels were observed on 03 April. The
1000 pfu threshold was reached at 03/0735Z.
```

Geomagnetic field activity ranged from quiet to major storm levels throughout the period. Quiet conditions prevailed from 28 March through midday on 01 April. A weak geomagnetic Sudden Impulse (SI) was observed at 29/1604Z (8 nT as measured at the Boulder magnetometer). The SI likely represented the passage of a halo CME observed on 24 March. ACE solar wind data indicated increased velocities (313 to 398 km/s), as well as increases in density of (2 to 26 p/cc) and the total field (Bt 5 to 9 nT). Interplanetary Magnetic Field (IMF) Bz remained mostly northward following the passage. By midday on 01 April, ACE solar wind observations indicated the onset of a coronal hole high speed stream (CH HSS) at approximately 01/1600Z. Velocities steadily increased from about 360 km/s to a peak of 665 km/s at 02/2128Z. IMF changes associated with the CH HSS included increased Bt (peaks to 12 nT from 01/2000 - 2100Z) and intervals of southward Bz (maximum deflection of -10 nT at 01/1628Z). The geomagnetic field responded with periods of unsettled to active levels, including an isolated minor storm period observed at high latitudes at 01/1500Z. These conditions persisted through 03 April with an isolated major storm period observed at high latitudes at 02/1200Z and another isolated minor storm at high latitudes at 03/1200Z.

Forecast of Solar and Geomagnetic Activity
06 April - 02 May 2011

Solar activity is expected to be very low to low for the majority of the period. A chance for M-class activity exists from 17 - 30 April due to the return of Region 1176.

No proton events are expected at geosynchronous orbit.

The greater than 2 MeV electron flux at geosynchronous orbit is expected to be at high levels from 06 - 07 April and then return to normal to moderate levels for the remainder of the period.

Geomagnetic field activity is expected to be quiet to unsettled from 07 - 08 April due to the effects of a recurrent CH HSS becoming geoeffective. Quiet conditions are expected from 09 - 16 April. A second CH HSS is expected to be geoeffective from 17 - 19 April bringing with it quiet to unsettled conditions. Mostly quiet conditions are expected from 20 - 27 April. Unsettled to active conditions with a chance for isolated minor storm periods at high latitudes are expected due to a third CH HSS that is expected to become geoeffective on 28 April. A return to quiet conditions is anticipated on 02 May as the effects from the CH HSS wane.

DXNL 1722 - Apr 6, 2011
DX Newsletter

a free and weekly service of
DARC Committee "DX and HF contesting"
(http://www.darcdxhf.de)

editor: Helmut Schlaffer, DL7MAE
(e-mail: dxnl@dxhf.darc.de)

translation by: Bob, DL7VOA
(e-mail: dl7voa@darc.de)

FM - MARTINIQUE, NA-107
Olivier,FM/F6ARC, will show up from Martinique (NA-107) working in CW on 160m-30m from Apr 6-21. Please send your QSLs either via REF bureau or direct to his homecall.
For more information check his website at: http://www.dxbeam.com

FR - REUNION, AF-016
Olivier,F4FLF, will use the callsign TO2Z from Reunion (AF-016) from Apr 9-22. He works in "holiday style" and wants to try to be on air every night in SSB, PSK and RTTY. QSL via his homecall.

KH8 - AMERICAN SAMOA, OC-045
Rick,AI5P/KH8, will be QRV "holiday style" from Tutuila Island (OC-045) from Apr 8-18. QSL via the W5 bureau or direct to his homecall.

LG5/SJ9 - MOROKULIEN
Hugo,PA2HW, Robert,PA2RDK, Frank,PA3CNO, Paul,PA3DFR, and Gert,PE0MGB, will activate Morokulien as LG5LG and SJ9WL (changing day by day) in CW, SSB and digital modes on 160m-6m from Apr 10-16. If you work both calls on at least two bands you can qualify for a special award.
QSL via bureau or direct to LA4EKA.

P2 - PAPUA NEW GUINEA, OC-034
Tim,KD5SSF, is an aid worker and will stay in Ukarumpa for the next years. He plans to work as P29ZL in PSK31 and SSB mostly at the weekends and in his evenings. He has 100 watts and Inverted V antennas for 10m, 15m, 20m and 40m.
His QSL address is Tim Linn, Box 1, Ukarumpa, EH 444, Papua New Guinea.

SV/A - MOUNT ATHOS
Rick,NE8Z, has obtained a pilgrim visa for Mount Athos and wants to visit Monk Apollo, SV2ASP/A, from Apr 9-16. Rick calls his trip the "Monk Apollo Project". He wants to donate some equipment which helps

to improve the portable stations with the intention to produce better signals in Asia. This direction is affected negatively by a mountain range. It is not known if Rick is allowed to become active himself.

XV - VIETNAM
Mal,VK6LC, will stay in Vietnam from Apr 10-25. He plans to show up as XV2LC from Ho Chi Minh City from Apr 10-15 and later as XV4LC in the Mekong Delta from Apr 20-25. Mal works in SSB and CW on 20m and confirms QSLs only direct via his homecall VK6LC.

ZD8 - ASCENSION ISLAND, AF-003
Mike,M0PRL, who was active as VP8DMH from the Antarctic base "Rothera" during the past 18 months will arrive on Ascension Island (AF-003) in the next few days. He will show up as ZD8PRL in SSB from the Garden Cottage Lounge on the 700m high Green Mountain for one week.
QSLs cards for ZD8PRL should be sent via bureau or direct to M0PRL.

ITALY, SPECIAL EVENT STATION
The special event station II1ECO is activated from Casale Monferrato at the weekends between Apr 2 and May 15. This is the place of the upcoming "Ecolimpiadi" with the motto "Sport wants to be green" (see http://www.ecolimpiadi.it/IndexEng.php) on May 14/15.
QSL via bureau or direct to IZ1KIM.

KAZAKHSTAN, SPECIAL EVENT STATIONS
50 years of manned spaceflight is the 50th anniversary of the first flight of Yuri Gagarin. Besides of other events (contest, awards, etc) there will be two special event stations active from the cosmodrome in Baikonur. R50YG (Yuri Gagarin) and R50SK (Sergej Korolev) will be QRV from Apr 6-14. Both stations will take part in the "Gagarin Cup 2011" contest and count as an additional multiplier in this contest. Furthermore there will be also the special callsign R50KEDR (KEDR was the callsign of Yuri Gagarin during his flight) activated from the launch site of Yuri Gagarin on Apr 12 from 0507 until 0655 UTC. This is the same time like the 108 minutes of Gagarin's first flight.

PUERTO RICO, SPECIAL EVENT STATION
50 years ago (on Apr 12, 1961) Yuri Gagarin was the first man to fly into space and 30 years ago (on Apr 12, 1981) the maiden flight of the space shuttle Columbia took place. The special event callsign N4S in Puerto Rico remembers both historic dates of mankind. They are working in SSB on 80m-10m and in PSK1000 on 145.950 MHz. QSL via WP3GW.

TURKEY, SPECIAL EVENT STATION
The memorial station TC2J remembers Fazyl Turkan (TA2J, 1950-2006) from Apr 7-10. Fazyl passed away five years ago and has made outstanding contributions to amateur radio in Turkey. QSL via YM7KK, via bureau or direct. More information about the free award can be found at QRZ.com when you search for TC2J.

LINKS: Current SOTA activities (mountain summits) are announced at: http://www.sotawatch.org

---
Detailed information about current VHF activities can be found on the
VHF DX portal "Make More Miles on VHF" at: http://www.MMMonVHF.de
---
Phil,FO8RZ, has uploaded a report about his mini DXpedition to
Nuku Hiva belonging to the Marquesas (OC-027) to:
http://f5phw.hamlogs.net/articles.php?lng=en&pg=455

Pierre,ZS1HF/ZS8M, went QRT on Marion Island finally. His last
newsletter can be found at: http://www.iz8epy.it/html/zs8m.html

UPCOMING CONTESTS

Apr 6: BUG Party
Apr 9: European Sprint Contest
Apr 10: UBA Spring Contest
Apr 9/10: Japan International DX Contest
Apr 9/10: DIG QSO Party
Apr 9/10: Yuri Gagarin International DX Contest
see: http://gc.qst.ru/en/section/32

IOTA collected by Fredy,DE0MST (e-mail: iota@dxhf.darc.de)

Island activities:
EU-026, JW, Svalbard: Frank,LA1RSA, will sign JW1RSA from the clubstation
JW5E in Longyearbyen from Apr 9-15. QSL via LA1RSA.

EU-069, EA5, Columbretes Islands: A team of Spanish HAMs will be QRV as
EG5CI from Columbretes Island (DIE E-205, ARLHS SPA-180) from Apr 7-10.
QSL via EA5EOR (bureau/direct).

EU-079, LA, More og Romsdal County South Group: Bjorn,LA5UKA, and
Trond,LA9VDA, will show up as LA6Q QRV in CW, SSB and RTTY on 80m-10m
from Apr 8-11. QSL via LA9VDA.

NA-184, W6, CA State North Group: Rick,K6VVA, plans an activity as K6VVA/6
from St. George Reef on Apr 8/9. QSL via N6AWD (bureau/direct).

NRRL president Thormod Boe,LA7OF, Silent Key:

Thormod "Tom" Boe,LA7OF, president of the Norsk Radio Relae Liga (NRRL),
passed away on Monday, March 21. He was born in 1940. Boe was working for
the Norwegian PTT and served as Director of the European Radiocommunications
Office (ERO) in Copenhagen till his retirement in 2006. Thormod was involved
in the creation of the so-called WARC bands 30m, 17m and 12m during the
WARC conference in 1979. Upon his retirement he moved back to Horten in
Norway where he bought a house. LA7OF was elected president of the NRRL in
2008.

Other DXers who passed away during the last week are:
Robert Williams (G4LVQ/EA7FGS), Wah How "Howie" Lee (KH6CD),
Yury G. Sinitso (UA1RJ), Krishnappa Ramaswamy (VU2BRK) and
Michael R. Koss (W9SU), owner of Industrial Communication Engineers (ICE):

French HAMs try to get an allocation for the 6m band

F1DUE, the president of the French amateur radio union REF, writes about
his efforts to open the 6m band for French amateurs. Already last year the
REF asked the French frequency regulation authority (ARCEP) to deal with the
case of the 6m band which was suspended two years ago. The ARCEP informed
the REF that they consider to assign the frequency range 50-52 MHz for
amateur radio. Thus ARCEP placed this proposal on the agenda of the
Frequency Planning Commission (CPF) which was held in March. Yet nobody
knows when the change of the bandplan is finalized and comes into effect.

Many thanks for contributing to this issue of the DXNL are going to:
Carl Smith (QRZ DX), 425DXNews, OPDX Bulletin, DF6EX (WIN-QSL), DJ5AV,
DK8JB, DL1MDV, DL1SBF, DL2BQV, DL6ZFG, DL7VOA, F6AJA & Les Nouvelles DX,
NG3K, PA3CNO and others.

Archive-name: radio/ham-radio/recruitment
Revision: 1.2 2009/11/25 14:41:01
Posting-Frequency: posted monthly
URL: http://www.faqs.org/faqs/radio/personal-intro/

Changes followed by "|".

The rec.radio.info newsgroup, first established in 1993, has been
recently revived by an active moderation team. We are currently seeking
suitable information, FAQ, and bulletin articles from the entire
rec.radio.* newsgroup hierarchy for simultaneous cross-posting to our
newsgroup.

We are seeking a replacement maintainer for the following information
bulletin formerly posted to rec.radio.amateur.* (and currently archived
at http://www.faqs.org/faqs/radio/personal-intro/ ):

radio/personal-intro
Subject: Guide to the rec.radio Newsgroups
Maintainer: jeffreyh@Hawaii.Edu (Jeffrey Herman)
Last Posted: 9 Nov 2001 06:18:17 GMT
Posting-Frequency: 15th of each month

One significant omission, requiring immediate updates, for this article |
is that it does not mention newer amateur radio newsgroups created since |
it was written, including: |

rec.radio.amateur.antenna |
rec.radio.amateur.boatanchors |
rec.radio.amateur.dx |
rec.radio.amateur.equipment |
rec.radio.amateur.homebrew |
rec.radio.amateur.moderated |
rec.radio.amateur.space |

We are willing to provide any technical support necessary to get this
article updated and automatically posted again at a regular interval.
This would include establishing contact with the original maintainer for
any necessary permissions. We would prefer to seek a new, dedicated
maintainer at this time, rather than start auto-posting the original
article ourselves.

For more information about our newsgroup, see:
```

http://www.panix.com/~rram/usenet/rri/index.html

Please direct any comments, questions, or criticisms to
rec-radio-info-request@panix.com.

Hallo dear MMMonVHF friends,

please find below our lastet NEWSLETTER from the VHF-DX-Portal
"Make More Miles on VHF" (www.MMMonVHF.de), dated 2011-04-07
We attempt to distribute our Newsletter, once a week (thursday)
from now on - if any special activities will make it necessary
we will inform you with Breaking News or a Special NL-Edition.
For further detail please be so kind and watch our "News"-page
http://www.mmmonvhf.de/latest.php - you vy welcome for any
input and we do hope you will enjoy the VHF-DX-Portal MMMonVHF!

Latest NEWS and INFO for the NEWSLETTER
MMMonVHF The VHF-DX-Portal
****

** MOST WANTED SQUARES & DXCCs at the VHF-DX-Portal of MMMonVHF **

Just in advance of the active meteorscatter time of the year
(with gd EME condx and the MS showers in may and june) we would
like to remember that these services are only as good as YOU (as
the USER) are doing UPDATES at our different sources...

Please do yourself and all of us the favour and check and update
periodical the following links and tools:

eMWS (MOST WANTED SQUARES) >>> www.mmmonvhf.de/emws.php
MWDXCC (MOST WANTED DXCC) >>> www.mmmonvhf.de/dxcc.php

We will spread the Result mid/end of april, early enough...

If you hear or plan yourself a trip and/or any activity use:

INPUT of VHF-ACTIVITIES >>> www.mmmonvhf.de/newsuser.php
INPUT of UPDATES to NEWS >>> www.mmmonvhf.de/newsuserup.php

Thanks in the name of all USER of MMMonVHF and the team which is
always trying to pass you as soon as possible the latest News...

Announcement New DXCC 144MHz moonbounce: PJ4(FK52ud)
LATEST NEWS from PJ team, dated 2011-04-07: A long day of hard
work have passed. While building up the antenna system on the
tower we nearly lost the complete array due to high wind and
lack of the right materials on the island. While installing
the last 2 yagi's the other 2 came down and a boom landed on
Jurgen. A crossplate broke and it had to be fixed by a local
welder. While it was getting dark he climed into the tower to
fix the problem. See pictures and a small movie on
www.emelogger.com/bonaire Now we have some delay on our
schedule. Tomorrow we start building again at sunrise and we
try to be qrv as soon as possible, we need a few hours more.
But we still enjoy the stay on the island (no we did not see
much of it so far) SOURCE: Rene, PE1L, direct to MMMonVHF

EA8/DC2JWR Home-made QRP 6m & 2m Expedition LOC : IL18AQ
Canary Island - La Palma 17.04.2011 - 01.05.2011
With this internet site (http://ea8-dc2jwr.co.de/) I would like to
announce my expedition to EA8. On this expedition I will only use
home-made equipment and antennas. The pleasure of making a qso on a
home-made equipment is many times larger than working on commercial
equipment. I hope to make many nice DX QSOs and I would be very
happy if I could animate the self-construction activities in ham
radio through my expedition.

MUSKO Island (JO98) qrv during PERSEIDS 2011
This year I will be active in JO98 during the perseids. August 12,
13 and 14 I planned to be active from Musko island just south of
Stockholm. Only 3, depending on QRL maybe 4 days max. Running like
the previous years a single 9 elemens yagi and 500W out. No internet
connection so all QSOs are random, like previous years caling on
370 and switching to 380 when things are running good, hi.

** JW9DFA qrv HF, 50 and maybe 144 MHz from Spitsbergen Island **

Morten, LA9DFA, will be active from Longyearbyen, Spitsbergen Island
(IOTA EU-026, WLOTA 0125, WW Loc. JQ78TF), from 14-19 September 2011.
QRV on the HF bands, mostly CW but some RTTY and SSB as well. Will
work 50MHz if conditions allow (not likely!). Morten will also
participate in the Scandinavian Activity CW Contest (17-18 September)
using the callsign W3C. QSL both callsigns via LA9DFA, direct or
bureau and LoTW. QSL can also be requested for both calls via e-mail
to la9dfa[at]online.no . Website: www.qrz.com/db/LA9DFA - Meantime
there is a contact to Guy, DL8EBW, for a request about any 144 MHz
EME activity from JW...
SOURCE: LA9DFA & [NG3K] via [ICPO] ICPO Bulletin (01-08 April 2011)

** XV2RZ qrv from Phan Thiet, South-East Vietnam (WW Loc. OK40BV) **
Retu, XU7MDY/OX3RZ/OH4MDY will once again be active from Phan Thiet,

South-East Vietnam (WW Loc. OK40BV) on 4-17 April 2011 as XV2RZ. QRV
on 80-6m CW and SSB. QSL direct only to XU7MDY.
SOURCE: [AT International] via [ICPO] ICPO Bulletin (01-08 April 11)

** TK4DS qrv from island of Corsica (JN42) **

Operators Tonny ON1DNF, Jaak ON4PJA, Joeri ON7IQ, Jempi
ON7JPS and Geert ON7QC will be active from the village of Biguglia,
island of Corsica (IOTA EU-014, DIFM TK-001, MIA MCO-001, WLOTA 1390,
Grid Loc. JN42) as TK4DS from 21-24 April 2011. Plans are to be QRV
on the HF bands, using SSB and the digital modes. There is the
possibility of some VHF activity as they will be taking a 9 element
yagi for 2m and a vertical for 2m/70cm. The village of Biguglia is
located in the Canton [county] of Borgo, Department Haute-Corse/2B
and Province Corse (DPF 09). QSL via ON4PJA, bureau preferred.
Website: www.TK4DS.be/
SOURCE: [rsgbiota.org] via ICPO Bulletin (25 March-01 April 2011)

** 5M, LIBERIA, qrv in April **

The I2YSB DXpedition team is now active as 5M2TT from Liberia until
April 13th. The team consists of Silvano/I2YSB, Vinicio/IK2CIO,
Angelo/IK2CKR, Marcello/IK2DIA and Stefano/IK2HKT. The pilot station
will be Art/IK7JWY. The group plans to use 3 stations for the HF
bands and one other for the 50 MHz band (w/beacon and cubical quad
antenna). Activity will be on 80-6 meters using CW, SSB and RTTY.
QSL via I2YSB (A OQRS is available -- See Web page for details).
An online log (provided by IH9GPI) is available at:
http://www.i2ysb.com/joomla5/index.php?option=com_wrapper&view=wrapper&Itemid=179
The official Web site is at: http://www.i2ysb.com
Official forum (for any comment, suggestion or to contact the pilot)
is available at: http://www.hamradioweb.org/forums The current QSO
count as of April 3rd, at 1556z is: 12871 QSOs with 6245 unique
callsigns (5317/SSB, 7327/CW and 227/RTTY).
SOURCE: [DX-ENG] Ohio/Penn DX Bulletin #1005

LATEST NEWS directed by the Team, dated 2011-04-05:

Tonight we had problems with internet access and we remained
without uploading the logs from 00:00 UTC..... Given our
phisical effort in recent days, last night we decided to stop
transmitting early and try to rest a bit. So we did not lower
bands ..... we'll make this night! This morning we have
arranged and we have internet connection again (there was a
5 GHz bad link). There are still problems to the generators
and not only how they work..... We are been asked for an
increase in cost compared to the agreements and we are
evaluating different options ..... Unfortunately, the dollars
requested are many more and we do not know if we can meet the

cost .... in the event we'll have to agree on the hours of
blackouts to avoid excessive costs. Today will be a day spent
to discuss and find a better solution, but something tells me
it will not be a final agreement: I wonder why we are not
surprised about this.... We managed to somehow fix the
vertical but its efficiency is very low..... In RTTY we do
our best but we can not guarantee all the bands. We are
trying to satisfy all requests for contacts and sked but
keep in mind that we are 5 and we are not able to do
miracles... SOURCE: 425 DX News and VHF Reflector

** SV8/PA1FJ/p from Skala Potamias, Thasos Island **

Look for Fred, PA1FJ, to be active as SV8/PA1FJ/p from Skala Potamias
Thasos Island (IOTA EU-174, GIOTA NAS-037, MIA MG-124, WLOTA 4186)
from 13-19 September 2011. QRV on 40-6m CW and SSB, using FT-817,
Buddistick and 2x5m dipole. QSL via home call, bureau preferred.
SOURCE: [rsgbiota.org] via ICPO Bulletin (25 March-01 April 2011)

** PUERTO RICO, SPECIAL EVENT STATION **
50 years ago (on Apr 12, 1961) Yuri Gagarin was the first man
to fly into space and 30 years ago (on Apr 12, 1981) the
maiden flight of the space shuttle Columbia took place. The
special event callsign N4S in Puerto Rico remembers both
historic dates of mankind. They are working in SSB on 80m-10m
and in PSK1000 on 145.950 MHz. QSL via WP3GW.

==> + JAPAN SUFFERS LARGE AFTERSHOCK; TSUNAMI WARNING ISSUED, LIFTED

A 7.4 magnitude aftershock hit just off the coast of Japan
<http://www.cnn.com/2011/WORLD/asiapcf/04/07/japan.quake/index.html?hpt=T1&ir
ef=BN1>
at 11:30 PM JST (1430 UTC) on Thursday, April 7. The epicenter of this
earthquake is just 73 miles from the nuclear plant at Fukushima and 41
miles from the epicenter of last month's 9.0 earthquake
```

<http://www.arrl.org/news/massive-earthquake-hits-japan-tsunami-warnings-issued>.
As such, Japan's meteorological agency issued, and then lifted, a tsunami warning for a wave of up to 6 feet for the coastal area that has been already torn apart by the March 11 earthquake and tsunami. These events are believed to have killed some 25,000 people and have sparked an ongoing crisis at the nuclear power plant. The ARRL asks that you keep 7.030 MHz clear for emergency use. In addition, these frequencies should also be kept clear: 3.525, 7.030, 7.077, 7.087, 7.097, 14.100, 21.200 and 28.200 MHz. -- Thanks to CNN and other sources for the information

==> + AMATEUR RADIO IN THE CLASSROOM: ALABAMA HIGH SCHOOLS SUCCESSFULLY LAUNCH HIGH ALTITUDE BALLOON

The Pell City and St Clair County High School's joint balloon launch was a great success. The balloon was launched from the St Clair County Airport in Pell City, Alabama into a brisk wind at 2 PM on April 2. The balloon carried a variety of experiments ranging from materials, plastic sticks, silly putty, several varieties of seed, batteries, film and cameras, radio location equipment and a radio beacon announcing the balloons flight, as well as a collection of worms. The worms were given physicals by a St Clair County High School science class prior to the flight. They returned home in apparent good health and have made reservations for the next flight. The balloon made a rapid and steady ascent to 94,449 feet and, after bursting, landed near Woodbury, Georgia. The balloon landed in the middle of an open field and was quickly retrieved by Amateur Radio operators from the Auburn/Alexander city area. Read more here <http://www.arrl.org/news/alabama-high-schools-successfully-launch-high-altitude-balloon>.

==> + PUBLIC SERVICE: BILL SMITH, K1ARK, RECEIVES NATIONAL RECOGNITION FOR STORM SPOTTING ACTIVITIES

It is difficult to imagine the number of hours that Dr Bill Smith, K1ARK, of Fayetteville, Arkansas, logs in his job as the University of Arkansas' Director of New Media for the Razorback Athletics Department. Smith spends countless hours blogging, filming, commentating and handling the social media responsibilities for 19 teams and the department, but he still finds time to assist Washington County residents when dangerous weather conditions arise. Smith has volunteered for the Washington County Department of Emergency Management for more than a decade, assisting with county weather emergency communications. In addition, Smith is the volunteer Public Information Officer for the DEM with Advanced P10 certification from FEMA.

For these efforts, Smith -- an ARRL member -- has been named the Bob Kenworthy Community Service Award winner by the College of Sports Information Directors of America (CoSIDA). The Bob Kenworthy Community Service Award is presented annually to a member for civic involvement

and accomplishments outside of the sports information office. CoSIDA is a 2700-plus member national organization comprised of the sports public relations, communications and information professionals throughout all levels of collegiate athletics in the United States and Canada. Smith will be honored at the CoSIDA at the organization's annual convention in June. Read more here <http://www.arrl.org/news/bill-smith-k1ark-receives-national-recognition-for-storm-spotting-activities>.

==> + CHECK OUT THE MAY ISSUE OF QST

The May issue of QST is jam-packed with all sorts of things that today's Amateur Radio operator needs. From product reviews to experiments to contesting -- including a special look at the ARRL EXPO, coming to the Dayton Hamvention® and the ARRL National Convention at Ham-Com in Plano, Texas -- this issue of QST has something for just about everyone.

As amateurs, we get excited when we finally get that new entity, top a previous year's score in a contest, build a new piece of equipment or meet up with an old friend on the air. Why not unleash some of that excitement and introduce kids to Amateur Radio at the same time? Mark Spencer, WA8SME, shows readers how to do just that in his article "A Transmitter for Foxhunting." Build this project that combines the fun of the outdoors with the science and art of radio. With today's rising energy costs, we are all looking for ways to save on those monthly bills. One of the ways to do so is by lassoing the energy of the Sun. In his article "An Emergency Backup Solar Power System," Jim Talens, N3JT, says that after the purchase of some basic hardware, solar power is free -- and independent of the grid.

Three Dutch hams -- Eltje Veen, PA3CEE; Johan Meezen, PE9DX, and Ren® Hasper, PE1L -- ventured to Mauritius to shoot for the moon. Read about their adventure in "3B8EME -- Moonbounce from the Indian Ocean." Join a group of Midwestern teenage hams as they discover what it's like on the other end of the pile-up in "Youth DX Adventure #1" by Don DuBon, N6JRL, and Dave Kalter, KB8OCP. QST Assistant Editor Steve Sant Andrea, AG1YK, decodes RSQ and explains what it means to digital operators in his article "Readability, Strength -- and Quality?"

QST Contributing Editor Ward Silver, N0AX, takes a look at the Kenwood TS-590S HF and 6 meter transceiver in this month's Product Review. He says that this rig "is a compact package of high-performance radio with an exceptional receiver for the price and is well-suited for today's operating modes and styles. It has a useful package of features that are thoughtfully organized and easy to access." QST Technical Editor Joel Hallas, W1ZR, checks out the Heil Pro Set Elite headset. He calls it "a worthy addition to the popular Pro Set line of headsets. It offers comfortable, wider range earphones, combined with a wide range fidelity dynamic microphone element. The mic element is intended to be tailored by radio or external audio equalizers to provide just the

desired voice characteristics."

Kelly Taylor, VE4XT, delivers the results of the 2010 ARRL November CW Sweepstakes. For the first time ever in the history of the contest, there's a tie for first place! Jeremy Alexander, W7EME, has the results of the 2010 ARRL International EME Competition, held over three weekends this past September and October. According to Alexander, the 2010 running of the contest generated more than 100 logs with many more stations participating.

Of course, there are the usual columns you know and expect in the May QST: Happenings, Hints & Kinks, The Doctor Is IN, How's DX, Technical Correspondence, Vintage Radio and more. Look for your May issue in your mailbox. QST is the official journal of ARRL, the national association for Amateur Radio. QST is just one of the many benefits of ARRL membership. To join or renew your ARRL membership, please see the ARRL Web page <https://www.arrl.org/join>.

==> + ON THE AIR: REV UP THE ROOKIES -- THE 2011 SSB ROOKIE ROUNDUP IS HERE!

Newly licensed amateurs will once again be the focus of attention on Sunday, April 17 as the ARRL Rookie Roundup enters its second year. Created to give the budding operator a place to learn about contesting at an easier pace, the ARRL Rookie Roundup is a six hour contest open to all amateurs who have been licensed for three years or fewer. If you were licensed in 2009, 2010 or 2011, you qualify as a Rookie. The Rookie Roundup happens three times each year: SSB in April, RTTY in August and CW in December. Read more here <http://www.arrl.org/news/rev-up-the-rookies-the-2011-ssb-rookie-roundup-is-here>.

==> ARRL TO CHANGE INSURANCE COMPANY FOR EQUIPMENT PROTECTION, CLUB LIABILITY SERVICES

On May 1, 2011, the ARRL will begin a new partnership to provide its ARRL-sponsored Equipment Insurance and Club Liability Insurance plans. The League has signed an agreement with Hays Affinity Group to serve as the program administrator to provide equipment insurance to its members who choose to elect coverage. In addition, Hays will also provide club liability insurance to ARRL Affiliated Clubs for those clubs that wish to take advantage of that program. Hays will be replacing Marsh Affinity Group Services as the program's administrator and will be introducing new policies for both plans, underwritten by the Hanover Insurance Company. Read more here <http://www.arrl.org/news/arrl-to-change-providers-for-equipment-protection-club-liability-insurance-plans>.

==> + AMATEUR RADIO FUN: ANNOUNCING THE WINNERS OF THE ARRL VIDEO CONTEST

With more than 30 videos submitted from all corners of the Earth, the ARRL's production and editorial team had a tough job ahead of them

as they sat down to pick the best one. But in the end, these ARRL HQ staff members picked a clear and decisive winner. In December, the ARRL announced that it was looking for ARRL members to shoot and submit videos that showcase how fun and electrifying our hobby can be. Extra points were awarded for videos showing someone -- young or old, licensed or not -- making their first contacts. Videos were judged on their creativity, overall quality and composition, and how well each communicated enthusiasm for Amateur Radio. All videos had to be less than five minutes long. Read more here <http://www.arrl.org/news/announcing-the-winners-of-the-arrl-video-contest>.

==> ARRL IN ACTION : WHAT HAVE WE BEEN UP TO LATELY?

Compiled by ARRL News Editor S. Khrystyne Keane, K1SFA

This feature is a concise monthly update of some of the things ARRL is doing on behalf of its members. This installment -- which covers the month of March -- looks at how the ARRL and its members are responding to HR 607, various filings made by the ARRL to the FCC, the ARRL's Executive Committee meeting, reports from the Official Observer Desk and more. Read more here <http://www.arrl.org/news/arrl-in-action-what-have-we-been-up-to-lately-32>.

==> + FCC NEWS: FCC LAUNCHES COMPLETE OVERHAUL OF WEBSITE

The Federal Communications Commission announced on April 6 that it has launched a complete overhaul of its website. According to an April 6 press release from the FCC, the new website is "architected with a more intuitive user experience and the addition of Web 2.0 technologies, and improves and simplifies the FCC.gov experience for consumers, government, public safety agencies and the business community." This is the first major update to the Commission's website in 10 years. Read more here <http://www.arrl.org/news/fcc-launches-complete-overhaul-of-website>.

==> SOLAR UPDATE

Tad "I walk out into the Sun, I try to find a new day <http://www.youtube.com/watch?v=W1N19zOBKCE>" Cook, K7RA, reports: Our Sun is still quite active, but solar activity is down this week when compared with the week before. The average daily sunspot numbers were down nearly 34 points to 68.3, while the average daily solar flux declined nearly 3 points to 111.8. But geomagnetic activity was quite strong this week, with the planetary A index on April 2 at 20, rising to 26 on April 6. The latest forecast from USAF and NOAA has the solar flux at 117 on April 7-9, 115 on April 10-14, 88, 90, 100 and 115 on April 15-18 and 125 on April 19-27. The predicted planetary A index is 8, 5, 10 and 10 on April 6-9, 5 on April 11-17 and 7 on April 18-20. Geophysical Institute Prague predicts quiet conditions on April 8, quiet to unsettled April 9, unsettled to active April 10, active April 11, unsettled April 12, quiet to unsettled April 13 and back to quiet on April 14. On April 4, NASA released a new solar cycle prediction

<http://solarscience.msfc.nasa.gov/predict.shtml>, and they say this may be the smallest sunspot cycle in 200 years. Look for more information on the ARRL website on Friday, April 8. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad Cookism" is brought to you by Duran Duran <http://en.wikipedia.org/wiki/Duran_Duran>'s Careless Memories <http://www.youtube.com/watch?v=W1N19zOBKCE>.

==> + ARRL RECOGNIZES: HOWARD "SKIP" TELLER, KH6TY, WINS MARCH QST COVER PLAQUE AWARD

The winner of the QST Cover Plaque Award for March is Howard "Skip" Teller, KH6TY, for his article "Digital VOX Sound Card Interface." Congratulations Skip! The QST Cover Plaque award -- given to the author or authors of the best article in each issue -- is determined by a vote of ARRL members on the QST Cover Plaque Poll Web page <http://www.arrl.org/cover-plaque-poll>. Cast a ballot for your favorite article in the April issue today.

==> + ON THE AIR: ARRL FREQUENCY MEASURING TEST SCHEDULED FOR TUESDAY, APRIL 12

The Frequency Measuring Test (FMT <http://www.arrl.org/frequency-measuring-test>) adds a couple of new wrinkles to the format when it takes to the airwaves on April 12. The first change is that the FMT will be held on Tuesday evening instead of Wednesday. If weeknight schedules have prevented you from participating in past FMTs, this change is for you. The second change is in the sequence of stations transmitting. The new format will mimic a round-table QSO in which all of the stations are close to the same frequency but not exactly on the same frequency. Read more here <http://www.arrl.org/news/arrl-frequency-measuring-test-scheduled-for-tuesday-april-12>.
<http://www.arrl.org/news/arrl-frequency-measuring-test-scheduled-for-tuesday-april-12>

==> ON THE AIR : NIST TO CONDUCT TIME AND FREQUENCY USER SURVEY

The National Institute of Standards and Technology's (NIST) Time and Frequency Division is conducting a survey to learn more about its users, seeking to determine how the agency can make its services more useful in the future. NIST services include WWV, WWVH and WWVB, which provide reference time and frequency signals via radio. The NIST also provides the Internet Time Service -- which provides accurate time synchronization to computer systems -- and several other services to offer accurate time information via telephone or web pages. Radio amateurs are encouraged to complete the survey. Read more here <http://www.arrl.org/news/nist-to-conduct-time-and-frequency-user-survey>.

==> THIS WEEK ON THE RADIO

This week:

- April 9 -- PODXS 070 Club PSK 31 Flavors Contest (local time); EU Spring Sprint (CW)
- April 9-10 -- Montana QSO Party; New Mexico QSO Party; Georgia QSO Party; JIDX CW Contest
- April 10 -- SKCC Weekend Sprint; UBA Spring Contest (SSB)
- April 11 -- 144 MHz Spring Sprint (local time)
- April 13 -- NAQCC Straight Key/Bug Sprint
- April 13-14 -- CWops Mini-CWT Test

Next week:

- April 15 -- NCCC Sprint
- April 15-16 -- Holyland DX Contest
- April 16 -- Feld Hell Sprint; TARA Skirmish Digital Prefix Contest; ES Open HF Championship; EU Spring Sprint (SSB)
- April 16-17 -- Michigan QSO Party; Ontario QSO Party; YU DX Contest; CQ Manchester Mineira DX Contest; EA-QRP CW Contest
- April 16-24 -- ARLHS Annual Spring Lites QSO Party
- April 17 -- ARRL Rookie Roundup (SSB) <http://www.arrl.org/rookie-roundup>
- April 18 -- Run for the Bacon QRP Contest
- April 19 -- 222 MHz Spring Sprint (local time)

All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests>, the ARRL Contest Update <http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more info. Looking for a Special Event station? Be sure to check out the ARRL Special Event Stations Web page <http://www.arrl.org/special-event-stations>.

==> UPCOMING ARRL SECTION, STATE AND DIVISION CONVENTIONS AND EVENTS

- April 22-24 -- ARRL Idaho State Convention <http://www.arrl.org/hamfests/idaho-state-convention-1>, Boise, Idaho
- April 23 -- ARRL Louisiana State Convention <http://www.arrl.org/hamfests/louisiana-state-convention-twin-city-ham-radio-fest>, Monroe, Louisiana; ARRL North Carolina State Convention <http://www.arrl.org/hamfests/north-carolina-state-convention-raleigh-hamfest>, Raleigh, North Carolina
- May 7 -- ARRL South Carolina State Convention <http://www.arrl.org/hamfests/south-carolina-state-convention-upstate-hamfest>, Spartanburg, South Carolina
- June 3-5 -- ARRL Northwestern Division Convention (SeaPac) <http://www.arrl.org/hamfests/northwestern-division-convention-seapac-1>, Seaside, Oregon; ARRL Wyoming State Convention <http://www.arrl.org/hamfests/wyoming-state-convention>, Cheyenne, Wyoming

- June 4 -- ARRL Atlantic Division Convention
<http://www.arrl.org/hamfests/atlantic-division-convention-rochester-hamfest-
1>,
Rochester, New York; ARRL East Bay Section Convention
<http://www.arrl.org/hamfests/east-bay-section-convention>, Berkeley,
California; ARRL Georgia State Convention
<http://www.arrl.org/hamfests/georgia-state-convention-atlanta-hamfest>,
Marietta, Georgia
- June 10-11 -- ARRL National Convention
<http://www.arrl.org/hamfests/arrl-national-convention-ham-com-2011>,
Plano, Texas
- June 11 -- ARRL Tennessee State Convention
<http://www.arrl.org/hamfests/tennessee-state-convention-1>, Knoxville,
Tennessee

To find a convention or hamfest near you, click here

WIANEWS FOR WEEK COMMENCING APRIL 10 2011.

WIA NATIONAL FIELD DAY

VOX POP FROM VK6POP WIA DIRECTOR

OLDEST TV IN WORLD FOR SALE

SCOTCH ON ROCKS THE VK7DI QSL ROUTE

ALL THESE STORIES UP AND COMING IN THIS EDITION OF NEWS FROM THE WIRELESS
INSTITUTE OF AUSTRALIA FOR WEEK COMMENCING APRIL 10 2011.

WIA
President Michael Owen VK3KI president@wia.org.au
Vice President Phil Wait VK2ASD vk2asd@wia.org.au
Secretary Sarah Thompson VK3AUD secretary@wia.org.au
Treasurer John Longayroux VK3PZ vk3pz@wia.org.au

Rosebud Secondary College, Victoria has just completed exchanging a series
of 18 questions with the International Space Station via amateur radio.

Among the questions, the students asked why a career as an astronaut was
chosen, the training required, the difference in the appearance of the
stars, and whether greenhouse gasses are visible.

"The ISS contact (on Monday 4th April at 09:04 UTC) was an outstanding success," said Southern Peninsula Amateur Radio Club Secretary, John Ross VK3BJR.

The students with their rehearsed questions probed the thoughts of astronaut Katy Coleman before an audience at the Arts Centre, which was almost full with students, parents and friends who were in praise of the event.

John VK3BJR said, "The evening's activities were videotaped by media studies students at the College along with Jack Braham VK3WWW. Audio of the contact was transmitted live via SPARC's 2-metre Mt Martha repeater VK3RSP and the full audio of the evening has also been recorded."

He said the club is indebted to the Australian ARISS Co-ordinator, Tony Hutchison VK5ZAI for his assistance with the contact and to W6SRJ for making contact with the ISS.

John VK3BJR said, "The night was capably chaired by SPARC treasurer John Vardanega VK3BCR, who not only handled the microphone for the contact, but also answered many questions about the ISS while the large screen in the auditorium was displaying the space station's orbit."

The nine-minute ARISS contact with the Rosebud Secondary College, will be followed by a similar contact this Monday by the John XXIII College, Perth Western Australia.

All is ready for a great public relations event

The WIA National Field Day has more than 20 clubs and groups registered including each state plus the Northern Territory where the Darwin Amateur Radio Club is to be at the Rapid Creek Markets.

In VK2 they will set up at Port Macquarie, Dubbo and Dural, VK3 is registered at Yarra Glen, Lilydale, Syndal, Williamstown and Queenscliff, for VK4 they come from Manly, Mt Morgan Range, Maryborough, North Ward, Ipswich and Kippa-Ring.

VK5 has representatives at Gladstone Square in Port Augusta, Mile End and Murray Bridge, VK6 will be at Kalamunda and Kalgoorlie, while VK7 has chosen Penguin and Hobart.

Each group has registered on-line for the event that marks World Amateur Radio Day, celebrated throughout the nation on Sunday the 17th of April. It's not too late for any group of three or more to secure a public spot and register.

Have a look at www.wia.org.au for some guidance and see what, and where, others intend to set up operating stations available to the public.
Each have been sent a draft media release and the WIA wishes them all success.

Do check the rules. It's time to put up those WIA banners that have proven themselves as drawcards to portable displays of amateur radio equipment and experts.

For those who will be at home or out mobile, there's the opportunity for you to be the friendly voice at the end of the first QSO of a newcomer looking at what amateur radio has on offer.

Among them are potential recruits to amateur radio - that is what it's all about. Remember the National Field Day, the 17th of April, next Sunday, Tune-In to World - Amateur Radio gets people talking.

(Jim Linton VK3PC)

Spam .. Don't we all just love it !

Everyday .. people out there sending out unsolicited mail trying to trick people into clicking one link or another and to provide their personal details.

As we have said before here on WIA National News, if you ever receive an email claiming to be from the WIA asking for your personal details, it WILL most definitely be Spam. In ALL cases, the WIA office will contact you directly (not by email) should they be wish to clarify anything to do with your membership or your personal details.

WIA Board - news

Hello I'm Bob VK6POP, WIA Director with some news from the Board.

The WIA Board met in Melbourne last weekend at the WIA premises in Bayswater. On the Saturday afternoon, we welcomed visitors and guests who came to witness the naming of our headquarters as "Andersson House".

The Board decided on the name to honour Henry Andersson's generous bequest to the WIA, which enabled the building to be purchased. The naming ceremony was transmitted on Amateur TV via the local ATV repeater.

The full story and video can be found on the WIA website www.wia.org.au

Among several important issues discussed and resolved at the Board meeting was membership fees. While it was found necessary to increase some classes of fees for the first time since formation of the National WIA, the Board felt it appropriate to introduce a membership fee concession for full time students under the age of 25 years. This concession acknowledges that Amateur Radio as a hobby must look to the future, and the concession was adopted as one way of encouraging young people to fully participate in Amateur Radio life.

The new student concession membership fee is $35.

My particular interest lies in the area of attracting young people to the hobby and then encouraging and supporting them to continue. I encourage all clubs and individuals to examine how they may attract, encourage and support young people to enter this great hobby.

The Board, in order to enhance communication with the members, have decided to make regular contributions to the weekly National News. You can expect to hear from all of the Directors, in turn, week by week, giving you news, comments and updates on what's happening. I drew the short straw to prepare something for this week. The directors are looking forward to communicating

with you each week.

WIA AGM

This is Sarah Thompson VK3AUD, Secretary of the WIA.

As you know, the WIA Annual Conference is being held over the weekend of 27 to 29th of May at the Mirambeena Resort in Darwin.

Activities commence with a welcome dinner by the sea at the beautiful Darwin Trailer Boat Club on Friday night.

Saturday morning is for the Annual General Meeting and Open Forum. Although there is no charge to attend just the AGM and Open Forum, it would help us with room configuration and catering if you would register nonetheless.

Saturday afternoon will see presentations based around the theme "Technology for the Bush" and life in the top end. For Partners, we have set up a tour of some special places in Darwin led by the team from the Darwin Amateur Radio Club.

The conference dinner on Saturday night at the lovely Tree Tops restaurant finishes off the Saturday events.

On Sunday we are going to Litchfield National Park. Bring your togs and swim or just cool off in the pristine water falls and rock holes. Take a look at the magnetic anthill phenomenon, and join in a barbecue lunch at the very pretty Wangi falls.

Sunday evening event is hosted by the DARC at the famous Mindil Markets, where we will watch a beautiful sunset over Fannie bay whilst eating our choice of specialty food from one of the many different food stalls.

I urge you to please go to the WIA website now and register for this fantastic weekend. Accommodation can be booked at the special rates negotiated by the WIA by calling the Travelodge Mirambeena on 08 8946 0111 and speaking to Aleishia Good or Belinda Anthony, quoting the reference "WIA Conference"

VK4CAU Frank Sleep March 24 2011 advised by Gavin VK4ZZ
VK4AB Wayne Bryce April 04 2001 advised by Allan VK4FARB

Silent Key - VK4AB Wayne Bryce

One of the founding members of the Ipswich and District Radio Club went Silent Key Monday April 4, 2011.

VK4AB Wayne Bryce was born in 1944 at St Andrews Hospital Ipswich.

As a young boy Wayne had a keen interest in amateur radio. This interest was something he shared with his uncle Ramsay Bryce. Wayne held several call signs including VK4ZBN and when he obtained his Morse code license he changed to VK4ZN.

On the passing of his Uncle Ramsay, Wayne applied and obtained is uncle's call sign VK4AB. Wayne was a life member of the Ipswich & District Radio Club. During almost 50 years Wayne held many positions including President through to elder statesman.

Wayne had several jobs including at RT Edwards in Ipswich as a TV repair man, but his real passion was 2-way radio. He started at Fred Hoe & Sons at Evans Rd Salisbury and was their service manager.

In the early 1980s he opened W & J Communications from their home office at 1 Shelley Street Brassall.

Since retirement Wayne became an avid restorer of valve radios.

We all have our own fond memories of him and he will be sadly missed by all.

Wayne's Funeral will be held on Monday 11th April, 2011 at 10.00am in St Stephens Church Cnr Limestone Street and Gordon Street, Ipswich.

Should you wish to attend, Wayne's Family have requested in lieu of Flowers we respectfully request donations to be made to the Ipswich and District Amateur Radio Club as they feel this would respect Wayne's impact on the contributions he made to the club for over 50 years.

After the service a Wake will be held at Brothers Leagues Club to Celebrate Wayne's Life.

Wayne is survived by his wife Jeanette, his Father Ian and brother Dale and family along with children and partners Robert & Julie Bryce, Sandra & Jason West and Keith Bryce and Tara Liverton.

Wayne was a loving grandfather to Laura and step grandfather to Sarah and Nicholas.

(vk4aab/vk4farb)

Welcome to QNews from VK4WIA. I'm Geoff Emery, VK4ZPP, and I've been thinking.

As WIA President Michael Owen, VK3KI, has reported, the Foundation Licence has stopped the previous trend of amateur numbers dropping. Times have moved on and our once favourite shops have rationalised their inventories to reflect purchasing trends.

In a population of 22 millions, a licensed amateur community of about 15,000 means we are spread very thinly when retailers come to swap our dollars for their products. Some retail spokespersons have been decrying the use of "on line" buying. Well for me being able to buy items that are no longer available from local outlets let's me pursue some of my radio interests which would otherwise be denied.

I know from researching purchases that there can be equivalent items for sale locally but often at twice the price I can buy them in from overseas. I also know that the cost of freight from U.S.A. can be a large component of the total cost. With our dollar above or matching the greenback, it looks tempting to purchase from USA book stores. Add in the postage and packing and then check with WIA Bookshop and you are more inclined to buy locally.

We are fortunate that as some of the store front retailers drop hobby products we have more enthusiasts building successful on-line businesses in VK. With on-line payment and ordering we are perhaps better served now than in past times. We just need internet access to still buy Australian.

I'm Geoff Emery and that's what I think.....how about you?

CENTRAL QUEENSLAND AR CLUB
Rockhampton
cqar.com.au

The Central Queensland Amateur Radio Association Inc. would like to officially introduce a new radio association in Central Queensland. The CQARA held its inaugural meeting on the 10th of March with 9 members, and has grown rapidly in a short amount of time to over 22 active members all keen to participate and promote our beloved hobby.

Our association is dedicated to promoting Amateur Radio within the community and fostering the spirit of Amateur Radio within its members. Education and enjoyment are the cornerstones of our association. We also have a strong commitment to increase the general interest and fun of amateur radio within the association and the community. We will be actively participating in public events to increase public awareness of Amateur Radio.

The CQARA meet every second Sunday of the month at the Frenchville Sports Club in Rockhampton at 6pm for a social meal and then a meeting at 7pm that includes a regular show and tell.

The up and coming Field Day will be our first public event with two sites being run simultaneously. One at the top of the Mount Morgan Range co-ordinated by David Christmas VK4DJC and Maree Churchill our secretary, and a second site will be located at the Bunning's car park in Rockhampton co-ordinated by our president Andrea Williams VK4FROG.

I'm Adam, VK4MTJ on behalf of the Central Queensland Amateur Radio Association Inc.

MARYBOROUGH RADIO AND ELECTRONICS CLUB
For more info, call Secretary Kathy Johns 040-939-8853
Email: kathy.johns@bigpond.com
Channel 14 UHF CB call "CQ MERG"

Kathleen Johns vk4kj (secretary@merg.org.au) has advised the WIA that the Maryborough Electronics and Radio Group will conduct a "Wide Bay Hamfest" July 16.

This at West Scout Hall, Ariadne St, Maryborough on the corner with Frank St.

General entry at 0830.

Exhibitor space in the hall or for "car boot sale" as desired.

Wide Bay Hamfest will be catered for by the local scouting groups

Clairview Gathering Weekend

The Clairview Gathering is a yearly event where Radio Amateurs meet at a spot on the coast between Rockhampton and Mackay to relax, talk radio, re-establish acquaintances and participate in the world renown Saturday Night Mega-Auction.

It is one of the main revenue raisers for the Rockhampton and District Amateur Radio Club Inc and Mackay Amateur Radio Club.

It happens in 2011 during the Long Weekend on the 30th April and 1st of May.

The Clairview Gathering is so popular that on-site accommodation is booked out years in advance, so if you want to go you will have to either camp, caravan or motor-home over the weekend.

For further details contact Clive Sait VK4ACC

mobile 04 2963 2815.

To book your camping spot contact the Clairview Beach Holiday Park
on 07 495 60 190.

TABLELANDS RADIO AND ELECTRONICS CLUB
vk4wat@wia.org.au
www.treclub.org.au

G'day again from Far North Queensland where it is still very wet and tropical,
this is Dale VK4DMC for the Tablelands Radio and Electronics Club, TREC,
in Far North Queensland.

Three candidates were assessed this week at the TREC clubrooms for their
foundation level certificate of proficiency. They were all successful and we
look forward to hearing three new call-signs on air shortly.

One of the candidates, Peter George, passed the assessment with flying
colours. Peter was a signaller with the Army during WW2. He enlisted
(aged 17yrs) in May 1940 with 7th Aust Divisional Signals. He was attached
to 2/5th Field Regiment (25 pounder artillery)for 4 years in India, Palestine,
Western Desert, Syria, New Guinea and Milne Bay Papua.

Peter was then seconded as wireless operator to RAAF unit No 4 Mobile
Meteorological Flight for last nine months of WW2 which included the
landing at Balikpapan. After discharge he joined the Northern Territory
Police Force in 1946

Peter re-enlisted in the Regular Army in the 1950's and received a
commission soon after. He served in Korea for two tours. After 55yrs
in civvy street and at eighty eight years young and in perfect health
Peter has decided to recall his CW skills and become a "Ham".

Not content with foundation level Peter has started studying for his
standard level certificate.

That's your lot for this week.

Visit the TREC website at www.treclub.org.au for club information and you can
also download the latest monthly club news in TREC-NEWS.

This has been Dale VK4DMC and you are listening to the WIA news.

Travel Well!

VK5

Whyalla Amateur Radio Club "on display".

The club is joining in this year's WIA celebration of World Amateur Radio Day
with its participation in the wia National Field Day Sunday the 17th.

Operating from Gladstone Square in Port Augusta and hopes to have working
displays of a variety of modes including PSK and satellite communications.

All amateurs in the area are welcome to join them in Port Augusta but if you
can't be there please look out for the VK5BWR callsign on the HF bands and
through the local 2 metre repeaters.

As Alex for the Whyalla Amateur Radio Club says " We're helping to get people talking."

D-STAR IN THE BAROSSA VALLEY THIS EASTER

For anyone interested in D-Star and are travelling to the Barossa Valley this Easter, Nik VK3BA advises that he will set up a D-Star Simplex HotSpot in Tanunda.

The operating frequency will be 438.925MHz in the 70cm band and anyone with a D-Star capable radio are most welcome to use it. Nik hopes that the D-Star HotSpot will be operational from late afternoon of Thursday the 21st of April through to early morning of Wednesday the 27th of April.

Please contact Nik via his email address of vk3ba@wia.org.au if you require any further details.

VK8

This is spud vk8zwm on behalf of the Darwin amateur radio club.

At the club meeting on Wednesday night last we discussed the auction coming up on Saturday night the 16th of April, that's next Saturday night.

Get your preloved gear down to the clubrooms by Thursday lunchtime to allow time to set it up and list it.

No glass screens please.

We will start off the evening with a barbecue tea at 6pm auction at 7pm.

Please advise Spud if you will be there for catering purposes as soon as possible.

The next day will be the national field day and VK8DA will be there.
Rapid creek markets, rapid creek shopping centre Trower road is the place.

Be there at 8am to help setup and stay and be a part of spreading the word about amateur radio to the community.

We will have a remotely controlled HF station there as well as IRLP via node 6343 and EchoLink via node 288680.

We are trying to get our mobile crane mounted HF beam onsite as well.
3 elements 70ft up in the air. Dipoles on the hook. Good stuff.
Keep your ears listening for vk8da on air.

A big working bee over Easter will see a scrape down of the walls and a repaint to tidy them up after this record breaking big wet. Around 2.8 meters of rain so far. Ian vk8ip is in charge. Contact him for information.

And don't forget. The WIA Annual conference is being held over the weekend of 27, 28, 29th of may here in Darwin. Be a part of it, register now and come and meet us in the better part of this great country.
Go to www.wia.org.au and click on the annual conference button to register.
Book your flights and have an eyeball contact or dozen, see the top end and above all enjoy yourselves somewhere a little different.

This has been spud vk8zwm in Darwin
Now its back to the good guys at the national news desk at vk1wia

HOME OF THE GOOD GUYS

Gunshot Victim Finds New Voice With Morse Code

A QRZ forum item drew our attention and makes author KB1EGK certainly "One Of The Good Guys".

"Most of us either love or hate Morse Code, but whatever your thoughts on the subject, I'm sure you'll find this story touching.

KB1EGK's friend Bryan, has created an application to use Morse Code with an iPad, be it still in developmental stage.

You can read the rest of the story, and how Gun Shot victim Philip will be using Morse Code when you visit qrz.com

Briefly it appears the victim (gunshot wound to the left side of head) is very aware of his surroundings, basically it is the motor skills that he lost. He cannot speak and his only usable hand is very awkward BUT he can hit an iPad screen button if it is large (such as 2 - 3 on a screen.), maybe one button for a dit and another for a dah.

Once the application is finalised and can decode Philips CW to printed word he will have "regained" a voice after some for 6 years!

(Andy edited by KB1EGK Yesterday at 04:44 PM qrz.com)

INTERNATIONAL NEWS With thanks to RSGB, Southgate AR Club, the ARRL, Amateur Radio Newsline, NZART and the WW sources of the WIA.

DISASTERS * 2 = FCC OFFERS TECHNICAL EXPERTISE TO JAPAN

The FCC offered its counterpart in Japan any assistance that it might be able to render. This, as recovery efforts continued in the wake of the March 11th earthquake and Tsunami in JA.

The FCC (the US equivalent of our ACMA) soon after a massive earthquake hit Haiti, took a proactive role. This included providing technical assistance on emergency communications as well as passing along offers of help from private industry.

But Japan is a different situation. It's a nation with its own very robust communications system. On the telecommunications front Japan was very well prepared for a situations like this.

Still with disasters, authorities are claiming that the household tap water in Christchurch ZL land is now safe to drink again without boiling.

After the devastating earthquake on 22 February a notice was put out TO BOIL IT.

However, Christchurch residents are still asked to conserve water.

The Jet Propulsion Laboratory (JPL) choose to put a pattern on the next Martian Rover, named Curiosity.

They are in a pattern of short squares and longer rectangles on the wheels almost like dots and dashes in CW.

According to JPL, Curiosity is about the size of a small SUV -- 10 feet long (not including the arm), 9 feet wide and 7 feet tall -- or about the height of a basketball player -- and weighs 2000 pounds.

It features a geology lab, rocker-bogie suspension, a rock-vaporizing laser and lots of cameras. Curiosity will search areas of Mars for past or present conditions favourable for life and for conditions capable of preserving a record of life.

It is set to launch between November 25 - December 18, 2011 from Cape Canaveral, Florida and will arrive on Mars August, 2012.

The prime mission will last one Mars year, or about 23 Earth months

So what does the pattern JPL choose spell out?

It spell's out in Morse code J P L.

TV SALE OF THE CENTURY

The UK's oldest working television receiver is for sale and it's expected to fetch £5000 at the very least.

The owner, bought it the week after TV transmissions began in November 1936 for £99, 15s. Tragically, the Crystal Palace that housed the TV transmitter burned down only days later, and the device wasn't in use again until 1946.

The 75-year-old set comes with a 12-inch screen and is contained in a walnut and mahogany case with the picture reflected on to a mirror that opens from the top.

It's an incredibly rare variety of TV, as appraiser Laurence Fisher notes:

This is being sold by the late owner's family and is the oldest working TV set in Britain. These sets were really a side effect of our secret radar research and they are very similar inside to the radar. Logie Baird and Marconi had separate companies but used the same people to make the sets, but Marconi became the most popular maker.

This Marconi type-702 TV set even comes with the original invoice.

It'll be sold on April 19 th at Knightsbridge in the UK

FIRED!

A "Suspicious" fire damaged the main transmitter of Little Rock's KUAR last weekend.

A fire marshal was called in following the late Saturday afternoon fire at the site. The station's engineer, after being summoned to the transmitter, found the lock had been replaced and he wasn't able to open it.

It took the fire department to break down the door, and by then the station says the transmitter was "severely damaged with smoke." Things got even more

disturbing: "Officials also discovered that part of the fence around the transmitter building had been pulled back and that copper from the tower was missing."

So here's the possibility of yet another radio station vandalized by copper thieves, who then set a fire to cover their tracks.

KUAR was able to get back on the air from its backup site,

AMAZING BUT TRUE

Reading an online industry paper through the week stumbled across a segment called "Radio Around the World".

3 stories in BOLD type,

SOMALIA: The director and a news editor for Mogadishu's independent Shabelle Radio, held for four days by government forces, now released.

PHILIPPINES: The National Police have solid leads in the murder of Manila's DZME-AM Radio host Marlina Len Sumera, releasing descriptions of three men identified as the gunman, a lookout and an accomplice. Sumera was shot at close range on her way to the radio station.

AUSTRALIA: Sydney's 2Day-FM morning co-host Jackie O broke down on the air after a newspaper editorial criticized her for going back to work so soon after giving birth and feeding her child whilst crossing a busy intersection.

How on earth the Jackie O story rates with terrorism and death is beyond me!

BUT THAT'S RADIO!

WEIRD AND WONDERFUL

Scotch on the Rocks?

Whilst sailing in the midst of Westernport bay the VK7DI team decided to send a special QSL to Lionel VK3NM who was acting as one of their onshore liaison stations.

It was decided that an empty Johnny Walker bottle should be pressed into service and a qsl was scribbled on a sheet of paper and placed in the bottle. The top was sealed and with some ceremony the bottle was cast over the side to be borne by the waves ...

To our surprise about three days later we hear that not only has the QSL been recovered but it was recovered by another amateur Albert VK3KLB who we hope will forward to the QSL to Lionel.

Is this quicker than the QSL Bureau ?

John VK2JJW with the Weird AND Wonderful, another, be it slower scotch story "surfaced" this week.

A charity that recovered a cache of whisky abandoned in Antarctica more than 100 years ago is set to reap a windfall after a Scottish distillery

painstakingly recreated the historic tipple.

The Mackinlay's scotch belonged to British explorer Sir Ernest Shackleton's 1907-08 Antarctic expedition and was left beneath a hut on the frozen continent after his attempt to reach the South Pole failed.

The Christchurch-based Antarctic Heritage Trust (AHT) found the whisky in 2006 and shipped a crate containing 11 bottles to New Zealand last year.

The wooden crate, marked "British Antarctic Expedition 1907", was frozen solid in temperatures of minus 30 degrees Celsius -- but the whisky in the bottles was still liquid.

After the crate was thawed out, Whyte and Mackay, which owns the Mackinlay's brand, analysed it and after 4 years has recreated their masterpiece.

At around $160 per bottle the "new scotch" will give a potential windfall of $400,000 to the Antarctic Heritage Trust at 5% per bottle!

Oh and for those paying attention and noting 11 bottles were found and sent back to ZL " The crate would originally have held 12 bottles but one was missing when it was found, raising the possibility that Shackleton or a colleague helped himself to one to ward off the polar chill."

SPECIAL EVENTS AND ON AIR CONTEST COLUMN - D A T E L I N E 2011

Apr 23 ZL/VK 2011 VK/ZL RTTY SPRINT 80 metres

Apr 30 WW Marconi Day 2011

Apr 30 ZL/VK 2011 VK/ZL RTTY SPRINT 40 metres

>From Denis Johnstone Contest Manager for the John Moyle Memorial Field Day.

"So far I have received about 70 logs and there has been plenty of contesting completed during the contest.

Of course having taken part in the contest, which in many cases required you to plan your site, pack and transport, your accommodation, food and equipment.

Then to set up your station.

This was followed by up to 24 hours operation, after which you had to pack up your station and return to your home QTH.

It would be such a shame if you were not to complete the process of completing your log and getting it to me. You can use electronic or snail mail, and the full details are on the Contest Page on wia.org.au

Your log is very important to you, but it is also very important to others as it is with this information I am able to verify the logs of other stations.

So make sure you complete your log and get it to me before the closing date of April 22nd 2011."

SPECIAL EVENT STATIONS

GB2RAF back on the air

It has now been confirmed that permanent special event station GB2RAF will be back on the air again from yesterday, Saturday 9th April.

Operations will be from the Air Defence Radar Museum, RAF Neatishead, Norfolk. Due to a Health and Safety fire issue, the Museum had to close down in September 2010 and consequently the permanent special event station GB2RAF has been unable to go on the air since then.

GB2RAF will be back on the air every second Saturday of the month from 10.00 to 16.00, primarily on 80m SSB around 3,710kHz.

For further information contact Terry, G4PSH QTHR or via GB2RAF. Details of both are correct on qrz.com.

International Lighthouse and Lightship weekend

Following the entry of Crookhaven Heads lighthouse on the south coast of New South Wales, for the first time last year, intense interest in the weekend is being shown by various government bodies.

While investigation begins into the rehabilitation of the lighthouse, including a steering committee set up by the Shoalhaven City Council, it will be on air thanks to Ian Newton VK2IAN.

He is among 26 Australian lighthouses registered this year, ahead of Germany on 22, followed by USA on 18 and England with 12. In all 30 countries have listed.

For the first time Lebanon is registered at Manara, Ramkin and Tyr lighthouses, all under the OD5RW callsign.

It will also be nice to have New Caledonia, Le Fare Amedee, who joins us signing FK4WBT, on air for the first time since the year 2000.

The fun event dates back to 1994 when the first Scottish Northern Lighthouses Award Weekend was held and it has continued to grow ever since.

The International Lighthouse and Lightship Weekend is on August the 20th and 21st this year, and all enquires via its website ILLW.NET

(Jim Linton VK3PC)

INTRUDER WATCH - ENFORCEMENT ZONE

Region III IARUMS Coordinator Peter Young VK3MV

VK IARUMS reflector email to subscribe intruders@wia.org.au

INTRUDER NETS
Friday 0730 UTC 7.065.5 with VK4CEU David.

Amateur exclusive frequencies where any non-amateur signal is definitely an intruder.

Amateur HF Spectrum world wide
7.050 to 7.100
14.000 to 14.250
14.250 to 14.350 No broadcasters
21.000 to 21.450
24.890 to 24.990
28.000 to 29.700

A South East Queensland woman has spoken out about the dangers of using UHF CB radio frequencies after incidents of stalking and numerous death threats.

The problems started about 10 months ago when she went online to use the UHF channel.

After a few minutes of talking, other users started or followed and threats to her son and to grand-children followed."

She won a good behaviour and peace order against the main offender in November last year, but has said it did not seem to have an effect. Logan District Crime Prevention Unit officer-in-charge Sergeant Debbi Tronc said everyone had to be vigilant in this age of digital communication.

"People should just be aware that it is public (the radio channel) and public means that it's open to thousands of people out there who are listening," she said.

"You wouldn't give out private or personal details to a stranger on the street, so you should treat EVERY public forum in the same way."

Over in Maple Leaf Land, an Ottawa 15 year old has been accused of not only operating a "Pirate FM'er" but of threatening to kill mainstream radio announcers who are said to have critisised his station, music and voice.

The teen testified he launched the radio station on Oct. 31 after buying transmitting equipment. He said he went off the air in December because he planned to get a licence, but went back on air on Dec. 24 when an engineer told him it was "impossible" to get a radio licence in Ottawa.

The teen has pleaded not guilty to violating the Radiocommunication Act as well as four charges of criminal harassment and three counts of uttering threats. He is also charged with assaulting a police officer and obstructing justice.

Www.ottawacitizen.com/news/Death+threat+against+radio+personality+wasn+serious+teen+accused+running+pirate+radio+station/4557931/story.html#ixzz1Ic9CW0rg

WW SPECIAL INTEREST GROUPS - ASTRONOMICAL

Britain's Jodrell Bank Observatory has been chosen as the headquarters for a $2 billion effort to build the world's largest radio telescope, astronomers say.

An agreement to put the headquarters of the Square Kilometre Array at Jodrell Bank has been signed in Rome by Australia, China, the Netherlands,

New Zealand, South Africa, France, Germany, Italy and the United Kingdom,
the BBC reported Saturday.

The Square Kilometre Array has been named for the size of its signal
collecting area, but it will not be a radio dish a kilometre across but rather
thousands of smaller ones spread across a wide area.

The location has yet to be determined but the two leading candidates are
Australia and South Africa.

www.upi.com/Science_News/2011/04/04/Largest-telescope-will-have-UK-base/UPI-73351301962674

ALARA - AUSTRALIAN LADIES AR ASSOCIATION
http://alara.org.au
Net is held each Mondays on 3.570 MHz, commencing at 1030 UTC.
(1000utc during daylight saving)
geencee@picknowl.com.au

In this months ALARA news letter Tina the President gives a special thank you
to Margaret VK4AOE from Dalby who has been on the committee for 30 years and
Treasurer for 11 of those years.

Margaret has kept ALARA going with much of her work done during January when
there isn't even a committee meeting to give her guidance.

She has also been a helpful source of information about procedures which have
kept all at ALARA legal and out of trouble with the powers that be.

Oh and Margaret, VK4AOE has also looked after this WIA News and QNEWS
call-backs from Dalby each week so thanks from us as well Margaret!

WW SPECIAL INTEREST GROUPS --- FINAL FRONTIER

AMSAT-VK UNOFFICIAL HF Net.
2nd Sunday each month.
April through October 1000 UTC 3.685 MHz
November through March 0900 UTC 7.068 MHz

N4S - Special Event:
50 yrs First Man in Space / 30 yrs of STS-1 - April 12:

The Soyuz capsule carrying two Russians and an American successfully docked
with the International Space Station, after a two-day journey, docking
automatically 0909 AEST Thursday.

"Soyuz TMA-21 'Gagarin' docked with the Russian MIM-2 module.

The spaceship named after the first man in space Yuri Gagarin in honour of
his historic flight 50 years ago.

The mission is centrepiece of celebrations for the half century of manned
spaceflight, the crew carried a recording of the famous radio exchanges
between Gagarin in his tiny capsule and chief Soviet rocket designer

Sergei Korolyov on the ground from half a century ago.

Yes it was 50 years since the First Man in Space, Russian pilot Yuri Gagarin, who April 12, 1961 was the first human being to go into space on an 108 minute flight, and the first flight of the Space Shuttle Columbia Sunday morning on April 12th, 1981, known as mission STS-1, opening what is called the Shuttle era.

The Special Event callsign N4S will be on the air to remember these two events:

one which changed the course of history, and the other helped expand our knowledge of the space sciences and in the construction of the International Space Station (ISS).

The Special Event will be active on the HF bands from 80 to 10 meters on SSB.

A special electronic certificate will be issued for this occasion.

For information go to www.qrz.com/db/wp3gw or write to wp3gw@arrl.net

RADIO LAW: CO-SPONSOR OF HR-607 MEETS WITH MISSOURI HAMS

U.S. Representative Billy Long of Missouri has assured ham radio operators that he will keep them informed about a bill that contains a provision to sell a band of frequencies that they use heavily for emergency service work. Bill Pasternak, WA6ITF, is in our Newsroom with more:

--

According to an article in the Springfield News Leader newspaper, Representative Long made the statement after a meeting with a group of Missouri radio amateurs from his home district.

Billy Long is a co-sponsor of H.R. 607. This is a measure introduced by New York Representative Peter King who is the chairman of the Committee on Homeland Security.

As previously reported, the bill is intended to unite the communications capabilities of first responders by reallocating certain frequencies in the 700 MHz band specifically for their use. But another part of the bill would sell off 420 to 440 MHz to the highest bidder. This, to make up for lost revenue in the give away of the 700 MHz spectrum for interoperable, first response radio use.

Long says that right now, the bill is in its initial stages and that meetings like this is one with the ham radio community of many ways to

address any concerns. Long promised that he will continue to listen to ensure that we are not cutting any vital emergency services and not adversely affecting ham radio operators.

Rod Kittleman, K0ADI is the ARRL's Information Officer in Southwestern Missouri. He was present at the meeting and is quoted by the newspaper as saying that he believes that Long is trying to do the right thing.

K0ADI went on to say that he believes that Representative Long understood where the ham radio community was coming from and that he reassured us he will do everything he can to keep the ham radio community informed. But at the same time, he did not guarantee that spectrum would not be taken away.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF, in the Newsroom in Los Angeles.

--

The bottom line. If nothing else this meeting between Representative Billy Long and the Missouri ham community has made one of the bill's co sponsors aware of the negative impact that selling off 420 to 450 MHz would have on overall emergency communications during a time of public need. (Springfield.com, others)

PROPAGATION: SOLAR RADIO STORM COULD MEAN IMPROVED PROPAGATION

Some good news for hams awaiting the return of decent propagation. Spaceweather reported on March 28th that a large number of emerging sunspots has kicked off what it termed as days-long radio storm on the sun. According to the on-line newsletter, VHF receivers on Earth were picking up loud bursts that sound like waves crashing on a beach. Spaceweather says that this ongoing event continues a recent trend of increasing activity as Solar Cycle 24 heats up.

Then over the weekend of April 2nd and 3rd a solar wind stream hit that Earth's magnetic field over the weekend of sent a wave of deep sky auroras over northern tier of the United States. According to Spaceweather dot com, the Northern Lights were pale-white to the naked eye, but digital cameras revealed spectacular colors and luminous shapes above Wisconsin, Michigan, Minnesota, and elsewhere.

Meantime, on the ground some hams on 6 meters and above heard or made contact with distant stations not usually heard on these bands. You can easily tell a contact made via aurora propagation by its raspy C-W note or gargely voice sound.

For images and audio go to www.spaceweather.com. (Spaceweather)

**

RESTRUCTURING: SARL SAYS NEW SOUTH AFRICAN HAM RADIO REGULATIONS HAVE ERRORS

The new South African radio regulations that were published on March 31st and came into effect on April 1st are causing concern to that nation's ham radio community. This is because a number of mistakes have crept in, which telecommunications regulator I-C-A-S-A is reportedly working on to rectify as soon as possible.

According to the South African Radio League, the problem is with the new regulation for the Class B or Zed-U license is incorrect. This is because the word "under" was left out before the words 20 years. The leads to a situation where if you are over 20 years of age you cannot apply for a class B license. If you have a class B qualification you will be able to keep a Zed-U license until you reach 25, when the license is automatically canceled.

The position of current Zed-U license holders has not been finalized. I-C-A-S-A is likely to allow a two year grace period for those over 25 with a class B qualification to upgrade their to a class A. To upgrade means having to sit for the class A examination.

Meantime, on the other side, those who hold the Zed-R prefix now have the same privileges as a Zed-S license holders meaning that the upgrade process falls away. But it seems that the new table of amateur radio frequency allocation is incorrect. Both Zed-R and Zed-S should follow the same frequencies and power limits. Zed-R license holders do not have to change their callsign. (SARL)

**

MILITARY RADIO: SHORTWAVE AIMED AT LIBYAN VESSEL COMMANDERS

And it appears that radio has gone to war in Libya. This with reports that High Frequency radio transmissions are reportedly playing a major role in the U-N's Operation Odyssey Dawn.

According to international shortwave news reports, 6 point 877 MHz is being used as an airborne announce channel, possibly from a Commando Solo Aircraft. The messages being broadcast are aimed at commanding Libyan naval officers. They reportedly and not so subtly order them not to board their ships.

The Milcom Monitoring Post website has been reporting on the use of High Frequency radio in the enforcement of the no fly zone. More is on-line at tinyurl.com/5wca737. (WIA)

ENFORCEMENT: FCC ISSUES OFFICIAL CITATION OVER CABLE TV LEAKAGE

A cable company has been cited by the FCC for excessive leakage at frequencies that could affect the ability of aircraft to communicate and navigate. Amateur Radio Newsline's Fred Vobbe, W8HDU, has the details:

--

The FCC has issued an official Citation to Jerry Fuller doing business as Custom Cable of Russellville, Alabama. This, for exceeding signal leakage limits in aeronautical frequency bands in violation of section 76.605(a)(12) of the Commission's Rules.

According to the Citation, an investigation by the Enforcement Bureau's Atlanta Office revealed that on February 15, 2011, Custom Cable utilized a non-cable, multichannel video programming distributor system which was emitting radio carrier signals above allowed limits on frequency bands utilized by aeronautical services. At the time of the inspections, agents from the Atlanta Office measured excessive signal leakage on the frequency of 121.2625 in the Aeronautical Radio band.

As a result, the FCC has ordered Custom Cable to take immediate steps to come into compliance and to avoid any recurrence of this misconduct. The FCC added that any future violations of its rules in this regard may subject your company to substantial monetary penalties, seizure of equipment, and criminal sanctions.

Reporting from Lima, Ohio, I'm Fred Vobbe, W8HDU.

--

Custom Cable was given the appropriate time to remedy the situation and to reply to the FCC. (FCC)

**

ENFORCEMENT: VAN NUYS CA STORE WARNED TO TURN OFF CELLPHONE JAMMER

The FCC has issued a Notice of Unauthorized Operation and Interference to EDN Aviation of Van Nuys, California. This, for allegedly operating a cellphone jamming device on its premises.

According to the FCC, back on January 10th agents from the Enforcement Bureau's Los Angeles Office visited the business location. At that time they detected radio signals in the 1.8 to 2.0 GHz range emanating from a radio transmitter. The Los Angeles agents determined that the business was operating a radio transmitting device designed to jam or intentionally interfere with licensed radio communications in the cellular and personal communications service.

According to the FCC, its agents did attempt to inspect the device. Subsequent to that attempted inspection, operation of the device ceased.

Now in its March 18th Notice, the FCC tells EDN Aviation that unauthorized operation of the transmitting device must not resume. It also warns EDN that the operation of the device may constitute a violation of Sections 333, 302(b), and 301 of the Communications Act. Such operation may subject the company to substantial monetary forfeitures, seizure of the offending radio equipment, and criminal sanctions.

EDN was given the customary 10 days to respond to the FCC with any information that it believed relevant to the warning notice. That time period has now passed. No word yet from the FCC if EDN responded or what the company may have said. (FCC)

ENFORCEMENT TECHNOLOGY: TRACER SOFTWARE LEADS TO RECOVERY OF STOLEN COMPUTERS

Los Angeles, California Police say that they have tracked down three people whom they allege to have stolen nine computers from the Open Charter Magnet School in the Westchester area. This thanks to a new form of security software installed on the machines.

According to police, the computers were stolen between March 9 and 10 at the campus on 77th Street in the city of Westchester. The suspects were unaware that the computers were equipped with the security software. As soon as one of the machines was turned on and connected to the Internet, it monitored and recorded the location via GPS. It also took photographs of the user and then sent this information off to authorities.

Detectives from the Los Angeles Police Department tracked down one of the suspects on March 12th. A further investigation led them to two others. So far, four of the stolen computers have been recovered. (Published news reports)

COMMUNICATIONS ON THE WWW: FCC LAUNCHES NEW WEBSITE IN BETA TEST

The Federal Communications Commission has launched a complete overhaul of the agency's web site. In making the announcement the regulatory agency says that the new design will improve and simplify the FCC website experience for consumers, government, public safety agencies and the business community.

The Commission says that its new web site design was shaped by public feedback and sharpened through an ongoing conversation with users over the past several months. It also represents the Commission's first overhaul of its main web site in more than a decade. You can try it for yourself at beta dot fcc dot gov. (FCC)

RADIO EDUCATION: ARRL TO SPONSOR FOUR 2011 TEACHERS WIRELESS WORKSHOPS

The ARRL Education Services Department has announced the 2011 schedule for the Teachers Institute on Wireless Technology workshop. Offered through the ARRL's Education & Technology Program, the Teachers Institute is a four-day, expenses paid in-residence learning opportunity designed for motivated teachers and other school staff who want to learn more about wireless technology and bring that knowledge to their students.

There are four ARRL Teachers Institute sessions scheduled for 2011. These are June 13th to the 16th in Albuquerque, New Mexico; June 20th to the 23rd at Parallax Inc. in Rocklin, California; July 11th to the 14th at the Mohawk Valley Community College in Utica, New York, and July 18th to the 21st at ARRL Headquarters in Newington, Connecticut. The deadline to apply for the New Mexico and California sessions is April 15th. The deadline for the New York and Connecticut sessions is May 15th.

In addition, the Dayton Amateur Radio Association will once again host and sponsor a TI-2 session on Space in the Classroom. That one will be held in Dayton, Ohio from July 11th to the 14th. The application deadline for this one is is May 15.

All information about the Teachers Institutes, including the application and a downloadable brochure is available online at tinyurl.com/3exzpj. (ARRL)

CHANGING OF THE GUARD: AMATEUR RADIO NEWSLINE CO-FOUNDER BILL ORENSTEIN, KH6QX - SK

The changing of the guard continues and this time it hits pretty close to home. This as we learn of the passing of one of Amateur Radio Newsline's co-founders and its longtime Production Coordinator Bill Orenstein, KH6QX. Again, our producer Bill Pasternak, WA6ITF:

--

Its not easy to write a final goodbye to someone who has been a friend for almost four decades, but Ill try.

I first met Bill Orenstrin, in 1972 shortly after my wife and I move to Los Angeles. And as I got to know him, I learned that he was first licensed in his hometown of Los Angeles, California, in the late 1950's as K6ZSW. Bill also became interested in broadcasting as a teen.

Bill eventually landed a job with the ABC Television Network where he spent several years as an Audio Engineer before accepting a job at the rival National Broadcasting Company at its West coast headquarters in Burbank, California. There he worked on numerous live and "live to tape" network specials featuring such talent as the legendary Frank Sinatra and stand up comics like Bill Cosby and the late Flip Wilson. Later, Bill also had a regular gig as the audience Public Address Mixing Engineer on the "Tonight Show with Johnny Carson" and "The Gong Show." And it was also during this time he adopted Hawaii as his second home and turned in K6ZSW to become KH6IAF and years later KH6QX.

As those of you who were around in the late 1970's may remember, Gong Show host and Producer Chuck Barris had the habit of creating on-air talent from members of the shows crew. Perhaps the best known was Stage Manager Eugene Patton who became known as "Gene Gene the Dancing Machine." In a like manner, Bill Orenstein was tapped by Barris as the character "Weird Wille." As Weird Willie, Bill's job was to appear just before a commercial break and leer stoically and silently at Barris as the latter made jokes about the character Bill was portraying. For the rest of his life, Bill used that pseudonym or some derivation of it and carried it as a kind of badge of pride. If you asked him why, his answer would be: "...how many of you can claim a famous TV producer like Chuck Barris gave you your nickname?"

After the Gong Show left the air, Bill continued as the Public Address Engineer on the Tonight show until he was tapped by NBC Network Radio to take on the Engineering position of its then brand new young adult contemporary radio network called "The Source." "The Source" was filled with newscasts and features focusing on 18- to 34-year-olds. When it was sold to Westwood One Radio in August 1987, Bill remained at NBC News working with most of the well known network news people of the era including the late NBC News Science Correspondent Roy Neal, K6DUE.

In the world of amateur radio, Bill is best known as one of those behind the 1977 creation of the "second generation" of the Westlink Radio Network which eventually was renamed Amateur Radio Newsline. In 1981 Bill Orenstein and I co-shared the Dayton Hamvention Special Achievement Award for - and I quote from the plaque on my wall -- "The Development and Operation of the Westlink Radio Network." Bill was also co-creator of the late 1970's era "CARS Program" in which radio amateurs became the extra eyes and ears of the Los Angeles Police Department in the then heavily crime-ridden Hollywood and North Hollywood areas.

In the late 1980's Bill retired from both NBC and Westlink Radio due to health reasons and eventually relocated with his family to Hawaii where he lived out the remainder of his life. Over the years he continued to file news reports for Westlink and then in our later incarnation as Amateur Radio Newsline. Most usually dealt with ham radio emergency preparedness and emergency response on the Island state. He was also with Hawaii's famed Emergency Amateur Radio Club and at one time served on its governing board.

I last saw Bill a few years ago when he was in Los Angeles to attend his sons college graduation. After that it was only on the phone. And now, its time to say a final 73 to a guy who was an important part of my life for almost forty years. Not easy to do, but I hope I have succeeded.

--

Bill Orenstein was age 75 when he passed away on Wednesday, March 30th at his home in Honolulu. He is survived by his son Jon. At airtime, plans for a memorial service at Temple Emanu-El in Honolulu, Hawaii,

are pending. (ARNewsline)

**

CHANGING OF THE GUARD: INDUSTRIAL COMMUNICATIONS ENGINEERS FOUNDER MIKE KOSS, W9SU - SK

A mid-West legend in amateur radio has also passed from the scene. Amateur Radio Newsline's Jack Parker, W8ISH, has the story of Mike Koss, W9SU:

--

Mike Koss, W9SU, of Indianapolis, Indiana, passed away Monday, March 28. According to his friend Brian Smith, W9IND, Koss was found on his workshop floor and paramedics were unable to revive him.

Koss is the founder of Industrial Communication Engineers. He is well known in the Amateur Radio and in the commercial radio communities for his surge protectors, line filters, RF switches and more.

Koss is known as being the heart and soul of the Indianapolis Motor Speedway Amateur Radio Club, He designed and maintained one of the best Amateur Radio stations in the Midwest -- the one responsible for cranking out the big signals of Indy 500 Special Event Station W9IMS. Mike was also the driving force behind Special Event Station W87PAX, which commemorated the 1987 Pan American Games in Indianapolis. The station logged more than 23,000 QSOs. Koss was also an avid Dxer. HIs 10 meter CQWW record for the 9th Call Area, set in 1989, remains unequalled.

Mike Koss also was actively involved in public service activities: Just last year, he spearheaded a volunteer project that cleaned up and repainted the USS Indianapolis Memorial in downtown Indianapolis, this coming just in time for the survivors' reunion. History tells us the ship was torpedoed in 1945, and only 317 of the original eleven hundred and ninety-six crew members survived the sinking and subsequent shark attacks over a five day period in the Pacific Ocean.

In 2005 Koss was awarded the prestigious Technical Excellence Award for his contributions to the Amateur Radio community. And now, at age 57, Mike Koss W9SU, is a silent key.

>From Indianapolis, this is Jack Parker W8ISH

--

Koss will be long remembered for his many contributions to telecommunications and his service to the ham radio community. Services for W9SU were to be held in Whiteland, Indiana, on Saturday, April 3rd. (W8ISH)

WORLDBEAT: MAJOR CUTS TO HIT THE BBC WORLD SERVICE

Some major cutbacks are coming to one of the worlds best known international shortwave broadcasters. To meet a United Kingdom government mandated 16 percent funding cut, the B-B-C World Service is eliminating five languages, ending radio distribution for seven more and slashing medium and shortwave radio distribution. This, in favor of FM, TV and the so-called online new media.

The cuts will amount to an annual savings of about $74 million by April 2014. At that point all World Service funding will be switched from governmental grants through to the same domestic license fee that funds B-B-C services across the U-K. 650 out of a total 2400 B-B-C World Service jobs will be eliminated.

**

RADIO IN SPACE: NASA ASKS YOU TO VOTE ON ASTRONAUT WAKE-UP SONG

NASA is offering the public a chance to vote for your favorite tunes to be played as the wake up song during the STS-134 mission, which is currently scheduled to launch on April 19th. Voting will be open until mission launch day. You can listen to the songs nominated and cast your vote at tinyurl.com/4peh55m

**

HAM RADIO IN SPACE: ARISSAT-1 TO BE ON THE AIR TO CELEBRATE GAGARINS FLIGHT

The ARISSat-1 satellite, presently still inside the ISS, will be turned on and use an external antenna from the afternoon of April 11th through the morning of April 13th. This, to celebrate the 50th anniversary of Yuri Gagarin's first manned space flight.

The transmissions on the 12th will see ARISSat-1 in low power mode This means 40 to 60 seconds on and 2 minutes off. Event planners say that this should be a challenge for hams on the ground to find and tune the CW signal then decode some B-P-S-K data during the short on times. As an aside, this mode was developed to be used when the batteries are low or the satellite is in eclipse.

AMSAT says that it will also support this event and issue certificates to those stations reporting reception of the ARISSat-1 signals. Russia's Roscosmos space management agency has announced that ARISSat-1

will be deployed into orbit during the next space walk in July of this year. (WA4SXM)

**

HAM RADIO IN SPACE: N4S TO COMMEMORATE GAGARIN FLIGHT AND LAUNCH OF STS-1

Meantime, special event station N-4-S will be on the air on April 12th to commemorate the 50 years since Russia'a Yuri Gagarin became the first man in space on April 12th, 1961. The operation also honors the first flight of the Space Shuttle Columbia, known as S-T-S One, that took place two decades later on April 12th, 1981. N-4-S will be active on 80 through 10 meters using SSB as well as the KP4IA FM repeater and 147.48 MHz simplex for local contacts across Puerto Rico. A special electronic certificate will be issued for this occasion. For information go to www.qrz.com/db/wp3gw or write to wp3gw (at) arrl (dot) net. (WP3GW)

**

ON THE AIR: ISWL CELEBRATES ITS 65TH ANNIVERSARY

And the International Short Wave League is celebrating its 65th anniversary with a pair of special events stations. GB65ISWL will be on the air for the weekend of April 16th to the 17th. Operation will begin around 1800 hours on Friday, April 15th using S-S-B and P-S-K. The primary operator will be G6XOU.

Then PA0FAW will operate as PC65ISWL between May 1st and the 28th. Activity will be mainly on the digital modes and CW, with some SSB. QSL information for both callsigns will be on QRZ.com. More about the Internartional Short Wave League is on-line at www dot iswl dot org dot uk. (ISWL)

**

DX

In DX, word that G3KHZ has organized a 6th trip to Papua New Guinea to activate more Islands on the Air. Destinations include Feni Island, Nuguria and Green Island. Two members will then will go to Louisiade after the main DXpedition is finished between. Activity will be on all HF bands, including 6 meters, using CW, SSB and RTTY. For updates and more complete details, watch the expedition Web page at p29ni.weebly.com

IK8DNJ has just obtained authorization to be active stroke HI7 between April 30th and May 13th. All operation will be be holiday style on 40 through 10 meters using SSB and the digital modes. QSL via IZ8LKL.

JA1IFB says that the planned operation from Bhutan has been cancelled their April 19-26th operation due to the earthquake and tsunami hitting the JA7 district on March 11th. Look for this operation to possibly be

rescheduled for some later date.

The "DX-World.Net" reports that N2WB, is planning to be active stroke HR5 from Honduras between April 20th and May 4th. QSL via N2OO.

The I2YSB DXpedition team is now active as 5M2TT from Liberia until April 13th. The group plans to use 3 stations for the HF bands and one for the 50 MHz band that includes a beacon and cubical quad antenna. Modes include CW, SSB and RTTY. QSL via I2YSB.

The upcoming September 2011 Timor-Leste DXpedition has received the callsign 4W6A from the governing licensing authorities. 4W6A will operate from Atauro Island in East Timor from September 16th to the 26th. Activity will be on 160 through 10 meters, using CW, SSB and RTTY. The QSL manager is M0URX.

Lastly if you DX the birds, then look for KL7CN to be active in a holiday-style DXpedition on the FM satellites from various Caribbean locations. He will start at KP4 and then operate maritinme mobilefrom as many grids as we can. That will be followed by a stint portable J6 then as V25CN. Several other Caribbean stops are planned. QSL as directed on the air.

(Above from various DX News Sources)

THE NOMINATION PERIOD FOR THE 2011 AMATEUR RADIO NEWSLINE YOUNG HAM OF THE YEAR NOW OPEN

And finally this week, its time to announce that the nominating period for the year 2011 Amateur Radio Newsline Young Ham of the Year Award is now open. Created by us back in 1986, this award is offered to recognize one young United States or Canadian radio amateur age 18 or younger for his or her contributions to society through Amateur Radio.

As in years past, the 2011 recipient will receive an expense paid trip to the Huntsville Hamfest in Huntsville Alabama courtesy of Vertex-Standard Corporation which produces Yaesu brand amateur radio gear. Vertex-Standard will also present this years winner with a special ham radio related gift. CQ Magazine will again treat the recipient to a week at Spacecamp-Huntsville. We at Amateur Radio Newsline will present the winner with a plaque honoring his or her achievements.

All nominations and materials required by the official rules must be received by ARNewsline before June 30, 2011. A downloadable nominating form is at our website at www.arnewsline.org. A nominating form can also be obtained by sending a request along with a self addressed stamped envelope to the Young Ham of the Year Award in care of Amateur Radio Newsline, Inc. 28197 Robin Avenue, Santa Clarita California 91350.

Again, the cutoff date for this year's Young Ham of the Year Award nominations is June 30th. We ask you to do your part by nominating a young ham who has done something special related to ham radio. The nomination form is at www.arnewsline.org (ARNewsline(tm))

**

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB, the Southgate News and Australia's W-I-A News, that's all from the Amateur Radio Newsline(tm). Our e-mail address is Newsline (at) arnewsline (dot) org. More information is available at Amateur Radio Newsline's(tm) only official website located at www.arnewsline.org. You can also write to us or support us at Amateur Radio Newsline(tm), 28197 Robin Avenue, Santa Clarita California, 91350

For now, with Bill Pasternak, WA6ITF, at the editor's desk, I'm Don Wilbanks, AE5DW, saying 73 and we thank you for listening.

GB2RS NEWS

Sunday 10th April 2011

The news headlines:

* RSGB AGM to be held in Derby on 14 May

* QSL bureau changes

* T32C DXpedition raffle

Don't forget, the 84th RSGB AGM will be held in the Menzies Mickleover Court, Etwall Road, Mickleover, Derby DE3 0XX on Saturday 14 May, commencing at 12 noon. Doors will open from 11 until 11.45am for registration. After lunch there will be an Open Forum at 2pm. Why not make it a full day out and join us for dinner? After the AGM there will a dinner in celebration of amateur radio. Join the President, Dave Wilson, M0OBW and members of the Board for a splendid social evening in the true traditions of amateur radio. Tickets are available from the online RSGB shop, priced £26.

Roy Walsh, G4ZNK is stepping down as volunteer manager for the M zero D to M zero F QSL card series. The Society wishes to thank him for his service to his fellow amateurs and welcomes his replacement Jim Steel, M0ZAK. All cards and envelopes are being transferred to M0ZAK who is QTHR. Details can also be found on the RSGB website or via the RSGB QSL bureau.

CDXC is running a raffle in support of the T32C DXpedition. There is one prize, a Yaesu FT-950 transceiver that sells for around £1,290. This prize is sponsored by Martin Lynch & Sons, Nevada Radio and Yaesu UK. ML&S is also supplying a 30A power supply. Contact the promoter Neville Cheadle, G3NUG for details, email g3nug@btinternet.com or 01568 750 560. The draw will take place on 26 August just prior to the DXpedition.

The Reunion of the Radio Security Service ex-members on Sunday 17 April in the Mansion at Bletchley Park will include an illustrated lecture on how radio amateurs helped to win the war. More than a thousand amateur radio volunteers listened on the short wave bands, in secret in their own homes, for illicit signals in the UK. What they uncovered were the transmitters of the German Secret Service operating all over Europe and beyond. Besides penetrating the most secret aspects of the service they also learnt about spies sent here. Some of them were 'turned' to work for us under the supervision of radio amateurs, notably Ronnie Reed,

G2RX. More can be found at http://secretlisteners.org.

On 3 April a new distance record set for optical communication by a group of radio amateurs from North-East England. The distance worked was just a few metres short of 90km. Signals were exchanged on FM and SSB at remarkable strengths. The contact was made from Race Head in County Durham, which is locator IO94VS to Danby Moor near Whitby, which is locator IO84NK. The team at Race Head included two stations, Stuart, G8CYW running the transverter and LED transceiver of his design featured in recent articles in RadCom, and Brian, G8KPD also running his version of the designs, plus separate receive and transmit heads. The station on Danby Moor was operated by Rob, M0DTS using his version of the transverter featured in RadCom. To commemorate the 50th anniversary of the first man in space, Russian pilot Yuri Gagarin, on 12 April 1961, and the anniversary of the first flight of the Space Shuttle Columbia on 12 April 1981, special event station N4S will be on the air. The station will be active on the HF bands from 10m to 80m on SSB. A special electronic certificate will be issued for this occasion. For information go to WP3GW on qrz.com.

Arissat-1 will be activated inside the ISS on that same day, 12 April, and will send voice messages and slow scan TV images, plus CW and data from the new PSK1000 mode on the frequency 145.950MHz. For more info go to www.amsat.org.

The International Short Wave League is celebrating its 65th anniversary in 2011. GB65ISWL will be on the air over the weekend of 16 and 17 April. Activity will start around 1800 hours on Friday, April 15th. Modes will be SSB and the PSK modes. Main operator will be Herbie, G6XOU.

And now for the details of rallies and events for the coming week

Today, Sunday 10 April, it's the Cambridgeshire Repeater Group Annual Rally at Foxton Village Hall, Hardman Road, Foxton, Cambridge CB22 6RN. There is talk-in on S22 in advance of the 10am start, trade stands, a Bring & Buy and catering. Entry is £2. Contact Lawrence, M0LCM, on 01223 654880 for more information.

Also on today, Sunday 10 April, is the Northern Amateur Radio Societies Association Exhibition, also known as the Blackpool rally. Held at Norbreck Castle Exhibition Centre, Blackpool FY2 9AA, it opens at 10.45 for disabled visitors and 11am for everyone else. Car parking is available, there are trade stands, an RSGB book stall, Bring & Buy, club and special interest stands. For more information contact Dave, M0OBW, on 01270 761 608.

Over the weekend of 16 and 17 April, Jim, M0JHW will be holding another of his field days at the Sports & Social Club, Harlaxton, Grantham NG32 1HX. There will be plenty of tea and coffee and a BBQ in the afternoon. All are invited to come and meet old friends and make new ones. There will also be ample opportunity to play radio. Details from Jim by email

to m0jhwjim@aol.co.uk.

At the next Kempton Rally at Kempton Park Race Course on Sunday 17 April, Radiofairs will be holding a group of technical clinics that are designed to help newcomers and old timer alike with any amateur radio problems. The clinics will be held in the quiet lecture theatre area and will be available all day. The amongst the topics covered will be EMC problems and solutions, how to get started in amateur radio, getting started in contesting and improving your results, antenna advice, home brew advice and a rig basic health check. Details are available on the internet at www.radiofairs.co.uk.

Past RSGB President, Angus Annan, MM1CCR, will be speaker and a guest of honour at the Pearl Anniversary Lough Erne Rally on 17 April. His busy programme includes a talk about the National Radio Centre at Bletchley Park, the presentation of the Regional Club of the Year Award to Lough Erne Amateur Radio Club and certificates of congratulation to the Club's nine new Intermediate licensees. Further details at www.lougherneradioclub.co.uk.

Also on Sunday 17 April the Andover Radio Amateur Club Boot Sale will take place at Wildhern Village Hall and Playing Field, north of Andover just off the A343 at SP11 0JE. Entry is £1.50, with vendors £6 per boot/table or £8 inside the hall. Details from Martin, M0MWS on 01980 612070. Now for the news of special events

On 12 April, GB4SWF will be on the air from the Speyside Whiskey Festival in Banffshire. Then, on 15 April, GB4SG will be on the air for St George's Day from Northampton and MI0RTX will put GB0AVB will be on the air from County Antrim promoting the work of artificial voice boxes. On 16 April Grantham radio amateurs are putting GB0GRA on the air.

GB4FPR is participating in this year's Marine Radio Day event over 14 and 15 April from 1200 to 1200UTC from Fort Perch Rock Marine Radio Museum. Whilst using the normal amateur frequencies they will also be transmitting on 502/503kHz CW and replying on same frequencies to suitably equipped stations and crossband replies on 3570 or 7030kHz to non suitably equipped stations depending on operational conditions. Signal reports are welcomed. QSLs to M0BZZ direct or via the bureau.

And now the HF DX news compiled from 425 DX News and other sources

The September 2011 Timor-Leste DXpedition has now received its callsign, 4W6A, from ARCOM, the licensing authority in Dili. The team is very grateful to ARCOM for issuing this special one-letter callsign for use on the DXpedition. The DXpedition has a website at www.4W6A.com, which includes profiles of the team members, propagation predictions and lots of information about Timor-Leste and Atauro Island, the location of the DXpedition.

A major IOTA expedition that incorporates several different IOTA references in Papua New Guinea has just started and the team are

currently Nuguria Islands, IOTA reference OC-257, where the call P29NI will be used until 14 April. This is followed by the Green Islands, IOTA reference OC-231, where they will use P29VLR from 15 to 18 April.

Dave, EI9FBB will pay a short visit to Monaco later this month and will be active as 3A/EI9FBB from 20 &#65533; 22 April. Operation will be mainly in the afternoons and logs will be uploaded to Logbook of the World and eQSL.

Craig, VK4LDX will be on the air from Magnetic Island, which is IOTA reference OC-171, from 17 to 20 April. He plans to operate SSB, PSK41 and RTTY. He will use the call VK4LDX/P.

Now the contest news

The 432MHz UK Activity Contest is taking place on Tuesday 12 April from 1900 to 2130UTC. Using all modes the exchange is signal report, serial number and locator.

On Wednesday 13 April, the 80m Club Championships SSB leg is taking place between 1900 and 2030UTC. The exchange is signal report and serial number.

On Saturday 16 April the Spring EU Sprint SSB contest takes place between 1600 and 2000UTC on the 3.5 to 14MHz bands. It's a 4-hour event with a rigid exchange structure of both callsigns, a serial number and your name (or nickname). You'll have to engage in some band hopping, to make the most of changing conditions. And now the solar factual data for the period from the 28th of March to the 3rd of April, compiled by Neil Clarke, G0CAS on the 4th of April.

To start this week an update on the latest smoothed monthly sunspot numbers which are for June, July and August 2010 and are 16.4, 16.8 and 17.4 respectively.

The two large complex sunspot groups that were visible on the solar disc for most of the week failed to produce any large solar flares. They could only produce isolated small C class solar flares everyday except for the 2nd. On occasions, small sudden ionospheric disturbances and coronal mass ejections occurred with these flares but their effect on propagation was minimal. Some days they were up to six groups visible but many were very small. Solar flux levels declined from 119 units on the 28th to 108 by the 2nd. The average was 114 units. The 90 day solar flux average on the 3rd was 99 units. That's three units up on last week. X- ray flux levels varied little day to day and averaged B3 units. Geomagnetic activity was quiet every day until the 1st when a recurring coronal hole disturbance arrived. This carried on through to the 3rd. The most disturbed day was the 2nd with an Ap index of 20 units. The average was Ap 9 units. Solar wind data from the ACE spacecraft saw solar wind speeds increase from 300 kilometres per second to 710 by the 2nd. Particle densities were low except for an increase to 40 particles per cubic centimetre during the evening of the 29th. Bz on the quiet days varied between minus and plus 4 nanoTeslas

and between minus and plus 10 nanoTeslas during the disturbance. Interestingly, on the 30th the Bz remained positive for the complete day and varied between plus 5 and plus 13 nanoTeslas.

And now the solar forecast. This week solar activity is expected to be at low levels, however there is a chance that activity could increase on some days. Solar flux levels are expected to decline and be in the 90s for most of the week. Geomagnetic activity is expected to be quiet everyday. MUFs during daylight hours at equal latitudes should be about 25MHz for the south and 22MHz for the north. Darkness hour lows are expected to be about 10MHz. Paths this week to South Africa should have a maximum usable frequency with a 50 per cent success rate of around 31MHz. The optimum working frequency with a 90 per cent success rate will be about 24MHz. The best time to try this path will be between 1100 and 1600 hours UTC.

And that's all for this week from the propagation team.

Next, the Local News:

SARL NEWS - SUNDAY 10 APRIL 2011 You are listening to ZS6SRL, the official radio station of the South African Radio League, the national body for amateur radio in South Africa, with a news bulletin every Sunday at 08:15 CAT in Afrikaans and at 08:30 CAT in English. To listen to a web stream, visit www.sarl.org.za, click on 'ARMI' and follow the links for details. PLEASE NOTE: for audio via Echolink, connect to ZS0JPL-R. You can download this bulletin and previous ones from www.sarl.org.za and also subscribe to receive future bulletins by e-mail. Your newsreader this morning is (name), (call sign), on 145,725 and 7,066 MHz from Pretoria, with relays on 7,066 and 3,695 MHz SSB. In the news today: SARL AGM ON AIR NEW REGULATIONS GET THE FACTS FIRST CAPE TOWN RTA PROGRAMME NOW AVAILABLE POWERLINE COMMUNICATIONS IN SPOTLIGHT AGAIN You are listening to ZS6SRL. Stay tuned for more details on these and other important and interesting news items. SARL AGM ON THE AIR If you cannot attend the SARL AGM next Saturday, you can follow the proceedings on the air and Echolink. Transmission will start just before 09:00 on 7 082 kHz and 14 250 kHz. In Gauteng it can also be heard on 145,750 MHz. The relay arrangements are by courtesy of the Magalies Amateur Radio Club. NEW REGULATIONS The SARL has been in constant contact with various persons in ICASA about the corrections to the published regulations. The conference hosted by ICASA on the digital dividend took several role-players out of their offices, which has made it difficult to get any written confirmation. The official dealing with the license renewals has telephonically confirmed that as matters stand currently, class B license holders over 25 years of age can renew their ZU license as before for the next two years. He advises that during this two-year period they should work on upgrading to a class A license. GET THE FACTS FIRST In general, discussion forums on the web carry interesting information and discussions, but forum postings are more often than not the opinion or perceptions of the author and not necessarily the facts. The SARL forums are no exception to this. Bear in mind that people posting on the forums are not necessarily fully informed or aware of the latest developments. He or she conveys his or her own views. In the case of the SARL, official information is disseminated in SARL News and on the home page of the SARL website. Specific information for members is also communicated in a new SARL TODAY slot on the members-only web pages. Currently the new radio regulations as published are available for download, as well as a recording of last weekend's President's Net. Other information available is how a club can run their own Class B examinations and an explanation of how the SI metric system works and the correct abbreviations for metric units. SARL members should click on the top right hand of the homepage on Members Only and enter their pin. CAPE

TOWN RTA PROGRAMME NOW AVAILABLE The Radio Technology in Action Symposium will be presented in Cape Town on Saturday 7 May 2011. The venue is the Cape Peninsula University of Technology, Bellville Campus. Visit www.sarl.org.za and click on RTA. The programme features a panel discussion on 'How can older amateurs get more out of amateur radio?' You will learn more about Field Programmable Gate Array devices (FPGA). The presentation will include a simple explanation of the FGPA, its advantages, were you can use it, how it is used in amateur gear and what to do to get started using FPGAs. If you live in the Western Cape,you do not want to miss this annual SARL event. ARISSAT-1 CELEBRATES 50TH ANNIVERSARY OF FIRST SPACE FLIGHT The ARISSat-1 satellite, presently still inside the International Space Station, will be turned on and use an external antenna to celebrate the 50th anniversary of Yuri Gagarin's first manned space flight. The transmissions will begin on Monday 11 April 2011 at 14:30 UTC and continue until 10:30 UTC on 13 April 2011. The solar panels are currently covered, and the satellite will be powered only by the onboard battery, running in low power mode. This means that the transmissions will cycle, ON for 40-60 seconds and OFF for 2 minutes. FM transmissions on 145,950 MHz will cycle between a voice ID, select telemetry values, 24 international greeting messages in 15 languages and SSTV images. One of the messages will be a conversation between Yuri Gagarin and ground control. The CW transmissions on 145,919 MHz will be callsign ID, select telemetry, and callsigns of people actively involved with the ARISS programme. AMSAT will issue commemorative certificates to those receiving the transmissions and sending an email to gagarin@arissat1.org or yuri@arissat1.org with your name or group, a description of what you heard and the UTC when you heard it. Recording the battery voltage values and the UTC will be especially helpful. Send a report to SA AMSAT at saamsat@intekom.co.za and you could be the lucky winner of the SumbandilaSat first-day cover released by the Post Office on 1 April. More details on www.amsatsa.org.za. Include an audio recording if you can. The BPSK transmissions on 145,920 MHz will feature a new 1kBPSK protocol developed by Phil Karn, KA9Q, to be readable in low-signal conditions. The BPSK data will transmit satellite telemetry. A free ground station soundcard demodulator and display software will be available. Watch www.amsatsa.org.za for details of when it becomes available. The linear transponder will not be active during this event. Roscosmos has announced that the satellite will be deployed into orbit during the next 'space walk' or EVA in July this year. POWERLINE COMMUNICATIONS IN SPOTLIGHT AGAIN In this past week, SARL Councillor Hans van de Groenendaal, ZS6AKV, represented the SARL at a joint meeting of three SABS technical committees held to discuss a new standard proposed for the use of powerline communications (PLC) in controlling the electricity network, metering and the so-called smartgrid applications. Eskom and some vendors had objected to the ratification of South African National Standard (SANS 50065-1) as they believe that the Standard does not meet all the Eskom and possibly Metro requirements for managing the electricity grid. Eskom is seeking to use frequencies up to 500 kHz while the Standard only covers

applications between 3 kHz and 148,5 kHz. Specifications between 148 kHz and 500 kHz are yet to be coordinated around the world. There is no agreement between various industry players. One of the arguments is that the band between 3 kHz and 2 MHz should be considered for use of PLC for power utilities as new development in smart grid applications point in this direction and there should be no argument as all equipment would have to comply with CISPR 22 which will protect users of the radio spectrum. Amateur Radio has two allocations in this spectrum, the newly acquired 135,7-137,8 kHz and 1810 to 1850 kHz. Currently, a revision to the 50065-1 standard is under consideration in Europe. It was resolved that various studies will be undertaken which should include the frequency spectrum management group of ICASA. The joint committee will meet again in mid June. While broadband powerline communication is still on the horizon, there have been no further developments. The SARL is watching this space closely. NEW MEMBERS This week we welcome Dennis van Blerk, ZS1TC, and Anthony Van Tonder, ZS1AB, to the SARL. We trust your association with us will be mutually beneficial. This brings our membership total to 1529 this week. PROPAGATION REPORT: GIVE 10 METRES A TRY THIS WEEK With Hannes Coetzee not available this week, Hans, ZS6AKV, reports that the geomagnetic conditions are at quiet levels. Local HF working frequencies are unstable to near monthly average predicted values. The outlook for the next few days is that propagation conditions should be fair, with operating frequencies variable from the predicted monthly average HF working frequencies. A number of active areas are visible on the solar disk. Most of them are magnetically quiet, but one is developing the potential for C-class X-ray flares. Radiation events are unlikely. A small coronal hole on the solar disk should become geo-effective this weekend. The sunspot number outlook for this week is 97. Openings to the USA east coast on 10 metres are predicted for the late afternoons and early evenings while 15 metres is likely to offer better results for contacts with the US west coast. For Europe the best results are expected in the late afternoon with 10, 15 and 20 metre openings peaking at around 18:00 CAT on 10 and 15. The 20-metre band is expected to give good results till well after 22:00. To communicate with stations in Australasia you will have to be an early riser. Conditions are like to peak at our local sunrise on 15 metres Locally, 40 metres will provide good communication over medium distances while 20 metres is the frequency of choice between Cape Town and Johannesburg during the daytime. 80 metres remains the frequency of choice after sunset. For the CW and digital enthusiasts, 30 m may be very rewarding with openings to many parts of the world. Please visit www.spaceweather.co.za for further information. DIARY OF EVENTS 11 April - ARISSat-1 satellite celebrates 50th anniversary of Yuri Gagarin's first manned space flight. 15-16 April - SARL National Convention at Vaal University for Technology. 7 May - RTD in Cape Town. 18 June - Programming in Windows course in Gauteng. Book at www.sarl.org.za. SARL News invites clubs and individuals to submit news items of interest to radio amateurs and shortwave listeners. Submit news items - if possible - in both English and Afrikaans to

www.sarl.org.za/newsinbox.asp, not later than the Thursday preceding the bulletin date. The SARL also invites you to listen to Amateur Radio Today every Sunday morning at 10:00 CAT on 145,750 MHz in the Pretoria area, with relays on 7 082, 7 205 and 17 750 kHz. There is also a podcast by ZS6RO. For a web-stream and Echolink by ZS6FCS, visit www.sarl.org.za, click on 'ARMI' and follow the links. A repeat transmission can be heard on Mondays at 18:30 CAT on 3 230 kHz. Sentech sponsors the ARMI transmissions on the non-amateur frequencies. You have listened to a bulletin of the South African Radio League, compiled by Hester van der Walt. Thank you for listening, 73.

Radio News Bulletin
Sunday 10th April 2011

IRTS Awards Presented at IRTS AGM 2011

A full listing of award winners at the recent IRTS AGM held in Limerick and their prizes can be obtained by logging onto www.irts.ie

---

Up-Coming IRTS Contests

1. 2m Counties Contest Monday April 25th 2011. From 2pm till 4pm. Log to be submitted by May 25th.

2. CW Field Day Sat 4th/ Sun 5th June 2011. Log to be submitted by June 5th.

Calling all active VHF and Higher operators we are trying to get the 2010 Squares table finalized on IRTS.ie on the right hand side. So can anyone that was active on the VHF bands last year please send you Square totals or your log and I can work it out for you to EI2GLB /at/ hotmail / dot/.com . To see the squares table go to www.irts.ie and click on vhf/uhf/shf on the right side of the home page.

North Cork Radio Club

North Cork Radio Group will be active from the 29th of April through 2nd of May and during International Marconi Day.

The call used will be EI-0-IMD from the Mizen head Signal Station, Goleen in West Cork and the duration will be 24hours. NCRG will also use EI1NC/P for the remainder of the weekend until May 2nd. Members attending are Anthony EI3GAB, Pat EI2GHB, Padraig EI5GEB and Claus EI7JZ although other members may operate in short burst while visiting the station.

North Cork would also like to advise of another premium upcoming event for CASHOTA / WAI hunters. EI1NC/P this time will activate Blarney Castle, Co Cork on June 4th 5th & 6th. The event is being run in conjunction with Cashota Ireland and the awards designator will be EI010/C. further details on the CASHOTA Awards program can be obtained via http://cashota-ireland.org. further upcoming events will be advised

through IRTS News service and at the Groups Home page www.ei1nc.com

---

International Marconi Day

International Marconi Day takes place this year on Saturday 30th April. The Howth Martello Radio Group will be participating once again as an award station using the call-sign EI0MAR.

This is not a contest but there are several nice awards available for working the officially listed stations, each of which has an historic connection with Marconi. The event is organised by the Cornish Amateur Radio Club. For more information please visit the club's website http://crac.g4usb.net/cracblog/

EI0MAR operates from the Martello Tower overlooking the East Pier in Howth. The tower now houses a vintage radio museum. In 1905 the British Post Office carried out wireless telegraphy experiments at the tower in Howth using Marconi equipment.

Visitors are always welcome at the museum and the group hopes to see many visitors during the IMG event in April. The HMRG's website is www.ei0mar.org where a free information booklet in PDF format can be downloaded.

South East Amateur Radio Group

The South Eastern Amateur Radio Group and the Lough Erne Amateur Radio Club will ensure that Ireland again has its say in the 2011 International Geopark Communication weekend on 28 & 29 May, with special stations, likely EI2GEO again, at the Copper Coast Geopark and, likely GB2MAC again, at the Marble Arch Caves International Geopark in Fermanagh which straddles the border into Cavan.

Louth Erne Amateur Radio Club Annual Rally

The Louth Erne Annual Rally takes place on April 17th.

Venue is the Share Centre, Lisnaskea Co. Fermanagh BT920EQ

Doors open 11:30 a.m. Contact: Iain 028/048 66326693. EMail: iain /at/ learc.eu See www.loughernerадioclub.co.uk

Bring and Buy, Food, on-site parking Access from Erne/Shannon Waterway

---

Lough Erne Rally Raffle Prize

Nevada, the major amateur radio retailer has donated an Alinco DJ 596 E.

It will be raffled at the Pearl Anniversary Lough Erne Rally next Sunday 17 April.

This neat handheld VHF and UHF transceiver has an output of 5 watts.

Other features include a theft alarm and mosquito repel feature

For more on Nevada go to www.nevadaradio.co.uk

With much improved roads, travel north to this Rally is much improved.

The Lough Erne party drove to the March Limerick rally in three hours.

In February their journey to Dublin's Phoenix rally took 2 hours.

South Dublin Radio Club

This Tuesday 12th of April Tom EI7HT will be demonstrating Antenna Analysers and how they can be used help test and build VHF aerials.

On Tuesday 19th April Mike EI3DY will give a presentation to South Dublin Radio Club on the newer digital modes like JT65 that enable worldwide communications with low power with modest antennas.

He will discuss the relevance of beacon and propagation reporter systems like WSPR pronounced "Whisper", PSK Reporter and others.

Dundalk Amateur Radio Society

The AGM of Dundalk Amateur Radio Society will be held at 8pm May 4th at 'Larkin House' 113, Castletown Road, Dundalk. All members are requested to attend. New members always welcome.

DX News

A group of German operators will be active from Togo during the period 15 - 28 April. They will be QRV on all bands 160 - 10m using the callsign 5V7CC. QSLs go via DL9MBI.

For the XYL chasers Anne OH2YL will be on the Island of St Barthelemy in the Caribbean from 15 - 27 April signing FJ/OH2YL. Operation will be on CW only. QSL via the home call or via Logbook of the World.

For those who need Central Kiribati an international team will be on from Kanton Island from 17 - 28 April with the callsign T31A. QSLs are via W2IJ or Logbook of the World.

The Italian DXpedition to Liberia still has a few days to run. For the prefix chasers this is a chance to get a rare one as the group are using the callsign 5M2TT instead of the usual EL prefix and are QRV on 80m through 6m. Another thing to mention is that the online log is updated immediately a QSO takes place. QSLs go via I2YSB.

Two Dutch operators will sign PJ2/PA7JWC and PJ2/PD7DB from the Island of Curacao from 15 - 22 April. This one counts for IOTA SA-099 and is one of the new DXCC entities in the Caribbean since last October.

Items for inclusion in next week's Radio News can be submitted via e-mail to "newsteam /at/ irts / dot / ie" for automatic forwarding to both the radio and printed news services. Urgent news items for the radio news maybe telephoned to the radio news editor, Aidan, EI7JC on 085 7100511.

Please note that items for the radio news should reach the editor no later than midday on Thursday in order to be guaranteed inclusion in the following Sunday's bulletin.

DX Bulletin No. 1006
BID: $OPDX.1006
April 11, 2011
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, NJ1Q, NA2M, KA3UNQ, NG3K & ADXO, KP4BJD, N4AA & QRZ DX, WP3GW, KH6BZF, N6PSE, W6SJ, WB6RSE, K8JP/V31JP, K8YSE, W8GEX (60m News), N0TG, 9A2JK, AT International, DL1MGB,, DL1SBF, DL7MAE & The DX News Letter, DxCoffee.com, DXItalia.it, DX-World.Net, F5NQL, F6AJA & Les Nouvelles DX, HA0HW, I1JQJ/IK1ADH & 425 DX News, IK7JWX, LU1FAM, OO4O, OZ6OM & 50 MHz DX News, Pete's-DX-Newsdesk, RSGB IOTA Web Site, VA3RJ & ICPO, VE2EBK, VE3VHB, VHF-DX-Portal (MMMonVHF) and VU2PTT for the following DX information.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 3rd-April, through Sunday, 10th-April there were 233 countries active. Countries available: 3A, 3B8, 3B9, 3D2, 3DA, 3V, 3W, 4J, 4L, 4O, 4S, 4W, 4X, 5B, 5H, 5N, 5R, 5T, 5W, 5X, 5Z, 6W, 6Y, 7P, 7Q, 7X, 8P, 8R, 9A, 9G, 9H, 9J, 9K, 9L, 9M2, 9M6, 9N, 9Q, 9U, 9V, 9Y, A2, A3, A4, A5, A6, A7, A9, AP, BV, BY, C3, C6, C9, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, CY0, D2, D4, D6, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, F, FG, FH, FK, FM, FO, FP, FR, FW, FY, G, GD, GI, GJ, GM, GU, GW, H2, H4, HA, HB, HB0, HC, HH, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J5, J6, J7, JA, JD/o, JT, JW, JX, JY, K, KG4, KH2, KH6, KH8, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ4, PJ7, PY, PZ, R1FJ, S2, S5, S7, SM, SP, ST, SU, SV, SV/a, SV5, SV9, T8, TA, TF, TG, TI, TJ, TK, TL, TR, TT, TU, TY, TZ, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V7, V8, VE, VK, VK0M, VP2E, VP2M, VP2V, VP5, VP6, VP8, VP9, VQ9, VR, VU, XE, XU, YA, YB, YI, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZD7, ZD8, ZD9, ZF, ZK2, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

160M WAZ AWARDED. Congratulations to NODXA's member Scottie, WK3N, (the man who never sleeps according to Martti, OH2BH) for receiving his 160

meter WAZ award. This award started in 1975 and less than 35 North American stations have achived this level. If you have never seen one, see WK3N's at: http://s622.photobucket.com/albums/tt306/zebrahauler/?action=view&current=100_0543.jpg

3D2/C, CONWAY REEF (Update/Possible Change!). From the Hrane's, YT1AD, Conway Reef Web page, it reports (edited): "After the cancelation of the T31 DXpedition by YT1AD and K3LP with friends, the team organized a DXpedition to the small beautiful Island of Conway Reef, a small Fiji Island in South Pacific area. This island is famous for DXCC as 3D2C. The whole team will arrive in Nadi, Fiji, on September 25th, 2011. Departure from port Suva, September 26th, 2011. Arriving at Conway Reef on September 27th, 2011, afternoon. Activity from Conway Reef will be between October 1-6th, 2011. Departure from Conway Reef to Suva will be October 7th. Arriving at Fiji on October 8th, in the afternoon. PLEASE NOTICE: Our team has a possibility to change trip from Conway Reef to Rotuma Island according to many requests by the amateur radio operators of the World. Team already has the callsign 3D2R and is now working for landing permit. More information coming later." LAST MINUTE UPDATE: Before going to print on Sunday, Hrane, YT1AD, has announced that his group will defer their September-October operation to Conway Reef until 2012. It sound as if they are going to join the "Pacific DXers" at Rotuma because they have all the approvals and are planning an operation in October-November (See 3D2/R).

3D2/R, ROTUMA. Eddie, 3D2A/VK4AN, member of the Pacific DXer's, announced: "A team of 'PACIFIC DXERS', have 'ALL PERMITS' in place and are planning to sail for Rotuma early October 2011 and operate for 3 weeks (October 15th to November 15th). The team so far consists of: Eddie/3D2A/VK4AN, Rocky/3D2DD, Bill 3D2(?)/VK4FW...others are pending. We already have 24-hr power and accommodation arranged. Most of the 3D2A equipment is in Fiji already. We are seeking expressions of interest from experienced CW/SSB/Digital mode operators and possibly a 6m enthusiast. A 6m beacon will be established on 50.095 MHz. Rigs so far include K3, Flex5000A, Emtron DX1b amp, FT-900, Spiderbeam, wire antennas, DX88 vertical. This will be the anniversary of the FIRST operation from Rotuma by Eddie/ 3D2A/VK4AN...original license was 3D2XX/rotuma in 1988. The callsign has not been issued yet, but we expect to be issued with either 3D2P or 3D20R... The alternative will be 3D2A/R(otuma)."

5B, CYPRUS. Zoli, HA5PP, will once again be active as 5B/HA5PP during the CQWW WPX CW Contest (May 28-29th) as a Single-Op/Single-Band (??) entry. QSL via HA5PP.

5W, SAMOA. Before heading to Kanton Island (OC-043), a few of the T31A team will be active from Apia until April 13th. Look for Jay/W2IJ, John/ N7CQQ, Phil/W9IXX and Carlos/EA1IR to be active as 5W0JK, 5W0QQ, 5W0X and 5W0IR, respectively. Most of the activity has been on 20/17/15/12 meters using CW and SSB. QSL via operators' home callsign. The T31A team will leave Apia on April 13th, and sail to Kanton Island for approximately four days. See T31 below for more details. LAST MINUTE UPDATED: "April 7th - Some team members are in Apia now and have cleared all 11 pallets of

equipment through customs without problems. N7CQQ and W2IJ have been on the air as 5W0QQ and 5W0JK and are testing propagation patterns. The other team members will arrive over next few days, and plans are still to leave Apia on April 15th."

8P, BARBADOS. Yuri, VE3DZ, will once again be active as 8P9AA between now and May 1st. Activity will be on all HF bands using CW, SSB and RTTY. QSL via his home callsign. PLEASE NOTE: QSL cards for Feb-Apr 2011 operations will be answered in early May 2011.

8P, BARBADOS. Fred, PY2XB, will be active as 8P9XB from St. Philip, Barbados (NA-021) between May 8-21st. Activity will be on 80-6 meters using CW, SSB and RTTY. He will have a 6m beacon on at 50.099 MHz (Grid Locator GK03gc). QSL via PT7WA.

9A, CROATIA. Look for special event station 9A11P (Nine Alpha ONE ONE Papa) to be active through the end of the year to celebrate the city of Djurdjevac. A special QSL will be issued and all of the QSOs will be confirmed automatically via the bureau and LoTW.

9N, NEPAL (Reminder). Operators Dov/4Z4DX/9N7DX and XYL Anat/9N7YL will be active between April 13-30th. Activity will be mainly 20/15/10/6 meters using mostly CW, RTTY and PSK31. QSL via 4Z4DX. Dov has activated a new Web page for this operation at: http://www.9n7dx.com

A2, BOTSWANA (Reminder/Update). Look for operators Steffi/ON3AEO, Filip/ ON4AEO (Team leader), Jose/ON4CJK, Kath/ON7BK Lucas/ZS6ACT, Adele/ZR6APT, Sid/ZS6AYC, Gert/ZS6GC and possibly others to be active as A25FC from a QTH east of Seika (Grid Loc. KG37XA) between April 14-18th. Activity will be on 80-10 meters using CW, SSB, PSK and RTTY. QSL via ON4CJK, direct or by the Bureau. For more details and updates, go to the Web page at: http://www.filipstattooshop.be/botswana

AH0, MARIANA ISLANDS. Kan, JJ2RCJ/AB2RF, will be active as AH0/AB2RF from the Saipan Rental Shack on Northern Mariana Island (OC-086) between May 1-5th. Activity will be focused on RTTY and PSK. QSL via JJ2RCJ. For more details about the Saipan Rental Shack, see the following Web page at: http://saipan.rental-shack.com/english/index.html

C2, NAURU (Update). The Pacific-DXer's Web page is reporting that the "Callsign should be issued soon (they are requesting C21A), and permission to also use 60m. Expressions of interest have been received from a number of experienced DXers to join us. Operations are now led by Bill, VK4FW, with liaison support by Eddie VK4AN. A Polish group will operate here in Jan-Feb 2012."

CY0, SABLE ISLAND (Wrap-up Report). Randy, N0TG, informs OPDX that they are busy working on the QSL design and it will be a few weeks yet before their CY0 QSL cards are printed. Meanwhile, Randy provides the DXpedition's QSO totals: 24117/QSOs, 19867/CW, 3547/SSB and 703/RTTY. Breakdown by bands is as follows: Band CW SSB Total
----- ---- ---- -----
160m 1826 -- 1986

80m 1519 54 1673
40m 2619 450 3069
30m 2659 -- 2659
20m 3871 1488 5359
17m 3394 539 3933
15m 1838 680 2518
12m 1598 247 1845
10m 543 89 632
Randy mentions that only 550 JA stations were worked prior to the earthquake. After that, only 15 more..... He thanks all for the support.

DX-CODE OF CONDUCT (Reminder/Update). The "DX-Code of Conduct" are some very important guidelines on how to best use your station, as well as providing good operating skills to make it into the DX log in away that is both efficient and follows the ethical standards of operating on the amateur bands. So please visit and become a supporter of the "DX-Code of Conduct" Web page at: http://dx-code.org
Also, there is a new publication available on the Web site titled "THE NEW DXER'S HANDBOOK" by K7AU at: http://dx-code.org/newdxer.pdf
Randy, W6SJ, states, "I think you will find it enjoyable, even if you are a pro. Tell your club about it and make sure that new members get a copy. After all, it's an e-book and it's free."

FJ, SAINT BARTHELEMY (Reminder). YL operator Anne, OH2YL, will be active as FJ/OH2YL from Saint Barthelemy (NA-146) between April 15-27th. Activity will be on all HF bands, 160-10 meters and using CW only (on a lower edge of all bands). QSL via OH2YL or LoTW. More details are available at: http://www.fjoh2yl.com

HK0, MALPELO ISLAND. Members of the DXColombia Amateur Radio Club (DXARC, HK1NA) have announced that the next DXpedition to Malpelo Island will be in 2012, using the callsign HK0NA. All efforts/organization has been made ??by the Colombian group Team Leader Jorge Prieto, HK1R. The international team will consist of 8 Colombians and 4 foreigners. Operators mentioned currently are Jorge/HK1R, Jahm/HK1T and Pedro/HK1X. Activity will be on all bands and modes (allowed by Colombian laws). More details are forth-coming. A Web page is under construction and is available at: http://hk0na.wordpress.com

IOTA NEWS.....
AS-101. Operators Tony/E21IZC, Tana/E27EK, Capitan/HS7UCQ and Wut/HS8JYX from the Samutsakorn Amateur Radio Club will be active as HS7AT/p from Samui Island during the RSGB IOTA Contest (July 30-31st). QSL via direct to HS7AT.

EU-062. Operators Mek/SP7VC and Waldi/SP7IDX will be active as LA/SP7VC and LA/SP7IDX, respectively, from Vega Island between June 23rd and August 2nd. Activity will be holiday style (they plan to do some fishing). They plan to have 2 stations on the air: One for the HF bands and the other for the 50 MHz (Grid Square JP65BQ). Operations will be 80-6 meters using SSB and RTTY. They will also be in the RSG IOTA Contest. Equipment will consist of:

IC-746, TS-2000X, HEX beam, R-7 vertical, 6 element yagi for 6m, 500w amp for HF and 6m. QSL via their home callsigns, by the Bureau, direct and also LoTW.

EU-136. Operators Pista/HA5AUC, Ed/HA5BWW and Karl/HA7PC will be active as 9A/homecall from Rab Island (JN74JR), Croatia, between April 11-18th. Their radios are IC-756PRO and IC-765, and the antennas are wire verticals on fishing poles. The operation will take place on 80-6 meters, mostly CW, but some SSB as well. QSL via the HA Bureau.

EU-172. Noel, OO4O, will be active as OZ/OO4O from Fyn Island (DIA FY-001, WLOTA 2690) between May 1-6th. Activity will be on the HF bands using mostly SSB. QSL via ON Bureau and via the LoTW.

EU-172. Ric, DL2VFR, will be active as OZ0FR/p from Aero Island (DIA FY-014, WLOTA 2676) between August 6-19th. Activity will be mostly CW, with some SSB. QSL via his home callsign, by the Bureau or direct. For more details and updates, see the Web page at: http://www.iota-expedition.com/aero11/aero11.html

NA-128. Members of the NA-128 Contest Group will be active this year as XM2I (Multi/Single) from Isle-aux-Grues (CISA QC-038, Grid FN47, ARLHS CAN 1390), Quebec, Canada, between July 29-31st, for the 2011 RSGB IOTA Contest (July 30-31st). Activity will be on all bands, 80-6 meters, using CW, SSB, RTTY and PSK31. QSL via VE2CQ. A possible short operation may also take place from Isle-aux-Oies (CISA QC-038, a private island) and ARLHS CAN 973 after the contest. For more details and updates, visit: http://www.qsl.net/na128cg

NA-221. (Update) Operators Ismael/XE1AY, Gustavo/XE1KKK, Francisco/XE1P, Ricardo/XE1RZL, Raymundo/XE1SOV, Fernando/XE1VGC, Jose/XE1UYU, Martin/XE1UZH, Modesto/XE1UZU, Juan/XE2IA, Jose/XE2IVG and Ricardo/XE3NMC will be active as XF2P on from Lobos Island (ARLHS MEX-35), Veracruz, between April 29th and May 1st. Activity will be on the HF bands and 6 meters, using CW, SSB and RTTY, and also the satellites (AO27, AO51 and SO50). QSL via XE1AY. A Web page is now available at: http://xf2p.puebladx.org/XF2P/Bienvenida.html

SA-095. (Update) Operators Cezar/VE3LYC and Dino/CE3PG have embarked on a project to activate Pupuya Islands as CE4A for four days during the second half of November. The operation will take place under the auspices of the Radio Club de Chile. Given the difficulties associated with operating from Pupuya Islands, various contingencies will be considered, including radio equipment, power, transportation, landing, and camping. A Web site will be designed in due course where updates will be posted. QSL via CE3AA.

KH6BZF PROPAGATION FORECAST/REPORT (April 11-17th)....
Apr 11 AN SOLAR REFERENCE KEYS
Apr 12 AN --------------------
Apr 13 AN BN - Below Normal
Apr 14 AN AN - Above Normal/Geomagnetic Level is QUIET
Apr 15 AN LN - Low Normal
Apr 16 AN HN - High Normal/Geomagnetic Level is UNSETTLED
Apr 17 AN DIS - Disturbed
VDIS - Very Disturbed

GEOMAGNETIC REFERENCE

QUIET - The "A" index is expected to be between
0-7 and the "K" index will be 2 or less
UNSETTLED - The "A" index is expected to be between
7-16 and "K" index will be 3 or less

KP4, PUERTO RICO (Special Event). Once again members of the Radio Operadores Del Este (RODE) Club will be active as part of the activities from the Jesus. T. Pinero house museum on April 17th, in Canovanas, Puerto Rico. They will be active on the HF bands using CW, Digital modes and possibly on SSB, plus AM operation with vintage radio equipment. Jesus was the first Puertorican Govenor and held the callsign 4KT.
QSL via KP3RE.

OL950, CZECH REPUBLIC (Special Event). Members of the Radio Club OK1KWN will activate special event station OL950CHEB between May 1-31st. Activity is to celebrate "the first documented, written information about the town Cheb" and its 950th anniversary. For more information about the city of Cheb, go to: http://www.mestocheb.eu
http://en.wikipedia.org/wiki/Cheb
QSL via OK1MO, by the Bureau or direct(w/SASE). Use e-QSL for only Digital operations. QSL is valid for Castles Awards: OK-00302, KA-034, HR 0005.

P4, ARUBA. Dee, W1HEO, will continue to be active as P4/W1HEO from Aruba (SA-036) until April 16th. Activity will be from the P49V contest station and will be on 160-10 meters using CW and SSB, with emphasis on the higher HF and 30/17/12 meter bands. Operations will be on the IOTA frequencies:
CW - 10115, 14040, 18098, 21040, 24920 and 28040 kHz
SSB - 14260, 18128, 21260, 24950 and 28460 kHz
Although this is a semi-holiday outing, major effort will be devoted to maximizing operating time. A special color photo QSL will be available. QSL direct only to the W1HEO (QRZ.com address) or by the Bureau.

PACIFIC TOUR. Masahiko, JH4VUC, plans to activate the following islands during the last few weeks in the month of April. Activity from all islands will be on 40/15/10/6 meters using 500 watts and SSB. QSL via his home callsign. His tentative schedule is:
April 17-19th - Saipan, Mariana Islands; callsign AH0CD
April 20-22nd - Guam; callsign AH0CD/KH2
April 23-25th - Palau; callsign T88VU

PJ2, CURACAO (Reminder). Operators Jan-Willem/PA7JWC and Monique/PD7DB will be active as PJ2/homecall from Curacao (SA-099, WLOTA LH-0942) between April 15-22nd. Activity will be on 80-10 meters using CW, SSB, RTTY and PSK. QSL PJ2/PA7JWC via PA7JWC or LoTW. QSL via PJ2/PD7DB via PD7DB. For updates, visit Jan-Willem Web page at: http://www.pa7jwc.nl

NEW QSL ROUTE FOR V31JP AND NO LONGER THE QSL MANAGER. Lon Miller, KA9WON, reports that he is no longer the QSL Manager for V31JP. He states, "PLEASE PASS THIS INFORMATION AROUND SO OTHER HAMS DO NOT WASTE TIME, POSTAGE & MONEY SENDING QSLs TO ME AS I WILL ONLY BE SENDING EVERYTHING BACK TO THEM." QRZ.com is now reporting to QSL either LoTW or direct to: Joseph Pontek Sr., P.O. Box 280, Dangriga, Stann Creek District, Belize.

Fred, IK7JWX, reports that all his logs for the recent IK7JWX, IO7DAI and IR7ITA are available at: http://www.enzolog.org/login.php

LT1F QSL MANAGER. Luc, LU1FAM, operator at LT1F, has confirmed that the LT1F QSL Manager is AC7DX and NOT EA5KB.

ZL8X QSL STATUS. Christian, DL1MGB, reports on April 4th: "Nearly 4,000 letters are out now. All direct OQRS requests until end of February were sent. Mario will continue now with the direct mail he received. IMPORTANT: Please don't send any E-mails concerning 'Did you receive my QSL card?' 'When will I get my card?' We will not answer to those E-mails. It is just waste of time for you and for us. Please be patient until we send out ALL QSL cards. We keep informing you about the status of the QSL shipment. Thanks for your patience!"

QSL RECEIVED VIA LoTW: 4U1ITU, A45XR, EE3A, EU7SA, FJ/VE3EY, KH2/N2NL, KP2DX, OX3XR, PJ2/WI9WI, PZ5P, TO3A, V31JP, VE3JM, VE7/F5IDM, VK9NN, VQ5D and XV2W

QSLS RECEIVED VIA MAIL: 3B8/EA3BT, 3C0C, 5R8X, AA1AC/VP9, AP2NK, C5YK, EW8O, FM5AA, HL5FUA, IV3RAV, JT1CO, JW/DJ3KR, KH2/N2NL, KH2L, OJ0B, PJ4A, PX8J, PZ1DV, S9DX, T30XG, T30YA, TT8DX, V44/AA1M, VK0KEV, XF1HUQ, YW5LF, Z35T and ZL8X

QSLS RECEIVED VIA THE BUREAU: CO8OTA, TI7XX and XR7W

SILENT KEY. Mitch, Wolfson, DJ0QN, reports that "the DARC has learned of the death of the Chairman of the DX and HF Contesting Committee of the DARC, Dr. Lothar Wilke, DL3TD, who was 58 years old. OM Lothar died in a house fire during the night of Thursday, April 7, 2011. His wife Christiane and some neighbors have been hospitalized for smoke inhalation. The cause of the fire and further details are not yet available from the authorities.
OM Lothar was instrumental in integrating the RSV (German Democratic Republic) with the DARC (Federal Republic of Germany) following the German reunification. An experienced contester, Lothar has been responsible for the success of DA0HQ, as well as many other activities.
With Lothar, the DARC has lost not only a key member of the DX and HF Contesting Committee, but a fine person and radio amateur. Our thoughts and condolences go out to his wife Christiane and family from the DARC Executive Committee and all members."

SV/A, MOUNT ATHOS. Rick, NE8Z, has obtained a pilgrim visa for Mount Athos and plans to visit Monk Apollo, SV2ASP/A, between April 9-16th. Rick is calling his trip the "Monk Apollo Project". He wants to donate some equipment which will help Monk Apollo improve his portable operations in Mount Athos with the intention to produce better signals in Asia which is partially blocked by a mountain behind his Monastery. One of Rick's goals is to provide what Monk Apollo needs for CW capability through the use of a MFJ646 code reader and other software. He will train Monk Apollo on CW pile up handling techniques. It is not known if Rick is allowed to become active himself. The Southeast Michigan DX Association has adopted the project of helping Monk Apollo to improve his permanent and portable stations. Details on the project and a PayPal link for donations can be found at: http://live.semdxa.org/ (click the "Monk Apollo Project" button).

T31, CENTRAL KIRIBATI (Update). An international team will activate T31A from Kanton Island (OC-043) next weekend between April 17-28th. The team is currently in Apia, Samoa (see 5W above). They plan to have 6 stations on the air, operating on 160-10 meters. The following operators have been mentioned: Carlos/EA1IR, Jim/K6ZH, Dave/N1EMC, Arnie/N6HC, Bud/N7CW, John/N7CQQ, Mike/N9NS, Paul/UX2HO, Jay/W2IJ, Charlie/W6KK, Phil/W9IXX and Hrane/YT1AD. The pilot stations will be Eduardo/EA3NY and San/K5YY. The suggested frequencies are:
CW - 1826, 3504, 7004, 10104, 14024, 18074, 21024, 24894 and 28024 kHz
SSB - 1843, 3798, 7084, 14195, 18145, 21295, 24945 and 28495 kHz
RTTY - 3582, 7043, 10140, 14080, 18100, 21080, 24920 and 28080 kHz
6m - 50099/CW and 50120/SSB
IOTA Frequencies to be used are:
CW - 3530, 7030, 10113, 14040, 18098, 21040, 24920 and 28040 kHz
SSB - 3765, 7055, 14260, 18128, 21260, 24950 and 28460 kHz

QSL via QSL Manager W2IJ, by the Bureau or direct to: Jay Kobelin, 10628 Grandview Drive, Rancho Cucamonga, CA 91701. Current plans are: "The team will leave Apia on April 13, 2011, and sail approximately 4 days. Upon arrival at Kanton, they will set up 2 sites and begin operation

of their 11-12 days of operations. They will depart Kanton and arrive back in Apia on May 2, 2011." The T31A Web page is now active and available at: http://www.T31A.com

T6, AFGHANISTAN (Press Release #2). Paul, N6PSE, Co-Leader of the T6PSE DXpedition, reports: "The Intrepid-DX Group continues to move forward with our plans to conduct a DXpedition from Afghanistan to take place during ten days in May of 2011. Due to security concerns, the exact dates and location of the DXpedition will not be announced until the eve of our activation. The team is closely monitoring the security situation and events in the news coming from Afghanistan. Unless conditions worsen in the comings weeks, our plans are a go!
Our primary objective is to activate Afghanistan with a goal of providing as many DXers as possible a 'new one' with this rare DXCC entity and, as a secondary objective, to give as many band-slots as possible. We will focus on North and South America during those periods when propagation is possible to those areas. We anticipate that we will be working EU amateur stations nearly around the clock, but we will ask for their cooperation to allow us to work North and South America during those brief periods each day when propagation will permit us to work those far away regions.
The team consists of eight operators including: Co-Leader Paul Ewing/ N6PSE, Co-Leader David Collingham/K3LP, Hrane Milosevic/YT1AD, Krassy Petkov/K1LZ, Al Hernandez/K3VN, David Flack/AH6HY, Alex Pavlenko/UX0LL and David Ritchie/W6DR.
You can find out more about our plans at:
http://www.intrepid-dx.com/t6pse/index.php
Thank you, Paul S. Ewing/N6PSE, Co-Leader T6PSE DXpedition"

TJ9PF VIDEO AVAILABLE ONLINE. A video on the 2011 TJ9PF DXpedition to Kribi, Cameroon, by the KOP team (DXers from F6KOP Radio Club in Provins, France), is now available online at:
http://www.dailymotion.com/video/xhrbr6_tj9pf-daily_travel
The video runs just under 20 minutes.

TM26, FRANCE (Special Event). Members of the French CW Society, the Union Francaise des Telegraphistes (UFT), will activate special event station TM26UFT (for their 26th annual meeting) on the air between April 10-24th. Activity will be on the HF bands and on CW only. All the QSOs will be confirmed by the Bureau and the log will be uploaded on the LoTW. SWL QSL cards should go also via the French Bureau. After the operation and before QSLing, each operator will be able to check their QSO in the log on the UFT Web site at: http://www.uft.net
Those who would like to have a direct QSL card should not QSL before July, to Gerard, F6ICG, (address correct on QRZ.com). Don't forget to send a SAE and 1 valid IRC or sufficient money for return postage (not less than 2 USDs).

TT8, CHAD. Phil, F4EGS, will once again be active as TT8PK from N'djamena, Chad, between April 15th and June 15th. Activity will be limited due to his work schedule and spare time. Operations last time was on 40-10 meters

using CW, SSB and some RTTY. QSL via F4EGS, by the Bureau or direct (see QRZ.com for details).

V2, ANTIGUA. Darrell, AB2E, will once again be active as V26E from Antigua (NA-100) tentatively between May 24-31st. Activity will include the CQWW WPX CW Contest (May 28-29th) as Single-Op entry. All operations before and after the contests will be either on the 30/17/12 meter bands or the lower bands. QSL direct via AB2E for any and all operations from 1993 to present. Be sure to include an SASE, green stamp, or new IRC, or you won't get a card. Sorry, no Bureau cards at this time, and no eQSL. As of February 28, 2011, all logs from all V26E operations (including 2010) have been uploaded to LoTW as well.

V4, ST. KITTS AND NEVIS. John, W5JON, will once again be operating as V47JA from his Calypso Bay, St. Kitts, W.I., hillside vacation home (CQZ 8, IOTA NA-104, Grid FK87pg) between July 12th and August 2nd. Activity will be on 80-6 meters using SSB. His activity will also include both the CQWW VHF Contest and RSGB IOTA (SSB) Contest. Equipment will be: Kenwood TS-590S, Yaesu FT-857D, KL-400 Amplifier (400 watts) and a 80-10m Multiband Dipole and S9 Vertical; 6m will be a 3 element yagi. His XYL Cathy, W5HAM, will occasionally operate as V47HAM. ALL QSLs go to his home callsign W5JON.

VK9, LORD HOWE ISLAND (Operators Needed). Members of the Hellenic Amateur Radio Association of Australia (HARAOA Group) are planning a major DX-pedition to Lord Howe Island (OC-004) as VK9HR for 10 days between July 8-17th. See OPDX.1002 for more details. The VK9HR team is looking for "any experienced CW, SSB or digital modes operators interested in attending the VK9HR Lord Howe Island Dxpedition." Please contact, if interested, the team leader Tommy, VK2IR at: vk2ir@vk2ir.com
For more details, visit the VK9HR Web Page at: http://www.vk9hr.com

VP8, FALKLAND ISLANDS. Iain, M0PCB, has been active as VP8DNA from the RAF Amateur Radio Club Station (VP8FIR/VP8RAF) located at the Mount Pleasant Airport on the Falkland Islands (SA-002). Activity will last until April 22nd. Operations have been very sporadic. QSL VP8DNA via M0PCB. Logs are now uploaded to LoTW.

VU4, ANDAMAN ISLANDS (Update/QRT). Members of the Amateur Radio Society of India (ARSI) active as VU4PB from Port Blair went QRT at 1829z on March 31st, and the various operators have headed home to get back to their normal lives. A large number of log check requests have been generated due to the pirate activities that unfortunately took place. In press release #8, it states: "We request all who sent in their requests to standby while we address the emails received over the next two weeks. Only after this is done will the final logs be sent over to our QSL Manager - Joe W3HNK for QSL responses. The breakup of QSOs by continent for the operation which logged around 33,000 contacts is given below: EU - 45%, AS - 30%, NA - 20% and Others - 5%."

W3, UNITED STATES (Lighthouse Op). Look for lighthouse special event station W3P to be operating from the annual "Waterfront Festival" at

the Piney Point Lighthouse (ARLHS USA-601), MD, on Saturday, May 14th,
between 1400-2000z. Activity will be on 40/20/17 meters using SSB and
PSK31. Please QSL via KA3UNQ with SASE or funds for return postage.

Highlights of Solar and Geomagnetic Activity
04 - 10 April 2011

Solar activity was low. Three C-class events were observed on 06 and
07 April from the East Limb. On 08 April, Region 1185 (N23, L=033,
class/area Cso/100 on 05 April) was redefined as two distinct
groups, the second of which was designated Region 1189 (N23, L=033,
class/area Dso/040 on 08 April). Six regions, numbered 1184 through
1189, populated the visible disk by the end of the period. Of those,
Region 1184 (N17, L=110, class/area Dso/170 on 04 April) was the
largest. The remaining regions were small B or C type groups with
simple Beta magnetic characteristics. While x-ray activity was low,
several CMEs were observed during the period. The first CME launched
at 02/2347 UTC from Region 1176 (S15, L=200, class/area Eko/490 on
23 March). Additional CMEs were observed on 04 April, including one
from the northeast limb at 04/0509 UTC associated with a long
duration B-class flare. Two more CMEs were observed on 07 April. The
first originated from an active filament channel on the southeast
limb and was observed in SOHO/LASCO C3 imagery at 07/0754 UTC. The
second, seen at 07/1042 UTC, was thought to originate from old
Region 1176 which had rotated around the west limb on 04 April.
Finally, a slow partial halo CME was observed in SOHO/LASCO C2
imagery at 09/0024UTC.

No proton events were observed at geosynchronous orbit.

The greater than 2 MeV electron flux at geosynchronous orbit was at
high levels from 04 - 06 April. Moderate levels were observed
throughout the rest of the period.

Geomagnetic field activity ranged from quiet to major storm levels.
The period began at unsettled to active levels in the midst of a
coronal hole high speed stream (CH HSS). The CME observed at 02/2347
UTC arrived at the ACE spacecraft at approximately 06/0854 UTC. A
sudden impulse of 24 nT was observed at Boulder at 06/0942 UTC.
Solar wind speeds at ACE jumped from 494 to 559 km/s, then climbed
```

to a peak of 591 km/s at 06/1700 UTC. The Interplanetary Magnetic Field (IMF Bt) initially rose from +07 to +14 nT following the shock and peaked at +17 nT at 06/1030 UTC. The IMF Bz turned southward following shock passage and remained mostly southward until approximately 06/2000 UTC. A maximum southward deflection of -11 nT was observed at 06/1213 UTC. The geomagnetic field was at quiet to unsettled levels in the days prior to the CME arrival (04 - 06 April). Activity increased to unsettled to major storm levels once the CME arrived. Active to minor storm levels were recorded at Boulder and minor to major storm levels detected at high latitudes. Activity decreased to mostly unsettled levels after 06/1800 UTC as Bt decreased and Bz became variable at +03 to -03 nT. Geomagnetic activity returned to quiet to unsettled levels for the remainder of the week.

Forecast of Solar and Geomagnetic Activity
13 April - 09 May 2011

Solar activity is expected to be at predominantly low levels for the entire period, with a slight chance for an M-class event when old Region 1176 returns on 17 April.

No proton events are expected at geosynchronous orbit.

The greater than 2 MeV electron flux at geosynchronous orbit is expected to begin the period at high levels following the increased windspeeds associated with the CH HSS. A return to normal to moderate levels is expected from 17 April until 01 May. High levels are expected to return from 02 - 05 May following a second CH HSS. Normal to moderate levels are expected for the remainder of the period.

Geomagnetic field activity is expected to be at predominantly quiet levels from 12 April until a CH HSS arrives on 17 April. Three days of unsettled to active conditions are anticipated, with a return to mostly quiet conditions on 20 April. Quiet to unsettled conditions with isolated active and minor storm periods are expected from 28 April - 01 May due to a second recurrent CH HSS becoming geoeffective. Quiet conditions are expected to return and persist until 07 May. Unsettled to active conditions with a chance for isolated minor storm periods are expected from 08 - 09 May as a third CH HSS rotates into a geoeffective position.

384. [DXNL] DXNL 1723 (Apr 13, 2011)

DXNL 1723 - Apr 13, 2011
DX Newsletter

a free and weekly service of
DARC Committee "DX and HF contesting"
(http://www.darcdxhf.de)

editor: Helmut Schlaffer, DL7MAE
(e-mail: dxnl@dxhf.darc.de)

translation by: Bob, DL7VOA
(e-mail: dl7voa@darc.de)

Lothar Wilke, DL3TD, Silent Key

With great sadness, the DARC e.V. has learned of the death of the Chairman of the DX and HF Contesting Committee of the DARC, Dr. Lothar Wilke, DL3TD, who was 58 years old. OM Lothar died in a house fire during the night of Thursday, April 7, 2011. His wife Christiane and some neighbors have been hospitalized for smoke inhalation. The cause of the fire and further details are not yet available from the authorities.
Following the German reunification OM Lothar was instrumental in integrating the RSV (German Democratic Republic) with the DARC (Federal Republic of Germany). An experienced contester, Lothar has been responsible for the success of DA0HQ, as well as many other activities.
With Lothar, the DARC has lost not only a key member of the DX and HF Contesting Committee, but a fine person and radio amateur. Our thoughts and condolences go out to his wife Christiane and family from the DARC Executive Committee and all members.

Other DXers who passed away last week are:
Gerard LeDrean,F6IJW, who was very active as FH8CL in the 1980s, and also Dianna R. Killeen,KB6NAN, who was a wellknown QSL manager. She passed away at the age of 62 on Apr 6. The QSL cards for all stations she managed should be sent to Russ,K6KLY, now.

A2 - BOTSWANA
Filip,ON4AEO, Steffi,ON3AEO, Jose,ON4CJK, Kath,ON7BK, Lucas,ZS6ACT, Adele,ZR6APT, Sid,ZS6AYC, and Gert,ZS6GC, will be on the air as A25FC from Apr 14-18. They want to be active in CW/SSB/RTTY/PSK on 160m-10m.
QSL via ON4CJK, via bureau or direct.
The website of Filip is: http://www.filipstattooshop.be/botswana

FH - MAYOTTE ISLAND, AF-027
Jose,PT9ZE, Ric,PY2PT, Anderson,PY2TNT, Alex,PY2WAS, and Fernando,PY4BZ

will show up from Mayotte (AF-027) signing TO2FH from Apr 18-25. They will work with three stations simultaneously in CW and SSB on 160m-10m. QSL cards are available only direct: For 7 US$ respectively 2 US$ for the less expensive cards. More details at: http://www.qrz.com/db/TO2FH

FJ - ST BARTHELEMY, NA-146
Anne,FJ/OH2YL, announced to be active from St Barthelemy (NA-146, DIFO FJ-001, WLOTA LH-0377) in CW on 10m-160m from Apr 15-27. Anne is using an Elecraft K2 transceiver, a Yaesu FT-897, a MAFET amplifier, an Inverted L antenna for 160m, verticals on 10m-30m, a G5RV and a Butternut HF2V for the other bands.
All QSL cards can be sent via bureau, direct or LoTW.
Bureau QSLs can be requested on: http://www.fjoh2yl.com

FS - ST MARTIN, NA-105
Pascal,FS/F5JSD, is active from St Martin (NA-105) since last tuesday until Apr 21. He is working in holiday style mainly in CW on 10m-40m. He also plans a side trip to the Dutch part of the island Sint Maarten and would should up as PJ7/F5JSD then.
QSL cards should be sent via bureau or LoTW to his homecall.

KH0 - NORTHERN MARIANAS / KH2 - GUAM / T8 - PALAU
Masahiko,JH4VUC, will be QRV as AH0CD from Saipan (OC-086) from Apr 17-19. His next stop will be Guam (OC-026) where he wants to become active as AH0CD/KH2 from Apr 20-22. Last not least he will show up from Palau (OC-009) signing T88VU from Apr 23-25.
He works with 500 watts in SSB on 40m/15m/10m/6m. QSL via homecall.

PJ2 - CURACAO, SA-099
Jan-Willem,PJ2/PA7JWC, and Monique,PJ2/PD7DB, plan to become active in CW, SSB, RTTY and PSK on 80-6m from Curacao (SA-099) from Apr 15-22. They have following equipment available: Yaesu FT879D, Fed-end for 20m, dipole for 40m, a FD-3 for 10m-40m and a vertical for 6m.
QSLs via bureau or direct to their homecalls. PJ2/PD7DB also via LoTW.
See also their website: http://www.pa7jwc.nl

T31 - CENTRAL KIRIBATI, OC-043
The upcoming DXpedition to Kanton Island (OC-043) from Apr 17-28 is very likely one of the highlights of this year. The callsign will be T31A and twelve operators will run six stations at the same time. Carlos,EA1IR, Jim,K6ZH, Dave,N1EMC, Arnie,N6HC, Bud,N7CW, John,N7CQQ, Mike,N9NS, Paul,UX2HO, Jay,W2IJ, Charlie,W6KK, Phil,W9IXX, and Hrane,YT1AD, will work in CW, SSB and RTTY on 160m-6m from two QTHs.
This frequency plan of T31A has been announced (in MHz) in advance:

Band	CW	SSB	RTTY
160m	1.826	1.843	---
80m	3.504	3.798	3.582
40m	7.004	7.084	7.043
30m	10.104	---	10.140
20m	14.024	14.195	14.080
17m	18.074	18.145	18.100

15m 21.024 21.295 21.080
12m 24.894 24.945 24.920
10m 28.024 28.495 28.080
6m 50.099 50.120 ---
You should check also the 60m band and following IOTA frequencies:
CW: 3530, 7030, 10113, 14040, 18098, 21040, 24920, 28040 kHz
SSB: 3765, 7055, 14260, 18128, 21260, 24950, 28460 kHz.
QSL cards should be sent via bureau or direct to W2IJ.
His address is: Jay Kobelin, 10628 Grandview Drive, Rancho Cucamonga,
CA 91701, USA.
More information can be found on their website: http://www.T31A.com

TT - CHAD
Phil,F4EGS, is on a business trip and will stay in the Chad from Apr 15
until Jun 15. Listen for TT8PK in CW/SSB/RTTY on 40m-10m.
QSL via bureau or direct to F4EGS.

XV - VIETNAM, AS-128
Sigi,DL8AKI, Udo,DL2AQI, Ingolf,DL4JS, And Rich,DK8YY, are going to
become active as XV4YY from Phu Quoc (AS-128) from Apr 18-30. They
will work in all modes on all bands with two stations plus amplifier.
Special emphasis will be put on the lowbands if local conditions permit
the right antennas. QSLs via bureau or direct to DH7WW.

5V - TOGO
Starting in the mid of April the callsign of Rudi,DL5MEV, Armin,DL5MGH,
Werner,DL9MBI, and Christian,DL3MBG, will be 5V7CC until Apr 28. They
will work in CW, SSB, RTTY and via EME on 160m-10m.
QSL via DL9MBI, Werner prefers to send and receive QSLs via bureau.
They also plan to publish an online log at: http://www.clublog.org

9N - NEPAL
Dov,4Z4DX/9N7DX, and his XYL Anat,9N7YL, are working in CW, RTTY and
PSK31 mainly on 20m/15m/10m/6m from Apr 13-30. Dov uses this stay to
organize a larger DXpedition not only to celebrate his 60th birthday
in November but also the 45th anniversary of his first licence.
QSL via 4Z4DX. See also: http://www.9n7dx.com

CROATIA, SPECIAL EVENT STATION
9A11P is working in all modes on all bands throughout the year to
celebrate the jubilee of the city of Djurdjevac. All QSOs will be
confirmed via bureau automatically.

ENGLAND, SPECIAL EVENT STATION
The "International Short Wave League" (ISWL) is celebrating its
65th anniversary. GB65ISWL will be active in SSB and PSK on the
upcoming weekend of Apr 15-17.
QSL via G6XOU, preferably via eQSL but also via bureau.

FRANCE, SPECIAL EVENT STATION
TM26UFT is working in CW on all bands from the 26th annual meeting of
the "Union Francaise des Telegraphistes" (http://www.uft.net) from

Apr 10-24. All QSOs will be confirmed via bureau or LoTW automatically.
Direct QSL cards should be addressed to F6ICG.

MEXICO, SPECIAL EVENT STATION
The members of the Mexican Contest and DX Group (DXXE) are going to
activate the special event station 4A0IARU from Apr 18-24. They are
not only pointing to the "World Amateur Radio Day" on Apr 18 but also
to the founding of the IARU 86 years ago. The QSOs are also good for
the DXXE Award (see: http://www.dxxe.org).
QSLs via bureau or direct to N7RO.

WFF OPERATION
Some members of the "Algarve STAR DX Team" will be active as CR6A from
the natural park "Submerged Fortress" (CTFF-07) on Apr 17. Jose,CT1EHX,
Arlindo,CT1EGW, Antonio,CT1GFK, Goncalo,CT1GPQ, and Miguel,CT1IUA, will
work in SSB and CW on 40m-10m only when the weather is fine! More info
about CR6A and about their award can be found on: http://algarvedx.com
QSL cards are managed by CT1GFK, direct or via bureau (e-mail requests
are also possible via ct1gfk@algarvedx.com).

LINKS: Current SOTA activities (mountain summits) are announced at:
http://www.sotawatch.org

Detailed information about current VHF activities can be found on the
VHF DX portal "Make More Miles on VHF" at: http://www.MMMonVHF.de

UPCOMING CONTESTS

Apr 16/17: CQ Manchester Mineira DX Contest (see: http://www.cwjf.com.br)
Apr 15/16: Holyland Contest
Apr 16: ES Open HF Championship
Apr 16: European Sprint Contest

IOTA collected by Fredy,DE0MST (e-mail: iota@dxhf.darc.de)

Island activities:
EU-042, D, Schleswig-Holstein NW Group: A group of German HAMs will be QRV
as DF0TM from Sylt (GIA/DID N-16) from Apr 15-18. QSL via DF0TM.
See also: http://www.df0tm.de

EU-136, 9A, Rab: 9A/HA5AUC, 9A/HA5BWW and 9A/HA7PC are working mostly in CW
but also in SSB on 80m-6m from Rab Island from Apr 11-18. Their equip-
ment includes an IC-756PRO, an IC-765, wire verticals and dipoles.
QSLs via homecalls (bureau/direct).

EU-138, SM, Senoren Island: Fred,SM7DAY/p, will be QRV in CW and SSB from
Senoren Island from Apr 16-23. QSL via homecall.

OC-171, VK4, QLD State (N. Coast) South Group: Craig,VK4LDX (VK8PDX), plans
to activate Magnetic Island as VK4LDX/p from Apr 17-20. He wants to
be active every day from 2100-0200 UTC and from 0600-1600 UTC.
QSL via homecall (bureau/direct).

(*) New QSL manager
(L) Logbook of the World (LoTW)
(r) E-mail request

QSL via IK2QPR: Paolo is the QSL manager of following stations:
EK3AA, EK3GM, EU6MM, EW6BN, EW6GB, EX2U, EX7MA, EX7MK, EX8QB, UA0FUA,
UA0YAY, UK8GH, UK8IZ, UK8OAH, UN1O, UN7FET, UN7FW, UN7JX, UN8FE, UN9PQ.
He still has open logs of his past activities as FO/IK2QPR, HR9/IK2QPR,
IU2ANT, IU2IPY, V25PR and VP5/IK2QPR.
Paolo confirms QSL cards either via bureau or direct.

QSLs arrived direct: ET3BN, T30YA (via W7YAQ), V25OP (W9OP)

DX MAGAZINE 2010 MOST WANTED

The DX Magazine published the results of their Most Wanted survey 2010.
These are the Top Ten worldwide:

Rank 2010 Prefix - Entity Rank 2009
---
1. P5 - Nordkorea 1.
2. KP1 - Navassa 2.
3. 3Y - Bouvet 4. (+1)
4. 7O - Jemen 5. (+1)
5. VK0/H - Heard Island 6. (+1)
6. FT5/Z - Amsterdam 9. (+3)
7. ZS8 - Marion Island 3. (-4)
8. VP8/S South Sandwich 10. (+2)
9. FT5/W - Crozet 7. (-2)
10. BS7 - Scarborough Reef 11. (+1)
More information can be found at: http://dxpub.com/dx_news.html

Many thanks for contributing to this issue of the DXNL are going to:
Carl Smith (QRZ DX), 425DXNews, OPDX Bulletin, DF6EX (WIN-QSL), DJ5AV,
DK8JB, DK8YY, DL1MDV, DL1SBF, DL3IE, DL7VOA, DM3VL, HA0HW, OH6LBW, F5NQL,
F6AJA & Les Nouvelles DX, NG3K, PY4WAS, 4Z4DX and others.

**********************************************
The ARRL Contest Update

Published by the American Radio Relay League
**********************************************

April 13, 2011

Editor: Ward Silver, N0AX <rate-sheet@arrl.org>

==> IN THIS ISSUE

- 1-1/4 Meters Worth of VHF Spring Sprint
- Aim North for MI, VE3, and SD QSO Parties
- Youth Programs at Contest University
- DL3TD Silent Key - DARC DX and Contest Leader
- Bell Labs Archive Online - Who's Calling?
- Fyrbotlz Web Museum
- ARRL Phone Sweepstakes and EME Results
- Hot Switching - Your Friend?
- AC6LA's Transmission Line Utilities
- Turn On, Tune Up, Tune In

NEW HF OPERATORS - THINGS TO DO

If you've been licensed for three years or less (or you know someone
like that) then give the ARRL's Rookie Roundup
<http://www.arrl.org/contests> a try on April 17th. It's a contest in
which the Rookies (that's you) are sought after by the experienced
stations instead of vice versa! This is the Phone version - there will
be an RTTY and a CW version later in the year! Try web-based logging at
In The Log <http://inthelog.com>. Stay tuned to the ARRL Rookie Roundup
page <http://www.arrl.org/rookie-roundup> for more information about
on-line logging and certificates.

BULLETINS

There are no bulletins in this issue.

BUSTED QSOS

Your editor managed to avoid bedaubing the previous issue with any
errors of confabulant scuttlebutt.

CONTEST SUMMARY

Complete information for all contests follows the Conversation section
```

April 16-17

- ARRL Rookie Roundup--Phone
- NAQCC Monthly QRP Sprint--CW (Apr 13)
- CWops Monthly Mini-CWT Test (Apr 13)
- Holyland DX Contest (Apr 15)
- TARA Skirmish Dig Pfx Contest
- Lighthouse Spring Lites QSO Party
- ES Open HF Championship
- All America Contest--CW
- EU Spring Sprints--Phone
- Feld-Hell QRP Sprint
- Michigan QSO Party
- EA QRP Contest--CW
- Ontario QSO Party
- YU DX Contest--CW

April 23-24

- VHF Spring Sprints - 222 MHz (Apr 19)
- Ten-Ten Spring Digital Contest
- SP DX RTTY Contest
- Helvetia Contest
- QRP To The Field--CW
- South Dakota QSO Party

==> NEWS, PRESS RELEASES, AND GENERAL INTEREST

Tim K3LR wants to be sure everyone knows that Contest University <http://contestuniversity.com/> includes a new Youth CTU ("YCTU") track this year as part of the Dayton 2011 CTU experience. YCTU is specifically aimed at Amateur Radio operators that have an interest in contesting and who are 25 years old and younger. YCTU is led by Scott, W3TX - there is a separate classroom for all-day YCTU activities. If you are attending CTU, you are encouraged to consider bringing a young licensed Amateur Radio operator with you to CTU, family or friends. Full scholarships have been sponsored for YCTU attendees, so there are no YCTU fees for those (under 25 years old) who preregister (from the CTU website). Please consider bringing someone "young" to YCTU and submit their scholarship request ASAP. CTU 2011 will be held outside the US, too - June 25 in Germany; July 16/17 in Brazil; and Oct 8 in England. CTU also has its own Facebook <http://www.facebook.com/ContestUniversity> page and Tim wants to be sure we all know the Contest Super Suite <http://contestsupersuite.com/> will be active all four nights, as well as the 19th Annual Contest Dinner <http://contestdinner.com/> on Saturday.

Considering the success of the weekly NS Ladder series of sprint contests, here's another "low-impact" contest that could spark some ideas to attract new contesters on VHF. The Oregon Tualatin Valley ARC (OTVARC) sponsors a "Fifth Wednesday <http://www.otvarc.org/FifthWednesday.htm>" simplex contest on 147.54

MHz for an hour from 8-9 PM. (Thanks, Don W7WLL)

Being a complete science geek, your editor enjoys reading books about various math topics and my recent word wanderings took me to three very enjoyable titles:
Hidden Harmonies: The Lives and Times of the Pythagorean Theorem by Robert and Ellen Kaplan
Here's Looking at Euclid by Alex Bellos
Figuring It Out - Nuno Crato
The latter two tackle topics of various sorts from geometry to the interesting behavior of numbers without getting too deeply tangled in minutia or jargon. The first takes a more focused look at what is probably the most famous theorem in mathematics and possibly the oldest. Leavened with lively bits of writing, the book covers the history of the theorem and the many highways and byways that intersect in its domain - some quite surprising. If you've a sweet tooth for math candy, these three will make good summer reading.

My favorite ham radio celebration - WARD - the International Amateur Radio Union <http://www.iaru.org/> (IARU), and its member societies representing over 150 countries around the world, will celebrate World Amateur Radio Day <http://www.arrl.org/news/world-amateur-radio-day-set-for-monday-april-18> on April 18. The theme for this year's celebration is "Amateur Radio: The first technology-based social network." Make sure you get the word out - reminding readers that long before the Internet and smart phones, hams were talking, texting and sharing for decades without pre-established supporting infrastructure. Look for special events and call signs to be active <http://www.iaru-r2.org/world-amateur-radio-day/> with attractive QSLs and certificates <http://www.awards.pzk.org.pl/html/WARD.htm>.

Alex VE3NEA has released CW Skimmer <http://www.dxatlas.com/CwSkimmer>, version 1.7. This version is designed to work on Windows 7 in both 32-bit and 64-bit versions. The update is free for registered users and all others have a new 30-day trial period. (Thanks, Pete N4ZR)

More Dayton Hamvention <http://hamvention.com/> radiosport news from Shelby K4WW - "A History Of RTTY Contesting" by Mike K4GMH will run from 12-1 PM on Saturday, May 21, in Room 3. Beginning with the first contest in 1953, Mike's talk will help explain how and why many of today's contest rules came about. In addition, Mike will interject first-hand descriptions of what it was like participating in an early-1970's RTTY contest compared to today's RTTY contesting during the presentation.

In the "Friends Like These" category from ARRL Propagation Bulletin ARLP014 <http://arrl.org/w1aw-bulletins-archive-propagation>, Danny K7SS of Seattle notes that just before the recent improved propagation conditions his antenna blew down in a windstorm. Now some of his more superstitious ham friends are begging him not to put it back up.

A new version of Chuck NO5W's cool mobile contesting software CQ/X <http://www.no5w.com/> is now available. The most interesting feature creates a county line crossing file used for real-time updates of the distance and time to the next county. CQ/X allows you to draw your planned route on a Google Map and submit it to CQ/X for analysis. CQ/X then determines your county line crossings and in addition creates a "drive path" that is then used during real-time operation to calculate distances and times to the next county and to specified waypoints on the basis of planned driving route.

>From Eugene UA0CA, "I wish to inform all of pleasant news - Russia has joined CEPT. Now foreign hams who have a radio amateur license and come to Russia will be able to operate without notice, using their call sign with a slash adding the call area of Russia. For example, RA0/JA8BMK."

Mitch DJ0QN reports sad news - "The DARC e.V. has learned of the death of the Chairman of the DX and HF Contesting Committee of the DARC, Dr. Lothar Wilke, DL3TD, who was 58 years old. OM Lothar died in a house fire during the night of Thursday, April 7, 2011. His wife Christiane and some neighbors have been hospitalized for smoke inhalation. OM Lothar was instrumental in integrating the RSV (German Democratic Republic) with the DARC (Federal Republic of Germany) following the German reunification. An experienced contester, Lothar has been responsible for the success of DA0HQ, as well as many other activities. With Lothar, the DARC has lost not only a key member of the DX and HF Contesting Committee, but a fine person and radio amateur. Our thoughts and condolences go out to his wife Christiane and family from the DARC Executive Committee and all members."

Web Site of the Week - Bell Labs was the birthplace of many technologies and scientific discoveries that virtually define our understanding of the modern world and The Bell System Technical Journal (BSTJ) was the record of those achievements. Not only that, but it included reprints of other important papers and reports, too. That's why it's great news to see in the IEEE's Antennas and Propagation Magazine "AP-S Turnstile" column by Rajeev Bansal that the entire archives of the BSTJ <http://bstj.bell-labs.com/> were placed online by Alcatel-Lucent - from the technical community, thank you!

WORD TO THE WISE

Sale Time - As we move into the warmer months, don't forget to take advantage of spring sales on camping and fishing equipment that serve double duty in the ham shack! Tackle boxes, fishing line, tools, poles - the list goes on and on. Take advantage of the high-volume consumer market to score some deals - and then you can spend the savings on real radio stuff!

==> SIGHTS AND SOUNDS

While wireless may not be the first thing one thinks of when considering artistic subject matter, Art Weinerman finds plenty. Check out his Fyrbotlz <http://www.fyrbotlz.com/> website for some vintage

radio art, & other interesting old time stuff. (Thanks, Don K4ZA)

Dave NN1N forwarded a link to this compilation of great photos <http://triggerpit.com/2010/11/22/incredible-pics-nasa-astronaut-wheelock/> from the ISS including a picture of Juan de Nova (FR/J) with an erupting volcano. While you're online, register your QTH at Heavens Above <http://www.heavens-above.com/> so you can wave as the ISS goes by overhead!

This release by Radiosport Films (WW2DX and W2RE) is a fun take on their CQ WW mission <http://www.youtube.com/watch?v=x_zHBDeEf2Q&hd=1>! Fun and fast-paced with some great helicopter shots, recommended by Dave KM3T.

Standing Waves! Fire! Excellent! This Ruben's Tube (not Rubik's Cube) video <http://www.wimp.com/rubenstube/> has just about everything! (Thanks, Rick W0PC)

==> RESULTS AND RECORDS

Results for the 2010 ARRL Phone Sweepstakes by Steve N2IC are online <http://www.arrl.org/contest-results-articles> for your reading pleasure. Steve's usual insightful comments and "horse race" features are always fun. Similarly, you'll find the 2010 EME Results by Jeremy W7EME a click away. Next up will be the ARRL 160 Meter results by Gary K9AY.

The Sweepstakes results didn't get released without a little excitement, however, as recounted by ARRL Contest Branch Manager, Sean KX9X. "After the initial release of the 2010 November Sweepstakes club scores, it was brought to our attention that some stations claimed club affiliation even though they were operating outside of their club's circle. This was confirmed with a re-examination of the Club data. As a result, we re-compiled the Club Competition table and the order of finish in the Medium and Local Club categories in the 2010 November Sweepstakes has changed. Remember: ARRL Club Competition rules prohibit claiming club affiliation when operating outside of your club's circle, with the exception of offshore DXpeditions in the ARRL DX Contest in Medium and Unlimited Club categories. While the ARRL accepts responsibility for the error and regrets it, please do not claim Club affiliation if you are operating outside your club's circle."

The full results of the 2010 CQ WPX CW Contest are now available on the CQ WPX web site <http://www.cqwpx.com/>. Go to the Results tab to view PDF files of the writeup and scores from CQ Magazine. Also available is an Excel file with full breakdown of all club scores. All submitted logs (except CHECKLOGS) have been made public <http://www.cqwpx.com/publiclogs/2010cw/>, too. Now is the time to start looking over the records for your area and setting a goal for the 2011 CW contest on May 28-29. (Thanks, CQ WPX Director, Randy K5ZD)

As long as we're on the subject of WPX results, how about this pair of WPX SSB Claimed Scores:

Non-USA M/M HP
DR1A - 11969 QSOs & 1923 prefixes for 65,735,832 points
Non-USA M/2 HP
5D5A(@CN3A) - 10498 QSOs &1713 prefixes for 67,492,200 points
Wow! That's a lot of calls, points, prefixes, and ratt'lin. (Thanks,
John K1AR)

Ron WD4AHZ reports that he has just finished and posted the 2010 FQP
results <http://floridaqsoparty.org/results/fqp2010.pdf> on the Florida
QSO Party web site. This year's contest is just weeks away!

OPERATING TIP

Operating ethics apply to DXing and contests much the same. To that
end, here are a couple of online resources. The Utah DX Association has
published the "New DXers Manual <http://www.udxa.org/>" by Bryce K7UA.
Another useful "handbook" is "Ethics and Procedures for the Radio
Amateur (3rd edition)
<http://www.ham-operating-ethics.org/files/1-Eth-operating-EN-IARU-R1-V3-CORR-2011.pdf>"
which is sponsored by the IARU and written by ON4UN and ON4WW. Both
might remind even grizzled veterans of certain rules of the radio road.
And don't forget the ARRL's contribution, "HF Operating Guidelines
<http://www.arrl.org/hf-operating-guidelines>". (Thanks, Jim K7WA and
Rob KD7H)

==> TECHNICAL TOPICS AND INFORMATION

Although "hot switching" is usually a bad thing, RF switching relay
contacts that are intermittent on receive can sometimes be temporarily
restored that way. Tim K3LR suggests, "set (output power) at about 20
watts. Hot switch your relay box several times while transmitting a CW
carrier. The small arcing that occurs while doing this "hot" switching
- along with the wipe from the relay contact construction closure may
clean the contacts well enough that the problem will subside during
receive." You'll probably still have to manually clean or replace the
relay but this procedure may provide temporary relief.

Dennis N6KI found this excellent writeup
<http://kb5wia.blogspot.com/2009/12/atas-120a-disassembly.html> with
photos by KB5WIA on repairing and maintaining the Yaesu ATAS-120A
motorized screwdriver antenna.

Every enthusiast needs an "Awesome Button
<http://blog.makezine.com/archive/2011/04/the-awesome-button.html>" and
this video shows how to use an Arduino microprocessor to create one!
I'll bet that with a little coding, you could turn this into a voice
keyer for contesting - maybe it could say, "What's your call?" or come
up with other ways to ask for a repeat of exchange info!

Wow - here's a new technology that might catch on. "Regional
Broadcast Using an Atmospheric Link Layer" was described in the April
1st compilation of articles by Slashdot <http://tech.slashdot.org/> and
has an Internet RFC standard <http://tools.ietf.org/html/rfc6217.html>

and everything! I wonder if this is patented!

An interesting new VHF/UHF turnstile <http://en.wikipedia.org/wiki/Turnstile_antenna> antenna design was published in the October 2010 issue of the IEEE Antennas and Propagation Magazine. (Vol 52, No 5) By RadnoviÄ☐, NešiÄ☐, and MilovanoviÄ☐, the design takes care of the phasing requirements by detuning the elements from resonance - no quarter-wave feed lines are required, simplifying construction. An L-C lattice balun <http://www.odyseus.nildram.co.uk/RFMicrowave_Circuits_Files/Balun%20Design.pdf> is used at the feed point.

Here's a simple Excel spreadsheet <http://audiosystemsgroup.com/intermod.xls> that illustrates the principles of intermod prediction by predicting intermod between up to five frequencies and two broadcast carriers. It is also unprotected with all the formulas visible, so you can see how to expand it to consider more channels or improve it. (Thanks, Jim K9YC)

If you are concerned about abrasion of cables on a tower leg or rung, look for a product called Spiral Wrap which is normally used to tidy up cabling. Spiral wrap is perhaps a sixteenth of an inch thick plastic and can be wrapped around the offending material or the feed line to be protected then secured with electrical tape. (Thanks, Doug EI2CN)

Technical Web Site of the Week - If you are a fan of utility programs, you'll be glad to know that Dan AC6LA has been busy lately! His TLDetails <http://www.ac6la.com/tldetails.html> transmission line utility program has been modified to include the effects of dc resistance and internal inductance, added two new plot functions, and several dozen new line types have been added. The Zplots <http://www.ac6la.com/zplots.html> Excel utility calculates and plot various attributes of transmission lines from antenna analyzer or vector network analyzer data. There are two small workbooks showing various formulas <http://www.ac6la.com/tlmath.html> that are used when dealing with transmission lines and a workbook <http://www.ac6la.com/feed2el.html> to aid in the design of a typical two-element phased array loosely based on the 'Arrayfeed1' app by W7EL.

==> CONVERSATION

Turn On, Tune Up, Tune In

You may remember the call sign W5ZN - perhaps as a past-President of the ARRL? Joel has moved on to bigger and better things - he's the new Contest Manager for ARRL VHF+ contests! As an ARRL Contest Manager, Joel will be promoting and helping to guide the ARRL VHF+ contest program - and operating in them, too. Joel is building a bigger and better station for all bands, now that he has more time for getting on the air. Let's see what he has to say!

73, Ward N0AX

As the low band and DX contesting season comes to a close many begin to focus on VHF+ activity with the birth of a new sporadic E and tropo season, and thoughts of the summer VHF+ contests avail.

While various VHF+ contests, sprints and operating activities occur throughout the year, the most anticipated of all is the ARRL June VHF QSO Party, scheduled each year to take advantage of the peak sporadic E season. There is nothing more exciting than to be constantly calling CQ on a band and have it instantly burst wide open with activity. Just last year the 2 meter band, open only to local contacts within a 300 mile radius, burst wide open on paths from Texas to New England. When "double hop" sporadic E occurs on 50 MHz stations on the East Coast easily work West Coast stations and those in the "middle" enjoy paths to both.

As Solar Cycle 24 begins its incline, DX contacts on 50 MHz during the contest will increase. Each June a few are made into the South and Midwest, however, given the propagation enhancement on 10 meters recently resulting from increased sunspot activity I expect an increase in DX contacts this spring and summer.

50 MHz has become increasingly popular over the past few years thanks primarily to the availability of 6 meters on just about all HF radios and the small size and lower antenna height requirements. n addition, columns in QST and The National Contest Journal focus on 6 meters, thus raising awareness of what that band can produce.

As with all contests, a variety of categories exist to accommodate various VHF+ operating styles. One popular contest category is Rover. Its popularity is driven by two factors; the small size of VHF+ antennas with gain that can be applied to a mobile installation and the use of Maidenhead Grids as multipliers in VHF+ contests. This category provides a unique appeal to those that live in antenna-restricted neighborhoods in that a multiband station can be installed in a vehicle, providing operation from a variety of grids. You can become VERY popular from a rare grid multiplier!

The usual fixed-station categories are also available for single and multi-op entries. The competition is not only fierce but quite exciting among entrants. If you want to join in the excitement from this angle, review past contest results to see who the multi-ops are and contact them to see if any operator slots are available. Stations will be active on all bands from 50 MHz all the way up to light!

Want to learn more about VHF+ Contesting? Contest University in Dayton provides two sessions on the topic covering everything from beginner to advanced strategy. You can also review a very detailed and informative paper on VHF+ contests <http://www.w9smc.com/SMC%20VHF/The%20State%20of%20VHF%20Contesting.pdf> written by Kevin, W9GKA.

The Spring VHF Sprints are about to begin, so tweak up the station and get ready for the ARRL June and September VHF Contests and the CQ July

VHF Contest!

73, Joel W5ZN

==> CONTESTS

13 April through 26 April

An expanded, downloadable version of QST's Contest Corral in PDF format <http://www.arrl.org/contest-calendar> is available. Check the sponsor's Web site for information on operating time restrictions and other instructions.

HF CONTESTS

ARRL Rookie Roundup--Phone, from Apr 17, 1800Z to Apr 17, 2359Z. Bands (MHz): 3.5-28, 50. Exchange: Both calls, name, check, S/P XE⌿ or "DX". Rules <http://www.arrl.org/contests>

NAQCC Monthly QRP Sprint--CW, from Apr 13, 0030Z to Apr 13, 0230Z. Bands (MHz): 3.5-14. Frequencies: Monthly on 2nd Tuesday or 3rd Wednesday (alternating). Exchange: RST, S/P/C, and NAQCC mbr nr or power. Logs due: 4 days. Rules <http://naqcc.info/>

CWops Monthly Mini-CWT Test--CW, from Apr 13, 1300Z to Apr 14, 0400Z - Multiple operating periods. Bands (MHz): 3.5-14. Twice monthly on 2nd and 4th Wed, 18 to 28 kHz above band edge. Exchange: Name, member number or S/P/C. Logs due: 2 days. Rules <http://www.cwops.org/onair.html>

Holyland DX Contest--Phone, CW, Digital, from Apr 15, 2100Z to Apr 16, 2100Z. Bands (MHz): 1.8-28. Exchange: RS(T), serial or Israel district. Logs due: May 31. Rules <http://www.iarc.org/>

TARA Skirmish Dig Pfx Contest-- Digital, from Apr 16, 0000Z to Apr 16, 2359Z. Bands (MHz): 1.8-28, 50. Exchange: Name, prefix. Logs due: May 17. Rules <http://www.n2ty.org/seasons/tara_dpx_rules.html>

Lighthouse Spring Lites QSO Party--Phone, CW, Digital, from Apr 16, 0001Z to Apr 24, 2359Z. Bands (MHz): 1.8-28. Exchange: ARLHS number or serial, name, S/P/C. Logs due: 12 days. Rules <http://arlhs.com/>

ES Open HF Championship--Phone, CW, from Apr 16, 0500Z to Apr 16, 0859Z. Bands (MHz): 3.5,7. Exchange: RS(T), serial, dupes OK once/hour. Logs due: May 20. Rules <http://www.erau.ee/index.php?newlang=eng>

All America Contest--CW, from Apr 16, 1500Z to Apr 17, 2359Z. Bands (MHz): 3.5-28. Exchange: RST, continent, and category. Logs due: Jun 30. Rules <http://www.powerline.com.br/cwjf/eng4.htm>

EU Spring Sprints--Phone, from Apr 16, 1600Z to Apr 16, 1959Z. Bands (MHz): 3.5-14. Frequencies: 3.730, 7.050, 14.250. Exchange: Both call signs, serial, name. Logs due: 15 days. Rules <http://www.eu-sprint.com/>

Feld-Hell QRP Sprint-- Digital, from Apr 16, 1600Z to Apr 16, 1800Z. Bands (MHz): 1.8-28. Frequencies: Monthly on 3rd Saturday. Exchange: RST, QTH, Feld-Hell number. Rules <http://www.feldhellclub.org/>

Michigan QSO Party--Phone, CW, from Apr 16, 1600Z to Apr 17, 0400Z. Bands (MHz): 3.5-28. Frequencies: CW 45 kHz from band edge, Phone 3.825, 7.200, 14.250, 21.300, 28.450. Exchange: Serial and MI county or S/P/C. Logs due: 30 days. Rules <http://www.miqp.org/>

EA QRP Contest--CW, from Apr 16, 1700Z to Apr 17, 1300Z. Bands (MHz): 3.5-28. Exchange: RST, category, M if EA QRP member. Logs due: 30 days. Rules <http://www.eaqrp.com/>

Ontario QSO Party--Phone, CW, from Apr 16, 1800Z to Apr 17, 0500Z and Apr 18, 1200Z to Apr 18, 1800Z. Bands (MHz): 1.8-28, 50,144, Frequencies: Multiple operating periods; CW 30 kHz above band edge; Phone 1.870, 3.735, 3.860, 7.070, 7.260, 14.130, 14.265, 21.260, 28.360; VHF-SSB: 50.130, 52.540, 144.205, 146.550. Exchange: RS(T), S/P/C or Ontario QTH. Logs due: May 19. Rules <http://www.va3cco.com/>

YU DX Contest--CW, from Apr 16, 2100Z to Apr 17, 0500Z and Apr 18, 0900Z to Apr 18, 2100Z - Multiple operating periods. Bands (MHz): 1.8-28. Exchange: RST and ITU zone. Logs due: 30 days. Rules <http://www.yu1srs.org.rs/dl/yudx/yudxmain.html>

Ten-Ten Spring Digital Contest-- Digital, from Apr 23, 0001Z to Apr 24, 2359Z. Bands (MHz): 28. Exchange: Call, name, county & S/P/C, 10-10 number. Logs due: 15 days. Rules <http://www.ten-ten.org/>

SP DX RTTY Contest-- Digital, from Apr 23, 1200Z to Apr 24, 1200Z. Bands (MHz): 3.5-28. Exchange: RST, serial, SP province. Logs due: May 24. Rules <http://www.pkrvg.org/zbior.html>

Helvetia Contest--Phone, CW, Digital, from Apr 23, 1300Z to Apr 24, 1259Z. Bands (MHz): 1.8-28. Exchange: RS(T), serial or Swiss canton. Logs due: 15 days. Rules <http://www.uska.ch/>

QRP To The Field--CW, from Apr 23, 1500Z to Apr 24, 0300Z. Bands (MHz): 7-28. Exchange: RST, S/P/C. Logs due: Jun 1. Rules <http://www.zianet.com/qrp>

South Dakota QSO Party--Phone, CW, Digital, from Apr 23, 1700Z to Apr 24, 1700Z. Bands (MHz): 1.8-28. Hallo dear MMMonVHF friends,

please find below our lastet NEWSLETTER from the VHF-DX-Portal
"Make More Miles on VHF" (www.MMMonVHF.de), dated 2011-04-13
We attempt to distribute our Newsletter, once a week (due to QRL
and expedition circumstances in week 15 on wedenesday!!!)
from now on - if any special activities will make it necessary
we will inform you with Breaking News or a Special NL-Edition.
For further detail please be so kind and watch our "News"-page
http://www.mmmonvhf.de/latest.php - you vy welcome for any
input and we do hope you will enjoy the VHF-DX-Portal MMMonVHF!

****
Latest NEWS and INFO for the NEWSLETTER
MMMonVHF The VHF-DX-Portal
****

** MOST WANTED SQUARES & DXCCs at the VHF-DX-Portal of MMMonVHF **

Just in advance of the active meteorscatter time of the year
(as well gd EME condx and the MS showers in may and june) we would
like to remember that these services are only as good as YOU (as
the USER) are doing UPDATES at our different sources...
Please do yourself and all of us the favour and check and update
periodical the following links and tools - last chance!!!

eMWS (MOST WANTED SQUARES) >>> www.mmmonvhf.de/emws.php
MWDXCC (MOST WANTED DXCC) >>> www.mmmonvhf.de/dxcc.php

We will spread the Result 24 of april, as easter present ;-)
Thanks in the name of all USER of MMMonVHF and the team which is
always trying to pass you as soon as possible the latest News...
SOURCE: Guy, DL8EBW, on behalf of the MMMonVHF Team

** AURORA??? Space Weather News for April 12, 2011 **

GEOMAGNETIC STORM: A solar wind stream hit Earth's magnetic field
on April 12th, sparking Northern Lights as far south as Michigan
and Minnesota in the USA. At the time of this alert (April 12 @
1600 UT), the G1-class event is still underway. Images and updates
are available at http://spaceweather.com
SOURCE: http://spaceweather.com/services/

** Araucaria VHF Contest 07 and May 8, 144MHz and 50MHz **

Almost all of us have a VHF on home, car or on the field, in order
to invite you to participate in this year's ARAUCARIA VHF CONTEST,
and we closed new stamps will be an honor to a close contact ...
It is a sport very interesting, as we have CW, SSB and FM, many
people in the hills above the other 1000 meters to sea level,
national and international stations. Participate and some close
contacts because we were very happy to exchange some QSLs in a
different mode of HF. We ask everyone to publicize this event!

Johan PA3FPQ, Jurgen PE1LWT and Rene PE1L will travel, after the
PJ4X activity to PJ2 the new DXCC Curacao in FK52NC
LATEST NEWS from PJ-Team, dated 2011-04-13: Today the european
teammembers Jurgen PE1LWT, Rene PE1L and Johan PA3FPQ traveled to
Curacao while Pter PJ4NX did stay on Bonaire. With a little delay
the plane landed on Curacao and all luggage came through the custums
and all seems to be in good condition. (no time to check all) When
arrived at the house we could see the results of the heavy rain
lately here in Curacao. Lot of water arround the house so we decided
to put on our swimsuit for a little dip, pse notice we did not see

the see or beach on Bonaire because the hard on the antennasystem.
Now the moonrise is later on the day we have some spare time to
spent on pleassure. The rented cottage is not excactly what we had
in mind when we booked it a few months ago but we will handle it.
i.e. the icecream picture on the menucard is not the same as the one
beeing served. Tomorrow (april 13th) we will starting to build up
the station. All we we can say is that we need al least 10 degrees
on moonset and moonrise. We do our best to be qrv as soon as
possible - Call will be PJ2/PE1L, locator FK52vc - And freq is
planned to be 144124 (keep an eye on N0UK logger and
www.livecq144.com for last minute freq change because birdy's)

Frank DH7FB & Bernd DF2ZC qrv from GD in april 2011
LATEST NEWS from the MD/Team dated 2011-04-11: We are very happy with
the results because the location is not at all good for EME work. It
is very secluded and surrounded by high trees which make working at
moonrise quite hard with a lot of additional attenuation. On the
other hand nearly 100 QSOs in the first pass is something we never
reached from previous dxpeditions. Looking forward to today's moon
pass - and please remember to call us only if you copy us!!! Have a
look at our twitter site with JPGs: twitter.com/dxpeditions Today's
callsign is MD/DF2ZC. SOURCE: Bernd, DF2ZC direct to MMMonVHF
LOG will be daily updated: www.mmmonvhf.de/latest.php?id=3692

****

** RADIO EXPEDITION SIERRA LEONE 2011 (IJ38JK) **

Lance did make a first EME QSO on 50 MHz with the Group! They were
running 550w output to a Tonna 5 element yagi with about 1 dB of
feedline loss. They will be on below 20 degrees elevation for the
next couple of days. They are calling CQ in the first sequence on
50.200. Their moonset is after midnight and is their best direction
since there is no ionization to their west at that time of day to
disrupt the EME signals. GL and VY 73, Lance, W7GJ
SOURCE: Lance, W7GJ via MAGIC-BAND-EME Reflector

** Grid Trip DN00/01/02/03/04/11/12 by K7BV **

Friends, I am finalizing my schedule for a Grid Trip April 19-28
that will include operations in DN00-01-02-03-04-11-12. I will
release the schedule tonight or tomorrow. I have noted that there
have been a few Sporadic Es openings during this period in past
years so I have my fingers crossed. I do believe, however, that this
trip may have to rely heavily - if not totally - on scatter....
any mode. Some of these operations will be on grid borders out in
Never Neverland. I sure could use some telephone numbers to call to
request a spot being posted on PingJockey and elsewhere because
Internet access will be out of the question. If you are willing to
volunteer to assist, please drop me a private message with the
telephone number I can call and what days/hours are acceptable for
those calls. I will keep the telephone numbers totally confidential.
SOURCE: Dennis K7BV via VHF/WSJT Reflector

** V47JA + V47HAM qrv from FK87PG end july **

John, W5JON (V47JA) and xyl Cathy, W5HAM (V47HAM) will once again
be active from their Calypso Bay, island of St. Kitts (IOTA NA-104)
hill side vacation home (WW Loc. FK87PG) between 12 July and 2 Aug.
2011. Plans are to be QRV on 80-6 metre SSB, including both CQWW
VHF Contest and RSGB IOTA (SSB) Contest. Equipment will be: Kenwood
TS-590S, Yaesu FT-857D, KL-400 Amplifier (400 Watts) and 80-10m
Multiband Dipole, and S9 Vert.; 6m - 3el Yagi. QSL both V47JA and
V47HAM via W5JON (QRZ.com)
SOURCE: [NG3K] via (and tnx to) Andy, N8OFS, direct to MMMonVHF

** HF and 50 MHz activity from Rab Island **

Pista 9A/HA5AUC, Ed 9A/HA5BWW and Karcsi 9A/HA7PC will be
active from Rab Island (IOTA EU-136, ACIA IC-168, CIA-38, IOCA CI-096
MIA MC-330, WLOTA 2198, WW Loc. JN74JR) on 11-18 April 2011. QRV on
80-6 metres, mostly CW, but some SSB as well. Equipment will be
IC756PRO and IC765 with wire verticals on fishing poles. QSL via
home calls via the HA bureau.
SOURCE: [HA0HW] via [DX-ENG] ICPO Bulletin (08-15 April 2011)

** special callsign XM2I on the air **

Members of the NA-128 Contest Group will activate the special call
XM2I on 29-31 July 2011 from Ile-aux-Grues (IOTA NA-128, CIsA QC-038,
Grid FN47RB, ARLHS CAN-973 [Historic]), Province of Quebec. They will
also be QRV in the RSGB IOTA Contest (30-31 July) as a Multi-Single
entry. After the contest, there may be a short operation from the
Pointe aux Pins lighthouse (ARLHS CAN-1390, WW Loc. FN47RB) located
on Ile-aux-Grues, and activation of Isle aux Oies (private island
(CIsA QC-039, WW Loc. FN47SD). QRV on 80-6m SSB, CW and RTTY and
PSK31, with one station dedicated to 6m. QSL via VE2CQ, bureau or

direct. Website: www.qsl.net/na128cg/
SOURCE: [islandchaser.com] via [DX-ENG] ICPO Bulletin

** JH4VUC, PACIFIC TOUR (incl. 6m) **

Masahiko, JH4VUC, plans to activate the following islands during the last few weeks in the month of April. Activity from all islands will be on 40/15/10/6 meters using 500 watts and SSB. QSL via his home callsign. His tentative schedule is:
April 17-19th - Saipan, Mariana Islands; callsign AH0CD
April 20-22nd - Guam; callsign AH0CD/KH2
April 23-25th - Palau; callsign T88VU
SOURCE: Bill, NG3K via [DX-ENG] Ohio/Penn DX Bulletin #1006

** 3D2/R, ROTUMA, activity on HF and 50 MHz **

Eddie, 3D2A/VK4AN, member of the Pacific DXer's, announced: "A team of 'PACIFIC DXERS', have 'ALL PERMITS' in place and are planning to sail for Rotuma early October 2011 and operate for 3 weeks (October 15th to November 15th). The team so far consists of: Eddie/3D2A/VK4AN Rocky/3D2DD, Bill 3D2(?)/VK4FW...others are pending. We already have 24-hr power and accommodation arranged. Most of the 3D2A equipment is in Fiji already. We are seeking expressions of interest from experienced CW/SSB/Digital mode operators and possibly a 6m enthusiast A 6m beacon will be established on 50.095 MHz. Rigs so far include K3 Flex5000A, Emtron DX1b amp, FT-900, Spiderbeam, wire antennas, DX88 vertical. This will be the anniversary of the FIRST operation from Rotuma by Eddie/ 3D2A/VK4AN...original license was 3D2XX/rotuma in 1988. The callsign has not been issued yet, but we expect to be issued with either 3D2P or 3D20R... The alternative will be 3D2A/ R(otuma)." SOURCE: [DX-ENG] Ohio/Penn DX Bulletin #1006

** 8P, BARBADOS, activity on HF and 50 MHz **

Fred, PY2XB, will be active as 8P9XB from St. Philip, Barbados (NA-021) between May 8-21st. Activity will be on 80-6 meters using CW, SSB and RTTY. He will have a 6m beacon on at 50.099 MHz (Grid Locator GK03gc). QSL via PT7WA. SOURCE: [DX-ENG] Ohio/Penn DX Bulletin #1006

** 9N, NEPAL qrv again on HF and 50 MHz **

Operators Dov/4Z4DX/9N7DX and XYL Anat/9N7YL will be active between April 13-30th. Activity will be mainly 20/15/10/6 meters using mostly CW, RTTY and PSK31. QSL via 4Z4DX. Dov has activated a new Web page for this operation at: http://www.9n7dx.com
SOURCE: [DX-ENG] Ohio/Penn DX Bulletin #1006

** DEADLINE for your NEWS input to MMMonVHF**

you would expect to hear it being read back and NEVER send just links & url's.

WIANEWS FOR WEEK COMMENCING APRIL 17 2011.

NIGERIAN SCAM!

Special temporary call signs for Royal Wedding

WIA NATIONAL FIELD DAY ON TODAY

WIA AGM Darwin Book Now!

ALL THESE STORIES UP AND COMING IN THIS EDITION OF NEWS FROM THE WIRELESS
INSTITUTE OF AUSTRALIA FOR WEEK COMMENCING APRIL 17 2011.

NIGERIAN SCAM!

Motorola warns customers, beware! fake Motorola products!

These 'fakes' are being offered in Nigeria and not only consumer products
such as household items, mobile phones and automobile spare parts, but
professional telecommunication devices, such as two-way radios are becoming
affected too.

Mobile Equipment manufacturers, Motorola, has alarmed its customers that
several counterfeit Motorola products have recently hit the Nigerian market,

all of which lack the quality and ruggedness of the original, leaving users unable to rely on their functionality.

Wireless technology is revolutionizing the ways first responders and others who work under difficult circumstances in Nigeria conduct their jobs, empowering them with the best information when and where it matters most to best serve and protect their communities and Motorola says that its mission-critical solutions range from two way radio communications products and systems to an array of mobile computing devices.

(press reports)

WIA
President Michael Owen VK3KI president@wia.org.au
Vice President Phil Wait VK2ASD vk2asd@wia.org.au
Secretary Sarah Thompson VK3AUD secretary@wia.org.au
Treasurer John Longayroux VK3PZ vk3pz@wia.org.au

Today they give up, to put something back

As we go to air in the morning on Sunday the 17th of April, some 30 clubs and groups around Australia are on air for the Tune-In to the world, Amateur Radio get people talking ? WIA National Field Day.

Among the latest to join is the newly formed Central Queensland Amateur Radio Association at both the Bunnings Warehouse car park in North Rockhampton and the Mount Morgan Range.

Not bad having just been formed and with more than 20 enthusiastic members. Another entry has just been received from the Orange and District Amateur Radio Club with its special event callsign VI50AOA.

In all 30-odd clubs and groups are lined up for the Tune-In to the world, Amateur Radio get people talking ? public relations event.

Check out all of the entries on-line on the WIA website www.wia.org.au
They are set up at mainly public places with a range of equipment to showcase what amateur radio has to offer them.

Each has been given a display and hand-out sheet detailing the paths taken by a number of newcomers to our hobby. The information entitled ?My Story? makes interesting reading.

Remember the day - Sunday the 17th of April ?the WIA National Field Day.

WIA AGM

Gday this is Spud on behalf of the Wireless Institute of Australia and the Darwin Amateur Radio Club.

The annual WIA conference is being held in Darwin over the weekend of 27, 28 and 29th of May.

Come and join us for a great weekend of fun and friendship with fellow amateurs.

The weekend should go like this,

Friday night gather at the Darwin Trailer Boat Club for a sumptuous dinner by the sea as the sun, sets over the fleet at anchor in the harbour. Always Gorgeous.

Saturday we get down to business in the morning with the WIA Annual general meeting and then the forums presentation.

Saturday afternoon sees a series of presentations based around technology for the bush.

How 24 hour electricity is provided in the homelands with solar and in larger communities with hybrid solutions. How it is evaluated and negotiated.

2 very special presentations by amateurs involved in Bushlight and Powercorp.

Then Spud talking about life in the top end with a few curlies thrown in. You will have to be here for that one.

Saturday night in the treetops restaurant for the big conference dinner and entertainment by john VK8JM, he is good too.

Sunday we want to take you for a little trip in a comfortable coach down through beautiful Batchelor to Litchfield National Park for the day. We will take a look at what the Top End has to offer, beautiful swimming holes, magnetic anthills, bushwalks and a great barbecue lunch cooked by the team from The DARC side.

Sunday night at Mindil markets will round of a fantastic weekend for everyone, you pick your cuisine from one or more of the many different food stalls and then sit at the tables and chairs or on the beach and watch the sunset over the harbour and take a look around the many craft stalls at the markets. A great way to end the weekend.

Register now on the wia website at www.wia.org.au , look at the airlines website's and choose a flight and book it now they are filling fast. We have secured a great deal on accommodation at Mirrambeena, the conference venue as well. All the details are on the website. So do it now, register and book and come and see Darwin in the dry. Its not that far away from the southern parts and just a nice temperature too.

I urge you to please go to the WIA website now and register for this fantastic weekend. Accommodation can be booked at the special rates negotiated by the WIA by calling the Travelodge Mirambeena on 08 8946 0111 and speaking to Aleishia Good or Belinda Anthony, quoting the reference "WIA Conference"

This is spud vk8zwm on behalf of the WIA and DARC saying see you here in beautiful Darwin in May.

FROM THE WIA BOARDROOM AT ANDERSSON HOUSE.

This is Ewan VK4ERM, with greetings from the WIA to radio amateurs and your listening visitors, with some thoughts for your consideration.

If you are Radio Amateur listening to this broadcast on Sunday morning you may be involved in the activities of WIA National Field Day either at a community field station or giving direct support to the activity by communicating with field stations from your home or mobile station. In doing so we are demonstrating the educational, recreational and social values of Amateur Radio activities to individuals and the wider community.

If you are a visitor to a field station then this is your chance to ask as many questions as you want to and I encourage you to do so.

This is a great opportunity to demonstrate how Amateur Radio has not only stayed with advances in communications technology but, in many cases, leads the way in developing new and efficient techniques. We can demonstrate the opportunities that exist for those leaning toward an interest or career in communications and electronics.

Our hobby, that we are demonstrating to-day, has a rich and unique heritage with continuing rapid evolution, often unknown to our visitors to-day, who we can be assured, will leave with a greater understanding of Amateur Radio thanks to your efforts.

But, what now? Now the seeds of interest have planted and well received in the minds of your visitors, visitors who will range from the mildly curious to the keenly interested, what are your club and individual plans for germinating those seeds?

Too often we conclude the day, pat ourselves on the back for a job well done, and forget the sown seeds need watering and nurture before breaking through the earth. I have been guilty of this and I suspect many others feel the same way of opportunity lost by not planning and sticking to a plan and schedule of friendly follow-up. I am sure those of you who are visitors to Amateur Radio for the first time would be very disappointed and disillusioned in our hobby of Amateur Radio were your interest to be ignored or forgotten in the future post to-day's activities.

If we encourage anyone to further their interest and study in Amateur Radio at the onset through activities such as to-day, hopefully leading to their enthusiastic achievement of a licence, isn't it our duty or obligation as a radio amateur to be with them on the path? In doing so isn't your club and you becoming closer and better understood and accepted by your community at all levels? There are many examples where this has happened successfully but equally there are as many or more where the meshing has not been undertaken to the best interests and advantages for club and community.

As Radio Amateurs and visitors, enjoy your participation in the WIA National Field Day as you 'Tune-In To The World' and please take every opportunity to bring your club closer to your community and your community closer to your club.

This is Ewan VK4ERM for the WIA Board.

HAMS ACROSS AUSTRALIA.

Know your holiday address and beach access code

The Queensland Ambulance Service is urging holiday-makers to know their holiday address and take the time to familiarise themselves in new surroundings.

QAS Assistant Commissioner for Brisbane Region Leo McNamara said it was important for people to know their exact holiday address and beach access code in case of an emergency.

Knowing your exact holiday address can cut minutes off emergency response times, which can mean the difference between life and death. Many apartments and units have similar names that is why it's important to have the address information on hand, ready to relay quickly and accurately."

In an emergency on a beach, it's just as important for people to be able to correctly relay location information without delay.

VKG Roundup http://www.police.nsw.gov.au/news

Final reminder for the Urunga Radio Convention over Easter 23 24 April in the Senior Citizens Hall Bowra St Urunga NSW.

There is a comfortable lounge room with all amenities attached.
Free tea and coffee available all day to registered visitors.

Bring your family
You are invited to bring trade displays and goods for sale
at the trading tables, no commission if registered.

There are competitions, quizzes and lucky door prizes.
Everyone can take part, Technical quiz may require amateur skills.

The Urunga Radio Convention is one of the leaders in the art of "Fox-hunting".
If you want to challenge our new foxes, then Easter is the time to do it.

The Convention is also a great social event where you can meet fellow amateurs and friends and if you are looking for equipment or parts there is a good chance you can find it at the trading tables.

Urunga is part of the Coffs Coast Holiday area.

More details from Urunga Convention Committee.

GLADSTONE AR CLUB "Radio_Active".
IRLP Node 6246
President John Hinde VK4JWH
gladstone_ar_club@yahoo.com.au

Listening to us on 146.9FM Gladstone?

Well don't forget after the news today head on out to the newly developed Gladstone Airport. Not only planes on display but free shuttle busses will take you on tours of the entire runway system and check out the continuing widening of the runway project.

It happens from 11.30am to 1pm.

GOLD COAST

Gold Coast Amateur Radio Society, The Clubhouse is open every Saturday from 1pm for Members and guests and would love to see you there.

On Saturday 30th from 10am there will be a Boot Sale and BBQ.
Everyone is welcome to come along and maybe get rid of some unwanted equipment or on the other hand pick up something you have wanted for a while.

Remember Saturday 30th April from 10am Gcars Club-rooms 85 Harper Street Nerang.

CAIRNS

Goldborough Valley first in Far North to switch to digital TV

Digital-only television will be switched on on May 12.

The upgrade to the local transmitter will give better coverage and more stations.

To install the new equipment the analogue TV signal in the area would be switched off and then only digital services would be available.

The switch would be on May 12 making this the Far North's digital guinea pig.

Goldbourough Valley, via Gordonvale, is hidden between high mountains south of Cairns. Cairns herself along with the rest of the Far North will change over to digital at year's end.

Redcliffe and District Radio Club
www.redclifferadioclub.org.au/

I'm Ray, VK4CF with news from Redcliffe & Districts Radio club.

There has been a late change to next week's technical talk at the club.

As Kev, VK4UH, is unavailable, next week's tech talk on Antenna stubbs. The club used these on the last John Moyle field day with great success and the interaction usually found with the antennas being closely spaced was mostly eliminated. So come along next Monday night & hear how the stubbs are made and tested and what are some of the pitfalls.

This Sunday is the National field day event. The club is located inside the shopping centre located at Kippa Ring, Redcliffe, just outside KMART. Club members have a static display set up inside the shopping centre and club members are working on a link to have at least 2 metre repeater access during this morning.

Peter VK4EA provided a report of the John Moyle Field day, where the club, despite the rain made some 1700 contacts made. Whilst the weather stopped some club members from attending, those who did had a great time. Peter also reported that the Stubbs worked well and briefly outlined some of the lessons that will be incorporated into the club's planning for next year.

John VK4WX reported that a great friend of the club, Rob, VK2ZEB 's health has taken a turn for the worse with him going into respite care in Lismore Hospital. All club members wish Rob and his wife Elizabeth our best wishes for a rapid improvement in his health.

Scott, VK4FLAE, advised Watts Bridge airfield will be holding a breakfast fly-in, on 21st May from 9am - 4pm. Everyone is welcome. Club will also hold a membership drive at the fly-in and members should let Scott know asap for food catering. The Festival of Flight has been moved to Caboolture air field, with a date yet to be confirmed.

John, VK4YJV, has provided a list of topics for the first Monday night of the month mini-training night. The first of the mini training sessions will be on How to tie knots & their uses. Learn the differences between a bowline and a reef knot and how to tie a timber hitch at the club on the first Monday night of the month.

Roger, VK4ZLQ, reported that 4 new foundation licences were passed last Sunday. A big welcome to the new callsigns, from all club members.

Ken, VK4FKEN and Wendy, VK4FWEN passed on their thanks for all the club members that sent messages of sympathy on the passing of Club member Geary Fawke, Wendy's dad, who passed away peacefully after a long illness with cancer.

So now it's 73 from Ray, VK4CF and you are listening to QNEWS.

Welcome to QNews from VK4WIA. I'm Geoff Emery and I've been thinking.

Where I live is the proverbial fly speck on the map. It is a small region between two regional cities. Of course I have access to the highway and the railway does pass in hearing distance. Because the copper telephone lines have been neglected for so long, I have access to satellite internet service. The 3G networks all provide good signal strength, now.

Recently I have been called to visit the Big Smoke, Brisbane, a little more than I would like. However, in planning appointments it is very hard to convince people that we have a journey of 50Km to get to public transport and then there are only 2 rail services per day in each direction. Aerodromes are 100 to 150Kms away.

Likewise, the use of the internet for streaming audio and video has attracted more and more broadcasters. The technology is great but effective access is less so, out in the boonies. What I pay for satellite access is about 8 times as expensive as advertised ADSL "unlimited" plans. Wireless via 3G is more expensive still.

What I am driving at is that many of our country colleagues face a more difficult time, certainly more inconvenient and expensive, accessing services which city people take for granted. When we know that many country amateurs volunteer their time and facilities in supporting the hobby, the rest of us owe them a big "thank you".

I'm Geoff Emery and that's what I think.....how about you?

VK5

D-STAR IN THE BAROSSA VALLEY THIS EASTER

For anyone interested in D-Star and are travelling to the Barossa Valley this Easter, Nik VK3BA advises that he will set up a D-Star Simplex HotSpot in Tanunda.

The operating frequency will be 438.925MHz in the 70cm band and anyone with a D-Star capable radio are most welcome to use it. Nik hopes that the D-Star HotSpot will be operational from late afternoon of Thursday the 21st of April through to early morning of Wednesday the 27th of April.

Please contact Nik via his email address of vk3ba@wia.org.au if you require any further details.

VK6

The WA Government has released a $39.2 million tender looking for a vendor to improve mobile coverage in regional Western Australia.

Studies and community consultation undertaken by the State Government indicated a low level of mobile coverage and broadband internet availability in many regional areas. The government wants a vendor to improve this situation by installing more towers, which are to be integrated with existing mobile communications network infrastructure.

"The shortcomings of mobile telephone coverage on the state's major regional highways need to be improved not only for mobile telephone but also for radio communications coverage, which is essential for our police and emergency services, business and recreational purposes," Regional Development and Lands Minister Brendon Grylls said in a statement earlier this week.

Applicants will be required to outline how they will deliver mobile voice communications to the greatest possible number of coverage locations, said

Grylls. They need to propose their solutions by 5 May.

SILENT KEY

Paul Baran, W3KAS

An engineer who helped create the technical underpinnings for the ARPANET, the government-sponsored precursor to today's Internet died March 27 at his home in California.

He was 84.

Paul Baran was one of the three inventors of packet-switched networks.

In the early 1960s, Paul was working on a "survivable" communications system when he thought up one of its core concepts: Breaking up a single message into smaller pieces, having them travel different, unpredictable paths to their destination and only then putting them back together.

It's called packet switching and it's how everything still gets to your e-mail inbox.

6 Metres Due says F1due

F1DUE, the president of the French amateur radio union REF, writes about his efforts to open the 6m band for French radio amateurs.

Already last year the REF asked the French frequency regulation authority (ARCEP) to deal with the case of the 6m band which was suspended 2 years ago.

The ARCEP informed the REF that they consider to assign the frequency range 50-52 MHz for amateur radio. Thus ARCEP placed this proposal on the agenda of the Frequency Planning Commission (CPF) which was held in March.

Nobody yet knows when the change of the bandplan is finalized and comes into effect.

Sotheby's have auctioned off the Vostok 3KA-2, a Soviet Union-era space capsule which carried a dog and mannequin and orbited the Earth for 18 days before USSR cosmonaut Yuri Gagarin became the first man to enter space.

This was the only Vostok capsule outside Russia.

There are marks on the capsule where it burned as it re-entered the atmosphere, and a spot where engineers cut into the heat shield to examine how well it withstood the flaming re-entry.

Russian's described the ship's condition after its re-entry as a "wounded animal, panting its last breath."

"It was so hot still from burning through the atmosphere it was melting the snow around it."

==========

NEWS FROM ARNEWSLINE USA

SOLAR RADIO STORM COULD MEAN IMPROVED PROPAGATION

Some good news for hams awaiting the return of decent propagation.

Spaceweather have reported that a large number of emerging sunspots has kicked off what it termed as days-long radio storm on the sun. According to the on-line newsletter, VHF receivers on Earth were picking up loud bursts that sound like waves crashing on a beach. Spaceweather says that this ongoing event continues a recent trend of increasing activity as Solar Cycle 24 heats up.

Then over the weekend of April 2nd and 3rd a solar wind stream hit Earth's magnetic field and sent a wave of deep sky auroras over northern tier of the United States. According to Spaceweather dot com, the Northern Lights were pale-white to the naked eye, but digital cameras revealed spectacular colours and luminous shapes above Wisconsin, Michigan, Minnesota, and elsewhere.

Meantime, on the ground some hams on 6 meters and above heard or made contact with distant stations not usually heard on these bands. You can easily tell a contact made via aurora propagation by its raspy C-W note or gargled voice sound.

For images and audio go to www.spaceweather.com

VAN NUYS CA STORE WARNED TO TURN OFF CELLPHONE JAMMER

The FCC has issued a Notice of Unauthorized Operation and Interference to EDN Aviation of Van Nuys, California. This, for allegedly operating a cell phone jamming device on its premises.

According to the FCC, back on January 10th agents from the Enforcement Bureau's Los Angeles Office visited the business location. At that time they detected radio signals in the 1.8 to 2.0 GHz range emanating from a radio transmitter. The Los Angeles agents determined that the business was operating a radio transmitting device designed to jam or intentionally interfere with licensed radio communications in the cellular and personal communications service.

According to the FCC, its agents did attempt to inspect the device. Subsequent to that attempted inspection, operation of the device ceased.

Now in its March 18th Notice, the FCC tells EDN Aviation that unauthorized operation of the transmitting device must not resume. It also warns EDN that the operation of the device may constitute a violation of Sections 333,302(b), and 301 of the Communications Act. Such operation may subject the company to substantial monetary forfeitures, seizure of the offending radio equipment, and criminal sanctions.

EDN was given the customary 10 days to respond to the FCC with any information that it believed relevant to the warning notice. That time period has now passed. No word yet from the FCC if EDN responded or what the company may have said.

TRACER SOFTWARE LEADS TO RECOVERY OF STOLEN COMPUTERS

Los Angeles, California Police say that they have tracked down three people whom they allege to have stolen nine computers from the Open Charter Magnet School in the Westchester area. This thanks to a new form of security software installed on the machines.

According to police, the computers were stolen between March 9 and 10 at the campus on 77th Street in the city of Westchester. The suspects were unaware that the computers were equipped with the security software. As soon as one of the machines was turned on and connected to the Internet, it monitored and recorded the location via GPS. It also took photographs of the user and then sent this information off to authorities.

Detectives from the Los Angeles Police Department tracked down one of the suspects on March 12th. A further investigation led them to two others. So far, four of the stolen computers have been recovered.

NASA ASKS YOU TO VOTE ON ASTRONAUT WAKE-UP SONG

NASA is offering the public a chance to vote for your favourite tunes to be played as the wake up song during the STS-134 mission, which is currently scheduled to launch on April 19th. Voting will be open until mission launch day. You can listen to the songs nominated and cast your vote at tinyurl.com/4peh55m

==========

WEIRD AND WONDERFUL

EGGING ON OUR ABC

GEEZ, we knew budgets at the ABC were tight, but this tight?

ABC radio in Wodonga according to weeklytimesnow.com.au is appealing to listeners for egg cartons to sound-proof their new studio.

Apparently the money did not stretch to insulation and attempts to block out noise with mattresses and curtains have been unsuccessful.

ABC listeners have responded in true country style and have been dropping off their used egg cartons.

What's next? Old ixl jam tins and string for extra phones?

SPECIAL EVENTS AND ON AIR CONTEST COLUMN - D A T E L I N E 2011

Apr 23 ZL/VK 2011 VK/ZL RTTY SPRINT 80 metres

Apr 30 WW Marconi Day 2011

Apr 30 ZL/VK 2011 VK/ZL RTTY SPRINT 40 metres

This is Denis Johnstone VK4AE, Contest Manager for the John Moyle Memorial Field Day.

The WIA would like to thank those stations who have already gone to the effort of preparing and submitting a valid entry for this year's contest.

Logs are still slowly being received for the contest and so far only a little over 60% of the logs are from Portable Stations the rest being from Home Stations.

The contest log you submit for your station is of course important for you, as based on this information is how we calculate the relative score and placings in each category. However, the other equally important purpose of your log is to permit verification of the contacts of other stations and hence their scores as well.

So having gone to the considerable effort involved to take part in the contest, leaving aside the actual fun and enjoyment aspect, it would be such a shame not to complete the task and submit a valid log entry.

Don't forget that entries by mail, (Snail mail that is) have to be date stamped not later than 22nd April, and submissions by electronic mail close at midnight 22nd April 2011.

So go ahead, gather up all of the required information that you need, collate the log and submit it NOW!

You can check if your log is already in the system, by checking the John Moyle page in the Contest Section of the WIA website. Results will be published there as soon as they are completed and will be published in AR Magazine for the following month.

SPECIAL EVENT STATIONS, DX and BEACON NEWS

ISWL is 65

The International Short Wave League is celebrating its 65th anniversary.

GB65ISWL will be on the air over this weekend 16th and 17th April.

Activity starts around 18.00 hours on Friday, April 15th. Modes will be SSB and the PSK modes. Main operator will be Herbie, G6XOU

(rsgb)

Special temporary call signs for Royal Wedding

RSGB has agreed with Ofcom arrangements for all UK Radio Amateurs to opt to use special callsigns for a period of eleven days beginning on the date of the marriage of H.R.H. Prince William and Kate Middleton, 29th April 2011.

Use of the special prefix, which is 'GR', is conditional on allocation of a Notice of Variation (NoV) which can be quickly obtained via a simple process on the Society's website, where full details of the arrangements can also be found.

www.rsgb.org.uk/weddingcall

Beacon news.

A full listing of all Asian, Pacific and Central/South American beacons can be found by going to Google and typing in "G3USF" and follow the links to 50MHz beacons. The list is updated weekly.

In addition to the usual Asian 49 and 48MHz TV indicators, vk2wi news say another interesting one to look for is in Japan on 43.649MHz USB, a 24 hour data tracking signal running 100 watts north east of Tokyo, this has been heard and logged by Noel VK2FUL in Sydney who remarked that the signal closely resembles an over-the horizon radar pulse transmission. Some Chinese fishing boat FAX and data activity can also be heard on 33.250, 33.375 and 33.425MHz and will indicate to the observer a rising MUF.

BBC TO CLOSES ORDFORDNESS TRANSMITTER SITE

Another famed radio transmitting site has been decommissioned.

This one is owned by the British Broadcasting Company and is not one very many on this side of the world know about.

Unless you are a WIA listener/reader living in Europe or are a truly devoted low frequency DX'er, you likely have never heard of the BBC's transmitter site at Ordfordness.

It's an operation that sat on 648 KHz with a five tower array beamed to Europe. And that's what makes the signal from Ordfordness such a great catch for medium wave D-X listeners.

But all that ended March 27th. That's when the BBC switched off this transmitter site for good.

But its demise will not go undocumented.

As a historical note, Jonathan Marks, G-8-W-G-N, has released a short documentary that traces the history of the Ordfordness transmitter site from its inception. Marks, who was the former producer and host of the famed Radio Netherlands Media Network program is joined by Ordfordness radio engineer Andy Matherson who explains the way in which the site operated.

It's a great tour of a historic moment in European medium wave broadcast radio. You can experience it for yourself on line at vimeo.com/20996209

Another sad moment in broadcast history, but one that Jonathan Marks, G8WGN, has taken the time to preserve.

ATV Video Streaming

All ATV transmissions in Ulverstone are now simultaneously available to any viewer world wide via the VK7AX ATV Video Stream.

If you would like to check it out, point your favourite internet browser at the link that can be found on the email and internet editions of this WIA News broadcast.

http://vk7ax.camstreams.com

The WIA News Broadcasts, and Amateur Radio Related Broadcasts are broadcast via ATV at 8.00 PM daily with a repeat at 11.00 hours the following day.

This is, as yet, unconfirmed.

Bob Roske, N0UF, President of the QCWA, reports that Leo Meyerson, W0GFQ, became a silent key last night at 9:50 pm in the Eisenhower Hospital in Rancho Mirage, CA.

Leo is well known as the founder of World Radio Laboratories. He has made many, many contributions to amateur radio as well as radio communications in general.

==> + PUBLIC SERVICE: HAMS PROVIDE COMMUNICATIONS SUPPORT DURING WEST
TEXAS WILDFIRES

On April 9 at 4:15 PM (CDT), ARRL West Texas District 5 Emergency
Coordinator Bob Ward, WA5ROE, received a call from Jeff Davis County
(Texas) Fire Marshal Stewart Billingsley, N5HXZ. Billingsley informed
Ward that a fire had begun in the West Texas town of Marfa and was
rapidly approaching Fort Davis, 22 miles to the northeast.

"Stewart asked me to call the National Weather Service to get it on the
alert system, as well as the AM and FM radio stations in Alpine," Ward
told the ARRL. "He wanted it broadcast over the radio stations that he
needed the Mano Prieto and Fort Davis Estates sub-divisions evacuated.
```

People in the area know that when an emergency happens, they need to tune into these stations for the latest information. This was the Rock House Fire. At the same time, another fire, the Roper Fire, had started on the eastern edge of Alpine." Read more here <http://www.arrl.org/news/hams-provide-communications-support-during-west-texas-wildfires>.

==> + ON THE AIR: WORLD AMATEUR RADIO DAY SET FOR MONDAY, APRIL 18

The International Amateur Radio Union and its more than 160 Member-Societies that represent countries around the world will celebrate World Amateur Radio Day on April 18. The theme for this year's celebration is Amateur Radio: The First Technology-Based Social Network. Long before the Internet and smart phones, Amateur Radio operators have been talking, texting and sharing for decades. But unlike those commercial services, Amateur Radio continues to attract people worldwide by providing international communications for free. And because it does not need pre-established supporting infrastructure, these radio-savvy "amateurs" can reach out to friends in every corner of the world, as well as into space. Read more here <http://www.arrl.org/news/world-amateur-radio-day-set-for-monday-april-18>.

==> + ON THE AIR: OFCOM TO ISSUE SPECIAL TEMPORARY CALL SIGNS FOR ROYAL WEDDING

If you are a prefix hunter -- or you just get caught up in the pageantry that a Royal Wedding <http://www.officialroyalwedding2011.org/> can bring -- then take note: Ofcom, at the request of the Radio Society of Great Britain (RSGB <http://www.rsgb.org/>), will issue special temporary call signs that British amateurs may use from April 29 through May 9, 2011, commemorating the marriage of HRH Prince William of Wales and Miss Catherine Middleton. Amateurs in the United Kingdom who choose to apply for these special call signs will be using GR, MR and 2R prefixes during this time to commemorate the wedding.

==> + FROM THE HEARTS: PROVIDING A WAY FOR OTHERS TO COMMUNICATE WITH THE ISS

In America and around the world, students use Amateur Radio to talk to astronauts on the International Space Station, orbiting high above the Earth -- and it's the students at an all-girls school in Honolulu, Hawaii who help make the connection. Sacred Hearts Academy is a telebridge station for the Amateur Radio on the International Space Station program (ARISS). ARISS is a NASA-sponsored education activity where astronauts and cosmonauts use Amateur Radio equipment aboard the ISS to talk with students around the world. Telebridge stations, like the one at Sacred Hearts, connect schools, museums and others without their own Amateur Radio equipment to astronauts in space. Read more here <http://www.arrl.org/news/from-the-hearts-providing-a-way-for-others-to-communicate-with-the-iss>.

==> + ARRL WEST GULF DIVISION TO HOST WEBINAR ON ANTENNA ZONING

Periodically, ARRL Divisions will host a "webinar" -- an interactive Web-based seminar, designed to facilitate communication between a small number of presenters and a large remote audience using the Internet -- for interested amateurs. On Wednesday, April 27 at 9 PM (EDT), ARRL West Gulf Division Director David Woolweaver, K5RAV -- along with ARRL General Counsel Chris Imlay, W3KD, and noted antenna zoning lawyer Fred Hopengarten, K1VR -- will present Antenna Ordinances, You and the ARRL. Read more here <http://www.arrl.org/news/arrl-west-gulf-division-to-host-webinar-on-antenna-zoning>.

==> ARRL TO CHANGE INSURANCE COMPANY FOR EQUIPMENT PROTECTION, CLUB LIABILITY SERVICES

On May 1, 2011, the ARRL will begin a new partnership to provide its ARRL-sponsored Equipment Insurance and Club Liability Insurance plans. The League has signed an agreement with Hays Affinity Group to serve as the program administrator to provide equipment insurance to its members who choose to elect coverage. In addition, Hays will also provide club liability insurance to ARRL Affiliated Clubs for those clubs that wish to take advantage of that program. Hays will be replacing Marsh Affinity Group Services as the program's administrator and will be introducing new policies for both plans, underwritten by the Hanover Insurance Company. Read more here <http://www.arrl.org/news/arrl-to-change-providers-for-equipment-protection-club-liability-insurance-plans>.

==> SOLAR UPDATE

Tad "She has burst like the music of angels, the light of the Sun <http://www.youtube.com/watch?v=zM1sVapgUCs>" Cook, K7RA, reports: On Wednesday, April 13, we saw a new high in the daily sunspot numbers for Solar Cycle 24 when it hit 153. Seven new sunspot groups emerged over the past week, and sunspot activity (in terms of daily sunspot numbers) hasn't been this high since the declining side of Solar Cycle 23 in mid-2005. The average daily sunspot numbers rose 21.6 points this week to 89.9. The predicted solar flux values from NOAA/USAF for the near term are 120 on April 14-16, 125 on April 17-20, 120 on April 21 and 115 on April 22-23. The planetary A index for the same period is predicted to be 5 on April 14-17, 7 and 10 on April 18-19 and 5 on April 20-23. Geophysical Institute Prague predicts quiet geomagnetic conditions April 15-17, quiet to unsettled April 18, active conditions April 19 and unsettled conditions April 20-21. Considering that the predicted solar flux for today of 125 is higher than yesterday's reported value of 117.8, it is possible that the sunspot number will also be higher, although these numbers don't always move in tandem. Look for more information on the ARRL website on Friday, April 8. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad

Cookism" is brought to you by In My Life/Heart Full of Love
<http://www.youtube.com/watch?v=zM1sVapgUCs> from the musical Les
Mis&#65533;rables
<http://en.wikipedia.org/wiki/Les_Mis%C3%A9rables_%28musical%29>.

==> AMATEUR RADIO FUN: NEW QUICKSTATS POLL NOW AVAILABLE ON ARRL
WEBSITE

Four new poll questions have just been published on the QuickStats page
<http://www.arrl.org/quickstats> on the ARRL website. Let your voice be
heard!

Questions in this month's QuickStats poll:

- Do you operate HF portable while camping or hiking?
- Have you earned an ARRL Worked All States award?
- How old is your oldest transceiver?
- Do you monitor W1AW transmissions?

Visit the QuickStats page <http://www.arrl.org/quickstats> and be sure
to bookmark it in your browser. Results from this QuickStats poll will
be published in the July 2011 issue of QST on the QuickStats page,
located in the rear advertising section of the magazine. Along with
monthly poll results, QST QuickStats offers colorful charts and graphs
that highlight interesting Amateur Radio statistics.

==> ARRL SEEKS BOOK EDITOR

The ARRL is seeking a Book Editor to manage the production of ARRL
books and other publications, ensuring that they meet ARRL standards.
The successful applicant will be responsible for managing the progress
of all book materials through the production process, tracking current
book inventory and scheduling reprints or new editions as needed,
authoring new books and other materials, and editing and formatting
manuscript materials provided by authors to ensure correct grammar,
punctuation and style. Applicants must hold an Amateur Radio license, a
Bachelor of Arts degree in English, Journalism or equivalent, and 5 to
10 years of experience as a professional newspaper, book or magazine
editor, or corporate technical writer. For more information, including
a complete job description and application details, please see the
Employment Opportunities page
<http://www.arrl.org/employment-opportunities> on the ARRL website.

==> + SILENT KEY: LEGENDARY RECORDING ENGINEER ROGER NICHOLS, KE4BDA
(SK)

Roger Nichols, KE4BDA, of Jupiter, Florida, passed away on April 9
due to complications from pancreatic cancer. He was 66. Nichols was
best known for his work with Steely Dan, whose albums were noted for
their pristine sonic clarity. He collected three Grammy Awards --
including one for Album of the Year -- for his work on the duo's 2000
album Two Against Nature. He also received the Grammy for Best
Engineered Recording for Steely Dan's albums Aja in 1977, Gaucho in

1981 and their film theme FM (No Static at All) in 1978. Nichols collected another Grammy for his board work on John Denver's All Aboard!, named Best Children's Album for 1997. Read more here <http://www.arrl.org/news/legendary-recording-engineer-roger-nichols-ke4bda-sk>.

==> THIS WEEK ON THE RADIO

This week:

- April 15 -- NCCC Sprint
- April 15-16 -- Holyland DX Contest
- April 16 -- Feld Hell Sprint; TARA Skirmish Digital Prefix Contest; ES Open HF Championship; EU Spring Sprint (SSB)
- April 16-17 -- Michigan QSO Party; Ontario QSO Party; YU DX Contest; CQ Manchester Mineira DX Contest; EA-QRP CW Contest
- April 16-24 -- ARLHS Annual Spring Lites QSO Party
- April 17 -- ARRL Rookie Roundup (SSB) <http://www.arrl.org/rookie-roundup>
- April 18 -- Run for the Bacon QRP Contest
- April 19 -- 222 MHz Spring Sprint (local time)

Next week:

- April 22 -- NCCC Sprint Ladder 0230Z-0300Z, Apr 22
- April 23-24 -- South Dakota QSO Party; 10-10 International Spring Contest (Digital); SP DX RTTY Contest; Helvetia Contest
- April 25 -- Low Power Spring Sprint
- April 27 -- SKCC Sprint; 432 MHz Spring Sprint (local time)
- April 27-28 -- CWops Mini-CWT Test

All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests>, the ARRL Contest Update <http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more info. Looking for a Special Event station? Be sure to check out the ARRL Special Event Stations Web page <http://www.arrl.org/special-event-stations>.

==> UPCOMING ARRL SECTION, STATE AND DIVISION CONVENTIONS AND EVENTS

- April 22-24 -- ARRL Idaho State Convention <http://www.arrl.org/hamfests/idaho-state-convention-1>, Boise, Idaho
- April 23 -- ARRL Louisiana State Convention <http://www.arrl.org/hamfests/louisiana-state-convention-twin-city-ham-radio-fest>, Monroe, Louisiana; ARRL North Carolina State Convention <http://www.arrl.org/hamfests/north-carolina-state-convention-raleigh-hamfest>, Raleigh, North Carolina
- May 7 -- ARRL South Carolina State Convention <http://www.arrl.org/hamfests/south-carolina-state-convention-upstate-hamfest>,

Amateur Radio Newsline(tm) Report 1757 - April 15 2011

Amateur Radio Newsline report number 1757 with a release date of
Friday, April 15, 2011 to follow in 5-4-3-2-1.

The following is a Q-S-T. A new record for optical communications by
ham radio is set in the UK, a special callsign prefix to celebrate the
upcoming royal wedding, 6 meters and digital modes may soon return in
France and World Amateur Radio Day is here this week. Find out the
details are on Amateur Radio Newsline(tm) report number 1757 coming
your way right now.

**

RADIO RECORDS: UK HAMS SET NEW OPTICAL COMMUNICATIONS RECORD

A new record has been set for optical communications by a group of
British hams. Jeremy Boot, G4NJH, reports from Nottingham in the U-K:

--

On 3rd April a new distance record set for optical communication by a
group of radio amateurs from North-East England.

The distance worked was just a few meters short of 90km. Signals were
exchanged on FM and SSB at remarkable strengths.

The contact was made from Race Head in County Durham, which is locator
IO94VS to Danby Moor near Whitby, which is locator IO84NK.

The team at Race Head included two stations, Stuart, G8CYW running the
transverter and LED transceiver of his design featured in recent
articles in RadCom, and Brian, G8KPD also running his version of the
designs, plus separate receive and transmit heads. The station on
Danby Moor was operated by Rob, M0DTS using his version of the
transverter featured in RadCom.

I'm Jeremy Boot G4NJH.

--

Truly a ham radio record that you had to have been there to see.
(GB2RS)

**

HAM HAPPENINGS: HAM RADIO TO CELEBRATE ROYAL WEDDING

Amateur Radio in the UK will be a part of the upcoming royal wedding. This with word that the Radio Society of Great Britain has made an agreement with UK telecommunications regulator Ofcom for all UK Radio Amateurs to use special callsigns for a period of eleven days beginning on the date of the marriage of Prince William and Catherine Middleton on April 29th.

Use of the special GR prefix will require UK hams to obtainer a waiver called a Notice of Variation from Ofcom. This can be quickly obtained via a simple process on the RSGB's website, where full details of the arrangements can also be found.

UK amateurs wishing to use the special prefix should visit www.rsgb.org.uk/weddingcall and follow the instructions found there. The last date and time for application is 6.00 pm on April 25th. All Notice of Variation will be provided by close of business on April 28th. No postal applications will be accepted and all of the special permits will be sent by e-mail. (RSGB)

**

RADIO POLITICS: AMSAT FRANCE LEADERSHIP VOTES TO DISSOLVE ORGANIZATION

AMSAT France appears to have disbanded. According to a notice published in Frances URC News on Monday April 11th, 21 leaders present at an Extraordinary General Assembly of AMSAT France voted the weekend of April 9th to dissolve the organization.

The actual vote is reported as 11 votes in favor of going out of business and 10 in favor of continuing. The short news release gave no reason for the decision by AMSAT France to dissolve and go away. The original press release, in French is on line at tinyurl.com/3spvx6l. (URC News, F1MOJ)

**

RESTRUCTURING: FRENCH NATIONAL SOCIETY SEEKS 6 METER ALLOCATION

Still in France, F1DUE, who is the president of the French amateur radio national amateur society, the REF, reports that his efforts to open the 6 meter band for his nations ham operators is ongoing.

As previously reported, last year the REF asked the French frequency regulation authority ARCEP to once again reopen the 50 MHz allocation that was suspended two years ago. Earlier this year the ARCEP informed the REF that it would consider an allocation of 50.0 to 52.0 MHz for use by French radio amateurs.

F1DUE says that the ARCEP placed this proposal on the agenda of the Frequency Planning Commission which was held in March. However, as of airtime, its still unknown as to when the change of the bandplan is finalized and will come into effect. (Southgate)

**

RESTRUCTURING: WORK CONTINUING ON LEGALIZING DIGITAL MODES IN FRANCE

Meantime, the group Digital Radioamateur France says that a March 11th meeting between five French ham radio groups and telecommunications regulator ARCEP. This, regarding the legalization of several new digital could lead to changes to permit their use.

F1SHS is the president of Digital Radioamateur France. In a press release he says that this meeting was a first step in building a new relationship between ham radio and the French telecommunications regulator regarding digital ham radio operations. He says that organizing the get together was the result of 6 months working on a shared document between those groups involved in getting digital modes legalized in his nation. F1SHS thinks that this can also lead to an even larger request from the ham community to ARCEP about three years from now.

(F1SHS via Southgate)

**

RESTRUCTURING: UKRAINIAN HAMS LOOSE FREQUENCIES ON HF AND UHF

Some restructuring news out of the Ukrane that's bad news for ham radio operators in that nation. This, as the Ukrainian government has affirmed new rules for amateur radio operations that have resulted in spectrum losses on the High Frequency, UHF and microwave bands.

According to an e-mail from Alexander Doshchich, UY0LL, the spectrum withdrawn from access by Ukranian hams includes 10.100 to 10.150 and 14.250 to 14.350 MHz on the HF bands. On UHF an above the losses include 1240 to 1300 MHz, 2300 to 2450 MHz, 5670 to 5850 MHz and numerous other spectrum slots right on up to 248 to 250 GHz. (UY0LL)

**

ENFORCEMENT: MIAMI UNLICENSED BROADCASTER HIT WITH $20000 NAL

If you are operating an unlicensed radio station, don't advertise it on the Internet. That's the lesson that Florida resident Marckenson Bazile is learning the hard way as the FCC issues him a $20,000 Notice of Apparent Liability for his alleged operation of an unlicensed radio transmitter on the frequency 103.9 MHz from his residence in the city of Miami.

According to the Commission's March 29th release, on June 16 2010 and again on June 29 2010, Mr. Bazile is alleged to have operated an unlicensed radio station on the frequency 103.9 MHz from his residence. Information on the Internet also showed that Mr. Bazile served as a D-J for a radio station on the frequency 103.9 MHz that the regulatory agency says was an unlicensed operation.

The FCC says that because Marckenson Bazile knowingly operated the station, it finds the apparent violation was willful. Because the operation occurred on more than one day, it also finds the apparent violation was repeated. Based on the evidence before it the $20,000 NAL has been issued to Brazile. He was given the customary 30 days to pay or to file an appeal. (FCC)

**

THE BPL FIGHT: THE BBC REPORTS ON PLT INTERFERENCE TO BROADCASTING

The British Broadcasting Corporation has issued a report investigating the potential interference to broadcast reception from Broadband over Powerline devices which are known in Europe as Power Line Telecommunication or PLT equipment used in the home.

The report says they operation of the PLT Power Line Adaptors caused interference to indoor portable reception of both FM and Digital Audio Broadcasts, in varying degrees from no effect to total disruption. The report notes that the so-called digital cliff effect found in Digital Audio Broadcast reception means that when interference occurs the impact is extreme. The cliff effect is the all or nothing point in all digital broadcasts where you either get pristine reception or none at all.

But that's not all. The Power Line Adaptors were also found to disturb reception of FM using an external antenna at one of the homes that was surveyed. You can read the entire BBC Research White Paper at downloads.bbc.co.uk/rd/pubs/whp. (GB2RS)

CHANGING OF THE GUARD: WORLD RADIO LABS FOUNDER LEO MEYERSON, W0GFQ -S.K.

An era in amateur radio has come to an end. This with word that World Radio Laboratories founder and owner Leo I. Meyerson, W0GFQ, has became a Silent Key.

According to a news release from the Quarter Century Wireless Association, Meyerson passed away on Wednesday, April 13th at the Eisenhower Medical Center, near his summer home in Rancho Mirage, California.

Leo Meyerson, was age 100 at the time of his passing. At airtime funeral arrangements are pending. We will have more about the man and his lifetime contribution to amateur radio in next weeks Amateur Radio Newsline report. (ARNewsline)

RESCUE RADIO: SOCAL HAMS PROVIDE AID IN ANOTHER HOSPITAL PHONE OUTAGE

Two weeks ago, Newsline told you about a phone failure at Childrens Hospital of Orange County and how hams quickly responded to help. Well, it's happened again at another hospital there. Newsline's Joe Moell K0OV is back to tell you the details and to explain why he's not surprised at another outage.

--

A group pager alert at 10:28 AM on April 5 brought members of the Hospital Disaster Support Communications System to Saddleback Hospital in Laguna Hills after a digital equipment failure caused the inbound and outbound trunk lines to become inoperative. Again, the phone number of HDSCS net control was given to Orange County Communications agency so that ambulance companies and other hospitals could contact Saddleback Hospital via ham radio. The outage lasted until 6 PM that day.

--

[audio from activation]

--

Of the 115 times that HDSCS has been activated for communications problems in Orange County hospitals, this was the 85th time that it was due to switchgear or cable failure. Does it seem to you that Orange County has an unusual number of hospital phone failures? Well, not really. HDSCS leader April Moell, WA6OPS, talks to a lot of hospital employees and disaster planners around the country who tell her that they have their share of phone outages too. The causes range from accidentally cut cables to computer failures and power surges. She says that the difference is that most ham emergency groups around the country don't prepare and plan to help in these single-hospital incidents. They don't set up 24-hour alerting plans for the hospitals to use to contact them quickly when phones go down, so they never get the call. Often they don't have portable stations so they can go into the individual hospital units such as the Emergency Department, Pharmacy and so forth to provide unit-to-unit communications.

When a nurse on a hospital unit has an urgent need to contact a patient's physician at his office or home, but the phones are down because switchgear has failed or backhoe has dug up the cables, that's just as severe an emergency as it would be after a hurricane or tornado. So HDSCS plans to help hospitals whenever they need it, not just when all else fails in a big natural disaster.

Orange County hospitals appreciate HDSCS because hams come when they call and they can connect their staff members to the outside, no matter the cause of the communications outage. WA6OPS thinks that other ARES groups around the country should adopt this hospital support model, which includes robust alerting plans for each hospital, regular meetings with the hospital disaster planners, and ready-to-respond members who are trained in the special terminology and communications needs of medical facilities.

More information about HDSCS and its secrets of success are at the Web site of the Hospital Disaster Support Communications System, or HDSCS.ORG. From southern California, I'm Joe Moell K0OV for Amateur Radio Newsline.

--

Another time when ham radio is there when normal lines of communications fail. (K0OV)

PUBLIC SERVICE: VOLUNTEERS NEEDED FOR MAY 1 PROJECT BREAD WALK IN BOSTON

Eric Horwitz, KA1NCF, tells Newsline that ham radio volunteers are needed in the Boston, Massachusetts area. This in support of the Project Bread Walk for Hunger on Sunday, May 1st.

Eric says that this will be the 43rd running of the event and hams are needed to provide communications support for the Project Bread Staff and volunteers along the 20 mile course.

If you are interested in helping please take your web browser to www.mmra.org/wfh/ to log in and fill out the signup form. Questions go by e-mail to wfh11(at)mmra (dot)org (KA1NCF)

**

RADIO LAW: FCC CONSIDERING NEW COMPLEX TOWER RULES

The radio towers-are-killing-migratory-birds debate has moved to a new stage at the FCC. This, as some conservation groups and other federal agencies have prodded the Commission into considering changes that will make its approval process for towers more complex.

And not just new towers are affected. David Oxenford is an attorney with firm of Davis Wright Tremaine. He says that the new requirements proposed by the FCC would affect modifications to existing structures if there would be a substantial increase in size or even changes in lighting.

Two major rule changes are up for public comment. The first is a requirement to give local public notice of the construction of a tower. The second is a possible requirement for an Environmental Assessment.

Oxenford notes that an Environmental Assessment is a document that must be carefully prepared this is not routinely something that an applicants can dash off on their own. What affect if any the passage of these proposed requirements might have on small towers used by ham radio operators on private property is unknown. (RW)

**

HAM RADIO IN CYBERSPACE: NEW NOTE BOARD FEATURE ON QRZ.COM

The popular QRZ dot com ham radio website has added a very unique new feature. Called the Note Board, it gives every QRZ member's callsign access to an on-going collection of messages that are attached directly to their callsign page.

According to QRZ founder Fred Lloyd, AA7BQ, the new Note Board system allows other members on your Friends List to leave messages on your page. Optionally, you may designate an All Friends Mode that lets everybody post to your page.

Lloyd says that each member has full moderation authority for their Note Board and can add or delete postings whenever they like. And regardless of whether you limit the posts to your friends or everybody, you still get to block selected users from your page. (QRZ.com)

**

HAM HAPPENINGS: 2011 AMSAT SYMPOSIUM AND ANNUAL MEETING

The 2011 AMSAT Space Symposium and Annual Meeting will be held November 4th to the 6th at the Wyndham San Jose in San Jose, California. The AMSAT Board meeting will be at the same hotel on Thursday and Friday November 3rd and 4th. A special hotel rate for attendees has been negotiated that includes free Wi Fi, parking and airport shuttle. If you are into ham radio space communications, then be sure to Mark your calendars and plan to attend this event. (WA4SXM)

NAMES IN THE NEWS: WK3N RECEIVES RARE 160 METER WAZ AWARDED.

Some names in the news. First a word of congratulations to James Scott, WK3N, of Hartstown, Pennsylvania. This on both achieving and receiving his 160 meter Worked All Zones award. This award started in 1975 and less than 35 North American stations have ever achieved this level.

**

NAMES IN THE NEWS: WTVT REPORTER WARREN ELLY. W1GUD, ANNOUNCES HE WILL RETIRE FROM WTVT TELEVISION THIS JULY

Warren Elly, W1GUD, who has been reporting news for Tampa Florida's WTVT television is preparing to step away from the Fox-affiliate after nearly 29 years with the station. Elly joined WTVT in 1982, after reporting for Youngstown Ohio's WYTV. He quickly became known in the

Tampa area for his direct reporting style covering crime and politics.

Ham radio wise, Elly was first licensed in August of 1961 as WN1GUD. A Connecticut native, Elly credits amateur radio as the motivation that lead him to his career in broadcasting. He also worked in the amateur radio industry with short detours into publishing with 73 Magazine, manufacturing and marketing at DenTron and Original Equipment Manufacturing Sales as KW Electronics. From there it was onto the broadcast news business with Tampa's WTVT being his home base for close to three decades.

According to his QRZ dot com bio, W1GUD's main amateur radio interest is AM. He has operated that mode on 160, through 10 meters since 1967 and is with the Florida AM Group that meets nightly on 3655 Kilohertz in the 75 meter band. He also enjoys working DX on SSB and CW. And over the years he has reported several hobby radio related stories right here on Amateur Radio Newsline.

Warren Elly also maintains a YouTube Channel for retro broadcast transmitters and allied interests. Its in cyberspace www.youtube.com/user/w1gud. His final day at WTVT is set for this coming July 5th. (ARNewsline from Mediabistro, QRZ.com)

**

NAMES IN THE NEWS: ISS ASTRONAUT AND JETHRO TULL PERFORM FLUTE CONCERT

And NASA says that musical harmony reached new heights. This as astronaut Cady Coleman, circling Earth aboard the International Space Station, and musician Ian Anderson, founder of the rock band Jethro Tull, collaborated for the first space-Earth duet.

Coleman is an amateur flutist. She and Anderson played a portion of the song "Bourree," an arrangement of which Anderson and Jethro Tull performed during their 1969 U.S. tour as Neil Armstrong and Buzz Aldrin stepped on the moon.

Coleman played her part from 220 miles above Earth. Anderson performed his part while on tour in Russia. The two segments were then edited together to form the finished piece.

Coleman and Anderson's performance saluted 50 years of human spaceflight and the anniversary of the first launch of a human to space. Cosmonaut Yuri Gagarin completed that milestone on April 12, 1961. You can see this out of the world flute concert at tinyurl.com/3voo5ed. (NASA)

HAM RADIO IN SPACE: THREE RETIRING SPACE SHUTTLES TO HAVE NEW HOMES

Four space transport vehicles, three of which have a close association with amateur radio will soon have new homes. This after NASA announced on Tuesday, April 12th the new retirement locations for the four remaining space shuttles. Three that flew and the program's ground based test vehicle. Bill Pasternak, WA6ITF, is in the Newsroom with the details:

--

According to NASA, the space shuttle Atlantis will be displayed at the Kennedy Space Center Visitor Complex in Florida. The Endeavour will go to the California Science Center in Los Angeles. Discovery will makes its home at the Smithsonian's National Air and Space Museum in Virginia and the test shuttle, Enterprise, will be displayed on the Intrepid Sea, Air & Space Museum in New York City.

The announcement was made on the 30th anniversary of the space shuttle program's first flight made by the ill-fated Columbia orbiter, and the 50th anniversary of Russian Cosmonaut Yuri Gagarin becoming the first human in space. But it was the first manned ham radio operation by Dr. Owen Garriott, W5LFL, from Columbia during mission STS-9 lead to the creation of the Shuttle Amateur Radio Experiment program which later gave way to Amateur Radio on the International Space Station or ARISS as its known today. Hence the close ties between ham radio and the space shuttles.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF, in the new home of the spaceship Endeavour - Los Angeles, California.

--

During the three decade span of the Space Shuttle program ham radio was a part of many flights. And thanks in good part to former NASA Administrator Jess Moore and the late NBC science correspondent Roy Neal, K6DUE, amateur radio also severed as a back-up communications system that was in place on shuttle flights should all other means fail. (NASA, ARNewline Archives)

HAM RADIO IN SPACE: KA2UPW NEEDS ARISSAT 1 AUDIO FILES

If you made a recording of the transmissions of the ARISSat One satellite while it was operational from the International Space Station in celebration of Cosmonaut Yuri Gagari's 50th spaceflight anniversary, then ARISSat TLM author Douglas Quagliana KA2UPW wants to hear from

you. This, as he issues a request for ARISSat One audio recorded between 14:30 UTC on April 11th and continuing until 10:30 UTC on April 13th.

If you are able to make a recording of the signals from ARISSat-1, Douglas would be very interested in obtaining a copy. He is most interested in the CW and BPSK signals, but if you were able to record the voice and SSTV signals he would like to have those as well.

KA2UOW asks that you save your recordings as .WAV files. Please do not use the popular MP3 format and don't convert the recordings into MP3. This is because the MP3 format compresses the information to create a smaller file and data is lost. He says to leave the recordings as those large .WAV files and contact him by e-mail to dquagliana(at)aol(dot)com for details on how to get the recorded files to him. (KA2UPW/5)

**

RADIO IN SPACE: A MORSE CODE ROVER FOR MARS

A Morse code Rover will soon be headed to the Red Planet. Well, at least one marked in Morse. VK2LAW reports:

--

The Jet Propulsion Laboratory (JPL) choose to put a pattern on the next Martian Rover, named Curiosity. They are in a pattern of short squares and longer rectangles on the wheels almost like dots and dashes in CW.

According to JPL, Curiosity is about the size of a small SUV -- 10 feet long (not including the arm), 9 feet wide and 7 feet tall -- or about the height of a basketball player --and weighs 2000 pounds.

It features a geology lab, rocker-bogie suspension, a rock-vaporizing laser and lots of cameras. Curiosity will search areas of Mars for past or present conditions favorable for life and for conditions

It is set to launch between November 25 to December 18, 2011 from Cape Canaveral, Florida and will arrive on Mars August, 2012. The prime mission will last one Mars year, or about 23 Earth months

I'm VK2LAW reporting.

--

And less we forget. We do know what the pattern of dots sand dashes spells out. Simply the three letters JPL. (WIA News)

**

RADIO SCIENCE: CALL FOR PAPERS FOR ARRL & TAPER DCC

Technical papers are solicited for presentation at the 30th Annual ARRL and TAPR Digital Communications Conference slated for September 16th to the 18th in Baltimore, Maryland. Papers will also be published in the Conference Proceedings but you do not need to attend the conference to have your paper included in the Proceedings. Also, papers will be published exactly as submitted and authors will retain all rights.

The submission deadline is July 31st. Please send papers to Maty Weinberg at the ARRL, 225 Main St, Newington, Connecticut, 06111. You can also submit them by e-mail to maty@arrl.org. (WB8IMY)

**

ON THE AIR: CELEBRATING DJURDJEVEC CROATIA

On the air keep an ear open for special event station 9A11P to be active through the end of the year. This, to celebrate the city of Djurdjevac, Croatia. A special QSL will be issued and all QSOs will be confirmed automatically via the bureau and electronically using Logbook of the World. (OPDX)

**

CONTEST CORNER: FLORIDA QSO PARTY MOVED TO APRIL 30 - MAY 1

And the date of this year's Florida QSO Party has been changed to the weekend of April 30th to May 1st this year. The contest is normally held on the 4th full weekend in April however this year that is Easter. So the decision was made to slip it a week so as not to conflict with family holiday plans. (Florida QSO Party)

**

DX

In D-X, the Pacific-DXer's Web page is reporting that a callsign should soon be issued and permission granted to a group of Polish hams to operate from Nauru during January and February of 2012. This permit will include 60 meters. The call requested is C-21-A.

VE3DZ will be on the air from Barbados as 8P9AA through May 1st. Activity will be on all HF bands using CW, SSB and RTTY. QSL via his home callsign.

Also from Barbados, word that PY2XB, will be active as 8P9XB from St. Philip, Barbados between May 8th and the 21st. Operation will be on 80 through 6 meters using CW, SSB and RTTY. He will also have a 6 meter beacon on at 50.099 MHz. QSL via PT7WA.

OH2YL will be active portable FJ from Saint Barthelemy between April 15th and the 27th. Activity will be on all High Frequency bands from 160 to 10 meters. He will be using CW only on a lower edge of all bands. QSL via OH2YL direct or electronically using Logbook of the World.

9N7DX and XYL 9N7YL will be operational from Nepal between April 13th to the 30th. Operation is primarily on 20, 15, 10 and 6 meters using CW, RTTY and PSK31. QSL via 4Z4DX.

And listen out for A25FC in Botswana from April 14th to the 18th. Activity will be on 80 through 10 meters using CW, SSB, PSK and RTTY. QSL via ON4CJK, either direct or via the bureau.

Lastly, HA5PP will once again be active stroke 5B from Cyprus during the CQWW WPX CW Contest on May 28th and 29th. He will be a single operator single band entrant but his band of choice has not yet been announced. QSL via HA5PP.

(Above from various DX news sources)

**

THAT FINAL ITEM: WORLD AMATEUR RADIO DAY ON APRIL 18

And finally this week, the International Amateur Radio Union, and its member societies representing over 150 countries around the world, will celebrate World Amateur Radio Day on Monday, April 18. The theme for this year's celebration is "Amateur Radio: The first technology-based social network." Amateur Radio Newsline's Norm Seeley, KI7UP, tells us about this years ham radio celebration:

--

According to the IARU and the ARRL, long before the Internet and smart phones existed, amateur radio operators had been talking, texting and sharing their thoughts for decades. But unlike those commercial services, amateur radio continues to attract people world-wide by providing international communications for free. And because it does not need pre-established supporting infrastructure, radio-savvy amateurs can reach out to friends in every corner of the world and into space as well.

Amateur Radio operators have been the leaders in developing many of today's modern electronic and communications marvels. Today the citizens of Earth think of wireless as being the ubiquitous cellular phone - only made possible because of the pioneering work in radio technologies first explored by these "amateurs". Many of our leading electrical engineers draw from their practical experiences as Amateur Radio operators as they continue to develop applications blending computers and radios. Ham Radio operators may be "amateur" because they are unpaid volunteers, but their skills and contributions to the world are of the highest order.

Calling, texting or even using old Morse code on the Amateur shortwave bands can result in chatting with other radio amateurs across town or far across the oceans. While hams have repeatedly been in the news for their life-saving communications services in disasters, a large part of their activities is the excitement and joy of contacting distant and remote areas of the world, learning directly about each others' regions

and lives and trying different ways to make radio contacts around the world.

For the Amateur Radio Newsline, I'm Norm Seeley, KI7UP, in Scottsdale, Arizona.

--

Since 1925, the IARU has been instrumental in coordinating and representing Amateur Radio to the world. For more information about the International Amateur Radio Union please take your web browser to www.IARU.org (IARU, ARRL)

**

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB, the Southgate News and Australia's WIA News, that's all from the Amateur Radio Newsline(tm). Our e-mail address is Newsline (at) arnewsline (dot)org. More information is available at Amateur Radio Newsline's(tm) only official website located at www.arnewsline.org. You can also write to us or support us at Amateur Radio Newsline(tm), 28197 Robin Avenue, Santa Clarita California, 91350

And a reminder that the nominating period for the year 2011 Amateur Radio Newsline Young Ham of the Year Award is now open. Created by Newsline back in 1986, this award is offered to recognize one young United States or Canadian radio amateur age 18 or younger for his or her contributions to society through Amateur Radio.

As in years past, the 2011 recipient will receive an expense paid trip to the Huntsville Hamfest in Huntsville Alabama courtesy of Vertex-Standard Corporation which produces Yaesu brand amateur radio gear. Vertex-Standard will also present this years winner with a special ham radio related gift. CQ Magazine will again treat the recipient to a week at Spacecamp-Huntsville. We at Amateur Radio Newsline will present the winner with a plaque honoring his or her achievements.

All nominations and materials required by the official rules must be received by ARNewsline before June 30, 2011. A downloadable nominating form is at our website at www.arnewsline.org. A nominating form can also be obtained by sending a request along with a self addressed stamped envelope to the Young Ham of the Year Award in care of Amateur Radio Newsline, Inc. 28197 Robin Avenue, Santa Clarita California 91350.

Again, the cutoff date for this year's Young Ham of the Year Award nominations is June 30th. We ask you to do your part by nominating a young ham who has done something special related to ham radio. The nomination form is at www.arnewsline.org

For now, with Bill Pasternak, WA6ITF, at the editors desk, I'm Don Wilbanks, AE5DW, saying 73 and we thank you for listening.

Amateur Radio Newsline(tm) is Copyright 2011. All rights reserved.

GB2RS NEWS

Sunday 17th April 2011

The news headlines:

* Special Temporary Callsigns for Royal wedding

* Celebrate World Amateur Radio Day

* Latest report from the 6 and 10 reporting club published

RSGB has agreed with Ofcom arrangements for all UK radio amateurs to be able to use special callsigns for a period of eleven days beginning on the date of the marriage of HRH Prince William and Miss Catherine Middleton, 29 April 2011. Use of the special prefix, MR, 2R or GR, according to your licence type, is conditional on allocation of a Notice of Variation that can be quickly obtained via a simple process on the Society's website, where full details of the arrangements can also be found. UK amateurs wishing to use the special prefix should visit www.rsgb.org.uk/weddingcall and follow the guidance there. The last date and time for application is 6pm on 26 April 2011. All NoVs will be provided by close of business on 28 April. Please note that no postal applications can be accepted and all NoVs will be sent by e-mail.

The International Amateur Radio Union and its more than 160 Member Societies representing countries around the world, will celebrate World Amateur Radio Day on 18 April. The theme for this year's celebration is Amateur Radio: The First Technology-Based Social Network. Amateur Radio operators have been the leaders in developing many of today's modern electronic and communications marvels.

The Six and Ten Reporting Club is an informal group of radio amateurs, mostly from the UK, who are interested in propagation studies at frequencies around the HF-VHF boundary, mainly the 6 and 10 metre amateur bands. The club produces a monthly newsletter, the Six and Ten Report, that includes analysis of 28MHz propagation based on beacon monitoring, analysis of 50MHz activity reports broken down by propagation mode, reports and discussions on unusual propagation events, compilations of solar and geomagnetic data, lists of activity world-wide, beacon news and results of on-going experiments. The Report is usually published on this site about 5-6 weeks after the end of the month by g7kse at http://g7kse.co.uk/6and10.

The BBC has issued a report investigating the potential interference to broadcast reception from Power Line Telecommunication (PLT) equipment used in the home. Read the BBC Research White Paper by typing `BBC publications WHP195' into your favourite search engine.

Veralum Amateur Radio Club is celebrating its 50th anniversary on Saturday 11 June with a special events day. This will be held on the premises of a school in St Albans in Hertfordshire. All past and present members are to be invited. The Club is anxious to contact all ex members who have lost contact, so they can be invited to join in the celebrations. On the day there will be displays of equipment as well as operating stations including an attempt at an Earth-Moon-Earth bounce. There will be several talks and displays of memorabilia. Celebrations will end with a hog roast. If you are a one time member of the Club and would like to attend this reunion or would like further details, contact the Club Secretary, Ralph G1BSZ, preferably by e- mail to g1bsz@aol.com or by telephone on 01923 265572.

Could any amateurs or clubs planning to take part in this year's Mills on the Air over the weekend 14 and 15 May please register their details on the Denby Dale ARS website www.g4cdd.net or get in touch with Gerald, G3SDY via g3sdy@sky.com as soon as possible.

The East Yorkshire Repeater Group is pleased to announce that a new 70cm D-Star repeater, GB7HU, has been commissioned in East Yorkshire. The new service is the culmination of several years of planning by their committee, along with a successful grant of £9,466 received from the National Lottery Big Lottery fund. The group has also purchased several D-Star transceivers and a high quality generator for use with emergency communications in East Yorkshire. GB7HU was switched on by the RSGB DRM for East Yorkshire, Mario Brashill, G2DPA.

And now for the details of rallies and events for the coming week

Over the weekend of 16 and 17 April, Jim, M0JHW is holding another of his field days at the Sports & Social Club, Harlaxton, Grantham NG32 1HX. There will be plenty of tea and coffee and a BBQ in the afternoon. All are invited to come and meet old friends and make new ones. There will also be ample opportunity to play radio. Details from Jim by e-mail to m0jhwjim@aol.co.uk.

Today, Sunday 17 April, the Kempton Rally is taking place from 10am at Kempton Park Race Course, Staines Road East, Sunbury on Thames TW16 5AQ. There are trade stands, an RSGB bookstall, special interest sections and many other attractions. Details are available on the internet at www.radiofairs.co.uk.

Past RSGB President, Angus Annan, MM1CCR, is a speaker and guest of honour at the Pearl Anniversary Lough Erne Rally today, Sunday 17 April. His busy programme includes a talk about the National Radio Centre at Bletchley Park, the presentation of the Regional Club of the Year Award to Lough Erne Amateur Radio Club and certificates of congratulation to the Club's nine new Intermediate licensees. Further

details at www.loughernerадioclub.co.uk.

Also on Sunday 17 April the Andover Radio Amateur Club Boot Sale is taking place at Wildhern Village Hall and Playing Field, north of Andover just off the A343 at SP11 0JE. Entry is £1.50, with vendors £6 per boot/table or £8 inside the hall. Details from Martin, M0MWS on 01980 612070.

We are not aware of any rallies taking place over the Easter weekend, 22 and 23 April.

Now for the news of special events

GB2SWF will be celebrating the Speyside Whiskey Festival from 23 and 24 April from Craigellachie distillery. Operation will be on HF and 2m, more details are at QRZ.com.

Rockbeare Quarry in Devon hosts GB5RST for Rockbeare Shutter Telegraph from Monday 25th April until Saturday 30th April. Activity will be on all bands from Top Band to 70cm. Full details, including QSL information, on QRZ.com. And now the HF DX news compiled from 425 DX News and other sources

9A11P special event station will be active through the end of the year to celebrate the city of Djurdjevac. A special QSL will be issued and all of the QSOs will be confirmed automatically via the bureau and LoTW. SWL's reports are welcomed, too.

To celebrate the 86th Anniversary of IARU and the Amateur Radio Day a special event station will be active from Mexico with the call 4A0IARU from April 18 to 24. It will be on all bands, all mode, multi operator, multi location. QSL via N7RO and LoTW upload.

TC57A will be operating from the battlefields of Gallipoli and Gelibolu between 21 and 25 April. QSL via the bureau or direct to TCSWAT at PO Box 73 Karakoy, 34421 Istanbul, Turkey.

N2WB is planning to be active stroke HR5 from Honduras between 20 April and 4 May. QSL via N2OO.

A group of German operators will be active from Togo during the period 15 to 28 April. They will be QRV on all bands 10 to 160m using the callsign 5V7CC. QSLs go via DL9MBI.

Anne, OH2YL will be on the Island of St Barthelemy in the Caribbean from 15 £ 27 April signing FJ/OH2YL. Operation will be on CW only. QSL via the home callsign or via Logbook of the World.

Now the contest news

On Tuesday 19 April the 1.3GHz UK activity contest takes place on the 23cm band from 1900UTC to 2130UTC. Operation is all mode and the exchange is RST, serial number and locator.

The 80m Club Championships Data leg takes place on Thursday 21 April from 1900 to 2033UTC. All data modes can be used on the 80m band only. RST and serial number forms the exchange.

Over the weekend of 23 to 24 April it's the SP DX RTTY contest from 1200UTC Saturday until the same time Sunday. Operation is RTTY only, all bands from 80m to 10m. The exchange is RST and serial number; SP stations also send their Province code. And now the solar factual data for the period from the 4th to the 10th April, compiled by Neil Clarke, G0CAS on the 11th of April.

Solar activity varied between very low to low. Small strength C class solar flares took place on the 6th, 7th and the 9th. These had little effect on propagation but on occasions faint coronal mass ejections were observed. Solar flux levels declined from 117 units on the 6th to 105 by the 9th and the 10th. The average was 110 units. The 90 day solar flux average on the 10th was 101 units, that's two units up on last week. The last time the 90 day solar flux average stood at 100 units was in February 2005 during the declining phase of the last sunspot cycle. X-ray flux levels varied little day to day and averaged B2.9 units. Geomagnetic activity was quiet till mid morning of the 6th when a coronal mass ejection arrived. The following disturbance was strong but short lived and at its peak caused a widespread radio aurora that extended down to southern England. The Ap index on the 6th was 26 units and the average was Ap 10 units. Solar wind data from the ACE spacecraft saw solar wind speeds decline from 600 kilometres per second on the 4th to 420 by the next day. Speeds increased on the 6th associated with the disturbance. Particle densities were low every day. Densities on some days were below one particle per cubic centimetre. Bz on the quiet days varied between minus 3 and plus 4 nanoTeslas and between minus 10 and plus 7 nanoTeslas during the 6th.

And now the solar forecast. This week the active side of the Sun is expected to be looking our way. Solar activity is expected to be low bout could increase higher than that on some days. Solar flux levels should increase and later in the week could be approaching the 120's. Geomagnetic activity should be quiet every day, however, a small disturbance could take place around midweek. MUFs during daylight hours at equal latitudes should be around 24MHz for the south and 21MHz for the north. Darkness hour lows should be about 10MHz. Paths this week to Japan should have a maximum usable frequency with a 50 per cent success rate of around 21MHz. The optimum working frequency with a 90 per cent success rate will be about 15MHz. The best time to try this path will be between 0900 and 1200 hours. The second half of April normally sees the start of the summer sporadic-E season for the northern hemisphere. In fact during the 10th a good opening took place on 50MHz to Iberia.

And that's all for this week from the propagation team.

Next, the Local News:

Please note that details of all RSGB-affiliated clubs and societies

can be found on the RSGB website, including email addresses

and website links where known.

[Note to Newsreaders: Please read the local news items appropriate to the service area of your

transmission.]

NEWS FOR THE MIDLANDS On Sunday 17 April Midland Amateur Radio Society Club is visiting Kempton Park Rally. Details from Norman, G8BHE, on 01214 229 787.

On Monday 18 April Gloucester Amateur Radio & Electronics Society is operating on VHF. Contact Anne, 2E1GKY, on 01452 548478, daytime.

On Monday 18 April Leicester Radio Society is holding a committee meeting and general meeting. Contact Alex, G8FCQ, on 0753 120 1640.

On Monday 18 April South Birmingham Radio Society is planning the equipment and site for VHF field day. Contact Don, on 0121 458 1603.

On Monday 18 April South Normanton Alfreton & District Amateur Radio Club is holding a junk sale. Details from A Lawrence, 2E0BQS, by email to adylawri@btinternet.com.

On Monday 18 April Welland Valley Amateur Radio Society is holding its AGM. For more information contact Peter D Rivers, G4XEX, on 01858 432105.

On Tuesday 19 April Derby & District Amateur Radio Society has a technical topics evening. Contact Richard Buckby, by email to radio@dadars.org.uk.

On Tuesday 19 April Loughborough & District Amateur Radio Club is visiting Hermitage FM in Coalville. More information from Chris, G1ETZ, on 01509 504 319.

On Wednesday 20 April Hinckley Amateur Radio Society is having a talk on RAYNET by Kevin Finn, M0KVN. Details from John, M0JAV, on 07836 731544.

On Wednesday 20 April Lincoln Short-Wave Club is having a natter night and putting G6COL on the air. For more information contact Pam Rose, G4STO, on 01427 788356.

On Wednesday 20 April Midland Amateur Radio Society is planning for its 80th year in June and holding training classes. Details from Norman, G8BHE, on 01214 229 787.

On Wednesday 20 April South Kesteven Amateur Radio Society is discussing a visit to the Dambusters Rally and having an informal evening. Contact Nigel, M0CVO, on 01476 402550. On Wednesday 20 April Telford & District Amateur Radio Society is holding its first 2m DF hunt. Contact Mike, G3JKX, on 01952 299 677.

On Thursday 21 April Cheltenham Amateur Radio Association is having three short talks. Contact Derek Thom, G3NKS, on 01242 241099.

On Thursday 21 April Salop Amateur Radio Society is having a demo on wiring RF connectors the right way by Ken, G8DIR. Details on the club website at www.salop-ars.org.uk.

On Thursday 21 April Solihull Amateur Radio Society is having a talk on the development of the superhet receiver by Bill Williams, G8AVX. Details from P T Gaskin, G8AYY, on 0121 628 7383.

On Thursday 21 April South Birmingham Radio Society is having training classes with Dave Murphy, G8OWL. Contact Don, on 0121 458 1603.

On Friday 22 April Coventry Amateur Radio Society is holding a quiz night. Contact John, G8SEQ, on 07958 777363.

On Friday 22 April Hucknall Rolls Royce Amateur Radio Club is holding a quiz. More information from Dave Wilde, G1YAI, on 0844 4355593.

On Friday 22 April Nunsfield House Amateur Radio Group is having a shack night. Details from Ken Frankcom, G3OCA, on 01332 720976.

On Friday 22 April South Birmingham Radio Society is holding a construction evening. Contact Don, on 0121 458 1603.

On Saturday 23 April Lincoln Short-Wave Club is in the shack. For more information contact Pam Rose, G4STO, on 01427 788356.

NEWS FOR THE NORTH OF ENGLAND On Monday 18 April Angel of the North Amateur Radio Club is on the air and having a natter night. Contact Nancy Bone, G7UUR, on 0191 477 0036.

On Monday 18 April Sheffield Amateur Radio Club is having a quiz or video evening. More information from Peter Day, G3PHO, by email to sarc@g3pho.org.uk.

On Monday 18 April Thornton Cleveleys Amateur Radio Society is having an auction with Mick, G4EZM. Details on the web at www.tcars.org.uk.

On Tuesday 19 April Chester & District Amateur Radio Society is having a talk on Summits On The Air by Tom Read, M1EYP. Details from Barbara Green on 07957 870770.

On Tuesday 19 April Halifax & District Amateur Radio Society continues its Foundation and Intermediate training plus further investigations into a simple give-away crystal set kit. Contact Martin, M0GQB, on 01422 341317. On Tuesday 19 April Stockport Radio Society is having a talk on wireless propagation in WWII. More information from Nigel Roscoe, on 07973 312 699.

On Wednesday 20 April Denby Dale Radio Club is having part 2 of the talk on power supplies by Ian, G4LUG. Details from Richard, M0RBG, on 07976 220126.

On Wednesday 20 April Grimsby Amateur Radio Society is having a natter night. Contact Cliff, G4YHP, on 01472 328 830.

On Wednesday 20 April Hornsea Amateur Radio Club is holding a fox hunt. Contact Gordon MacNaught, G3WOV, on 01377 240573.

On Wednesday 20 April Mid-Cheshire Amateur Radio Society is having a talk on first contact by G8NKX. Contact Peter Paul Fox, G8HAV, on 01606 553401.

On Thursday 21 April Grimsby Amateur Radio Society is taking part in the RSGB 80m CC. Contact Cliff, G4YHP, on 01472 328 830.

On Thursday 21 April Hornsea Amateur Radio Club is taking part in the 80m CC Data. Contact Gordon MacNaught, G3WOV, on 01377 240573.

On Thursday 21 April Ripon & District Amateur Radio Society is having a talk on stealth antennas for the basement and flat dweller. Details from Rob Hall, M0RBY, on 0787 608 5631.

On Thursday 21 April South Manchester Radio and Computer Club is closed For Easter. Details from Ron, G3SVW, on 0161 969 3999.

On Thursday 21 April Wakefield & District Radio Society is on the air and holding a committee meeting. Contact Ken, 2E0SSQ, on 07900 563117.

On Saturday 23 April Wakefield & District Radio Society continues its Foundation, Intermediate and Advanced courses. Contact Ken, 2E0SSQ, on 07900 563117.

On Saturday 23 April Wakefield & District Radio Society Club is having its annual dinner at the Cock & Crown in Crofton. Contact Ken, 2E0SSQ, on 07900 563117.

NEWS FOR NORTHERN IRELAND No news items have been received for Northern Ireland this week.

NEWS FOR SCOTLAND On Tuesday 19 April Livingston & District Amateur Radio Society is having a club evening. Details from Norman, on 07740 946192.

On Wednesday 20 April Ayr Amateur Radio Group is holding its AGM. Details from Tom Ferguson, GM1OST, on 01292 532 088.

On Wednesday 20 April West of Scotland Amateur Radio Society has Solder Group homebrew projects & licence training. More information from Fred Coombes, 2M0BIN, on 01415 715512.

On Thursday 21 April Aberdeen Amateur Radio Society is on the air ad having a construction evening. More information from Lewis, GM4AJR, on 01224 575 663.

On Friday 22 April West of Scotland Amateur Radio Society is having presentations, guest speakers, a quiz and a raffle. More information from Fred Coombes, 2M0BIN, on 01415 715512.

SARL NEWS - SUNDAY 16 APRIL 2011

You are listening to ZS6SRL, the official radio station of the South African Radio League, the national body for amateur radio in South Africa, with a news bulletin every Sunday at 08:15 CAT in Afrikaans and at 08:30 CAT in English. To listen to a web stream, visit www.sarl.org.za, click on 'ARMI' and follow the links for details. PLEASE NOTE: for audio via Echolink, connect to ZS0JPL-R.

You can download this bulletin and previous ones from www.sarl.org.za and also subscribe to receive future bulletins by e-mail. Your newsreader this morning is (name), (call sign), on 145,725 and 7,066 MHz from Pretoria, with relays on 7,066 and 3,695 MHz SSB.

In the news today

SARL AGM REPORT

GALA DINNER AND SARL AWARDS

You are listening to ZS6SRL. Stay tuned for more details on these and other important and interesting news items.

SARL AGM

The SARL AGM was held yesterday at the Vaal University of Technology and was attended by 60 members present. There were 284 proxies. The annual report and the financial report were approved as published. Rassie Erasmus, ZS1YT, explained the budget as well as the the budgeted expenditure for the 2011 IARU conference. John Willescroft, ZS6EF, discussed the planned courses and the planned income. The budget was approved unanimously.

The AGM then proceeded to discuss the motions. The validity of the motion 1 was questioned. The Chairman explained that the motion was received before the closing date and was signed by the proposer and seconder. Richard, ZS6UK, proposed an amendment. The amendment was voted on and carried with 254 in favour and 13 against. The amendment amounts to that councillors will serve for two years and that 50% retire annually.

Motion 2, that the Forum is only open to members ,was carried unanimously. An amendment was proposed to have two forums one for members and one for non-members. The amendment was defeated by 254 against and 4 votes in favour.

The meeting adjourned to attend a presentation about physics by Tony Voorveld, ZS6CCD. The meeting resumed at 12:45. Under general various members asked questions around the regulations and the HAREC certificate.

The meeting closed at 13:40.

A brief Council meeting was held. Dennis Green, ZS4BS, was re-elected as President and Mark Zank, ZS6YES, as Vice President. Other portfolios will be discussed at the first council meeting. The following councillors were declared elected as only 15 nominations were received and one nomination was withdrawn, The other council members for the 2011/2012 are as follows: Henry Chamberlain, ZS1AAZ Hans van den Groenendaal, ZS6AKV Fred Scheepers, ZS1FCS Mark Zank, ZS6YES Laurie Devereux, ZS5DL Francois Botha, ZS6BUU Gerhard Coetzee, ZS3TG John Willescroft, ZS6EF Frik Wolff, ZS6FZ Riaan Greeff, ZS4PR Willem Weideman, ZS6WWJ. Geoff Levey, ZS6GRL.

Congratulations to you all, be assured of our loyal support for the new year of duty.

A motion of thanks for the National Convention arrangements by the Vaal and Sasolburg Amateur Radio Clubs was proposed and unanimously accepted.

GALA DINNER AND SARL AWARDS

We noted that the names of a Past President of the SARL, Chris Turner, then ZS6GM, and Gerald Klatzko, ZS6BTD, who I think is the oldest Honorary Life Member of the SARL, appeared on somewhere in the AGM papers. We presume that they would have had something to say during the course of the gala dinner on Saturday evening. Best of luck to them.

The gala dinner was interrupted by the presentation of SARL Awards, which was done by ZS6P, Tjerk Lammers, the awards manager of the SARL.

It is to be noted that Honorary Life Membership and Jack Twine Merit Awards are awarded once only to a particular person and are in recognition of meritious work done for the SARL over a period of membership. All the other awards are for achievements by individuals during the the past financial year. The awards are:

Honorary Life Membership. Dave Perry. ZS1SG.

Jack Twine Merit Award. Petrus Coetzee, ZR1DE Terry Cotton, ZS1AYJ S K White, ZS1BSD Graham Butler, ZS1GVB Klaus Knopf, ZS1QO Ivan Newman, ZS2ILN Ronnie Verhoeven, ZS4RY Chris Burger, ZS6EZ Dirk du Plessis, ZS1DDP Fred Scheepers, ZS1FCS Andries Visagie, ZS6VL Frik Wolf, ZS6FZ Riaan Greeff, ZS4PR Joop Hesp, ZS6C Deon Heydenrych, ZS1G.

President's Award. Graham Griggs, ZS2ABK.

Icom Excellence Award. Hannes Coetzee, ZS6BZP.

Arthur Hemsley 2 metre Trophy. Peter Tottle, ZS2ABF.

Barney Joel Trophy. Rassie Erasmus, ZS1YT.

Joseph White Plaque. Willem Badenhorst, ZS6WAB Pine Pienaar, ZS6OB

Bert Buckley Six metre Trophy. Andre Botes, ZS2ACP.

Radio ZS Shield. John Green, ZS1JHG

J J Pienaar Trophy. John Willescroft, ZS6EF

Gary Immelman RA Heritage Award Floating Trophy. Vidi la Grange, ZS1EL.

Arland Ussher Gold Pen. Guido Costa, ZS1UHF Warren Reilly, ZS4W Renier Siebrits, ZS1MIR.

Silent Keys Memorial Trophy, SSB. Jan Botha, ZS4JAN.

Silent Keys Memorial Trophy, CW. West Rand ARC, ZS6WR.

Joseph White Trophy. Jan Botha ZS4JAN

Fred Mills Trophy. Thian de Jager, ZS2Y Marius Preston, ZS2MP.

Anon Trophy. Bruce Dunn, ZS5XT.

HOS Trough. West Rand ARC, ZS6WR.

The Club or Branch Participation Award. West Rand ARC, ZS6WR.

The "Ray Webber, ZS6RSW" VHF/UHF Trophy. Magalies Radio Amateur Club, ZS6MRK.

The SARL 80 m Club Contest Trophy. West Rand ARC, ZS6WR.

Hamnet. Chris Gryffenberg, ZS6COG.

Hearty congratulations to all the recipients.

CLUB NEWS

The next flea market of the West Rand Amateur Radio Club will take place at 12:00 on Saturday 30 April 2011 at their club house in Kroton Street, Weltevredenpark, Roodepoort. Everyone is very welcome. For more information, contact Phillip, ZS6PVT, at 083 267 3835.

PROPAGATION REPORT

Hannes Coetzee, ZS6BZP, reports that the solar activity is at moderate levels. Numerous C-Class flares are taking place around both sprawling Sunspot 1 190 and new Sunspot 1 193. The solar flux is trending higher thanks to all of the recent sunspot activity. The official Sunspot number count of 153 on Wednesday was a new record for Cycle 24. The effective sunspot number is expected to be around 75 for the coming week.

15 m will provide the best opportunities for DX followed by 20 m. With the higher sunspot activity 10 m will open first followed by the lower bands later during the day. Conditions to India will be good from the

afternoon till after sunset. During the late afternoons conditions will be good towards Europe. Fair contacts with the USA are possible during the evenings. Contacts with Australia are possible on 15 m at sunrise and 20 m after sunset. Openings to Brazil and South America are possible during the afternoons. With the good 15 and 20 m openings 17 m and 12 m will also be full of surprises.

For the CW and digital enthusiasts 30 m may be very rewarding with openings to many parts of the world.

Locally is 40 m the work horse for contacts around the country with 20- and 30 m also being very useful for contacts over the longer distances. 80 m will be best during the early mornings and late afternoons as well as over the shorter distances.

80 m is the frequency of choice during the evenings.

Please visit www.spaceweather.co.za for further information.

DIARY OF EVENTS

30 April - West Rand Amateur Radio Club flea market from 12:00 CAT. 7 May - RTD in Cape Town. 18 June - Programming in Windows course in Gauteng. Book at www.sarl.org.za.

SARL News invites clubs and individuals to submit news items of interest to radio amateurs and shortwave listeners. Submit news items - if possible - in both English and Afrikaans to www.sarl.org.za/newsinbox.asp, not later than the Thursday preceding the bulletin date.

The SARL also invites you to listen to Amateur Radio Today every Sunday morning at 10:00 CAT on 145,750 MHz in the Pretoria area, with relays on 7 082, 7 205 and 17 750 kHz. There is also a podcast by ZS6RO. For a web-stream and Echolink by ZS6FCS, visit www.sarl.org.za, click on 'ARMI' and follow the links. A repeat transmission can be heard on Mondays at 18:30 CAT on 3 230 kHz. Sentech sponsors the ARMI transmissions on the non-amateur frequencies.

You have listened to a bulletin of the South African Radio League, compiled by George, ZS6NE.

Thank you for listening, 73.

Ukrainian Radio Amateurs Lose Many Frequencies and Bands
Dear friends,

11.03.2011

Ukrainian government has confirmed the new rules for radioamateurs. We lost
following frequencies: 10100-10150 kHz, 14250-14350 kHz, 1240-1300MHz,
2300-2450 MHz, 5670-5850 MHz, 10-10,1GHz, 10,15-10,5GHZ, 24,05-24,25GHz,
76-77,5GHz , 78-81GHz, 122,25 -123,0GHz , 134-136GHz, 136-141GHz,
241-248GHz, 248-250GHz.

NZART AWARDS
The NZART Awards Manager will be away from 9 May-2011 till the end of
June-2011.

If you are going to send an application for an award please have it to me
before the end of April. You are welcome to send it to my Call Book address.
(You will get a quicker response if you do.)Otherwise hold the application
until the end of June.

73

Alan Chapman ZL3GX

NZART and IARU Region 3 Awards Manager

****

>From The Business Manager ZL2DL
Debby says...
The following has been received from the Radio Spectrum Management, in
regard to the 'E', 'X' and 'Y' call signs.

We will soon be releasing "E, X and Y callsigns" to the amateur service. A
new edition of PIB 46 permitting the use of the new series will be emailed
to all ARX's in June. The effective time and date from which you are
permitted to allocate the new series is:

Noon, Wednesday 22 June 2011

Until then, ARX's are not permitted to allocate "E, X and Y callsigns". For
the purposes of ensuring allocations are not made in SMART before this,
current NZ time can be found at:
http://www.rsm.govt.nz/cms/tools-and-services/contact-us

Please read PIB 46 carefully, particularly the callsign appendix. On 22 June
SMART will process ARX allocations on a "first come, first, served" basis.

While the current edition of PIB 46 does not permit the allocation of these
series, a small number of "E" callsigns have already been issued in error.
Withdrawing these now would cause unnecessary costs, especially in the
context of QSL cards etc, so they will be permitted to remain.

Regards

Wayne Wedderspoon | Senior Advisor | Radio Spectrum Management

Break In...Due to the Christchurch earthquake on the 22nd February, Break In has been delayed. I understand from the mailing contractors that the magazine was dispatched on Tuesday 12th April. If you do not receive your copy in the next few days, please contact me at HQ.

I am presently on leave until the 26th April, however leave a message or send me an e-mail and I will rectify the problem if possible.

Talk soon...Debby ZL2DL

FMTAG Notes For Infoline-228
Please click HERE to go to the FMTAG Applications Being Processed

FMTAG at VHF Convention 2011 (23-24 April)
FMTAG has been invited to attend the Forum session of VHF Convention 2011, at Easter, next weekend. Details of VHF Convention can be found elsewhere in this issue of HQ Infoline.

Proposals
1.. Branch 74 Wellington VHF has applied to increase the power of, and add the P25 digital mode to, its Colonial Knob 7075 Voice and Data 2-metre repeater, located at Topo50 map reference BP31 513.49 426.17. An Engineering Evaluation, in accordance with the MED's Radio Licence Certification Rules (PIB38), shows that the transmit frequency can remain on 147.075 MHz and the receive frequency can remain on 147.675 MHz, and that there will be no interference to other stations.
Final Recommendations to NZART Council
Published on the NZART website, and in NZART HQ Infoline for the information of, and inviting comments from, NZART members.

At its April 2011 meeting, NZART Council approved the following Final Recommendations.

1.. Branch 83 Raglan has applied for a 2 metre Voice and Data repeater at Ward Street, Topo50 map reference BD33 007.88 154.66. The transmit frequency will be 145.350 MHz and the receive frequency will be 144.750 MHz. An Engineering Evaluation, in accordance with the MED's Radio Licence Certification Rules (PIB38), shows that there will be no interference to other stations.
2.. Branch 83 Raglan has applied for a 70 centimetre Voice and Data repeater at Ward Street, Topo50 map reference BD33 007.88 154.66. The transmit frequency will be 439.425 MHz and the receive frequency will be 434.425 MHz. An Engineering Evaluation, in accordance with the MED's Radio Licence Certification Rules (PIB38), shows that there will be no interference to other stations.
3.. Branch 74 Wellington VHF has applied to relocate its 2 metre Bulletin Board to Ngaio Reservoir, Topo50 map reference BQ31 494.92 316.02. An Engineering Evaluation, in accordance with the MED's Radio Licence

Certification Rules (PIB38), shows that the transmit frequency can remain on 146.025 MHz and the receive frequency can remain on 146.625 MHz, and that there will be no interference to other stations.
4.. Branch 74 Wellington VHF has applied to relocate its 70 centimetre Bulletin Board to Ngaio Reservoir, Topo50 map reference BQ31 494.92 316.02. An Engineering Evaluation, in accordance with the MED's Radio Licence Certification Rules (PIB38), shows that the transmit frequency can remain on 434.875 MHz and the receive frequency can remain on 439.875 MHz, and that there will be no interference to other stations.
5.. Branch 74 Wellington VHF has applied to change the frequency of the 70 centimetre repeater located at Ngaio Reservoir, Topo50 map reference BQ31 494.92 316.02. The transmit frequency will be 434.550 MHz and the receive frequency will be 439.550 MHz. An Engineering Evaluation, in accordance with the MED's Radio Licence Certification Rules (PIB38), shows that there will be no interference to other stations.
Comments and Applications
Please send your comments and suggestions on the above matters and recommendations, and on any other FMTAG matters, by e-mail to: fmtag@nzart.org.nz

Applications for repeaters, beacons, digipeaters, point-to-point links, and so on, should be made on the latest version of FMTAG Form 10. The latest versions of FMTAG Form 10, and the explanatory Form 10A, are available on the NZART web site:
http://www.nzart.org.nz/nzart/fmtag/

Completed forms should be sent by e-mail to fmtag@nzart.org.nz

Change of IARU Region 3 Secretary
Dear Colleagues

The Directors of IARU Region 3 very much regret to announce the resignation for personal reasons of Seiichi (Jay) Oka JA1TRC as Secretary of IARU Region 3 from 9 March 2011.

Jay became Assistant Secretary to Keigo Komuro JA1KAB then the IARU Region 3 Secretary in September 1998 and on Keigo?s resignation, Secretary in June 2009.

The Directors have formally recorded their acknowledgement of his contribution to amateur radio and IARU Region 3 over so very many years.

As required by clause 41 of its Constitution, the Directors have appointed Katsumi (Ken) Yamamoto JA1CJP as Secretary of IARU Region 3 on the nomination of JARL.

In nominating Ken as Secretary, JARL President Shozo Hara JA1AN reaffirmed his society?s strong and continuing support of IARU Region 3 and its secretary, at the same time stressing the importance of the regional secretary?s independence from any member society.

Ken holds a Bachelor of Science degree in electronics engineering and worked for KDD, now KDDI, in the satellite communications field for many years.

During that time he worked in many countries, including five years stationed in the United Kingdom working with the International Maritime Satellite Organisation.

He retired from KDDI in 2002.

Ken is currently head of the JARL International Section on a part time basis.

He was first licensed as a radio amateur in 1967 and today continues to have an active interest in DX and contests.

He was a member of the Japanese delegation representing the amateur service to the recently concluded ITU Conference Preparatory Meeting for WRC 2012.

I am very confident that Ken will make a significant contribution to IARU Region 3 and I am delighted that he has accepted this appointment.

Sincerely
Michael Owen VK3KI
Chairman
IARU Region 3

Thanks to Peter ZL2SJ

DX Code of Conduct Update
The DX Code of Conduct can be found here:http://dx-code.org/

Update 2011-04-09

We have received over 12,700 unique visitors to our website. This is a significant accomplishment given that we have now been "in business" for just a year and our budget is zero. Over 80% of the visitors are NOT from the U.S.A. so we are achieving our goal of having this be a truly universal, international movement.

We have added more clubs and more DXpeditions who endorse the Code. Feedback from some DXpeditions suggests that we are making good progress.

We have recently developed a new logo. We should have done this a year ago but getting it translated into over 30 languages seemed more important at that time. So here it is.

I hope each of you will put this on your website or QRZ.COM page and use it as a link. Ideally, every DXer, particularly the ones who NEED to align their operating practices with the Code, will see it and realize how strong the support is.

To that end, it is incumbent on each of you to carry this message

1.. to your HF operator friends, particularly DXers,
2.. to your club, especially if it is a DX club,
3.. to your national society and encourage them to send information about the Code to their memberships and to post the logo at their society website
Get EVERYONE to put the logo up on the web so we can increase our visibility.

We have a Power Point that is intended for use at Club meetings. It is available with an audio track, or you can narrate it yourself.

Finally, we have a new publication at the website THE NEW DXER'S HANDBOOK by K7AU at http://dx-code.org/newdxer.pdf I think you will find in enjoyable, even if you are a pro. Tell your club about it and make sure that new members get a copy. After all, it's an e-book and it's free.

I want to thank the many who have written encouraging words of support to me. It means a lot to the Committee and I know this project means a lot to you too. I always am delighted to get feedback so keep the e-mails coming. Respond to w6sj@arrl.net

For the DX Code of Conduct Committee

Randy W6SJ

Wide Bandwith Digital Modes on The Major HF Bands -
Comments By ZL2TLD
What is it with the wide-bandwidth digital emissions within the traditionally narrow-bandwith portions of the 20, 30 and 40 m band (amongst others)? PSK31, QRSS, and other modes are going on, yet these automated, unattended stations blat away whenever they please.

Others suggest that it is PACTOR-3 - used by mainly marine-mobile hams for internet email access. The content seems to be encrypted, yet the callsigns are unencrypted. Suggestions are that the (encrypted) content is unlikely to fall within the amateur non-commercial, without pecuniary interest categories, being internet email.

I think that this type of communication is outside the defined bounds of digital communications on the amateur bands, as the content is not clear, and the stations do not appear to listen before transmitting, causing interference to other narrowband digital users.

If this type of communication is deemed to be within the Amateur service, I suggest that these types of BBS or Mailbox systems could be appropriately shifted to the very top 10 or 20 kHz of the 15, 20 and 40 m bands, as the very top ends of these band are quite underused. This could be an appropriate use of the upper end of the bands, encouraging use of the whole band, and discouraging commercial or pirate incursion.

Glenn in Masterton ZL2TLD

=======

John ZL1GWE Comments:

NZART Monitoring Service Coordinator Replies
There are some experimental work going with DRM transmissions, especially with the Australians on particular transmissions - there are some fixed frequencies..

I will dig out the frequencies and verify what I know.

But they send the identification within the transmission as a picture for instance.

It is legitimate, if it is DRM, sending pictures via Amateur Radio, it just uses a different encoding system.

One can use a software tool called EasyPal (I will check this, verify) I raised this in one of my monthly reports and within Break-in

I actually carried out a dialogue with the Aussies about it.

It would be good if the person could actually provide details on when/date/time and frequencies used, so that we can verify whether they are amateur or commercial.

It goes back to the issue of people reporting what they suspect might be an intruder or not.

When I heard the DRM transmissions for instance on 40M, I immediately investigated and followed up the the people involved and they responded, providing me with additional information on what they were doing - they were Radio Amateurs for instance.

If they provide information to us (intruder watchers) we can investigate and verify plus provide an update or report any commercial systems as intruders

etc.

With no information, we cannot support them - we need their ears and hands to report what they suspect and we can then go out and verify it.

We need their support. I have also previously mentioned EasyPal for DRM digital transmissions within Break-in too.

I have commercial rated software from http://www.wavecom.ch/, to decode and identify these transmissions, if they give us samples or frequencies, so we can capture them live.

John ZL1GWE

=======

Further Comment From The NZART Monitoring Service Coordinator ZL1GWE
I have done some more research in this area:

A recent RSGB article in April 2011 RADCOM on Data Mode Identification:

The level of data modes in use has grown massively with many sub modes and speeds.

Patrick Lindecker, F6CTE, the author of the popular data mode package. Multipsk, has introduced a robust identifier that is sent as a short burst before each data transmission.

The receiving station detects this, with Multipsk automatically setting itself as soon as the identifier is detected.

The signalling burst is known as the Reed Solomon Identifier (RSID) from the robust error correction scheme it uses.

Through the use of Multipsk it is possible to identify the actual signal and data mode.

Yahoo Digital Radio Group: http://groups.yahoo.com/group/digitalradio/

RSID details http://www.w1hkj.com/RSID_description.html.

I support Glenn's suggestion, it would be a good idea to use some of the wider modes i.e. SSTV digital version and DRM on the higher end of bands to occupy them.

It would also disrupt many of the non-amateur transmissions or intruders we often find.

John ZL1GWE

John has also supplied a list of Digital Communications Modes and Frequencies. See these at:
http://www.nzart.org.nz/info/map-bp/digital-modes-freqs/

IntruderWatch - OTHR (Over the Horizon Radar) 80m
We have never come across Over the Horizon Radar on 80 meters. However any thing is feasible.

With my ears, it sounds very similar to the Stereo Radar system, which has been plaguing the 40 meter band in the CW and digital segments.

Any reports, are as always welcomed - samples would be appreciated, if heard.

Jock White Field Day Results Delayed
The reults for Field day would normally be ready for release by now.

Unfortunately this year four branches have failed to submit logs. This makes my life a lot harder as I have no idea whether or not these stations were valid for branch points. I do not have the time this year to plough through other entries counting contacts made to sort this out.

I have tracked down two of the branches so far and are working on two more.

If you were active as a field station and have not sent in a log, please contact me ASAP at:

zl2tw@nzart.org.nz

Alternative Programme 2011
Saturday 4 June 2011
9.50 am - Board our NCS Bus and travel to Wellington

10.30 am - Tour of Parliament - no cameras or cellphones allowed in here!

11.30 am - Short tour of Old St Pauls Anglican Church

12 noon - Back on our bus and we head for Lunch at Te Papa

12.30 pm - 1.30 pm - Free time at Te Papa to visit exhibits

1.40 pm - Back on Bus to travel to Lambton Quay

1.40 pm - 2.45 pm - Free time shopping along Lambton Quay (including Kirkcaldies)

2.45 pm - Arrive by foot at Cable Car and travel to Kelburn where we will be picked up by the bus and taken to the Wellington Botanical Gardens

3.00 pm - Afternoon Tea at the Picnic Cafe - after afternoon tea feel free to wander around the gardens and the Summer House

4.15 pm - Back on the bus to go back to the Retreat

5.00 pm - Arrive back at Silverstream

Sunday 5 June 2011
10.00 am - Board our Tranzit Bus and enjoy travelling over the scenic Rimutaka Ranges

11.15 am - Arrive at Te Kairanga vineyard for tastings

12.15 pm - Lunch at the Village Cafe Martinborough - a yummy platter along with a glass of wine and coffee. Afterwards enjoy a wander around Martinborough Village

1.30 pm - Wine tastings at Muirlea Rise - a lovely family owned vineyard - enjoy Shawn's humour and lovely reds.

2.30 pm - Depart for Greytown where you will have 45 minutes to wander this historic village which is full of boutique shops and maybe taste some yummy Schoc Chocolate!

3.45 pm - Depart Greytown travelling back over the Rimutakas - stopping on the way back at Stonestead for Devonshire Teas and a visit to the Quiltery.

5.30 pm - Arrive back at Silverstream

*** SPECIAL NOTICE FROM THE EDITOR (by KB8NW): There will be NO BULLETIN next week due to the holiday. I will be heading south, to Murfreeboro, Tennesee, to see my daughter for the Easter weekend. However, PLEASE continue to send your DX info to me (I should have InterNet access), and if any special announce are announced, I will probably send it out from there.... 73 and GUD DX de Tedd KB8NW

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 10th-April, through Sunday, 17th-April there were 233 countries active. Countries available: 3A, 3B8, 3D2, 3DA, 3V, 3W, 4J, 4L, 4O, 4S, 4X, 5B, 5H, 5N, 5R, 5T, 5V, 5W, 5X, 5Z, 6W, 6Y, 7P, 7Q, 7X, 8P, 8R, 9A, 9H, 9J, 9K, 9L, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A2, A4, A5, A6, A7, A9, AP, BV, BY, C3, C5, C6, C9, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FH, FJ, FK, FM, FO, FP, FR, FR/j, FS, FW, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HB0, HC, HI, HK, HL, HP, HR, HS, HZ, I, IS, J2, J3, J5, J6, J7, JA, JT, JW, JY, K, KG4, KH0, KH2, KH6, KH8, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OJ0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ4, PJ5, PJ7, PY, PZ, R1FJ, S2, S5, S7, S9, SM, SP, ST, SU, SV, SV/a, SV5, SV9, T32, T7, T8, TA, TF, TG, TI, TJ, TK, TL, TR, TT, TU, TY, TZ, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V6, V7, V8, VE, VK, VP2E, VP2V, VP5, VP6, VP8, VP9, VQ9, VR, VU, XE, XT, XU, YA, YB, YI, YJ, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZD7, ZD8, ZD9, ZF, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

4K, AZERBAIJAN. Yuris, YL2GM, will be active as 4K3AC between April 25th and May 3rd. Activity will be on all HF bands using 100w and operating CW, SSB and RTTY. QSL via his home callsign.

4W6, TIMOR-LESTE (Update to OPDX.1005). Steve, 9M6DXX, has reportedly has been issued the individual callsign 4W6AA for the upcoming September 16-26th, -- 2011 4W6A DXpedition. QSL 4W6AA via M0URX. For more information, please vist: http://www.4w6a.com

6J5, MEXICO (Special Event). Members of the Asociaci&#65533;n de Radio Experimentadores del Estado de Puebla A.C. (AREEPAC) will be active as 6J5M between 0000z May 1st, through 0459z May 6th. Activity is to celebrate the 149th anniversary of the Cinco de Mayo Battle. QSL via XE1AMF. On May 5th, activity will be mainly from "Guadalupe Fort" (Grid Loc.: EK09vb). See pictures on QRZ.com. A special award will be avalable. See details at: http://diploma.puebladx.org

A6, UNITED ARAB EMIRATES. Sergej, UA9B (ex-UA9BI) is now active as A6/UA9B until April 22nd. Activity will be holiday style (as a guest operator of A65BR) and will be on 80-10 meters using mainly CW with some SSB. QSL via his home callsign or by the Bureau via UA9AB.

CR3/CT9, MADEIRA ISLANDS. Operators Diethelm/DJ2YE, Dieter/DJ8DS, Ulrich/DJ9IE, Detlef/DK3QZ, Hans/DL1XW, Kai/DL3HAH and Rein/PA0R will be active as CR3L from Santana, Madeira Island (AF-014) during the CQWW WPX CW Contest (May 28-29th) as a Multi-? entry. QSL via DJ6QT. Operators will probably be active as CT9/homecall before and after the contest between May 24-30th. Activity will be mainly CW with some SSB. Checkout the CR3L station's Web page at: http://www.cr3l.de

CR6, PORTUGAL (Special Event Cancelled). Members of the Algarve STAR DX Team were expected to be on air as CR6A from "The Submerged Fortress" in the sea near Olhao city in the southern part of Portugal inside the CTFF-07 Natural Park, on April 17th, but the operation was cancelled and delayed until a summer date. Reason for the cancelation was winds were at 50km/h which did not allow travel and landing on the fortress. The team is sorry for situation. However, they were still active on April 17th, as CR6A, but from their activity HQ, on Armona Island DIA (Algarve Islands, AI-04, DIP [Portuguese Islands] AL-04 ST-022 [Isl. Plaque] and CTFF-007.

FS, SAINT MARTIN (Possible PJ7). Pascal, F5JSD, is now active as FS/F5JSD from Saint Martin Island (NA-105) between now and April 21st. He is there on vacation, so activity will be holiday style on 40-10 meters and mainly CW. Look for some possible portable operations from Sint Maarten (NA-105, WLOTA 0711) where he will operate as PJ7/F5JSD. QSL via his home callsign, by the Bureau or LoTW.

GB4, ENGLAND (Special Callsign For Royal Wedding). Operators Chris/M0DOL and Gary/M0NNH will be active as GB4RW on April 29th, to celebrate the Royal Wedding of HRH Prince William of Wales and Miss Catherine Middleton. QSL via address/info on QRZ.com.

GR/MR/2R, UNITED KINGDOM (Special Callsign For Royal Wedding). At the request of the Radio Society of Great Britain (RSGB), Ofcom has issued special temporary prefixes for British amateurs to use with their callsign between April 29th and May 9th, to commemorate the marriage of HRH Prince William of Wales and Miss Catherine Middleton. Look for the amateurs in the United Kingdom (if they choose) to apply the following prefixes - GR, MR and 2R, during this royal event.

HG15, HUNGARY (Special Event). Look for special event station HG15IPA to be active through December 31st. Activity is to celebrate the 15th anniversary jubilee callsign of the International Police Association. The station is expected to be on 160-10 meters using CW, SSB, RTTY, PSK31 and SSTV. QSOs with this station are valid for the HA-IPARC Award. QSL via HA3JB. For more information, visit the following Web pages:
http://www.qrz.com/db/hg3ipa
http://www.qrz.com/db/ha3jb

IOTA NEWS.....
EU-108. Members of the GMDX Group (Scotland's DX Association) plan to be active as GB5TI from the Treshnish Isles between April 28th and May 1st. Activity will be on 80-10 meters using CW, SSB and RTTY. QSL via MM0BQI, direct or E-mail Bureau requests to:
gb5ti.qsl@gmail.com
They state, "We do not need your card but are happy to send you ours using the methods above. Cards will be printed following our return with first ones being sent out in June. Let's save a tree and the bureau some work!!"

KH6BZF PROPAGATION FORECAST/REPORT (April 18-24th)....
Apr 18 HN SOLAR REFERENCE KEYS
Apr 19 HN-LN --------------------
Apr 20 AN BN - Below Normal
Apr 21 AN AN - Above Normal/Geomagnetic Level is QUIET
Apr 22 AN LN - Low Normal
Apr 23 AN HN - High Normal/Geomagnetic Level is UNSETTLED
Apr 24 AN DIS - Disturbed
VDIS - Very Disturbed

GEOMAGNETIC REFERENCE

QUIET - The "A" index is expected to be between 0-7 and the "K" index will be 2 or less
UNSETTLED - The "A" index is expected to be between 7-16 and "K" index will be 3 or less

KP4, PUERTO RICO. The team of the Puerto Rico Field Day Group will be active to commemorate "World Amateur Radio Day" this April 18th, on the same premises where Field Day 2011 is to be, in the Nuevo Gran Parque

Dorado in Dorado, PR. They will be on-the-air- as KP4FD on HF and on SSB after 1600z. QSL via KP4FD, direct, by the Bureau or eQSL.

LOTW USERS CLUSTER SPOTS ONLINE. Tzetzo, LZ2FQ, has provided DXers with a new tool online to only work stations on the air that use "Logbook of The World". The neat feature about this Web page is that you can filter the spots by band and DXCC entity. Give it a look at:
http://www.lotw-online.com

MJ & MU, JERSEY AND GUERNSEY (Channel Island DXpedition). Operators Silvia/EA1AP (YL) and Alberto/EA1SA planned to activate Jersey (EU-013) between June 12-17th, and Guernsey (EU-114) between June 17-21st. The callsigns to be used are MJ/EA1AP, MJ/EA1SA, MU/EA1AP and MU/EA1SA. Look for activity to be on 80-6 meters using CW, SSB and RTTY. They plan to participate in the IARU 50 MHz Contest from Guernsey. Suggested frequencies are (+/- QRM):
CW - 3504, 7004, 10104, 18074, 21024, 24894, 28024 and 50103 kHz
SSB - 3780, 7056/7180, 14195, 18145, 21295, 24945, 28495 and 50120 kHz
RTTY - 3580, 7035, 10140, 14080, 18100, 21080, 24920 and 28080 kHz
QSL via their home callsign. For more details, updates and log search, visit the DXpedition Web page at:
http://www.gdgdxc.net/channel_islands/index.php

MX0, ENGLAND (Special Group). Team Thunderbox (M0TBG) is a group of people who enjoy the lighter side of Amateur Radio and will be active once again as MX0TBG between now and April 23rd. The group states, "We all belong to various radio clubs, and come from very different backgrounds in and around the Wiltshire area, coming together several times a year to enjoy the great outdoors through amateur radio." Activity will be on all bands, but the main operation will concentrate on 80/40/20 meters. Visit their Blog page at: http://teamthunderboxactivities.blogspot.com
Also, check out: http://www.youtube.com/user/teamthunderbox

PP0T, TRINDADE ISLAND (Update). Members of the Cantareira DX Group have announced that they will activate Trindade Island (SA-010) as PP0T this month. The group earlier in the week announced that they were going to leave for Trindade on April 18th. However, a few days later their plans were changed. The Brazilian Navy rescheduled their trip to Trindade on the April 25th. They expect to arrive on the island on April 29th. Currently, Junior, PY2ZA, is the only operator listed on the new Trindade Web page at: http://trindade2011.com
David, EB7DX, is listed as the QSL Manager and Webmaster. Sebastian, EA7HEG, is also listed as a Webmaster. Suggested frequencies are as follows:
CW - 1824, 3514, 7014, 10114, 14014, 18084, 21014, 24904 and 28014 kHz
SSB - 1850, 3790, 7065/7185, 14195, 18140, 21285, 24940 and 28475 kHz
BPSK - 1838, 3600, 7035, 10110, 14071, 18100, 21080, 24920 and 28120 kHz
RTTY - 3582, 7038, 10140, 14082, 18102, 21082, 24922 and 28082 khz
6m - 50104/CW, 50140/SSB and 50500/BPSK
All QSOs will be confirmed via LOTW.

NO8DX/20 QSL STATUS. As of April 17th, all direct QSLs have been answered (including the cards that DID NOT have SASE).

PIRATE ALERT. Phillip, ZL2TZE, informs OPDX that a station signing ZK5A has been operating and is reportedly a PIRATE. Station states that his name is Bill and claims to be on Atafu Island (Tokelau), using 70w and GP. He was heard on 40 meters. This callsign is not listed with RSM. Any reports on this station are appreciated and should be sent to John, ZL1GWE, at: ms@nzart.org.nz

T32TV QSL STATUS. QSL Manager Stan, KH6CG, reports to "please be a bit patient since Tov's new QSL cards are being printed and will be shipped here as soon as possible. Once I receive them, I will start sending them out. Direct preferred, if you want your QSL in a timely fashion. Big delay via Buro." For updates, watch QRZ.com under T32TV.

QSL RECEIVED VIA LoTW: 9Q50ON, J6/VE3CZF, VK9NN and VU2NKS

QSLS RECEIVED VIA MAIL: 5R8HL, 5X0CW, 8P6DR, 9Q50ON, FR5ZL, HI3TEJ, IZ5AXA, J5NAR, J8/W9DR, MU0FAL, OX3XR, PJ7E, T6AF, VK4MA, Z22CW and ZL8X

QSLS RECEIVED VIA THE BUREAU: NONE REPORTED THIS WEEK!

SILENT KEY. Brian, KP2HC, informs OPDX: "It is with the greatest of broken hearts I inform you of the passing of my wife Ann, KP2YL. Ann passed away at home on April 11th, after a 4 month battle with cancer. Ann loved getting on the air and giving out 'new ones'. Especially on the WARC bands. She loved meeting new people. And she loved hearing from old friends. It's been a thrill for me to share this hobby with her during the past 15 years. Thank you to everyone who made ham radio so enjoyable for her." OPDX and its readers would like to send out our

deepest sympathy to Brian, the friends and family of KP2YL (SK). Her signal/voice on the air will be deeply missed.

SV/A, MOUNT ATHOS (Update to OPDX.1006). Brad Nowak, N8SNM, Southeast Michigan DX Association's (SEMDXA) Treasurer, would like to clarify their position on donations to the Monk Apollo Project. The SEMDXA will not be accepting any donations for the "Monk Apollo Project" due to the sensitive nature of "collecting" funds for the Monk as this is not allowed. SEMDXA has donated the MFJ keyer to the Monastery but not to Monk Apollo himself. Rick, NE8Z, was not able to operate from Mt Athos but planned to spend time training Monk Apollo in using the keyer/reader to better improve chances for many deserving DXer's to work SV/A on CW. For more details on the project, go to: http://live.semdxa.org/
(click the "Monk Apollo Project" button)

T31, CENTRAL KIRIBATI (Update/Delay). The international team of operators planning to be active as T31A from Kanton Island (OC-043) has been delayed for a few days. It was announced on their Web page April 13th: "The boat chartered for sailing to Kanton is delayed and will not arrive in Apia until late the 14th or early 15th, so the departure is delayed until maybe as late as the 16th. The boat captain arrived in Apia by plane. All operators are anxious about the delay as to how it may affect the T31A total operating days and also return flights to home QTHs beginning on May 2nd. Standby for updates." The T31A Web page is available at: http://www.T31A.com
UPDATE JUST BEFORE GOING TO PRINT. Looks like they are enroute to Kanton Island. From the T31A Web page:
April 16th (@ 1535) - BOAT JUST LEFT MARINA.
April 16th (@ 1600) - Boat is in early today Friday morning. Loading equipment off boat now and will load our equipment
today. Expect to leave Apia before 6PM today.

TC57, TURKEY (Special Event). Members of the Turkish group called TCSWAT (Special Wireless Activity Team) will once again activate special event station TC57A from the battlefields of Gallipoli/Gelibolu. They hope to set up the station between April 21-25th. First activated as TC57ALAY in 2007, the special event/commemorative station for the 57th Regiment Martyrs is active every year at the end of April as TC57A. A special emphasis will be made to work VK/ZL stations. QSL via TCSWAT at: POB 73, Karakoy, 34421 Istanbul, TURKEY (or by the Bureau). Details and photos from previous activities are available on the Web site at: http://www.tcswat.org

VK9C, COCOS (KEELING) ISLANDS. Wally, VK6YS, member of the South Pacific Contest Club, will be active as VK9CI from Cocos (Keeling) Island (OC-003) for one week in June. He plans to concentrate on the Digital modes. QSL via VK6YS.

VP8, FALKLAND ISLANDS (Update to OPDX.1006). Iain, M0PCB, who plans to be active as VP8DNA from the RAF Amateur Radio Club Station (VP8FIR/VP8RAF) located at the Mount Pleasant Airport on the Falkland Islands (SA-002), informs OPDX this past week: "Not managed to get on the bands yet. There

is uncertainty on how long I will be here and whether I will get on the air at all this time. Not great news :-(."

VP9, BERMUDA (NA-005). Paul, W4/VP9KF (G4BKI), is once again active as VP9KF from Baileys Bay, Hamilton Parish, between now and April 27th. Activity will only be CW on all bands. QSL via W4/VP9KF: Paul Evans, 6809 River Road, Tampa, FL 33615. Visit his Web page at: http://vp9kf.com/ Please, DO NOT send to the VP9 bureau.

XV4, VIETNAM (IOTA Op). A German team will be active as XV4YY from Phu Quoc Island (AS-128) between April 18-28th. Operators mentioned are Udo/DL2AQI, Ingolf/DL4JS, Sigi/DL8AKI and Rich/DK8YY. Activity will be on all bands and modes using stations with. Special attention will be given to the low bands using the antenna facilities on the allowed site. QSL via DH7WW, direct or by the Bureau. NO eQSLs.

YCTU IN DAYTON (May 19th). Tim, K3LR, reports (edited): "This is the first year for the new Youth focused track at ConTest University (Youth Contest University [YCTU]) in Dayton. The YCTU Dayton will have its own classroom right beside the regular CTU classrooms and will be linked via the Web to other YCTU participants around the world.
Several young operators have signed up to attend in person and present talks at YCTU, but there is room for more to attend. Full scholarships for YCTU/CTU registration have been sponsored and are available for YCTU/CTU participants 25 years old or younger. If you know of a young amateur radio operator who has an interest in contesting, please encourage them to come to YCTU." For more details, visit: http://contestuniversity.com

ZK2, NIUE (Update to OPDX.1002). Chris, GM3WOJ/ZL1CT, announced that he is returning to Niue (OC-040) starting about October 15th, and is hoping to spend at least 2 months there. He states (edited), "I will be at a new QTH, using new antennas on the LF bands to improve results (there is S9 QRN on 160m and 80m from the island's 11kV AC distribution system, over most of the island). I worked nearly 16000 stations in poor conditions during the 2009 ZK2V operation - my target is 40000+ this time - hopefully with better conditions and a longer DXpedition. My friend Keith, GM4YXI/ GM5X is joining me for the first 2 weeks of the DXpedition and is hoping to be QRV as ZK2X in the CQWW DX SSB Contest as a Single-Operator/All-Band entry." Chris suggests to visit the following Web page, which will be updated periodically before the DXpedition, at: http://www.zk2v.com

Theory Examination

The next theory examination for the Harmonised Amateur Radio Examinbation Certificate (HAREC) will be held on Thursday, 7 July next at 2.00 p.m. in the ComReg offices in Dublin. The examination may also be held on that day at other centres if warranted by the number of candidates.

Full details, including entry procedure and examination fee, are available at www.irts.ie/exam

---

Up-Coming IRTS Contests

1. 2m Counties Contest Monday April 25th 2011. From 2pm till 4pm. Log to be submitted by May 25th.

2. CW Field Day Sat 4th/ Sun 5th June 2011. Log to be submitted by June 5th.

Calling all active VHF and Higher operators we are trying to get the 2010 Squares table finalized on IRTS.ie. So can anyone that was active on the VHF bands last year please send your Square totals or your log and I can work it out for you to EI2GLB /at/ hotmail / dot/.com . To see the squares table go to www.irts.ie and click on vhf/uhf/shf on the right side of the home page.

International Marconi Day

International Marconi Day takes place this year on Saturday 30th April. The Howth Martello Radio Group will be participating once again as an award station using the call-sign EI0MAR.

This is not a contest but there are several nice awards available for working the officially listed stations, each of which has an historic connection with Marconi. The event is organised by the Cornish Amateur Radio Club. For more information please visit the club's website http://crac.g4usb.net/cracblog/

EI0MAR operates from the Martello Tower overlooking the East Pier in Howth. The tower now houses a vintage radio museum. In 1905 the British Post Office carried out wireless telegraphy experiments at the tower in Howth using Marconi equipment.

North Cork Radio Group will be active from the 29th of April through 2nd of May and during International Marconi Day.

The call used will be EI-0-IMD from the Mizen head Signal Station, Goleen in West Cork and the duration will be 24hours. NCRG will also use EI1NC/P for the remainder of the weekend until May 2nd. Members attending are Anthony EI3GAB, Pat EI2GHB, Padraig EI5GEB and Claus EI7JZ although other members may operate in short burst while visiting the station.

South Dublin Radio Club

Earlier this month, SDR moved back to its QTH at Ballyroan Community Centre, Rathfarnham. This means that the club once again has the use of two rooms for its meetings on Tuesday nights. The Community Centre has been extensively refurbished over the past two years.

The first meeting in Ballyroan was attended by a record number of members and visitors, who were treated to a presentation on Amateur Television by Ronnie EI9ED. His presentation covered transmitters and receivers for ATV on a number of bands; those more used to HF antennas were intrigued by the miniature size of the antennas for the Gigahertz bands.

This week's presentation covered antenna analysers. Daniel EI9FHB demonstrated a number of professional and amateur analysers and explained how these can be used to identify antenna faults and to tune antennas.

Next week's presentation at the club will be on digital modes.

Lough Erne Club in Top Three for RSGB Award

There will be a special zest at today's Pearl Anniversary Lough Erne Rally in the SHARE Centre with news that the Club has made it to the top three among top clubs from 13 regions in the UK National Club of the Year competition.

The first, second and third placed award winners will be announced at the RSGB AGM in Derby on Saturday 14th May. Lough Erne Amateur Radio Club has been invited to the awards ceremony where 'first', will get the UK National Trophy and £1,000, 'second' a plaque and £500 and 'third' a plaque and £250. Some one of these awards will go to Lough Erne Amateur Radio Club based in the SHARE Centre County Fermanagh.

At today's rally, Angus Annan MM0CCR, a past RSGB President will present the Regional Award to the Club, which represented Northern

Ireland alongside the top clubs from RSGB's other 12 regions. Earlier, at the IRTS AGM in Limerick, recognising the achievements of this Club's enthusiastic members, its Chairman, Michael Clarke Mi5MTC was presented the magnificent Pat Conway Trophy.

At Wednesday's rally work sharing meeting, when the RSGB letter arrived, Chairman Michael Clarke strongly congratulated his Club's members. These awards were a tribute to their enthusiasm and companionship. Each individually, and all working together had enjoyed and achieved much during 2010. Well done.

Ballymena ARC

Ballymena ARC (GI3FFF) will be participating in the Steam Traction Rally, at Shanes Castle, Antrim from the 1st May till the 2nd May 2011. They will be putting on displays of amateur radio for the public, as well as activating the castle as part of CASHOTA-NI (castles and stately homes on the air-ni). The club will be using callsign GN4KPT, utilising all modes and bands, please feel free to call in if heard. See http://gi3fff.synthasite.com/ or www.cashota-ni.org

---

Bangor and District Amateur Radio Society

Bangor and District ARS meet on the 1st Thursday of every month.

At 8pm on Thursday 2nd June 2011 we are holding our annual BBQ at the scout campsite in the Crawfordsburn Country Park.

As always, visitors are most welcome.

More information from Mike GI4XSF on 028 4277 2383, or club website :

http://www.bdars.com

Cork Radio Club

The next monthly meeting of Cork Radio Club will be held on Monday April 25th at 2030 in the Community Centre, Main Street, Carrigtwohill.

Dave Deane EI9FBB, who is EI's only ARRL DXCC Card Checker, will make a presentation on ARRL's Logbook of the World and EQSL.

Final preparations for clubs participation in the following weekends International Marconi Day will also be discussed. The callsign EI5IMD will be activated from Brow Head near Crookhaven in West Cork to celebrate the 110th anniversary of the setting up of Marconi's Wireless Station in 1901. The reception of strong signals from Poldhu in Cornwall at Crookhaven convinced Marconi that bridging the Atlantic by radio was possible. Prior to that it was believed that radio waves

travelled by line of sight only.

Visitors and new members will be very welcome on the night and further information can be had from Jeremy EI5GM on 083-3317710 or Dave EI4BZ on 087-6290574. You can email to info at Cork Radio Club dot com.

DX News

Special calls have been aired over the past two months to celebrate the 20th Anniversary of the Holyland Contest in Israel. The calls are 4X20HC and 4Z20HC and will be QRV till the end of this month. This is a good opportunity for the prefix hunters to get a couple of new ones. QSLs go via 4Z4TL.

Another one for the prefix chasers this week is 4A0IARU which will be active from Mexico where the usual prefix is XE. The station will be QRV from 18 - 24 April and celebrates World Amateur Radio Day on 18 April and the 86th anniversary of the founding of the International Amateur Radio Union.

A group of Brazilian operators are off to the island of Mayotte in the Indian Ocean where they will be heard as TO2FH from 18 - 25 April. They intend being on all bands 160 - 10m with SSB, CW, RTTY and PSK.

The well-known DXer Dov 4Z4DX will be in Nepal signing 9N7DX from now till the end of April. He is accompanied by his XYL Anat who has the call 9N7YL. Activity is planned for 20/15/10/6m using CW, RTTY and PSK31.

Finally a reminder that our own DXer Dave EI9FBB will be QRV later this week from Monaco as 3A/EI9FBB. The days to look out for him are Wednesday, Thursday and Friday (20 - 22 April) mainly in the afternoons.

Items for inclusion in next week's Radio News can be submitted via e-mail to "newsteam /at/ irts / dot / ie" for automatic forwarding to both the radio and printed news services. Urgent news items for the radio news maybe telephoned to the radio news editor, Aidan, EI7JC on 085 7100511.

Please note that items for the radio news should reach the editor no later than midday on Thursday in order to be guaranteed inclusion in the following Sunday's bulletin.

401. Weekly Highlights of Solar and Geomagnetic Activity, 11 - 17 April 2011

Newsgroup: rec.radio.amateur.misc

:Product: Weekly Highlights and Forecasts
:Issued: 2011 Apr 19 1900 UTC
# Prepared by the US Dept. of Commerce, NOAA, Space Weather Prediction Center
# Product description and SWPC contact on the Web
# http://www.swpc.noaa.gov/weekly.html
#
# Weekly Highlights and Forecasts
#
Highlights of Solar and Geomagnetic Activity
11 - 17 April 2011

Solar activity was at low to moderate levels. Low activity occurred
during 11 - 14 April with C-class flares from Regions 1185 (N18,
L=025, class/area Cso/100 on 05 April), 1190 (N13, L=338, class/area
Eki/440 on 16 April), and 1193 (N17, L=266, class/area Eai/430 on 17
April). Activity increased to moderate levels on 15 April due to an
M1/1f flare at 15/1712 UTC from Region 1190 associated with minor
discrete radio emission. Region 1190 showed gradual spot growth
during 12 - 15 April and displayed a beta-gamma magnetic
configuration, then began to gradually decay on 16 April. Region
1193, which also contained a beta-gamma magnetic configuration,
showed gradual spot growth during 13 - 17 April. An Earth-directed
coronal mass ejection was observed early on 15 April, associated
with a filament disappearance from the northeast quadrant late on 14
April. Estimated plane-of-sky velocity was for the CME was 390 km/s,
based on an analysis of SOHO/LASCO coronagraph images. Activity
decreased to low levels during 16 - 17 April with C-class flares
from Regions 1185, 1190, and 1193.

No proton events were observed at geosynchronous orbit.

The greater than 2 MeV electron flux at geosynchronous orbit was at
normal to moderate levels during 11 - 13 April. Fluxes increased to
moderate to high levels during 14 - 16 April, then decreased to
normal to moderate levels during 16 - 17 April.

Geomagnetic activity was at quiet to active levels on 11 April.
Activity increased to quiet to minor storm levels on 12 April with
major storm periods observed at high latitudes. Activity decreased
to quiet to active levels on 13 April with minor to major storm
periods observed at high latitudes. Activity decreased to quiet to
unsettled levels on 14 April. A further decrease to quiet levels at
all latitudes occurred during 15 - 17 April. ACE solar wind
observations indicated the activity during 11 - 13 April was
```

associated with a coronal hole high-speed stream (CH HSS). The HSS source was an equatorward extension of the southern polar CH. The CH HSS commenced on 11 April following a negative- to positive-polarity solar sector boundary crossing. Velocities increased during 11 - 12 April, eventually reaching a peak of 674 km/s at 12/1940, then gradually decreased during the rest of the period. Interplanetary magnetic field (IMF) changes associated with the onset of the CH HSS included increased Bt (peak 17 nT at 11/2001 UTC) as well as increased Bz variability with intermittent periods of southward Bz (maximum deflection -9 nT at 12/0525 UTC). The CH HSS began to gradually subside on 13 April.

Forecast of Solar and Geomagnetic Activity
20 April - 16 May 2011

Solar activity is expected to be low with C-class flares likely during the period. There will be a chance for moderate activity (isolated M-class flares) during the second half of the period due to the return of previously active regions.

No proton events are expected at geosynchronous orbit.

The greater than 2 MeV electron flux at geosynchronous orbit is expected to be at normal to moderate levels during most of the period. However, high flux levels are expected during 22 - 23 April, 30 April - 03 May, and 11 - 13 May.

Geomagnetic field activity is expected to be to be at quiet to unsettled levels during 20 - 22 April due to weak coronal hole effects on 20 - 21 April and weak coronal mass ejection effects on 22 April (associated with the Earth-directed CME observed on 15 April). Activity is expected to decrease to quiet levels during 23 - 27 April. Field activity is expected to increase to quiet to active levels during 28 April - 01 May due to recurrent coronal hole effects. Activity is expected to decrease to quiet levels during 02 - 07 May. Activity is expected to increase to quiet to active levels during 08 - 11 May due to recurrent coronal hole effects. Quiet conditions are expected during 12 - 16 May.

402. Re: An Introduction and Refresher On Mark, "I Am A Gay Pagan Draftee Officer" Morgan, KB9RQZ

DXNL 1724 - Apr 20, 2011
DX Newsletter

a free and weekly service of
DARC Committee "DX and HF contesting"
(http://www.darcdxhf.de)

editor: Helmut Schlaffer, DL7MAE
(e-mail: dxnl@dxhf.darc.de)

translation by: Bob, DL7VOA
(e-mail: dl7voa@darc.de)

EDITOR'S NOTE: Starting with this issue Enrico (Ric) Stumpf-Siering,DL2VFR, takes over the responsibilty to fill the IOTA column of the DX Newsletter every week. Ric is known to many HAMs as the editor of the DX column in the German HAM magazin CQ DL and for his numerous IOTA activities. Ric, aged 45, is SWL since 1977, on the air since 1982 (ex-Y52TL, -Y23CL) and got his current callsign DL2VFR in 1990. He is an air traffic controller and his QTH is Suestedt, south of Bremen. His interests: DX, IOTA, DXCC, WFF and going on DXpeditions. We wish Ric good luck and much fun with his new job. At the same time we thank Fredy,DE0MST, for making the IOTA part of this bullting for more than four years. Fredy prepared a few reports which will be published in the next weeks. We wish him all the best and he may use the new spare time for DXing or other hobbies.

A6 - UNITED ARAB EMIRATES
Sergej,UA9B (ex-UA9BI), is working as A6/UA9B from the QTH of A65BR until Apr 22. He works in holiday style in CW on 80m-10m and sometimes also in SSB. QSL cards should be sent also via bureau to UA9AB.

HR - HONDURAS
"Wild Bill",N2WB, plans an activity as HR5/N2WB from Apr 20 till May 4. QSLs are managed by N2OO, also via bureau.

T31 - CENTRAL KIRIBATI, OC-043
The T31A team is underway but with delay. Originally they planned to show up from Kanton Island (OC-043) starting on Apr 17 but they were not able to leave Apia (5W) before Apr 16. They need approx. four days for the passage so they might show up on the bands around Apr 21. Keep informed via their DXpeditions website: http://www.T31A.com

TK - CORSICA, EU-014
Tonny,ON1DNF, Jaak,ON4PJA, Joeri,ON7IQ, Jempi,ON7JPS, and Geert,ON7QC, will be QRV as TK4DS from a bungalow in the "San Damiano Camp" (EU-014) from Apr 21-24. Activities are promised in SSB and digital modes on all

HF bands. QSLs should be sent direct to ON4AMM or via bureau to ON4PJA.
Please visit also the homepage of the team at: http://www.tk4ds.be

VP9 - BERMUDA ISLANDS, NA-005
OM Paul,W4/VP9KF (G4BKI), is momentarily active VP9KF from Baileys Bay
in the Hamilton Parish (NA-005) and will stay there until Apr 27. Paul
works only in CW on all bands.
Your QSL cards should be sent to the following address:
W4/VP9KF, Paul Evans, 6809 River Road, Tampa, FL 33615, USA
More information is available at: http://vp9kf.com

3A - MONACO
Dave,3A/EI9FBB, will show up during the afternoons from Apr 20-22.
He did not say on which bands or modes.
All QSOs will be confirmed via LoTW/eQSL. If you want to have a paper
QSL you habe to sent your QSLs "direct only".

4K - AZERBAIJAN
4K3AC will be the callsign of Yuris,YL2GM, between Apr 25 and May 3.
He will work with 100 watts in CW, SSB and RTTY on all HF bands.
QSL cards should be sent via his homecall.

9M2 - WESTERN MALAYSIA
Mirek,VK6DXI, is going to hit the airwaves as 9M8DX/2 from Apr 25-30.
This is a business trip to the capital Kuala Lumpur but Mirek hopes to
make some CW QSOs during his evenings. QSLs also via bureau to SP5UAF.

HUNGARY, SPECIAL EVENT STATION
The special event station HG15IPA is working in CW/SSB/RTTY/PSK31/SSTV
on 160m-10m until the end of the year to celebrate the 15th anniversary
of the International Police Association (IPA). QSL via HA3JB.
More information about the HA-IPARC Award can be found at:
http://www.qrz.com/db/HG15IPA

RUSSIA, SPECIAL EVENT STATION
The special callsign R25CH will be activated from seven districts in
the province Bryansk from Apr 22-29. This is to remember the nuclear
disaster in Chernobyl 25 years ago.
The QSL manager is RW3YC, he confirms also via bureau.
They have also a special award, the rules can be found at:
http://qrz.ru/awards/detail/35.html

TURKEY, SPECIAL EVENT STATION
The "TC Special Wireless Activity Team" is working as TC57A from
Apr 21-25 to remember Battle of Gallipoli back in 1915.
QSL via TA1HZ. See also: http://www.tcswat.org

SILENT KEY: Ann Z. Keegan, KP2YL (ex-W2AZK), XYL of Brian,KP2HC, passed away
in her home on St. Croix on Apr 11.

PIRATE: ZK5A has been spotted on 40m lately and pretends to work with
70 watts and a groundplane, his name is Bill and he claims to be on
Atafu Island (Tokelau). Radio amateurs from New Zealand state this is

a pirate.

LINKS: Current SOTA activities (mountain summits) are announced at:
http://www.sotawatch.org

Detailed information about current VHF activities can be found on the
VHF DX portal "Make More Miles on VHF" at: http://www.MMMonVHF.de
---
You can download the "World Castles Award" (WCA) and the awards of the
COTA-Russia for free from the internet. Check: http://www.wcagroup.org

UPCOMING CONTESTS

Apr 23/24: SP DX RTTY Contest
Apr 23/24: Helvetia Contest
Apr 25: Germany Contest of the DTC

IOTA collected by Ric,DL2VFR (e-mail: iota@dxhf.darc.de)

Island activities:
EU-008, GM: MS0KLR is a four man team on an IOTA expedition to Eigg Island
from Apr 26-29. QSL via bureau to MM0KLR or direct to MM0GHM.

EU-016, 9A: The QTH of 9A/S50R will be Lastovo from Apr 25-30.

EU-029, OZ, Sjaelland archipelago: Ben,OZ/DO1BEN, and Barbara,OZ/DO1IQ, will
be active from Lolland Island (DIA SJ-015) working in SSB and digital
modes on 10m-80m from Apr 22-29. QSLs via homecalls (bureau/direct).

OC-227, VK: YL Lyn,VK4SWE/VK4EI, is living on Sweers Island. After putting
up a triband yagi in the last weeks she wants to add a power amplifier
soon. If you are still looking for OC-227 you may profit from her
interests in CW, DX and IOTA.
For more information visit: http://www.qrz.com/db/vk4swe

Lighthouse activities (WLOTA/ARLHS/ILLW)

Francois,ON4LO, is going to activate several lighthouses in SSB on 40m-10m
signing F/ON4LO/p between Apr 22 and Jun 4. QSL via homecall.

Secretary Sarah Thompson VK3AUD secretary@wia.org.au
Treasurer John Longayroux VK3PZ vk3pz@wia.org.au

WIA PRESIDENT SPEAKS

In my Comment published in the April issue of the WIA's magazine, Amateur Radio, I discussed the fact that a Freedom of Information request had revealed that the ACMA did not have any policies in respect of the transmitting equipment authorized to be possessed by an amateur or in relation to the inspection of amateur stations, and set out the WIA's view of what would be appropriate policies.

Since then, with WIA Director Peter Young, we met with senior ACMA staff who included Mark Loney, Executive Manager, Operations Branch and staff from the Compliance Operations, Field Operations and Industry Partnership areas.

At the meeting the WIA's concerns regarding the station inspection program and the legislative basis for some of the outcomes of individual inspections were presented. The ACMA advised that the inspection program was undertaken as a proactive measure to combat interference issues, as well as educate and generate awareness among the amateur community of their responsibilities.

The WIA has now been advised by the ACMA that its contribution is appreciated and that the ACMA is keen to continue to work with the WIA on these matters.

We are told that the ACMA intends to review the station inspection program in light of our concerns and the information gathered from the visits to date.

The ACMA points out that the matters raised from the station inspection program are to be distinguished from station inspections undertaken as part of necessary enquiries resulting from a complaint of interference or an investigation where there are reasonable grounds to suspect there has been a contravention of the Act.

The WIA welcomes the opportunity to work with the ACMA to develop workable solution to a number of legitimate concerns.

WIA National Field Day,

A brief summary of what occurred on the day:

The Hills Amateur Radio Group, Western Australia, had a successful day at Stirk Park, Kalamunda. They were joined by representatives from the Scouts, Ham College and the WIA.

Bill Rose VK6WJ reports that apart from gaining potential new recruits to amateur radio, a few drop-outs have had their interest rekindled. Visitors often mentioned they were at Stirk Park as a result of media coverage.

The Central Queensland Amateur Radio Association, the newest in Australia, set up at both the Mount Morgan Range and in the Bunning's Warehouse car park in North Rockhampton. It had a range of visitors, and relied upon battery power with solar back-ups.

Also at Bunning's was the Elizabeth Amateur Radio Club at Parafield, a multi-operator affair using field equipment with independent power.

The North East Radio Club of Adelaide set up its station and exhibit at the Golden Grove Shopping centre. President Quick VK5ATQ reports a reasonable amount of passing customers and a great day for club members gained practice of operating portable.

So much of a good time was had they'll be back on Anzac Day, Monday 25th to do it again.

The Whyalla Amateur Radio Club participated with Port Augusta club members along with other local radio operators setting up their portable stations in Gladstone Square, right in the city centre of Port Augusta.

A permit was issued which included use of a 10-metre flag pole, a point for the off-centre feed dipole cut for 80m and 40m. Plenty of contacts were to be had along with about 30 visitors.

The Redcliffe & Districts Radio Club set up a couple of tables outside of K-mart at the Kippa Ring Shopping Centre. Although a number of good inquiries were received, the club and the location are under review for next year.

The Cradle Coast Amateur Radio Club took to Hiscutt Park, Penguin. Quite a few members of the public saw what they were doing and asked sensible questions, while the Secretary Dave Cleland VK7DC reported the logbook included a few DX stations and most of the Australian contacts were made on the HF bands.

The Townsville Amateur Radio Club was on The Strand right alongside the main walkway. Richard Goodhew VK4FRJG reports that nine operators used the portable station and proved to be an interest the passing pedestrian traffic.

The Darwin Amateur Radio Club display was at the Rapid Creek Business Village Sunday markets. As Spud said "We arranged with the markets manager Costa for a good position with outside access so we could erect some antennas.

What a great day, lots of people, lots of great food, coupled with lots of interest shown in our display.

Alan VK8AB brought along his computer and wireless Internet adaptor to give us a fairly noise free HF set-up remoted from home. Much better than all the electrical noise at the shopping centre.

Myself, Spud VK8ZWM and Peter VK8HPB brought along our VHF and UHF equipment and antennas so we had HF, VHF, UHF as well as D Star operational. Quite a few contacts were had with other sites and operators around the country via IRLP and two into ZL.

We had 13 good enquiries and quite a few others showing some interest. We gave out lots of handouts and information about the foundation licence as well as what is needed for the standard and advanced. Let's see what comes of the enquiries. We have already had more than 20 successful examinations in the last year.

In all, a far more successful exercise than last years NFD.

Winners last year, Amateur Radio Victoria, stuck with its proven success at the Point Gellibrand Heritage Coastal Park. The day can be summed up as, greater activity and a more enjoyable experience.

The Eastern and Mountain District Radio Club tried something new, setting up outside the Jaycar electronic shop at Mulgrave.

Richard Holmes VK3XTD as a visitor was most impressed by what the public had to read, see and hear. The venue chosen was one of the busiest to show off from a marquee both HF, VHF, UHF and D-STAR. Outside was foxhunting, mobile operation and ATV on display.

In fact Richard VK3XTD found it difficult to identify a major part of the hobby not adequately represented.

The EMDRC had a second station at Lilydale Park. John Fisher VK3DQ reports one of the earlier visitors was Councillor Tim Hennnan from Billanock Ward. He popped in to have a look at what amateur radio was all about.

A number of calling CQ leaflets and a flyer about the club was also readily handed out. A large delta loop antenna was the mainstay of the days HF operations.

In contrast the weather was not good at Port Macquarie, leading to the cancellation of outdoor activity by the Oxley Region Amateur Radio Club. However President Henry Lundell VK2ZHE reports that members checked out other venues before converting to home stations.

Well there's always next year and certainly there will be another public relations for amateur radio event held in 2012

FROM ANDERSSON HOUSE THE WEEKLY WI A DIRECTORS SPOT.

WIA National Monitoring System

This is Peter Young VK3MV, WIA Director and WIA Monitoring System Coordinator. The WIA Monitoring System is an important activity that detects and reports unauthorised emissions in our primary HF bands. These are known as intruders.

In the year 2010, a small group of amateurs provided 2016 detection reports of intruders. These reports are collated and passed to the Australian spectrum regulator, the Australian Communications and Media Authority (ACMA) each month. Due to the iterant nature of some intruders, the ACMA may have difficulty in determining which ITU member administration is responsible for these intrusions.

The WIA monitoring arrangements are part of the International Amateur Radio Union monitoring system, and along with other member societies intruder reports are collated by regional coordinators and posted on the respective IARU regional websites each month.

This system of reporting is a very important activity for without regular reports to spectrum regulators of intruders and there removal, our HF bands would progressively be taken over by other services.

Want to know more information?

http://wia.org.au has information under the "Members" tab, where the latest reports from Australia and other IARU Regions are provided.

There is an excellent monitoring handbook from Region 1 that provides technical information on how to identify various intruder emissions.

There is also an online reporting form as well as an XL spread sheet template.

Help protect of HF Bands - The WIA needs more volunteer reporters.

HAMS ACROSS AUSTRALIA.

Radcom 2011

The ACMA's fifth conference on spectrum management RadComms2011 will be held at Sydney on 26 and 27 May.

The two day conference presents an exciting opportunity to hear the latest spectrum developments, participate in open forums and exchange ideas with radiocommunications professionals from across industry and government.

Topics to be covered will include emergency services' response to natural disasters, mobile telephony issues, digital radio, long term evolution (LTE) and emerging technologies and the ACMA's forthcoming review of the

900 MHz band.

VKG Roundup http://www.police.nsw.gov.au/news

The Hornsby and Districts Amateur Radio Club will once again be activating VK2IMD for International Marconi Day. This will be on the UTC Day of Saturday 30 April, meaning we will be on air from 10:00am Sydney time on Saturday until 10:00am on Sunday. The club will be operating on a range of HF frequencies during this period. The HADARC activation is because Ernest Fisk received the first direct radio message from Britain to Australia, sent by Marconi from his station in North Wales, at the Fisk home in Wahroonga, close to Hornsby. The house, but sadly not its antennas, remain there today, not far from Wahroonga Park.

Searching Facebook for VK2IMD should find an event page for this event.

HADARC is also pleased to announce that both candidates at it's recent exam sessions were successful, one entering the hobby at Standard level, the other at Foundation level. If you also wish to study for a licence or take an exam; or know someone who does, please contact the club via the form at hadarc.org.au

HADARC: http://www.hadarc.org.au/

(Julian Sortland, VK2YJS. Publicity Officer, Hornsby / Districts AR Club.)

VKC Roundup http://www.police

A Victorian man threatened to kill police officers and broadcast their home addresses over a police communications radio channel, the Ballarat Magistrates Court was told this week.

Charged with multiple offences, including knowingly interfering with police radio communications and resisting arrest the court was told how the accused (now sentenced) obtained codes specific to the Region West Division 3 police channel and began broadcasting, causing severe disruption and interference to police operations.

The transmitter is alleged to have been purchased on eBay and the codes to breach the police communications radio channel were obtained from the internet.

Melbourne's City Council will use high-tech underground sensors to detect motorists who overstay their park by just minutes.
A trial of new in-ground sensor technology showed almost one in five

drivers overstay their time period.

The technology will alert parking inspectors seconds after a metre expires and will catch an additional 50,000 cars per year..

VKR Roundup http://www.police.qld.gov.au/News+and+Alerts/Media+Releases/

The Brisbane to Gladstone Yacht Race leaves Shorncliffe Good Friday. The first Brisbane to Gladstone Yacht Race held 1949 and saw just seven vessels start, two only which carried radios while Brisbane's Homing Pigeon Club supplied pigeons to the others for position reporting!

Each yacht issued with birds was to release two each day.

The first person to finish that first race? Doug Perrins on "Hoana."

Welcome to QNews from VK4WIA. I'm Geoff Emery, VK4ZPP, and I've been thinking.

A few years ago the story went around that use of two-way radios near petrol pumps could cause ignition and explosion. It was common for service stations to decorate their forecourts with signs banning the use of radio transmitters and mobile phones whilst disposing of available cash into the fuel tank.

In March, the international radio company Thales announced the approval of their first responder hand held radio - the intrinsically safe Liberty model.

http://www.thalesliberty.com/about_liberty.asp

This nifty h/t can be used on 2m and 70cm by amateurs but is designed to cover emergency frequencies in vhf hi-band, uhf and 700MHz and 800MHz segments. The real importance is that apart from its capacity to communicate with different networks is that it can be used in explosive atmospheres. i.e. where there is a real rather than imagined threat of explosion.

What also makes this radio of interest to the amateur fraternity is that it packs all this capacity into a small package by using the coming standard of software defined radio technology. Next time you read an article about the SDR in your favourite amateur radio magazine, remember commercially that this evolution is giving power to military and first response networks around the world.

I'm Geoff Emery and that's what I think....how about you?

CLUBBING - TO SUPPLY NEWS ITEMS:-
email qnews@wia.org.au

BARC
http://www.qsl.net/vk4ba

or, by E-mail to vk4ba@qsl.net

This is Stuart, VK4MSL with news from Brisbane Amateur Radio Club Incorporated.

BARCfest is just around the corner. When exactly? 7th of May... that's less than 3 weeks. Where? Mt. Gravatt Showgrounds, 1600 Logan Road Upper Mt. Gravatt. Admission is $7.00

Check out the latest in gear from one of the commercial sellers, pick up a bargain, explore the displays of vintage and military radios, perhaps procure that rare component you've been seeking for months, or catch up with old mates at Caf&#65533; de BARC.

Want to sell something? Book a table, contact Les VK4SO on 3343 7247 or vk4so@wia.org.au.

And some news for members or visitors: This year, Good Friday fell on the fourth Friday of the month, the time of the month when we normally hold our business meeting. The decision was therefore made at the last business meeting (in March) to move the meeting back one week, and therefore will take place instead This Friday, the 29th, at the usual time 7:30PM at the Queensland Maritime Museum, Southbank.

Hope to see everyone soon, either at one of our Club meetings, or at BARCfest. 73 from Stuart VK4MSL.

Redcliffe and District Radio Club
www.redclifferadioclub.org.au/

I'm Ray VK4CF with news from the Redcliffe Club.

SILENT KEY:-

Rob, VK2ZEB has become Silent Key this week.
The club sends prayers to Rob's wife Elizabeth and their family at this time.

Last Sunday, the club set up a information and display area for the National field day event at the Kippa Ring shopping centre, Redcliffe, just outside KMART. Though the number of shoppers was down, there were at least 8 potential club members at the display. This included one gentleman who was pleased that he now did not have to learn morse to obtain his full call.

Last Monday's tech talk was given by Roger VK4ZLQ and Peter VK4EA. The topic was the stubbs used on all hf antennas on the last John Moyle field day. Essentially the stubbs acted as frequency specific band pass filters. This allowed band specific transmission and virtually eliminated all other frequencies except the frequency being used.

This also improved the reception within the band and many more weak signals were heard and the noise present at other frequencies was also eliminated. As the contest rules require all antennas to be in a 800

metre radius, the stubbs limited the interaction usually found with the antennas being closely spaced. The presentation was enhanced with a PowerPoint presentation of the theory and practical details of construction.

One club member was heard to ask if this would be able to reduce the pager interference in the local Redcliffe area from a certain location on 2 metres? Roger's answer was a definite YES.

Scott, VK4FLAE, is now well on his way to upgrade his licence with a good pass on his standard theory exam. Scotty said that it was the constant pushing from a number of fellow club members that finally motivated him to have a go at the theory paper and he was surprised and pleased to pass with flying colours. He is now well into studying for the regulations exam so he can make used of the higher power limit.

John, VK4YJV, will be conducting the first of the mini training sessions to be held on the first Monday night of the month. The first session will be on How to tie knots & their uses. As next Monday night is ANZAC DAY night the club will be open but there will be no fox hunt on the night.

Phil, VK4FIL, believes that he might be the first VK4 to work JA on 6 metres using the digital mode "whisper". It occurred last week when 6 metres was wide open.

So now it's back to finding the Easter eggs and its 73 from Ray, VK4CF wishing all a happy Easter from the Redcliffe club.

VK7

Congratulations

UTAS - Outstanding Achievers

A big congratulations to Thomas VK7NML and Andrew VK7AL who both appeared on the University of Tasmania - Outstanding Achievers list for 2010.

Thomas Karpiniec received a Dean's Citation for his Bachelor of Engineering (Honours) and Andrew Welch was on the Dean's Roll of Excellence for his dual degrees of Bachelor of Science and Bachelor of Engineering.

Congratulations to you both.

(Justin, VK7TW)

VK8

Well I can tell you that the dry has arrived with a vengeance, G'Day I'm Spud VK8ZWM.

The fans are off and the doona's are out already. That means an influx of visitors is almost upon us. The word is out. The moisture is pretty well gone. The wet is gone.

Just a whisker under 3 meters of rain since the beginning of October till now. It has been a big wet.

It means that it is time to really consider joining us for the WIA national conference for 2011 now that the wet has stopped. Darwin will still be green for you that's for sure.

Book your rooms at the Mirrambeena resort for the special conference rate and you can stay on after at that rate how's that. Come on up and be a part of this special occasion.

A welcome dinner not to be missed on Friday night the 27th of may at Darwin's famous Trailer Boat Club in Fannie Bay overlooking Darwin Harbour.

Saturdays AGM, , papers and then some special presentations in the afternoon or a special look around Darwin let by members of Darwin Amateur Radio club. The locals, followed by a great conference dinner in the treetops restaurant with special guests.

Sunday bring your togs for a trip to Litchfield national park, a swim in the creek, no crocs, a peer at the magnetic anthills, then a BBQ lunch and a swim at Wangi falls, what a great way to spend a Sunday and then follow that with a trip to Darwin's Mindil Sunday markets for tea as guests of the Darwin Amateur radio club.

It will be a great weekend having fun with friends.

Register at www.wia.org.au and Book your airfares and your rooms now.

Time is running out FAST.

This has been Spud on behalf of DARC and the WIA

SILENT KEY

VK5ZQ Murray Burford

Murray's wife, Pam, has advised VK5NU that Murray is now a silent key.

He passed away 2am Saturday, 16th April, 2011 aged 79 years.

Murray had been ill with cancer for quite some time.

Murray contributed in a number of ways to the effective functioning of the now superseded VK5/8 Division of the WIA. In particular, his long-time role in conducting the Division's classes for intending amateurs was much appreciated and was a major factor in the decision some years ago to grant Murray Life Membership of the WIA.

At the 2006 WIA AGM Murray was awarded a President's Commendation recognising his commitment and professionalism as the producer and presenter of the Sunday morning Broadcast heard in VK5 and VK8.

Murray provided this service over a period of about fifteen years, up until the introduction of the WIA National News broadcast which substantially replaced locally prepared national sessions. Murray

delivered these weekly broadcasts with very few personal interruptions except for breaks of about three weeks over the Christmas to mid-January period each year, and a very occasional holiday, even soldiering on while receiving treatment during a period of poor health.

Murray's program material was obtained from a wide variety of sources. They were thought provoking and created comments. Murray's programs were always carefully thought out and well prepared and gave pleasure to all.

Silent Key VK5ZQ Murray Burford.

INTERNATIONAL NEWS With thanks to RSGB, Southgate AR Club, the ARRL, Amateur Radio Newsline, NZART and the WW sources of the WIA.

Community Radio helps rebuild New Brighton Christchurch [NZ] after February's Earthquake

Wellington based Radio Heritage Foundation had the idea of bringing a mobile radio station to support the eastern suburbs of Christchurch.

In less than ten days, a licence was granted and Southland broadcaster Chris Diack had moved a mobile radio studio into the main street of the seaside suburb of New Brighton and Radio New Brighton was on the air on 102.1 FM.

Radio New Brighton has become an integral part of the eastern suburbs recovery and rebuilding process, with locals calling in to the studio to chat about lost pets, hot shower facilities, stores reopening, public meetings, children's events and much more.

The Radio Heritage Foundation, holder of the radio licence for 102.1 FM, now wants to see a permanent community radio station, run by locals, established in New Brighton once the current emergency broadcasts end.

The Radio Heritage Foundation is a registered non-profit organization connecting popular culture, nostalgia and radio heritage and its global website is www.radioheritage.net

Another of its 'Helping Rebuild Christchurch' projects involves restoring the original 3ZB radio studio and transmitter building in New Brighton in time for its 75th anniversary in 2012.

4 G

The European Commission has ruled member states open two radio frequency bands to the newest generation of mobile devices to enable faster Internet use on the move.

EU member states must implement the new rule to allow 4th generation mobile devices access to 900 and 1,800 MHz radio frequencies by the end of the year.

ALLO ALLO

The number of prisoners testing positive in random drug tests is at an all-time low, says New Zealand's Corrections Minister Judith Collins.

"New laws targeting drugs and contraband, cell phone jamming at all New Zealand prisons and increased vigilance by Corrections staff have made it much harder to get drugs into their prisons.

The Corrections Amendment Act authorises the Department to electronically detect, monitor and JAM radio communications in and out of prisoners and allowed for the monitoring of prisoners' phone calls.

SARL SAYS NEW SOUTH AFRICAN HAM RADIO REGULATIONS HAVE ERRORS

The new South African radio regulations that were published on March 31st and came into effect on April 1st are causing concern to that nation's ham radio community.

This is because a number of mistakes have crept in, which telecommunications regulator I-C-A-S-A is reportedly working on to rectify as soon as possible.

According to the South African Radio League, the problem is with the new regulation for the Class B or Zed-U license is incorrect.

This is because the word "under" was left out before the words 20 years. This leads to a situation where if you are over 20 years of age you cannot apply for a class B license.

If you have a class B qualification you will be able to keep a Zed-U license until you reach 25, when the license is automatically cancelled.

LOST

Alexander, UY0LL, says last month the Ukrainian government confirmed new rules for radio amateurs, including a significant loss of all or part of 15 FIFTEEN ham bands!

10100-10150kHz

K K K Katie

Never has so much attention been paid by so many to just two.

The April 29 wedding of Britain's Prince William and Kate Middleton will be watched by about 2 billion people worldwide.

These nuptials will draw a crowd in anticipation of drawing an audience. One estimate has 8,000 TV and radio reporters and support staff from around the world in London covering the nuptials.

CNN alone is said to be sending 50 U.S. staffers to complement 75 from its London bureau. Even the Weather Channel is planning some special wedding programming and the BBC will have around 30 TV Cameras INSIDE the Abbey.

And don't forget that special prefix in use from "the mother country" GR.

SPECIAL EVENT STATIONS, DX and BEACON AND NET ADVICE

New SSTV net starting up

Bob VK4DA is sending out the feelers to check on the feasibility in starting up a Slow Scan TV Net, possibly around 2pm to 3pm with pictures exchanged possibly on 10 metres and voice liaison on either of the Townsville voice repeaters.

If you are interested in being part of the net, drop Bob a line letting him know what hardware/software you can throw together, a preference for day and time and frequency for the net. Pass the word around to anyone you think might be interested as well.

Bob reminds us that even Foundation calls can participate in the net in receive only mode yet still comment on the liaison frequency by voice on what they received.

Contact Bob on email vk4da@bigpond.com

TC57A Special Event Station From The Battlefields of Gallipoli

They hope to set up the station between 21-25 April. First activated as TC57ALAY in 2007, the special event-commemorative station for the 57th Regiment Martyrs, is active every year at the end of April as TC57A.

Special emphasis is on contacts made with VK / ZL stations.

QSL via bureau.

A look inside Amateur Radio magazine for May

Featured in a cover story is the unveiling of the commemorative plaque during the formal opening of the WIA offices, and the naming of the building as Andersson House.

WIA President Michael Owen VK3KI explains the purposes of the occasion, before a gathering of the Board and WIA members.

Further to the Board holding its pre-AGM meeting, and among other matters, it decided to introduce a student rate as well as increase the members general annual subscription.

Among the articles are Ash Long VK3SSB, who gives a run down on the Western Victoria JOTA/JOTI weekend, An introduction to stepper motors is detailed by Jim Tregellas VK5JST, while Bill Isdale VK4IS talks about the hotter days entitled, "Murphy's emergency communications".

Ever wondered about the use of Ladder Line, well read the Foundation Corner piece by Geoff Emery VK4ZPP, there is do's and don'ts of the End-fed Zepp antenna use from the trials of Wayne Pickard VK2ACY, and for the tourist comes - "Amateur radio, bush walking, photography and fishing in the central highlands of Tasmania" - as explained by Brian Morgan VK7RR.

Regular columns on Shortwave Listening, AMSAT, ALARA, DXing and the Higher Bands make for a lot more reading in the May edition of Amateur Radio Magazine, a WIA membership service and also available at selected newsagents.

I'm Barry Robinson VK3PV and you're listening to VK1WIA.

T.D.M.A. NEXT DEVELOPMENT IN AMATEUR RADIO?

Time division multiple access (TDMA) is a channel access method for shared medium networks. It allows several users to share the same frequency channel by dividing the signal into different time slots.

The users transmit in rapid succession, one after the other, each using his own time slot. This allows multiple stations to share the same radio frequency.

The ARRL has filed a Petition for Rulemaking and a Request for Temporary Waiver to authorize the use of single-time-slot Time Division Multiple Access emissions in the amateur bands at and above 50 MHz, wherever multiple-time-slot TDMA is authorized.

The ARRL -- which called its Petition "very narrow in scope" seeks to facilitate the use of and experimentation by radio amateurs with existing narrowband spectrum-efficient digital voice and data technology."

Such technology is now in regular and increasing use in the private land mobile radio services.

wia.org.au Repeater listings

>From time to time we receive requests from people programming their radios to make the repeater listing information available in Excel format, we are pleased to announce that the repeater data can now be downloaded from the Repeater section of the WIA website under the members tab.

Also a reminder about the WIA email address service. The WIA though it's email server allows you to establish "yourcallsign@wia.org.au" with all emails sent to this address automatically forwarded to either your home or work email account.

This provides YOU with ONE consistent email address. And should you ever change ISP, then having a WIA address means your friends and colleagues will still be able to email you without the need for individually providing them with your new address. All YOU need to do is to simply advise us of your new address, through form on our website and we do the rest. It couldn't be easier !! A further benefit of having a WIA address, is in receiving informative Amateur Radio news as it breaks, sent directly to YOUR inbox..

Only one GlobalSET this year

IARU Region 1 website, shows Greg Mossop, G0DUB, the IARU Region 1 Emergency Comms Co-Ordinator saying:

"Unfortunately there will only be one GlobalSET this year which will be on 12th Nov1 1100-1500 local time.

This is due to work pressures on the organiser of the SET which have limited the time to prepare reports from earlier events and properly organise activities for the next SET which should have occurred in May.

The Emergency Communications Coordinators for Regions 2 and 3 have been consulted on the cancellation of the May event and have not made any objections.

Please send any comments to the Region 1 Emergency Communications Co-Ordinator The decision to cancel the May GlobalSET is regretted but is felt to be in the best interests of the event.

(Southgate and Jim Linton VK3PC, Chairman, IARU Region 3 Disaster Communications Committee.)

==> ARES® BRIEFS

By Friday, March 25, Japan Amateur Radio League (JARL) HQ stations had completed disaster relief communications on the 7 MHz band for the catastrophic northeastern Japan earthquake and tsunami of March 11. The JARL thanked radio amateurs for their cooperation in keeping 7.030 MHz clear for the relief communications effort. [March 28, 2011, statement, JARL]. A report can be found here <http://www.arrl.org/news/radio-amateurs-in-japan-still-providing-communications-support>.

Amateur Radio Emergency Communications Enhancement Bills

Of the two versions of the Amateur Radio Emergency Communications Enhancement Act of 2011, H.R. 81 and S. 191, the latter is expected to move through the Senate before H.R. 81 is taken up by the House. Quiet efforts are underway to smooth the path of the legislation through the committees of jurisdiction. [ARRL Executive Committee, March 19, 2011]. Current information on both measures, and on HR 607 - The Broadband for First Responders Act of 2011, which poses a threat to our 70-cm band, can be found here <http://www.arrl.org/current-legislation>. [Editor's note: Although I have not used it extensively at this point, I have found GovTrack.us <http://www.govtrack.us/> to be an easy-to-use site

for tracking congressional bills, events, individual members of
Congress, and so forth. Although not vetted by myself nor ARRL, readers
might want to try it, too, and please let me know of your experience.]

==> ARES® DIGEST

Wicked Tornadoes Rip Up the South; SKYWARN, ARES Respond

Devastating tornadoes swept through the southern portion of the country
over the course of the last few days, and after-action reports so far
are sketchy, but your editor reached a few key ARES® officials for some
early indications of responses. ARES® and SKYWARN were activated in
Atoka, Oklahoma and other areas of the state, especially the northeast
and southeast, for the tornado emergencies, according to Oklahoma SEC
Mark Conklin, N7XYO. Oklahoma ARRL Public Information Coordinator Lloyd
Colston, KC5FM, reported that last Friday was a very busy day for the
state, as it faced wildfire emergencies in the west and the tornadoes
in the southeast. Both SKYWARN and ARES® were involved, said Colston:
"These two groups of volunteers are married together for these types of
situations. They work extremely well."

Alabama SM David Drummond, W4MD, said that many areas in western
Alabama were activated, particularly in Sumter, Tuscaloosa and Greene
counties, where tornadoes were on the ground. Numerous ARES® nets
across the state were convened in support of these areas. SKYWARN
spotters reported ground truths back to the National Weather Service
offices in Birmingham via multiple modes, including D-STAR. Damage
assessments were also provided to the Red Cross at Tuscaloosa, and the
State EMA at Clanton. SEC Greg Gross, K4GR, called the Alabama ARES
State Net on 3965 kHz, which was in session for more than six hours.
Activity reports are still coming into the Section Manager and a more
comprehensive report is pending.

In North Carolina, SM Bill Morine, N2COP, said "storms resulted in the most lives lost in the state due to a natural disaster since 1984 with 23 confirmed dead. Because devastation was highly localized due to the narrow swath of many of the tornadoes, there were few communications outages. Nevertheless, SKYWARN was active, and ARES® operators were on standby for much of the weekend."

>From Tom Brown, N4TAB, North Carolina SEC: "Triad SKYWARN (Winston-Salem, Greensboro, High Point) activated under the Raleigh NWS, reporting events as the storm line developed, intensified and moved east. As it cleared their jurisdiction, ARES® Triad operators provided reports into Central Carolina SKYWARN about conditions on the back side of the storm line. John Hamilton, NC4JH, is the Triad SKYWARN EC.

"Central Carolina SKYWARN also activated under Raleigh NWS. It was very busy for many hours with rotating staff of at least two full-time operators on the air taking reports for the NWS and picking up the nets as reports were passed to the NWS. When the NWS office was evacuated to safe quarters, the SKYWARN operators moved with the NWS staff and continued their activities without interruption. That was an absolutely exemplary example of "how to do it right." Virginia Enzor, NC4VA, is the Central Carolina SKYWARN EC.

"Wilson County ARES® activated under Wilson County EM for about five hours, handling damage reports. George Diering, W3GJD, is the Wilson County EC.

"SEC Tom Brown, N4TAB, logged into and monitored the State Emergency Management WebEOC system for 20+ hours, maintaining situational awareness (SA). Most state ARES jurisdictions also maintained SA for the duration of the events. We had offers of boots-on-the-ground support from across the state and from surrounding states, from both ARES® and MARS."

The Newport, North Carolina, NWS SKYWARN operators in the northeastern part of the state, headed by SKYWARN EC John Hopkins, KJ4EJH, had two busy net controls, Pat Gorman, KE4WZY, and Tom Young, KF4VOL. Bertie County, a rural county, was hard hit but served well by the Newport NWS group.

In Virgina, Section Manager Carl Clements, W4CAC, reported that SKYWARN nets were activated throughout the state, sending reports to NWS offices, including the Wakefield NWS facility.

See also the above stories on Red Cross and Salvation Army involvement. They are both ARRL partners pursuant to formal and longstanding memorandums of understanding (MOU).

Western PA Tornado Response

March 30, 2011 -- Western Pennsylvania hams responded to a tornado emergency. At approximately 4:30 on the afternoon of Wednesday, March 23, severe thunderstorms started to roll into Westmoreland County, Pennsylvania, producing golf ball-sized hail and heavy winds. Members of the Westmoreland County Public Service/ARES® group were involved. Learn More <http://www.arrl.org/news/western-pennsylvania-hams-respond-as-tornado-sweeps-through-area>. -- ARRL Letter

Southern Cal Hospital Support Hams Fill In Communications Gap

March 25, 2011 - Hospital Disaster Support Communications System (HDSCS <http://www.hdscs.org/>) amateurs provided backup communications when phones failed at a southern California hospital. When nurses and other caregivers picked up their phones at Children's Hospital of Orange County (CHOC <http://www.choc.org/>) in California in the early morning on March 21, there was no dial tone. A power surge caused the central processor in the hospital's phone switch to fail. Following established procedures, the Lead Operator at the CHOC switchboard immediately used an off-switch tie-line to reach April Moell, WA6OPS, head of this ARES® group that specializes in helping hospitals when their communications fail. More here <http://www.arrl.org/news/hams-help-when-phones-fail-at-southern-california-hospital>.

Just 15 days later, HDSCS was activated again to another Orange County hospital. A group pager alert at 10:28 AM on April 5 brought hams to Saddleback Hospital in Laguna Hills after a digital equipment failure caused the inbound and outbound trunk lines to become inoperative. Again, the phone number of April Moell, WA6OPS was given to Orange County Communications agency so that ambulance companies and other hospitals could contact Saddleback Hospital via HDSCS. The outage lasted until 6 PM that day.

Of the 115 times that HDSCS has been activated for communications problems in Orange County hospitals, this was the 85th time that it was due to switchgear or cable failure. According to WA6OPS, who is an ARES DEC, "Many hams around the state and the country ask me why Orange County has so many phone system failures in hospitals. They seem to think that this doesn't happen in their own areas, but they're mistaken. We know from our own experience that phone equipment isn't 100% reliable. I know from talking to lots of hospital disaster planners around the country that they have plenty of failures, too. But far too often, hams think that Amateur Radio can only help in 'all else fails' disasters such as hurricanes, tornados and floods. Most ham emergency groups don't prepare and plan to help in these single-hospital incidents. They don't set up 24-hour alerting plans for the hospitals to use to contact them quickly when phones go down, so they never get the call."

Moell continues, "When a nurse on a hospital unit has an urgent need to contact a patient's physician at his office or home but the phones are down because switchgear has failed, that's just as severe an emergency

as it would be in a widespread natural disaster. Orange County hospitals know and appreciate us because we come when they call and we connect their staff members to the outside, no matter the cause of the communications outage. We urge other ARES groups around the country to adopt our hospital support model, which includes robust alerting plans for each hospital, regular meetings with the hospital disaster planners, and ready-to-respond members who are trained in the special terminology and communications needs of medical facilities." More information about HDSCS <http://www.hdscs.org/> and its successful model for hospital communications support is at the group's Web site. -- Joe Moell, K0OV, Fullerton, California

Bergen, New Jersey Members Active in Flooding Emergency

Hams from the Bergen Amateur Radio Association (BARA) provided communications for the Red Cross of Northern New Jersey. The five day response was in support of relief efforts in the wake of severe flooding that occurred in the area in early March. BARA hams leading the effort were Tony Izzo, K2AMI; Phil Barber, WA2LXE; and Bob Javits, WB2AIU.

Operating from a permanent station installed by BARA at Red Cross Disaster Relief headquarters in Ridgewood, New Jersey, the hams maintained contact with the Disaster Assessment Teams covering the flooded areas and relayed their reports to various departments as needed. Communications operations involved the use of the repeater of the 10-70 Repeater Association as it provided excellent coverage of the

flood area. According to Rob Pavlick, Response Manager for the Red Cross, "The continuing support from BARA for our efforts here in Northern New Jersey has resulted in a more timely flow of information, and data collection." Red Cross Disaster Assessment volunteers who are also hams provided the input from the field.

West Texas Wildfires Response

On April 9 at 4:15 PM, ARRL West Texas District 5 EC Bob Ward, WA5ROE, received a call from Jeff Davis County (Texas) Fire Marshal Stewart Billingsley, N5HXZ. Billingsley informed Ward that a fire had begun in the West Texas town of Marfa and was rapidly approaching Fort Davis, 22 miles to the northeast.

"Stewart asked me to call the National Weather Service to get it on the alert system, as well as the AM and FM radio stations in Alpine," Ward told the ARRL. "He wanted it broadcast over the radio stations that he needed the Mano Prieto and Fort Davis Estates sub-divisions evacuated. People in the area know that when an emergency happens, they need to tune into these stations for the latest information. This was the Rock House Fire. At the same time, another fire, the Roper Fire, had started on the eastern edge of Alpine." More here <http://www.arrl.org/news/hams-provide-communications-support-during-west-texas-wildfires> .

- ARRL Letter

==> EMCOMMWEST 2011 NEXT MONTH IN RENO

The ARRL Specialty Event convention EmCommWest is coming to Reno, Nevada on May 6, 7, and 8, 2011. This is a premier event that specifically focuses on Emergency Radio. This year's keynote ARRL speaker will be Mike Corey, W5MPC, Emergency Response and Planning Manager from ARRL HQ. Corey will share the latest in the world of emergency communications and what we can look forward to having just passed the 75th Anniversary of ARES®. The Saturday night banquet speaker will be honored, special guest former ARRL President Jim Haynie, W5JBP, who served three terms as League president, and made major contributions to Amateur Radio, including "The Big Project" to attract young people into the hobby. His key support for emergency communications is well-known. More event info here <http://www.emcommwest.org/>. -- ARRL Sacramento Valley Section News, March 2011

==> SURE-FIRE WAYS TO KILL YOUR ARES® PROGRAM

Last month, I offered what I believe are ten ways to grow an ARES® or EMCOMM program. This month, I'll offer a list of ways to do just the opposite. Most are related to leadership.

Politics - If you've been around a while, you've experienced the evil of Amateur Radio politics, often made worse because we're a passionate bunch and nobody really has an important (job, money, family) stake in the debate. ARES® is different. We have a public safety mission and people count on us. We do not have time for politics.

A commitment to community service and mission can fill the vacuum politics would otherwise be drawn into. Before you "start something" or play someone else's games, ask yourself, "Is this really worth it?" Sometimes you'll say "yes," but "no" is often a wiser, long-term decision. The best way to avoid politics is honesty and obvious goodwill.

Failure to communicate and delegate - This is absolutely key. One of the best ways to keep volunteers - arguably the only way - is to give the ones who want something to do a task they can do and want to do. You need to match the task to the volunteer and be careful to match the task and deadline to the volunteer's reliability. Getting others involved is the key to your group's success. Train these people to become your leaders.

Obviously, you need people to know what your plans are, what you need, and what progress is being made. A weekly e-mail is a good way to accomplish this. Monthly is probably too infrequent. If you can't fill at least a short weekly newsletter, you probably are not doing enough to be an active group.

Not loving your volunteers - Hot news: As a leader, you can't accomplish very much working alone. Your job is creating excellent volunteer experiences and keeping your volunteers involved, fulfilled, and happy. If you don't really love your volunteers, not merely respect or like them, but love them, you will fail. Think of your volunteers as an extended family and get them to think of each other the same way. Be the example.

Forgetting to say "Thanks!" - A wise manager once told me that there is really only one thing you can tell a volunteer - "Thanks" - because you can't force them to do anything. Remind your people constantly that their effort are (1) important, (2) make a difference and (3) are appreciated. You need to concentrate on all three.

Failure to apologize - As a leader, you're going to make mistakes. Decisions you make are sometimes going to make people unhappy. You must always weigh the gains made by doing something against the people it will upset and that potential loss. I generally find myself "doing something" while remaining sensitive to the people those actions might upset.

If you follow the adage, "it's easier to apologize than to get permission" then apologies really, really matter. And, you must be successful in the task for this strategy to work. Yet you still risk making permanent enemies.

In general: Apologize - sincerely - early, often, and sometimes even when you might not be wrong. But you must be sincere or this will totally backfire.

Misunderstanding served agencies - This is a topic for an ARRL Handbook-sized essay, but if you don't understand what your agencies need and want, how they function, and what they value, you will not have a good relationship with them. That could be your undoing. Work with multiple agencies to reduce the potential downside.

Not investing in growth - This is absolutely key. I don't care how you do it, but you need to constantly work to sign up and train new members. I am a big fan of ARES&#65533; groups and Community Emergency Response Teams <http://www.citizencorps.gov/cert/> (CERT) working together. See my article in May, 2011 QST for more on that. Do what works in your area, but you may be better off creating new hams than re-recruiting the burnout cases.

Last month, I recommended one-day HamCram licensing events as a growth tool. Not everyone agreed, so here <http://bit.ly/fEohMl> is my response to a HamCram critic. How to do a HamCram? Click here <http://n5fdl.com/hamcram>.

Not investing in relationships - The primary job of ARES&#65533; leaders isn't radio, it's relationships -- with volunteers, agencies, one another, allied groups, etc. If you put your time and effort into building relationships among people, your communications capabilities will

improve by multiples.

Personal burnout - Leaders need to look after one another as well as themselves. If you need help, support, or cheering up, ask for it, especially from the leaders you have created. You can always drop me a note, too.

I'd like to tell you I am an expert at all these things, but it would be a lie. Still, these are what I try to focus on: Excellent volunteer and program management. Members make the ARES® world go 'round. - David Coursey, N5FDL, Contributing Editor (visit his blog <http://www.n5fdl.com/>)

==> SETTING UP A TWITTER ALERT SYSTEM

One tool that might be useful for some groups is Twitter <http://www.twitter.com/> for rapidly sending out club, group or ARES® alerts or announcements. Anyone who has a cell phone that can send and receive text messages can easily enable these alerts to show up on their phones; no smart phone or complicated setup required!

Setting up a new Twitter account takes just a few minutes, and for your members to sign up to receive updates is even faster. To set up a new account visit http://www.twitter.com <http://www.twitter.com/> and look for the "Sign Up" button on the right side. For the name, put the name of your ARES® group or club. For the username, think carefully about this one as it will be in your URL address, and you won't want to change it later. For the Santa Cruz, California ARES® group I chose a naming scheme of "ares_xcz" with the plan that if multiple ARES® groups were listed they would be shown together alphabetically. Then I used a three letter county abbreviation. I created the main account, <http://twitter.com/ares_xcz> for official ARES® activations and alerts.

Next, choose a password. I would create a strong password that you might share with just a few people in your group so they could post the alert if you were unavailable. Board members or the club president would be some examples of who you might grant posting access to.

Next, put in an e-mail address (your own, or a club email address) that gets monitored regularly. Answer the other simple questions asked and click the "Create my account" button. You can then customize your page if you choose, add your organization logo, and write a description of the group with a link to your website for more information.

To post a "Tweet" or an alert to your group, simply type the text in the "What's happening?" box at the top and hit the "Tweet" button. Remember, Tweets are limited to 140 characters so they are easy to read on cellular phones via SMS, so keep it short. Your tweet is available to anyone who looks at your Twitter account or uses the search feature. A common method is to post the short alert message with a link to additional information. For our group I also created a second Twitter

account for more general news and non-priority information like meeting reminders and announcements: <http://twitter.com/ares_xcz_news>

Signing Up To Receive Twitter Alerts

For your group members to sign up to receive alerts is easy. From their mobile phone they would simply create a new text message. In the "To" field of the message is where you typically put the cellular phone number of who you want to send the message to, but in this case, Twitter's number is 40404, so place that in the "To" field of the message.

In the message portion, simply write the word "follow" and the name of the Twitter account for your organization. As an example, to follow all alerts for the Santa Cruz California ARES® group, the message would be "follow ares_xcz".

Send that message and Twitter will reply with a few very basic instructions. The next time the organization posts a tweet, your phone will receive a text message within seconds. If you ever want to turn off these updates, simply send a text message of "leave ares_xcz" to 40404 and it will turn the notifications off.

There are a lot of other features of Twitter, and through the Web site you can read the tweets online, search past tweets, locate additional people, ham radio operators or organizations to follow, and more. If you want to get started to see how some Amateur Radio operators are using Twitter, check out http://hamtwits.com <http://hamtwits.com/>. - Dan Dawson, KI6ESH [Dawson operates primarily on VHF/UHF voice around Santa Cruz, California and also occasionally operates APRS while mobile or flying private aircraft. He can be reached with questions or corrections to this article on Twitter @KI6ESH or via http://ki6esh.com <http://ki6esh.com/>.

[editor's note: ARRL HQ is also on Twitter! We have a Twitter page set up for EmComm related posts. You can find us at www.twitter.com/arrl_emcomm - Mike, W5MPC]

==> LETTERS

In re several points made by correspondents in the last issue, on the subject of batteries for HTs, the number one thing we're told is to get an AA battery case since AA batteries are available anywhere. You're more likely to find AA batteries than a charger outlet for your NiMH battery pack in an emergency, power-out situation. But the truth is: There are times when you can get AA batteries but no charger outlet, times when you can get a recharge but not AA batteries, times when you can get either, and times when you can get neither.

Meanwhile, if AAA batteries are going to be in less demand in this scenario, then an adapter to make AAAs fit your AA battery case would be a good idea. There are some commercially available adapters, but an inexpensive approach that you could even do in the field is available

here
<http://www.instructables.com/id/Make-a-AAA-battery-work-as-a-AA-battery/>.

On the subject of commodity communication infrastructure, you can't count on being able to place a cell phone call in an emergency situation. SMS can still work, though. It's hardly the most efficient medium for emergency communication, but I can understand why it still works: SMS uses what was initially unused bits in the handshake protocol between cell phones and the network, so even if the network is flooded to capacity with voice and data traffic, as long as the phones can tell the network that they exist, they can send a text message. This suggests that SMS may not be an altogether bad way to make initial contact with your ARES® team.

On transportation, dogma seems to limit it to the emcomm truck, van or trailer. Bicycles don't seem to be part of our plans, though, not even for getting to fixed locations. I've gone bicycle mobile for parades, and I've also seen bicycle mobile use in marathon event communications systems. Just a thought. - Chris Bohn, N0RZT/4, Navarre, Florida
[editor's note: Here in Florida, we see many public safety officials riding dirt bikeswith knobby tires, with hand-held radios on their belts. Bicycle use could be good for ARES® operators, too - plus, it's good exercise! - K1CE]

Easy-To-Use HTs

We need a national dialogue on what constitutes an easily usable hand-held radio that can be handed to anyone in an emergency and operated on the spot. All of the HTs that I own require that the operator have the manual close by in order to be able to program them. They are all different.

In a major disaster event, granted, many hams who have hand-helds know how to use them and will be instantly successful in communicating. But if you think about asking many other hams to get out in the field and help, they may not know how to program their units, or borrowed units, beyond the basics.

The KISS principle dictates that a simple hand-held for quick-study and emergency use be marketed. The simplest HT I can remember using was the Kenwood TH-22 radio with thumbwheel switches on the top (hard to knock off frequency) and dip switches on the front to choose the PL tone. Simple switches on the back selected offset and power levels. If an operator was handed one, he/she would quickly be able to get it into operation on frequency almost immediately.

I think you should start a dialogue in your newsletter about what we need, and what models are already available that are simple to use. - Bob Skaggs, KB5RX <http://www.qrz.com/db/kb5rx>, Santa Fe, New Mexico
[editor's note: I reviewed the ICOM IC-V80 in the Product Review column in March 2011 QST - it seemed to fill the bill as prescribed by Skaggs. - K1CE]

==> NEW TO ARES&#65533;?

Here are some basic sources of good ARES&#65533; information:

The ARRL Public Service Communications Manual
<http://www.arrl.org/public-service-communications-manual> (PSCM) is
the bible for ARES and NTS operators.

For field operators, check out the ARES Field Resources Manual
<http://www.arrl.org/files/file/ARESFieldResourcesManual.pdf>. It is a
quick trainer and field resource guide for the emergency communicator.

Find local ARES activity and organizations in your area here
<http://www.arrl.org/sections>.

==> THE 2011 NATIONAL HURRICANE CONFERENCE

As this E-Letter is getting ready to head out the virtual door Amateur
Radio is being well represented at the 2011 National Hurricane
Conference in Atlanta, Georgia.

The ARRL is being represented by Southeast Division Director Greg
Sarratt, W4OZK, and ARRL HQ is being represented by Emergency
Preparedness Assistant Ken Bailey, K1FUG. There are presentations
planned on a variety of topics of interest to Amateur Radio.

Stay tuned for a full report in next month's ARES E-Letter.

==> K1CE FOR A FINAL

I dusted off an older editorial I wrote for QST a number of years ago,
and thought I would replay it now as it is still relevant, perhaps even
more so today. It also appears in the ARRL's Public Service
Communications Manual:

Meeting the communications needs of served agencies is a challenging,
and often daunting proposition in today's complex post-9/11
disaster/emergency relief arena. With the proliferation of emergency
relief organizations, increasingly sophisticated needs, all competing
for that scarce resource -- the volunteer -- coupled with the emergence
of other non-ARES&#65533; amateur providers, it's enough to make an operator's
head spin. As more of the population moves to disaster-prone areas, and
less government funding is available, more pressure is consequently
placed on agencies to appropriately use the volunteer sector for
support of their missions in disaster mitigation.

The League's formal relationships with served agencies are vitally
important and valuable to radio amateurs. They provide us with the
opportunity to contribute meaningfully to the relief of suffering among
our fellow human beings. Another substantial benefit not to be
overlooked is that the relationships lend legitimacy and credibility
for Amateur Radio's public service capability, and that is important
when it comes time to defend our frequencies and privileges before the
FCC and Congress. So, ARRL's relationships with the emergency/disaster
relief world need to be nurtured.

What to do? First, it is imperative that a detailed local operational plan be developed with agency managers in the jurisdiction that set forth precisely what each organization's expectations are during a disaster operation. ARES® and agency officials must work jointly to establish protocols for mutual trust and respect. Make sure they know who the principle ARES® official is in the jurisdiction. All matters involving recruitment and utilization of ARES® volunteers are directed by him/her, in response to the needs assessed by the agency involved.

Make sure ARES® counterparts in these agencies are aware of ARES® policies, capabilities and perhaps most importantly, resource limitations. Let them know that ARES® may have other obligations to fulfill with other agencies, too. Technical issues involving message format, security of message transmission, disaster welfare inquiry policies and others should be reviewed and expounded upon in the detailed local operations plans.

Another challenge ARES® faces is the number of agencies that demand communications support during a disaster. A local ARES® unit only has so much to go around, and it can't possibly meet every agency's needs. While the League maintains several formal Memoranda of Understanding (MOU) with disaster and emergency response agencies including the Federal Emergency Management Agency (FEMA), National Weather Service, Salvation Army, Red Cross, National Communications System and Associated Public- Safety Communications Officials - International. These documents merely set forth a framework for possible cooperation at the local level. While they are designed to encourage mutual recognition, cooperation and coordination, they should not be interpreted as to commit, obligate or mandate in any way that an ARES® unit must serve a particular agency, or meet all of its needs, in a jurisdiction. MOUs are "door openers," to help you get your foot in the door. It's up to you to decide whether or not to pursue a local operational plan with an agency, a decision that will be based on a number of factors including the local needs of the agency and the resources you have available to support those needs, given that you may have other prioritized commitments as well.

To address this, sit down with your fellow ARES® members, EC and SEC, and determine what agencies are active in your area, evaluate each of their needs, and which ones you are capable of meeting. Then prioritize these agencies and their needs. After you're all in agreement, sit down with your counterparts in each of the agencies and execute local, detailed operational plans and agreements in light of your priority list based on the above.

Given the above, however, you should also be working for growth in your ARES® program, making it a stronger, more valuable resource and hence able to meet more of the agencies' local needs. A stronger ARES® means a better ability to serve your communities in times of need and a greater sense of pride for Amateur Radio by both amateurs and the public. That's good for all of us. - Se you next month! 73, Rick K1CE

ARRL - Your One-Stop Resource for Amateur Radio News and Information

Join or Renew Today! <http://www.arrl.org/join> ARRL membership includes QST <http://www.arrl.org/qst>, Amateur Radio's most popular and informative journal, delivered to your mailbox each month.

==> + FCC NEWS: ARRL SCORES PARTIAL VICTORY IN RECONROBOTICS PROCEEDING

The FCC has given radio amateurs a partial victory in response to
the ARRL's challenge, in a Petition for Reconsideration, of a rules
waiver that permits the certification and licensing of the Recon Scout
-- a remote-controlled, maneuverable surveillance robot operating in
the 430-448 MHz band. The device is marketed to public safety agencies
and certain security personnel by ReconRobotics Inc.

In an Order on Reconsideration released on April 15, the FCC granted
the ARRL's request for changes in the labeling and instruction manual
requirements to ensure that users of the device are aware of its
limitations, with regard to interference. Noting that no applications
```

for individual licenses to operate the Recon Scout had been granted, the FCC's Wireless Telecommunications Bureau, the Public Safety and Homeland Security Bureau, and the Office of Engineering and Technology deferred to the Commission's Enforcement Bureau with regard to complaints that ReconRobotics has been marketing uncertified devices and that the devices have been operating without authorization. Read more here <http://www.arrl.org/news/arrl-scores-partial-victory-in-reconrobotics-proceeding>.

==> + CALIFORNIA SUPREME COURT DECLINES TO HEAR ANTENNA ZONING CASE

The California Supreme Court refused to hear the antenna zoning case brought forth by Alex Zubarau, WB6X, of Palmdale, California -- with the assistance of his ARRL Volunteer Counsel Len Shaffer, WA6QHD -- after receiving a mixed decision by the California Court of Appeals earlier this year. The Supreme Court -- California's highest court -- handed down their decision on April 20. Read more here <http://www.arrl.org/news/california-supreme-court-declines-to-hear-antenna-zoning-case>.

==> SPECTRUM DEFENSE: "ETERNAL VIGILANCE" IS THE PRICE WE PAY FOR OUR SPECTRUM

The first edition for 2011 of Spectrum Defense Matters <http://www.arrl.org/spectrum-defense-matters-newsletter> -- a newsletter aimed at keeping ARRL members updated on issues related to the protection of Amateur Radio frequencies -- was recently released on the ARRL website. This newsletter covers both domestic and international topics related to the Amateur Radio spectrum. As ARRL President Kay Craigie, N3KN, said in a recent ARRL Legislative Update newsletter, "Eternal vigilance is the price of spectrum." Sometimes the threats are minimal; sometimes their impact can be devastating if not addressed. Regardless of the degree of severity, any threat to our Amateur Radio spectrum must be a top priority of the ARRL. Read more here <http://www.arrl.org/news/eternal-vigilance-is-the-price-we-pay-for-our-spectrum>.

==> + ON THE AIR: FIND AN ARRL FIELD DAY STATION NEAR YOU

First introduced in 2008, the ARRL's Field Day Station Locator Service <http://www.arrl.org/field-day-locator> has proved a popular addition to the Field Day toolbox. This service -- an interactive map that helps amateurs or those interested in Amateur Radio find a Field Day <http://www.arrl.org/field-day> site near them -- is free to clubs or individuals who will be operating public Field Day stations. Stations can also be listed by state or province. So far, hams in all 50 states and Puerto Rico have listed Field Day sites on the Field Day Locator. If your group would like to be a part of the Station Locator Service, it's easy to get started -- just go to the Field Day Station Locator website <http://www.arrl.org/field-day-locator> and follow the

instructions. ARRL Field Day is the most popular on-the-air operating event in Amateur Radio. On June 25-26, join tens of thousands of Amateur Radio operators as they gather for a public demonstration of the Amateur Radio Service.

==> ON THE AIR: TRANSATLANTIC AMATEUR RADIO BALLOON LAUNCH

The Project Blue Horizon 5 high-altitude transatlantic balloon is scheduled for launch, weather permitting, on Wednesday, April 27, from Oswego, New York. The Project Blue Horizon team is attempting to break current Amateur Radio high-altitude balloon records for distance (3361.81 miles) and duration (49 hours, 45 minutes). The payload will be carried beneath a 54,000 cubic foot capacity helium-filled balloon cruising between 85,000 and 100,000 feet. Read more here <http://www.arrl.org/news/transatlantic-amateur-radio-balloon-flight-postponed>.

==> + ARRL WEST GULF DIVISION TO HOST WEBINAR ON ANTENNA ZONING

Periodically, ARRL Divisions will host a "webinar" -- an interactive Web-based seminar, designed to facilitate communication between a small number of presenters and a large remote audience using the Internet -- for interested amateurs. On Wednesday, April 27 at 9 PM (EDT), ARRL West Gulf Division Director David Woolweaver, K5RAV -- along with ARRL General Counsel Chris Imlay, W3KD, and noted antenna zoning lawyer Fred Hopengarten, K1VR -- will present Antenna Ordinances, You and the ARRL. Read more here <http://www.arrl.org/news/arrl-west-gulf-division-to-host-webinar-on-antenna-zoning>.

==> + HQ NEWS: ARRL HQ TO CLOSE IN OBSERVANCE OF GOOD FRIDAY

ARRL Headquarters will be closed in observance of Good Friday on Friday, April 22. There will be no W1AW bulletin or code practice transmissions that day. ARRL Headquarters will reopen Monday, April 25 at 8 AM Eastern Daylight Time. We wish everyone a safe and enjoyable holiday weekend.

==> + POSTAGE PRICE INCREASE NOW IN EFFECT

On Sunday, April 17, the US Postal Service increased the price to mail certain items within the US and abroad, affecting the price of sending a QSL card within the US. While the cost to mail a 1 ounce piece of first class mail within the US stays at 44 cents, the cost of mailing a postcard increased one penny, from 28 cents to 29 cents. Click here <http://www.usps.com/prices/welcome.htm?from=home_lgpromo&page=NewMailingPricesApril2011>
for more information on all the postal increases.

==> VOTING NOW OPEN FOR MAY QST COVER PLAQUE AWARD

Now that you've thumbed through and read the May 2011 issue of QST cover-to-cover, we're sure that an article -- or three -- sticks in your mind. So go ahead and cast your vote <http://www.arrl.org/cover-plaque-poll> for your favorite article in the issue. The article with the most votes will receive the QST Cover Plaque Award.

- Supporting Portable Antennas Without Guy Wires by Dave Fisher, KG0D/7
- A Transmitter for Fox Hunting by Mark Spencer, WA8SME
- An Emergency Backup Solar Power System by Jim Talens, N3JT
- A Junk Box Power Line Frequency Monitor by Arthur Glazar, W2NN
- 3B8EME -- Moonbounce from the Indian Ocean by Eltje Veen, PA3CEE, Johan Meezen, PE9DX, and Rene Hasper, PE1L
- Youth DX Adventure #1 by Don DuBon, N6JRL, and Dave Kalter, KB8OCP

The QST Cover Plaque award -- given to the author or authors of the best article in each issue -- is determined by a vote of ARRL members on the QST Cover Plaque Poll Web page <http://www.arrl.org/cover-plaque-poll>. Headquarters staff members who write articles are not eligible to receive votes.

==> SOLAR UPDATE

Tad "The Sun came out today" Cook, K7RA, reports: Both the average daily sunspot numbers and solar flux were both higher for the week, with sunspot numbers up more than three points to 93.1 and the solar flux up by 8 points to 117.2. Geomagnetic activity was a bit lower -- with April 20 being the most active day -- after a coronal hole on the Sun spewed a solar wind at high speed. Currently, there are four sunspot groups visible, and we could see a geo-magnetic disturbance today from a slow-moving coronal mass ejection. Look for more information on the ARRL website on Friday, April 22. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad Cookism" is brought to you by John Fogerty's Centerfield <http://en.wikipedia.org/wiki/Centerfield_%28song%29>.

==> ARRL SEEKS BOOK EDITOR

The ARRL is seeking a Book Editor to manage the production of ARRL books and other publications, ensuring that they meet ARRL standards. The successful applicant will be responsible for managing the progress of all book materials through the production process, tracking current book inventory and scheduling reprints or new editions as needed, authoring new books and other materials, and editing and formatting manuscript materials provided by authors to ensure correct grammar, punctuation and style. Applicants must hold an Amateur Radio license, a Bachelor of Arts degree in English, Journalism or equivalent, and 5 to 10 years of experience as a professional newspaper, book or magazine editor, or corporate technical writer. For more information, including a complete job description and application details, please see the Employment Opportunities page

<http://www.arrl.org/employment-opportunities> on the ARRL website.

==> + SILENT KEY: WORLD RADIO LABS FOUNDER LEO MEYERSON, W0GFQ (SK)

Leo Meyerson, W0GFQ, of Omaha, Nebraska, passed away on April 13. He was 100. In 1935, Meyerson, an ARRL Life Member, founded Wholesale Radio Laboratories -- the forerunner to World Radio Labs -- in Council Bluffs, Iowa. For his contributions to Amateur Radio, Meyerson was named the 1997 Ham of the Year at the Dayton Hamvention. Read more here <http://www.arrl.org/news/world-radio-labs-founder-leo-meyerson-w0gfq-sk>.

==> ON THE AIR: DXCC APPROVES TWO TRISTAN DA CUNHA AND GOUGH OPERATIONS
